A pay cap is an arbitrary wage control on one segment of our economy—America's 2 million men and women in the armed service and 1.5 million Federal civil servants, their spouses, and dependents. The administration argues that by artificially capping military and civil service pay, we can set an example for private industry. This argument is unacceptable. In the last year, private sector workers have far outpaced military and civil service workers in wage settlements and pay increases. The Bureau of Labor Statistics "Employment Cost Index" figures for last year indicate that pay increases for all private, nonfarm workers has risen 7.8 percent. Professional and technical workers' salaries in the private sector rose 6.6 percent; sales workers' pay went up 11.8 percent; and industrial and manufacturing employees got an additional 7.8-percent increase.

To say that holding military and Federal pay at 5.5 percent will serve as an example is fallacious. Singling out one group of employees is unfair.

### TAKING POLITICS OUT OF FEDERAL PAY: AND MAKING THE PAY ACT WORK

Under the Comparability Pay Act of 1970, Congress moved to take Federal and military pay increases out of the annual political squabbles between Congress and the President over Federal pay. Pay increases under this act are not cost-of-living increases. They are "catch-up-with-industry" adjustments in Federal salaries, designed to keep military and civil service personnel comparable with workers in private industry.

Each year, the Bureau of Labor Statistics surveys private industry rates of pay for positions comparable to Federal Government positions. The President receives a comparability recommendation from the Civil Service Commission and OMB after consultation with public employee groups. This provision is designed to get these salaries they have coming to them, and to enable the military and civil service to recruit and retain high quality employees.

Mr. Speaker, we have a comparability system established so that these employees can catch up with private industry. We have only an opportunity to accept the counsel of the President's advisers on Federal pay who recommended an 8.4-percent increase, or to substitute his arbitrary pay cap of 5.5 percent.

Now, if the President wants to change the way comparability pay is computed, let him come forward with a plan to alter it. It is unfair, in the meantime, to deny comparability to those who have been promised it.

### REAFFIRMING HOUSE VOTE: AND AVOIDING BIGGER INCREASES IN 1980

When this resolution of disapproval comes up for a vote in the House later this month, we will have an opportunity to reaffirm the position the House took earlier this year in defeating an effort to impose the cap in the first concurrent budget resolution. The House rejected a 5.5-percent pay cap on rollcall No. 280, May 3, 1978, by a vote of 172 to 210.

A pay cap is deceptive since the comparability pay system is a "catch-up" system, an arbitrary 5.5-percent cap at this point will cause an even bigger adjustment next year, with an additional 2.9 percent added to the amount otherwise needed at that time. We are not fooling anybody by delaying comparability pay adjustments—nobody, that is, except the military and Federal employees who have been promised comparability.

## STATEMENT OF SENATOR STENNIS REGARDING PRESIDENT'S VETO OF DOD AUTHORIZATION BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

● Mr. MONTGOMERY. Mr. Speaker, I wish to call to the attention of my colleagues the following statement made today by Senator JOHN C. STENNIS, of Mississippi, regarding the President's veto of the Department of Defense authorization bill on which the House will vote tomorrow:

Senator JOHN C. STENNIS (D-Miss.) today strongly supported efforts by Members of the House of Representatives to override President Carter's veto of the Department of Defense authorization bill. "The crucial vote is in the House since the House must act first

on overriding this veto. If the House votes to override, it will provide an opportunity, as well as momentum for getting a similar vote to override the veto in the Senate," STENNIS said.

"This veto was of the wrong bill, at the wrong time, and under the wrong circumstances. It seems apparent that the veto was based on false facts as they relate to the Defense budget and our military strength," STENNIS commented.

"If this veto is not overridden, a major initiative on building a Navy for the future might be lost," STENNIS said. The bill that was vetoed included a carefully constructed package developed and agreed to by the House and Senate which laid the groundwork for a future fleet of smaller, less costly and lighter aircraft carriers equipped with vertical takeoff aircraft. It also included development funds for several new types of smaller, less costly ships and submarines.

"The Navy cannot have a fleet of smaller, less costly ships in the future if development is not begun now. This bill makes a strong start on that development. Therefore, it goes further than any legislation proposed or enacted to insure a strong naval fleet of this type for the future. Should this veto be sustained this forward move for light carriers, new V/STOL aircraft and other new types of Navy ships would be impaired and possibly stopped," STENNIS said.●

## SENATE ACTION ON VETERANS PREFERENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. ROBERTS) is recognized for 5 minutes.

● Mr. ROBERTS. Mr. Speaker, on Thursday, August 24, the Senate passed S. 2640, the civil service reform bill. It should be noted that the other body not only rejected the administration's proposed plan to terminate veterans' preference for millions of Vietnam veterans, it adopted several amendments offered by the distinguished chairman of the Senate Committee on Veterans' Affairs, the Honorable ALAN CRANSTON, that would substantially strengthen the preference for disabled veterans.

It is important to note the action by the other body since the House will be considering the civil service reform legislation tomorrow.

I would urge my colleagues to read the debate in the CONGRESSIONAL RECORD in reference to the Senate action on the veterans' preference issue. Rather than terminate the preference for millions of Vietnam veterans before having an opportunity to use the benefit, the Senate has confirmed our commitment to Vietnam veterans by keeping the 5-point preference as a lifetime benefit. This is consistent with the Hanley amendment. I hope my colleagues will support the Hanley amendment when it is offered tomorrow. In adopting Mr. HANLEY's amendment, the House will stand with the Senate in rejecting the administration's plan to limit the preference for those who served in Vietnam.

Everyone is aware that the American Legion, AMVETS, the Disabled American Veterans, the Veterans of Foreign Wars and other veterans organizations support the Hanley amendment; however, some administration officials have suggested that the National Association of Concerned Veterans, whose membership is composed mostly of Vietnam veterans, supports the administration's proposal. This organization does not support the proposed change in the current law. So there will be no mistake about this organization's views on this issue, there follows a copy of a letter recently sent to the Honorable JAMES HANLEY explaining the position of the organization:

AUGUST 15, 1978.

Hon. JAMES HANLEY,
*Cannon House Office Building,*
*Washington, D.C.*

DEAR CONGRESSMAN HANLEY: On behalf of the National Association of Concerned Veterans, I request that you make the position of the NACV clear to the members of Congress concerning the "Schroeder Amendment" to the Civil Service Reform Legislation pertaining to Veterans' preference in civil service.

Initially, I should restate the NACV's position that it does not support the veterans' preference provisions of the administration's proposed legislation, and is in fact, vehemently opposed to that portion of the legislation. The reasons for our opposition are outlined in our testimony to the Senate Committee on Governmental Affairs and to the House Committee on the Post Office and Civil Service. The NACV is also opposed to the veterans' preference provisions contained in the "Schroeder Amendment." The specific provisions that we object to are the fifteen year delimiting date and reduction-in-force (RIF) provisions.

The NACV accepts and supports the administration's argument that Vietnam veterans have not had significant access to federal employment. Furthermore, we believe that some preliminary support (albeit inconclusive) exists for the contention that the current veterans' preference law tends to inhibit Vietnam Veterans' access to federal employment. We must conclude, however, that the fifteen year delimiting date provided by the "Schroeder Amendment" will adversely and discriminatorily affect Vietnam veterans. It, in fact, totally contradicts the above-stated administrative arguments which have been used to support it.

Consider the case of a Vietnam veteran discharged in 1968. Accepting the administration's argument that current veterans' preference provisions deny effective access for Vietnam veterans to federal employment, under the "Schroeder Amendment" a Vietnam veteran discharged in 1968 will not have effective veterans' preference until 1980 and will lose it in 1983. This veteran will have a three year delimiting date as opposed to a Vietnam veteran discharged in 1980 who will have a fifteen year delimiting date. Considerably worse off is the Vietnam veteran discharged in 1965 who will have no effective veterans' preference at all.

The RIF provisions of the "Schroeder Amendment" also appear to be an unjust disadvantage to Vietnam veterans. The administration acknowledged "the many difficult and unfair adjustments" endured by Vietnam veterans have suffered prolonged periods of unemployment through no fault of their own. Because of this, we believe Vietnam veterans should receive more protection in RIF's than is offered by the "Schroeder Amendment." We believe that this protection should be in the form of additional years to Vietnam veterans' seniority for RIF purposes.

Additionally, the NACV notes that the administration's rhetoric conspicuously avoids any sort of affirmative action plan for Vietnam veterans. While we acknowledge that the administration supports the Senate's proposal to extend the VRA to nearly all Vietnam veterans until 1981, we must also note the past failure of this program. We attribute this failure to a lack of commitment from this administration and its two predecessors. Without such an affirmative action plan to support one of the alleged purposes of this legislation (greater access to federal employment for Vietnam veterans), we regard the alleged purpose to be a sham. It appears to be another instance of people within the government using Vietnam veterans to achieve their own desired ends.

Mr. Hanley, the NACV is not opposed to government reform. Neither is it entirely satisfied nor entirely dissatisfied with the Veterans' Preference Act of 1944. Moreover, we point out that much of the information that the administration is using to support its case was provided in our previously alluded to testimony. What the NACV does object to is legislation which harms Vietnam veterans, as is the case with the "Schroeder Amendment" and the original Civil Service Reform Legislation proposed by the administration. Perhaps even more importantly, as citizens, we object to any legislation which undermines its alleged purpose and which is supported by only the most piecemeal and conclusory evidence.

Thank you for your attention and cooperation in this matter.

Sincerely yours,

OTTO LUKERT,
*Vice President,*
*The National Association of Concerned Veterans.*●

## PRIVACY OF MEDICAL RECORDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. PREYER) is recognized for 5 minutes.

● Mr. PREYER. Mr. Speaker, I am today introducing the Privacy of Medical Records Act, a bill to protect the privacy of personally identifiable medical records maintained by medical care facilities. The bill incorporates many of the features of the medical records legislation recommended by the Privacy Protection Study Commission, as well as some of the ideas of the Department of Health, Education and Welfare. The Department testified on this subject last May before the Subcommittee on Government Information and Individual Rights, which I chair.

I think this bill strikes a fair balance among the competing interests involved. But let me stress that my proposal is not meant to be the final word. Rather, it is intended to be a starting point for discussion.

Under my proposal, medical care facilities such as hospitals, skilled nursing facilities, and intermediate care facilities would be subject to restrictions on the use and disclosure of medical records. Compliance with those restrictions would be a requirement of participation in medicare and medicaid. Federal medical care facilities would be covered by the bill, but would be exempted from conflicting provisions of the Privacy Act of 1974. Private physicians would not be affected.

A patient at a facility covered by the

bill would be guaranteed the right to see and copy all of the medical records containing information about himself or herself. In addition, the individual could request correction of erroneous information contained in those files. However, if access to the information would likely cause harm to the patient, then another person could be designated by the patient to examine the records on his or her behalf.

Restrictions on the disclosure of this sensitive personal data are the most significant part of the bill, of course. The measure provides that medical information concerning an individual can only be released to others when the individual has given written consent, or when the individual has received advance notification by the institution of anticipated disclosure to categories of users specified in the bill.

The individual's authorization to disclose must be obtained in writing. It must be dated, signed, and specific as to the nature of the medical data to be released and the recipient of that data.

Where advance notification rather than specific consent is relied on as the authority for release, the individual must have been informed in writing of the kinds of disclosures contemplated. In general, these disclosures can only be made to the extent necessary to accomplish the purpose for which the disclosure is made, and can only be made for the following purposes: First, use by facility employees with a "need to know" for the performance of their duties; second, consultation with health professionals about the treatment of the patient; third, compelling circumstances affecting the health or safety of any person; fourth, biomedical, epidemiological, or health services research projects, if the projects are sufficiently important to justify the disclosure, and an institutional review board has made such a determination; fifth, Government audit and evaluation; sixth, non-Government audit and evaluation; seventh, public health reporting required by law; eighth, law enforcement, if the disclosure is required by statute; ninth, information concerning the patient's admission and health status; and tenth, when required under administrative or judicial subpena.

Obtaining medical records under false pretenses is made a crime punishable by fine or imprisonment. A person aggrieved by a violation of any part of the bill is authorized to bring a civil suit for damages for injunctive relief.

Again, this bill does not represent my final position on medical record confidentiality issues. There are many different ways to deal with the issues, and I have an open mind about the structure, content, and need for Federal legislation. By introducing this bill, I hope to advance the discussion about medical record confidentiality beyond consideration of general principles and to begin debate about specific details of actual legislation.

While I had hoped that the administration would have offered a proposal of its own by now, I am confident that this legislation will serve as a talking point for future discussions on the subject. I invite all of those with an interest in this important matter to examine the bill I have introduced and to bring your comments to the attention of the Government Information and Individual Rights Subcommittee.●

## SYRACUSE PLANT OF GENERAL MOTORS WINS AWARD FOR QUALITY WORKMANSHIP

(Mr. HANLEY asked and was given permission to extend his remarks at this point in the RECORD.)

● Mr. HANLEY. Mr. Speaker, it is with great pride that I rise today to bring to the attention of my colleagues the outstanding efforts of a group of workers in my home community of Syracuse, N.Y.

For the second year in a row, the Fisher Body Syracuse plant has won top honors in its division's annual competition for quality workmanship. It is my understanding that this achievement is without precedent.

Several years ago, General Motors established a numerical scoring system to determine the quality of its products The objective of that system was to rate products for customer satisfaction. Auditors select components at random in the plants, and gage them for everything from appearance to engineering specifications. The Syracuse team out performed all others this year as well as last.

On August 31, Paul D. Pender, Fisher Body Division general manager and a General Motors vice president, presented a 3-foot silver and walnut trophy to the plant's 1,500 hourly and salaried employees, family members, friends and Fisher Body General Office personnel attended the ceremonies held outside the plant under cover of a tent set up especially for the presentation.

The Syracuse plant is GM's largest plastic injection molding operation. The plant's payroll last year amounted to over $29 million.

I know that my colleagues join me in extending our heartiest congratulations to the men and women of the Fisher Body Syracuse plant for their dedication and hard work. Certainly, the example they have set should be the goal for all American industry.●

## CHAIRMAN PRICE'S LETTER TO THE PRESIDENT ON THE VETO OF THE DEFENSE BILL

(Mr. WHITE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. WHITE. Mr. Speaker, I am inserting in the RECORD a letter from Chairman MELVIN PRICE of the Armed Services Committee to the President concerning the President's veto of the fiscal year 1979 defense authorization bill.

This letter articulates the serious concerns which the President's veto of this bill has raised regarding the Congress role in defense policymaking.

I urge all Members who have not read this letter to take this opportunity to do so.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
*Washington, D.C., August 31, 1978.*

THE PRESIDENT,
*The White House,*
*Washington, D.C.*

MY DEAR MR. PRESIDENT: I have considered long and carefully your veto message to the Congress on H.R. 10929, the Department of Defense Appropriation Authorization Act for fiscal year 1979. I must tell you that I am disturbed by the substance and the tone of that message, and I am compelled also to express my deep concern about the impression of uncertain leadership in national defense that this veto and related decisions may unintentionally project.

Your message repeatedly makes reference to dollar figures of programs which are, in fact, not in the bill that you vetoed. For example, the message refers to an $800 million reduction in weapons and equipment for the Army and a $200 million reduction in weapons and equipment for the Air Force. The authorization bill that you vetoed, H.R. 10929, makes reductions of only $188.7 million in weapons and equipment for the Army and actually provides an addition of $80.2 million for the Air Force.

It has been assumed by some people, therefore, that the intent of your message is to indicate that corresponding reductions have to be made in the Defense appropriation bill to provide for the funding of the *Nimitz*-class nuclear aircraft carrier (CVN) that was authorized in H.R. 10929. Such, however, still fails to explain statistics used in your message. For example, your message refers to "up to $500 million for research and development—for programs proposed in my FY 1979 budget but deleted by one or another congressional action." The authorization bill sent to you, H.R. 10929, reduced research and development (R&D) only $209.5 million. This is a reduction of only 1.7 percent from the amount you requested and the authorization remaining, $12.3 billion, is an 8 percent increase over the amount provided last year.

The explanation of your statement would seem to be that the reference to "one or another Congressional action" includes appropriation action as well. However, the only appropriation action completed at the time of your veto message was the House passage of the Defense appropriation bill. An examination shows that total R&D reduction from the authorization and appropriation process as of the date of your message is less than $400 million. We have no explanation of your reference to a $500 million reduction.

Similarly, your statement makes reference to elimination of $500 million in readiness funds. Most of the readiness items to which you refer—such as repair of weapons, ship overhauls, communications and logistics support—are provided for in operation and maintenance funds which are not subject to annual authorization. At the same time, however, your message fails to acknowledge specific actions taken by Congress in H.R. 10929 in personnel authorizations to improve the readiness of our forces, including increases to provide more training time, additional civilian manpower for aircraft maintenance activities, and steps to improve the readiness of the Ready Reserve forces.

I understand that you are opposed to a nuclear aircraft carrier, but here again the position and the statistics of the Administration are confusing.

The veto message states your opposition to a nuclear aircraft carrier and that, therefore, 2 billion could have been saved by following your Administration's recommendations.

I would remind you, however, that subsequent to the submission of your budget, but prior to House floor consideration of H.R. 10929, I received a letter from the Secretary of the Navy supporting the inclusion of a conventional aircraft carrier (CVV) costing $1.575 million in this year's authorization. The difference between the Administration position and the committee position at that point, therefore, was not $2 billion, but rather the difference between a CVN and a CVV.

Can we not assume that the Secretary of the Navy speaks for your Administration on matters affecting the Navy?

Your veto message makes no mention of the Secretary's letter, but indicates that a conventionally-powered carrier would be requested in the budget next year "at a saving of $1 billion for that single ship."

The authorization bill provides $1.930 billion for a *Nimitz*-class CVN.

The cost of the CVN includes approximately 13 years of nuclear fuel. The $1.575 million estimate for the CVV is a current estimate for a ship which has not yet been designed. The estimate is surely conservative at this point. The estimate does not include the cost of 13 years of fuel.

On a one-to-one comparison, therefore, I don't know how your Administration can state that building one CVV instead of one CVN would save $1 billion.

If only one more large carrier, is to be built, the cost comparison, I believe, would be very close. The operational advantages of the CVN over the CVV are well-known and acknowledged on both sides, and I believe Members of Congress can make their own comparison and determine whether the nuclear capability is worthwhile at a slight additional cost.

Let me call to your attention that Senator Hart of Colorado, a Democrat and one of the most vigorous spokesmen in Congress for going to smaller carriers has vigorously supported H.R. 10929 as a vehicle for moving to a small carrier strategy in the future, has stated that the single CVN would cost only $355 million more than the CVV even if the latter "does not experience large cost overruns common with a new ship design," and has asked his colleagues to override your veto.

Statements repeatedly emanate from your Administration that three large conventional carriers could be built for the price of two nuclear carriers. If indeed that statement is correct, it is only pertinent if we are planning to build there or more large carriers. However, the fact is we are planning to build only one.

All of the witnesses for your Administration, including the most vigorous proponents of going to smaller carriers in the future, concurred that we should have 12 large carriers deployed. All of your Defense Department witnesses made clear that to have 12 carriers deployed, 13 are required since one carrier is always in the shipyard undergoing overhaul.

The question, therefore, is if we are building one more large carrier, should it be nuclear or conventional?

On each occasion this year when the House of Representatives was faced with the question of whether or not to build a nuclear carrier, a substantial majority supported the CVN. Equally substantial support has been voiced in the Senate. To veto a bill after this expression of Congressional intent suggests an unwillingness to accept the Congressional role in the defense decision-making process.

I am disturbed also, Mr. President, because even if the dollar amounts referred to in your message could be verified, the allegation that reductions made by the Congress mean simply a cut in combat capability, evidences a failure to understand the dynamics of the authorization and appropriation process.

Subsequent to the submission of the budget, reductions are made with the concurrence of, or even at the request of the Department of Defense because of program cancellations, program delays, or contract modifications which were not anticipated at the time the budget was drawn. In H.R. 10929, in the area of procurement alone, more than $1 billion can be identified which was eliminated for these reasons. In other words, the funds could not responsibly be obligated now even if authorized and appropriated.

Examples are the Navy Trident submarine, where a $911.9 million reduction was made because of a program delay; the Mark 46 torpedo, where a reduction of $28.7 million was made because the Navy informed us of a cost-saving in the program; and the Army XM–1 tank program, where the Army informed us that $127.4 million originally requested was not needed as a result of contract modifications.

So the implication throughout the message that funding a $2 billion carrier necessarily means $2 billion cut in needed programs elsewhere is simply not correct.

Your message further states that reductions were made "to stay within Congressional budget limits." This statement fails to recognize the simple fact that Congress has not completed action on the Second Budget Resolution. Therefore, the final "Congressional budget limits" on national defense have not yet been established.

I can only conclude, Mr. President, that you have been ill-advised on the process of Congressional authorization and appropriation.

I am concerned that your message may lead to other statements by Administration officials which are incorrect. In a speech to the American Legion Convention on August 22, the Secretary of Defense stated, "spending money on spare parts, unit training, and field exercises may not grab the headlines. But . . . this is the right way at the right time to neutralize the Soviet buildup. That is what the President had in mind, as I said earlier, when he sent the Defense authorization bill back to the Congress last week. . . ." H.R. 10929 did not make any significant reductions in the authorization requested for initial spare parts, it provided more manpower authorization than requested in order to increase the amount of training, and it did not address any requests for funds for field exercises. The latter are provided through operation and maintenance appropriations not subject to annual authorization. Certainly, such misleading public statements should be avoided.

In the time since your veto message was received, no further explanation has been submitted by the Administration and, in fact, the military departments indicate they have been directed not to respond to Congressional inquiries on the message.

I must ask you, therefore, Mr. President, to direct your advisors to submit an explanation of the basis for the estimates used in your veto message, together with a list of specific additions and deletions opposed by your Administration.

I state to you categorically that none of the additions or deletions made in H.R. 10929 by my committee were inspired by a desire to find funding for a nuclear aircraft carrier. Each of the programs in the bill was considered independently on its merits. The assumption that reductions were sought in advance to provide funding for the nuclear carrier fails to appreciate the months and months of hearings and analyses by Congressional committees.

Indeed, Mr. President, perhaps my principal concern with your message is the tone with which the actions of the Congress are addressed. Nowhere do I find any recognition that the Congress is capable of making an independent contribution to the weapon development process. Implicit throughout your message is the charge that Members of Congress, in order to support a particular weapon system, knowingly voted for a bill that weakens our national defense.

This charge is most grievous to me.

I have served in public office for more than 40 years and in all of more than 32 years in the House of Representatives I have had special responsibilities in the areas of national defense and nuclear energy policy. In these areas I have worked with every President since Harry Truman. At no time have I supported any particular system or any special interest at the price of our overall national defense. I have always worked to strengthen our national defense and I think H.R. 10929 would do that. While the Congress made a number of changes in the bill, both additions and deletions, they are not inconsistent with the number of changes we have made annually in such legislation.

I have the utmost respect for the present Secretary of Defense as I have had for most of his predecessors, but I have failed to observe any conclusive evidence of infallibility in the Department of Defense.

The burden of your message is that Congress does not have a place in defense policymaking except insofar as it is prepared to "rubber stamp" recommendations of the Executive Branch. I reject that philosophy.

I believe the Congress deserves to be treated as a partner in defense decisionmaking, not as a poor relation.

Finally, Mr. President, I must express to you my deep concern about the picture we are presenting to the world of our willingness to provide necessary leadership. I am concerned about what appears to be a propensity to forgo those military capabilities that we do well.

You may recall that I wrote to you a year ago expressing my concern about the impact on national defense capability of a series of decisions which include the cancellation of the B–1, the cancellation of the short range attack missile (SRAM), the termination of production of the Minuteman III missile, and the slowdown of development funding for the MX missile system. At that time, I expressed the hope that the Congress could work with the Administration to provide necessary defense systems. Since that time, we have had the cancellation of production of the enhanced radiation weapon, the indecision in response to the demonstrated need to protect the vulnerability of our land-based ICBMs, the proposed withdrawal of forces from Korea, and now the veto of a Defense authorization bill and a determined effort to stop another large aircraft carrier.

I am deeply concerned as to the cumulative effect of all of these actions on our defense capability and equally concerned as to their effect on the perception of potential adversaries as to our willingness to meet our national security commitments.

For all of the above reasons, Mr. President, I must reluctantly tell you that I cannot accept the reasoning in your veto message and on September 7 I shall ask the House of Representatives to vote to override your veto of H.R. 10929.

Respectfully yours,

MELVIN PRICE,
*Chairman, Committee on Armed Services.*●

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. LEHMAN (at the request of Mr. WRIGHT), for September 6 through 14, on account of official business.

Mr. YOUNG of Alaska (at the request of Mr. RHODES), for September 6, 7, and 8, on account of official business.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. SIKES, for 30 minutes, today; and for 30 minutes September 7, 1978; and for 30 minutes, on September 13, 1978, to revise and extend his remarks and to include extraneous matter.

(The following Members (at the request of Mr. GREEN) to revise and extend their remarks and include extraneous material:)

Mr. GOLDWATER, for 5 minutes, today.

(The following Members (at the request of Mr. WATKINS) to revise and extend their remarks and to include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. PEPPER, for 10 minutes, today.
Mr. COTTER, for 10 minutes, today.
Mr. FLOOD, for 5 minutes, today.
Mr. TEAGUE, for 5 minutes, today.
Mr. WHITE, for 5 minutes, today.
Mr. BINGHAM, for 10 minutes, today.
Mr. HARRIS, for 5 minutes, today.
Mr. MONTGOMERY, for 5 minutes, today.
Mr. ROBERTS, for 5 minutes, today.
Mr. PREYER, for 5 minutes, today.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BUTLER, to include extraneous material during consideration of H.R. 12432 in the Committee of the Whole today.

Mr. BUTLER, to extend his remarks preceding the vote on the Treen amendment to H.R. 12432 in the Committee of the Whole today.

(The following Members (at the request of Mr. GREEN) and to include extraneous material:)

Mr. FINDLEY in three instances.
Mr. JOHN T. MYERS.
Mr. BOB WILSON in two instances.
Mr. COLLINS of Texas in three instances.
Mr. RUDD.
Mr. FRENZEL in three instances.
Mr. MOORHEAD of California.
Mr. MCCLOSKEY.
Mrs. HOLT.
Mr. LEACH.
Mr. DERWINSKI in two instances.
Mr. GILMAN.
Mr. GRASSLEY.
Mr. STEERS in two instances.
Mr. WHITEHURST.

(The following Members (at the request of Mr. WATKINS) and to include extraneous matter:)

Mr. PICKLE in 10 instances.
Mr. BYRON in 10 instances.
Mr. ROSENTHAL in 10 instances.
Mr. SISK in two instances.
Mrs. LLOYD of Tennessee in five instances.
Mr. ANNUNZIO in six instances.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. BROWN of California in 10 instances.
Mr. HAMILTON in 10 instances.
Mr. LAFALCE in two instances.
Mr. UDALL in two instances.
Mr. EDWARDS of California.
Mr. PEPPER.
Mr. HOLLAND in five instances.
Mr. EILBERG in 10 instances.
Mr. SIMON in three instances.
Mr. MITCHELL of Maryland.
Mr. APPLEGATE.
Mr. MCDONALD in five instances.
Mr. MILLER of California.
Mr. VANIK in two instances.
Mr. BONIOR.
Mr. PHILLIP BURTON.
Mr. AMBRO.
Mr. BENNETT.
Mr. JACOBS.
Mr. JOHNSON of California.
Mr. MAHON.
Mr. ROGERS in five instances.
Mr. BLANCHARD.
Mr. EDGAR.

## SENATE BILLS AND CONCURRENT RESOLUTION REFERRED

Bills and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 408. An act to amend title 5, United States Code, to extend certain benefits to former employees of county committees established pursuant to section 8(b) of the Soil Conservation and Domestic Allotment Act, and for other purposes; to the Committee on Post Office and Civil Service;

S. 1274. An act to provide the Attorney General of the United States with authority to contract with State and local authorities for the safekeeping, care, and subsistence of all Federal prisoners; to the Committee on the Judiciary;

S. 2366. An act for the relief of Keum Sun Lee; to the Committee on the Judiciary;

S. 3036. An act to amend the Coinage Act of 1965 to change the size, weight, and design of the one-dollar coin, and for other purposes; to the Committee on Banking, Finance and Urban Affairs;

S. 3184. An act to designate the Indian Health Facility in Ada, Okla., the "Carl Albert Indian Health Facility"; to the Committee on Interior and Insular Affairs;

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 7308

By Mr. GONZALEZ:

—Amend section 107 to read as follows:

REPORT OF ELECTRONIC SURVEILLANCE

SEC. 107. (a) In April of each year, the Attorney General shall transmit to the Administrative Office of the United States Courts and to Congress a report setting forth with respect to the preceding calendar year—

(1) the total number of applications made for orders and extensions of orders approving electronic surveillance under this title; and

(2) the total number of such orders and extensions either granted, modified, or denied.

(b) And in April of each year the Attorney General shall transmit a report to the appropriate Member of Congress or Congressional Committee on any information gathered regarding any foreign government's attempt to influence Congress, suborn individual Members or to threaten a Member.

H.R. 7308

By Mr. RUDD:

—Page 62, after line 15, insert the following new section and redesignate succeeding sections:

PROTECTION FOR SURVEILLANCE OFFICERS

SEC. 107. Notwithstanding any other provision of this act, no law enforcement, investigative, or intelligence officer or other person engaged in the course of his official duties in conducting electronic surveillance authorized by the Attorney General, or in the use or disclosure of information derived from such surveillance, shall be presecuted or otherwise held liable for such action under criminal or civil law: *Provided*, That such person acted in a good faith belief that his actions did not violate any provision of this title, under circumstances where that belief was reasonable.

(Amendment offered to the amendment in the nature of a substitute.)

—After section 103, insert the following new section and redesignate succeeding sections:

PROTECTION FOR SURVEILLANCE OFFICERS

SEC. 104. Notwithstanding any other provision of this act, no law enforcement, investigative, or intelligence officer or other person engaged in the course of his official duties in conducting electronic surveillance authorized by the Attorney General, or in the use or disclosure of information derived from such surveillance, shall be prosecuted or otherwise held liable for such action under criminal or civil law: *Provided*, That such person acted in a good faith belief that his actions did not violate any provision of this title, under circumstances where that belief was reasonable.

—(Amendment offered to the amendment in the nature of a substitute.) After section 106, insert the following new section and redesignate succeeding sections:

PROTECTION FOR SURVEILLANCE OFFICERS

SEC. 107. Notwithstanding any other provision of this act, no law enforcement, investigative, or intelligence officer or other person engaged in the course of his official duties in conducting electronic surveillance authorized by the Attorney General, or in the use or disclosure of information derived from such surveillance, shall be prosecuted or otherwise held liable for such action under criminal or civil law: *Provided*, That such person acted in a good faith belief that his actions did not violate any provision of this title, under circumstances where that belief was reasonable.

---

H.R. 11280

By Mr. CLAY:

—On page 138, after line 5, insert a new section as follows:

"(C) on the basis of sex, as prohibited by the Equal Pay Act of 1963, 29 U.S.C. 206(d);".

And redesignate the subsequent section accordingly.

—On page 142, after line 14, add a new section as follows:

"(3) under the Equal Pay Act of 1963 (29 U.S.C. 206(d)), prohibiting discrimination on the basis of sex;", and renumber the subsequent sections accordingly.

—Page 144, line 20, after "Senate." insert the following: "The term of office of the Director shall be 4 years and shall be coterminous with the term of office of the President.".

—Page 152, line 20, strike out the period and insert in lieu thereof the following: ", and in addition the authority to hear appeals with respect to examination ratings.".

—Page 166, after subsection (d), insert the following:

CATEGORY RATING SYSTEM

SEC. 203. (a) Section 3304 of title 5, United States Code, is amended by inserting at the end thereof the following new subsection:

"(e)(1) Subject to the provisions of this title (other than section 318(a)), in cases in which the qualifications of applicants are being determined without the use of written examinations, the Office may provide that individuals shall be evaluated in accordance with a category rating system established by the Office which divides the qualified applicants into three or more categories. The appointing or nominating authority may select any individual within the highest category, or, if at least three candidates have not received such a rating, any individual in the next highest category or categories if necessary to provide the appointing or nominating authority with at least three applicants from which to choose.

"(2) For the purpose of applying section 3318(b) of this title in cases to which paragraph (1) of this subsection applies, an individual shall not be considered to be passed over unless a selection is made from a category which is lower than the category for which that individual qualified.

Page 166, line 16, strike out "203," and insert in lieu thereof "204.".

Page 174, line 9, strike out "204." and insert in lieu thereof "205.".

Page 182, line 16, strike out "205." and insert in lieu thereof 206.".

Conform the table of contents accordingly.

—Page 168, beginning on line 17, strike out "appraisals of job performance of employees;" and insert in lieu thereof "appraisals of the total job performance of each employee in the agency".

Page 169, line 8, insert "total" before "job performance".

—Page 169, after line 3, insert the following: Under any performance appraisal system developed under this section, the agency may establish or modify any performance standard provided for under subsection (b) of this section to the extent necessary to meet the particular needs of the agency.

—Page 175, strike out line 11 and all that follows down through line 21 and insert in lieu thereof the following:

"(b) An employee against whom an action is proposed to be taken is entitled to—

"(1) written notice of the proposed action which shall state the specific reasons for the action and which shall be provided a reasonable period in advance of the opportunity for hearing;

"(2) a hearing;

"(3) be represented by an attorney or other representative; and

"(4) a written decision after the hearing (or opportunity therefor) which states the specific reasons for such decision and which is provided at least 90 days before such action takes effect.

Page 175, strike out line 22 and all that follows down through line 24.

Page 176, line 1, strike out "(d)" and insert in lieu thereof "(c)".

Page 179, strike out line 12 and all that follows down through line 2 on page 180 and insert in lieu thereof the following:

"(b) An employee against whom an action is proposed to be taken is entitled to—

"(1) written notice of the proposed action which shall state the specific reasons for the action and which shall be provided a reasonable period in advance of the opportunity for hearing;

"(2) a hearing;

"(3) be represented by an attorney or other representative; and

"(4) a written decision after the hearing (or opportunity therefor) which states the specific reasons for such decision and which is provided at least 90 days before such action takes effect.

Page 180, line 6, strike out "(d)" and insert follows down through line 5.

Page 180, line 6, strike out "(d)" and insert in lieu thereof "(c)".

Page 180, line 9, strike out "(e)" and insert in lieu thereof "(d)".

Page 184, line 3, strike out "(3)".

Page 184, line 6, strike out "(A) or party to the appeal or the Director of the Office of Personnel Management petitions" and insert in lieu thereof "(1) a party to the appeal petitions".

Page 184, line 9, strike out "(B)" and insert "(2)" in lieu thereof.

Page 184, strike out paragraph (2), beginning on line 18 and ending on line 23.

—On page 185, line 7, insert the following after "(42 U.S.C. 2000e-16),": "the Equal Pay Act of 1963 (29 U.S.C. 206(d)),".

—On page 187, strike lines 7 through 13, and insert the following in lieu thereof:

" "(b) A petition to review a final order or decision of the Board shall be filed in the Court of Claims or a United States district court as provided in chapters 91 and 85, respectively, of title 28 except that cases of discrimination shall be filed under section 717(c) of the Civil Rights Act of 1964 (42 U.S.C. 2000e-16(c), under section 15 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 633a(c)), section 16(b) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 216 and 217), as applicable. Notwithstanding any other provision of law, any petition for review must be filed within 30 days after the date the petitioner received notice of the final order or decision of the Board.".

—On page 187, line 17, insert after the word "followed" the following: ", except that in a case of discrimination brought under 42 U.S.C. 2000e-16(c), 29 U.S.C. 633a(c), or 29 U.S.C. 216 and 217, the proceeding shall be de novo.".

—Page 209, after line 13, insert the following:

CATEGORY RATING SYSTEM

SEC. 313. (a) Section 3304 of title 5, United States Code, is amended by inserting at the end thereof the following new subsection:

"(e)(1) Subject to the provisions of this title (other than section 3318(a)), in cases in which the qualifications of applicants are being determined without the use of written examinations, the Office may provide that individuals shall be evaluated in accordance with a category rating system established by the Office which divides the qualified applicants into three or more categories. The appointing or nominating authority may select any individual within the highest category, or, if at least three candidates have not received such a rating, any individual in the next highest category or categories if necessary to provide the appointing or nominating authority with at least three applicants from which to choose.

"(2) For the purpose of applying section 3318(b) of this title in cases to which paragraph (1) of this subsection applies, an individual shall not be considered to be passed over unless a selection is made from a category which is lower than the category for which that individual qualified.

—Page 209, line 14, strike out "313." and insert in lieu thereof "314.".

Conform the table of contents accordingly.

—Page 265, line 12, after "(C)" insert the following "except as provided in paragraph (5) of this subsection.".

—Page 266, after line 9, insert the following:

"(5) Any employee who is denied a pay increase under this subsection is entitled to appeal the action to the Merit Systems Protection Board under section 7701 of this title.".

—Page 361, after line 19, insert the following:

TITLE IX—POLITICAL ACTIVITIES

FEDERAL EMPLOYEES' POLITICAL ACTIVITIES

SEC. 901. (a) Subchapter III of chapter 73 of title 5, United States Code, is amended to read as follows:

"Subchapter III—Political Activities

"§ 7321. Political participation

"It is the policy of the Congress that employees should be encouraged to fully exercise, freely and without fear of penalty or reprisal, and to the extent not expressly prohibited by law—

"(1) their rights to participate or to refrain from participating in the political processes of our Nation, and

"(2) their rights to form, join, or assist, or to refrain from forming, joining, or assisting, any organization, political party, committee, association, or other group which advocates or encourages political activities, and that employees should be protected in the exercise of these rights.

"§ 7322. Definitions

"For the purpose of this subchapter—

"(1) 'employee' means any individual, other than the President and the Vice President, employed or holding office in—

"(A) an Executive agency;

"(B) a position within the competitive service, or within the Senior Executive Service as a career appointee (as defined in section 3132(a)(4) of this title), which is not in an-entity referred to in subparagraphs (A) through (B);

but does not include a member of the uniformed services;

"(2) 'candidate' means any individual who seeks nomination for election, or election, to any elective office, whether or not such individual is elected, and, for the purpose of this paragraph, an individual shall be considered to seek nomination for election, or election, to an elective office, if such individual has—

"(A) taken the action required to qualify for nomination for election, or election; or

"(B) received political contributions or made expenditures, or has given consent for any other person to receive political contributions or make expenditures, with a view to bringing about such individual's nomination for election, or election, to such office;

"(3) 'political contribution'—

"(A) means a gift, subscription, loan, advance, or deposit of money or anything of value, made for any political purpose;

"(B) includes a contract, promise, or agreement, express or implied, whether or not legally enforceable, to make a political contribution for any political purpose;

"(C) includes the payment by any person, other than a candidate or a political party or affiliated organization, of compensation for the personal services of another person which are rendered to such candidate or political party or affiliated organization without charge for any political purpose; and

"(D) includes the provision of personal services for any political purpose;

"(4) 'superior' means an employee who exercises supervision of, or control or administrative direction over, another employee;

"(5) 'elective office' means any elective public office and any elective office of any political party or affiliated organization;

"(6) 'State' means each of the several States and the District of Columbia;

"(7) 'person' means any individual, corporation, trust, association, any State, local, or foreign government, any territory or possession of the United States, or any agency or instrumentality of any of the foregoing; and

"(8) 'restricted position' means any position with respect to which there is in effect a determination by the Office of Personnel Management, by regulation, that—

"(A) the duties and responsibilities of such position require such employee—

"(i) as a substantial part of his official activities, to engage in foreign intelligence activities relating to national security;

"(ii) in the normal course of carrying out such duties and responsibilities—

"(I) to make decisions binding on employees with respect to whom he is a superior with regard to who shall be the subject of any action which is to be taken by any such employee in connection with the enforcement of any civil or criminal law (including any inspection or audit under any such law);

"(II) to actually carry out any such action; or

"(III) to make a final determination with respect to any such action; or

"(iii) in the normal course of carrying out such duties and responsibilities—

"(I) to make binding decisions on who shall be awarded contracts which are for the procurement of goods or services for the Government and which have substantial monetary value, or who shall be awarded licenses, grants, subsidies, or other benefits, which involve funds or other interests having a substantial monetary value; or

"(II) to supervise individuals engaged in the awarding, administering, or monitoring of such contracts, licenses, grants, subsidies, or benefits; and

"(B) the restrictions on political activity imposed on such employee in such position are justified in order to insure the integrity of the Government or the public's confidence in the integrity of the Government.

"§ 7323. Use of official influence or official information; prohibition

"(a) An employee may not directly or indirectly use or attempt to use the official authority or influence of such employee for the purposes of—

"(1) interfering with or affecting the result of any election; or

"(2) intimidating, threatening, coercing, commanding, influencing, or attempting to intimidate, threaten, coerce, command, or influence—

"(A) any individual for the purpose of interfering with the right of any individual to vote as such individual may choose, or of causing any individual to vote, or not to vote, for any candidate or measure in any election;

"(B) any person to give or withhold any political contribution; or

"(C) any person to engage, or not to engage, in any form of political activity whether or not such activity is prohibited by law.

"(b) An employee may not directly or indirectly use or attempt to use, or permit the use of, any official information obtained through or in connection with his employment for any political purpose, unless such official information is available to the general public.

"(c) For the purpose of subsection (a) of this section, 'use of official authority or influence' includes—

"(1) promising to confer or conferring any benefit (such as any compensation, grant, contract, license, or ruling) or effecting or threatening to effect any reprisal (such as deprivation of any compensation, grant, contract, license, or ruling); or

"(2) taking, directing others to take, recommending, processing, or approving any personnel action (as defined in section 2302(a)(2)(A) of this title).

"§ 7324. Solicitation; prohibition

"(a) An employee may not—

"(1) give or offer to give a political contribution to any individual either to vote or refrain from voting, or to vote for or against any candidate or measure, in any election;

"(2) solicit, accept, or receive a political contribution to vote or refrain from voting, or to vote for or against any candidate or measure, in any election;

"(3) knowingly give or hand over a political contribution to a superior of such employee; or

"(4) knowingly solicit, accept, or receive, or be in any manner concerned with soliciting, accepting, or receiving, a political contribution—

"(A) from another employee (or a member of another employee's immediate family) with respect to whom such employee is a superior; or

"(B) in any room or building occupied in the discharge of official duties by—

"(i) an individual employed or holding office in the Government of the United States, in the government of the District of Columbia, or in any agency or instrumentality of the foregoing; or

"(ii) an individual receiving any salary or compensation for services from money derived from the Treasury of the United States.

"(b) In addition to the prohibitions of subsection (a) of this section, an employee holding a restricted position may not solicit, accept, or receive a political contribution from, or give a political contribution to, any individual who is an employee, a Member of Congress (or a candidate for such office), or a member of a uniformed service, or any agent of any such individual. The preceding sentence shall not be construed to prohibit an employee from giving a political contribution to a political committee.

"(c)(1) In addition to the prohibitions of subsection (a) of this section, an employee may not solicit, accept, or receive a political contribution from, or give a political contrbution to, any person who—

"(A) has, or is seeking to obtain, contractual or other business or financial relations with the agency in which the employee is employed;

"(B) conducts operations or activities which are regulated by such agency; or

"(C) has interests which may be substantially affected by the performance or nonperformance of such employee's official duties.

"(2) The Office of Personnel Management shall prescribe regulations which exempt an employee from the application of paragraph (1) of this subsection with respect to any political contribution to or from an individual who has a family or personal relationship with the employee if the employee complies with such requirements as the Office shall so prescribe which relate to the disqualification of such employee from engaging in any official activity involving such individual.

"(3) The Office of Personnel Management shall prescribe regulations which exempt the application of paragraph (1) of this subsection with respect to any political contribution from a person in situations in which the facts and circumstances indicate there would not be any adverse effect on the integrity of the Government or the public's confidence in the integrity of the Government.

"§7325. Political activities on duty, etc.; prohibition

"(a) An employee may not engage in political activity—

"(1) while such employee is on duty;

"(2) in any room or building occupied in the discharge of official duties by an individual employed or holding office in the Government of the United States, in the government of the District of Columbia, or in any agency or instrumentality of the foregoing; or

"(3) while wearing a uniform or official insignia identifying the office or position of such employee.

"(b) The provisions of subsection (a) of this section shall not apply to—

"(1) an employee—

"(A) paid from the appropriation for the White House Office;

"(B) paid from funds to enable the Vice President to provide assistance to the President; or

"(C) on special assignment to the White House Office;

"(2) the Mayor of the District of Columbia, the Chairman or a member of the Council of the District of Columbia; or

"(3) any activity of an employee which is not otherwise prohibited by or under law and which is part of such individual's official duties.

"(c) Nothing in this section shall be construed to authorize an employee designated in subsection (b) of this section to engage in political activity otherwise prohibited by or under law.

"(d)(1) In addition to the prohibitions of subsection (a) of this section, an employee holding a restricted position may not take an active part in political management or political campaigns unless such part—

"(A) is in connection with—

"(i) an election and preceding campaign if none of the candidates is to be nominated or elected at that election as representing a party any of whose candidates for Presidential elector received votes in the last preceding election at which Presidential electors were selected; or

"(ii) a question which is not specifically identified with a National or State political party or political party of a territory or possession of the United States; or

"(B) is permitted by regulations prescribed by the Office of Personnel Management and involves the municipality or political subdivision in which such employee resides, when—

"(i) the municipality or political subdivision is in Maryland or Virginia and in the immediate vicinity of the District of Columbia or is a municipality in which a majority of voters are employed by the Government of the United States; and

"(ii) the Office determines that because of special or unusual circumstances which exist in the municipality or political subdivision it is in the domestic interest of the employees to permit political participation.

"(2) For the purpose of this subsection, 'an active part in political management or in political campaigns' means those acts of political management or political campaigning which were prohibited on the part of employees in the competitive service before July 19, 1940, by the determinations of the Civil Service Commission under the rules prescribed by the President.

"§ 7326. Candidates for elective office; leave, notification by employees

"(a) An employee shall promptly notify the agency in which he is employed upon becoming a candidate for elective office and upon the termination of such candidacy.

"(b) An employee who is a candidate for elective office shall, upon the request of such employee, be granted leave without pay for the purpose of allowing such employee to engage in activities relating to such candidacy.

"(c) Notwithstanding section 6302(d) of this title, an employee who is a candidate for elective office shall, upon the request of such employee, be granted accrued annual leave for the purpose of allowing such employee to engage in activities relating to such candidacy. Such leave shall be in addition to leave without pay to which such employee may be entitled under subsection (b) of this section.

"(d) The foregoing provisions of this section shall not apply in the case of an individual who is an employee by reason of holding an elective public office.

"§ 7327. Penalties

"(a) An employee who is found by the Merit Systems Protection Board under section 1207 of this title to have violated any provision of—

"(1) section 7323 of this title shall, upon a final order of the Board, be suspended without pay from such employee's position for a period of not less than 30 days, or shall be removed in which event that employee may not thereafter hold any position (other than an elected position) as an employee (as defined in section 7322(1) of this title);

"(2) section 7324 or 7325 of this title shall, upon a final order of the Board, be—

"(A) removed from such employee's position, in which event that employee may not thereafter hold any position (other than an elected position) as an employee (as defined in section 7322(1) of this title) for such period as the Board may prescribe;

"(B) suspended without pay from such employee's position for such period as the Board may prescribe; or

"(C) disciplined in such other manner as the Board shall deem appropriate.

"(b) The Merit Systems Protection Board shall notify the Special Counsel, the employee, and the employing agency of any penalty imposed under this section. The employing agency shall certify to the Board the measures undertaken to implement the penalty.

"§ 7328. Regulations

"(a) The Office of Personnel Management and the Merit Systems Protection Board shall prescribe rules and regulations to carry out their respective responsibilities under this subchapter.

"(b) The regulations referred to in section 7322(8) of this title shall be prescribed not later than 90 days after the effective date of such section. Thereafter any revision of such regulations shall be prescribed not later than March 1 of the calendar year in which such revision is to take effect. Any employee holding any position with respect to which any such regulation is prescribed may institute an action for judicial review of such regulation by filing a petition in the United States Court of Appeals for the District of Columbia Circuit, or in the United States court of appeals for the judicial circuit in which such employee resides or is employed, except that no such action may be instituted more than 30 days after the effective date of such regulation.".

(b)(1) Section 3302(2) of title 5, United States Code, is amended by striking out "7321, and 7322" and inserting "and" before "7203" (as added in section 703(d)(2) of this Act).

(2) Section 1308(a) of title 5, United States Code, is amended—

(A) by inserting "and" at the end of paragraph (2);

(B) by striking out paragraph (3); and

(C) by redesignating paragraph (4) as paragraph (3).

(3) The second sentence of section 8332(k)(1) of title 5, United States Code, is amended by striking out "second" and inserting "last" in lieu thereof.

(4) The section analysis for subchapter III of chapter 73 of title 5, United States Code, is amended to read as follows:

"Subchapter III—Political Activities

"7321. Political participation.
"7322. Definitions.
"7323. Use of official influence or official information; prohibition.
"7324. Solicitation; prohibition.
"7325. Political activities on duty, etc.; prohibition.
"7326. Candidates for elective office; leave, notification by employees.
"7327. Penalties.
"7328. Regulations.".

(c) Sections 602 and 607 of title 18, United States Code, relating to solicitations and making of political contributions, are each amended by adding at the end thereof the following new sentence: "This section does not apply to any activity of an employee, as defined in section 7322(1) of title 5, unless such activity is prohibited by section 7324 of that title.".

(d) Section 6 of the Voting Rights Act of 1965 (42 U.S.C. 1973d) is amended by striking out "the provisions of section 9 of the Act of August 2, 1939, as amended (5 U.S.C. 118i), prohibiting partisan political activity" and by inserting in lieu thereof "the provisions of subchapter III of chapter 73 of title 5, United States Code, relating to political activities, as enforced under sections 1206 and 1207 of such title.".

(e) Sections 103(a)(4)(D) and 203(a)(4)(D) of the District of Columbia Public Education Act are each amended by striking out "sections 7324 through 7327 of title 5" and inserting in lieu thereof "section 7325 of title 5".

(f) Sections 8332(k)(1), 8706(e), and 8906(e)(2) of title 5, United States Code, are each amended by inserting immediately after "who enters on" the following: "leave without pay granted under section 7326(b) of this title, or who enters on".

EFFECTIVE DATE

SEC. 902. (a) The amendments made by this title shall take effect 120 days after the date of the enactment of this Act, except that the authority to prescribe regulations granted under section 7328 of title 5, United States Code (as added by section 901 of this title), shall take effect on the date of the enactment of this Act.

(b) Any repeal or amendment made by this title of any provision of law shall not release or extinguish any penalty, forfeiture, or liability incurred under such provision, and such provision shall be treated as remaining in force for the purpose of sustaining any proper proceeding or action for the enforcement of such penalty, forfeiture, or liability.

(c) No provision of this title shall affect any proceedings with respect to which the charges were filed on or before the effective date of the amendments made by this title. Orders shall be issued in such proceedings and appeals shall be taken therefrom as if this title had not been enacted.

(d) If—

(1) subchapter III of chapter 73 of title 5, United States Code, applied to any category of individuals employed by any Federal agency or instrumentality immediately before the effective date of the amendments made by this title; and

(2) such subchapter, as amended by this title, does not apply to such category of individuals;

then such subchapter, as in effect immediately before the effective date of the amendments made by this title, shall continue to apply to such category of individuals, notwithstanding section 901(a) or any other provision of law.

STUDY CONCERNING POLITICAL PARTICIPATION BY FEDERAL EMPLOYEES

SEC. 903. The Office of Personnel Management shall study and review the effects of the amendments made by this title on—

(1) the level of participation by Federal employees in activities relating to Federal, State, and local elections;

(2) the merit system particularly the hiring, termination, or advancement of Federal employees; and

(3) matters generally affecting and contributing to the improper use of official influence or official information by Federal employees as prohibited under subchapter III of chapter 73 of title 5, United States Code (as amended by this title).

The Office shall report to the Congress not later that March 31, 1980, and March 31, 1982, the results of such study and review any findings therefrom together with such legislative or administrative recommendations as the Office considers appropriate.

Conform the table of contents accordingly.

H.R. 11280

By Mr. ERLENBORN:

—Page 288, strike line 12 and all that follows thereafter through line 12 on page 348.

—Page 292, line 18, strike the words "in while or in part" and line 19, strike the words "and pay dues".

—Page 293, strike the "or" on line 6, insert an "or" after "agency;" on line 7, and after line 7 insert the following new subparagraph (D):

"(D) an organization which assists, or participates in the conduct of a strike against the Government of the United States or any agency thereof or imposes a duty or obligation to conduct, assist, or participate in such a strike.

—Page 293, line 8, strike the words "dues, fees, and assessments" and substitute therefore "periodic dues and initiation fees uniformly required."

—On page 298, after line 20, amend section 7103 by adding a new subsection (c) as follows:

"(c) Employees of the Federal Election Commission engaged in the administration, interpretation and enforcement of the Federal Election Campaign Act of 1971, as amended, shall not be represented by any labor organization which maintains a political action committee or which is affiliated, associated or connected with an organization which maintains a political action committee; nor shall such employees be represented by a labor organization which expressly advocates the election or defeat of any candidate for Federal office.".

—Page 298, after line 20, amend section 7103 by adding a new subsection (c) as follows:

"(c) Employees engaged in administering a labor-management relations law who are otherwise authorized by this chapter to be represented by a labor organization shall not be represented by a labor organization which also represents other employees covered by such law or which is affiliated directly or indirectly with an organization which represents such employees."

—Page 300, line 7, insert before the period the following: "only upon notice and hearing and only for misconduct, inefficiency, neglect of duty, or malfeasance in office.".

—Page 301, line 25, strike "(1)"; page 302, insert "(1)" for "(A)" on line 1, "(2)" for "(B)" on line 3, "(3)" for "(C)" on line 5, and "(4)" for "(D)" on line 7; strike all of line 9 through line 13; and strike "or administrative law judge" on line 15.

On page 324, line 24, insert before the second period "and filed with the Authority"; on page 325, strike the parenthesis and all within on lines 3 to 5; on page 325 lines 9 to 11, strike "individual or individual conducting the hearing shall state in writing their" and substitute therefore: "Authority shall state in writing its"; and on page 326, strike lines 8 through 14, and substitute therefore: "(7) If the Authority determines that the preponderance of the evidence received fails to demonstrate that the agency or labor organization named in the complaint has engaged in or is engaging in any such unfair labor practice, the Authority shall state in writing its findings of fact and shall issue an order discussing the complaint."

—Page 304, strike "(1)" on line 20; Page 305 strike "Except as provided under subsection (e) of this section," on lines 14 and 15, and change "if" to "If" on line 15, and strike "subject to paragraph (2) of this subsection," on lines 17 and 18, and strike all on line 24, page 305, through line 22 on page 306.

—Page 305, line 14, strike all after the period through the comma on line 15; change "if" to "If"on line 15; and page 308, strike all of subsection "(e)" from line 3 through line 23 and redesignate the subsequent subsections accordingly.

—Page 312, strike line 19 and all thereafter through line 3 on page 314.

—Page 317, strike all of line 1 through line 18.

—On page 317, strike subsection "(C)", line 1 through line 18.

—Page 320, line 2, insert after "slowdown," the following:

"or to picket an agency in a labor-management dispute,".

—On page 320, after line 5, insert the following new subsection (c) and redesignate the subsequent subsections accordingly:

"(c) The expression of any personal views, argument, opinion or the making of any statement shall not (1) constitute or be evidence of an unfair labor practice under any of the provisions of this chapter or (2) constitute grounds for, or evidence justifying, setting aside the results of any election conducted under any provisions of this chapter, if such expression contains no threats of reprisal or force or promise of benefit.".

H.R. 11280

By Mr. FISHER:

—Page 142, line 24, insert "(a)" before "If".

Page 143, after line 6, insert the following new subsection:

"(b) The General Accounting Office shall prepare and submit an annual report to the President and the Congress on the activities of the Merit Systems Protection Board and the Office of Personnel Management. Such report shall include a description of—

"(1) significant actions taken by the Board to carry out its functions under this title; and

"(2) significant actions of the Office of Personnel Management, including an analysis of whether or not the actions of the Office of Personnel Management are in accord with merit system principles and free from prohibited personnel practices.

—Page 152, insert after line 17 the following:

"(d)(1) At any time after the effective date of any rule or regulation issued by the Office of Personnel Management in carrying out its functions under section 1103 of this title, the Board shall review any provision of such rule or regulation—

"(A) on its own motion;

"(B) on the granting by the Board, in its sole discretion, of any petition for such review filed with the Board by any interested person, after consideration of the petition by the Board; or

"(C) on the filing of a written complaint by the Special Counsel requesting such review.

"(2) In reviewing any provision of any rule or regulation pursuant to this subsection the Board shall declare such provision—

"(A) invalid on its face, if the Board determines that such provision would, if implemented by any agency, on its face—

"(i) require any employee to violate section 2302(b) of this title; or

"(ii) is contrary to any merit system principle; or

"(B) invalidly implemented by any agency, if the Board determines that such provision, as it has been implemented by the agency through any personnel action taken by the agency or through any policy adopted by the agency in conformity with such provision—

"(i) has required any employee to violate section 2302(b) of this title; or

"(ii) has been contrary to any merit system principle.

"(3)(A) The Director of the Office of Personnel Management, and any agency implementing any provision of any rule or regulation under review pursuant to this subsection, shall have the right to participate in such review.

"(B) Any review conducted by the Board pursuant to this paragraph shall be limited to determining—

"(i) the validity on its face of the provision under review; and

"(ii) whether the provision under review has been validly implemented.

"(C) The Board shall require any agency—

"(i) to cease compliance with any provision of any rule or regulation which the Board declares under this subsection to be invalid on its face; and

"(ii) to correct any invalid implementation by the agency of any provision of any rule or regulation which the Board declares under this subsection to have been so invalidly implemented by the agency.

Page 152, line 18, strike out "(d)" and insert in lieu thereof "(e)".

—Page 221, line 25, insert "the preceding sections of" after "purpose of".

Page 221, insert after line 25 the following:

"§ 3137. Annual report by the General Accounting Office

"The General Accounting Office shall submit to each House of the Congress on or before March 1 of each year a report on the Senior Executive Service which shall contain, based on audits and reviews which shall be conducted by the Office during the year covered by the report, an assessment of—

"(1) the extent to which the laws, rules, and regulations governing employment in the Senior Executive Service have been complied with; and

"(2) the effectiveness and soundness of management by senior executives.

Page 220, line 12, insert "by the Office of Personnel Management" after "report".

Page 222, in the matter following line 15, strike out the items relating to sections 3135 and 3136 and insert in lieu thereof the following:

"3135. Biennial report by the Office of Personnel Management.
"3136. Regulations.
"3137. Annual report by the General Accounting Office.".

—Page 225, strike out line 15 and all that follows down through line 24 and insert in lieu thereof the following:

"(c)(1) The Office of Personnel Management shall establish one or more qualifications review boards, as appropriate, the members of which shall be appointed on the basis of their knowledge of public management and other appropriate occupational fields. It is the function of the boards to certify the managerial qualifications of candidates for entry as career appointees into the Senior Executive Service in accordance with regulations prescribed by the Office of Personnel Management. Of the members of each board—

"(A) one-half shall be appointed from among career appointees; and

"(B) the other one-half shall be appointed from outside the civil service, not more than half of whom shall be adherents of the same political party.

—Page 237, line 23, strike out "If the Office of Personnel Management" and insert in lieu thereof the following: "The Office of Personnel Management shall review each performance appraisal system established under subsection (a) of this section promptly after it is established and from time to time thereafter and determine whether the performance appraisal system meets the requirements of this subchapter. If the Office".

—Page 238, after line 3, insert the following new subsection:

"(c) The Comptroller General shall, from time to time, review performance appraisal systems established under this section to determine the extent to which such systems meet the requirements of this subchapter, and shall periodically report its findings to the Office of Personnel Management and to the Congress.

—Page 270, beginning on line 1, strike out "January 1, 1982, a report on the operation" and insert in lieu thereof the following: "January 1, 1986, and biennially thereafter, a report on the operation during the preceeding 2 fiscal years".

—Page 272, strike out lines 19 through 24 and insert in lieu thereof the following:

EFFECTIVE DATE; EXPERIMENTAL APPLICATION

SEC. 503. (a) Except as provided in subsection (b) of this section, the amendments made by this title shall take effect on the first day of the first applicable pay period which begins on or after October 1, 1981.

(b)(1) Not later than 60 days after the date of the enactment of this title, the Director of the Office of Personnel Management shall prescribe regulations providing for an initial, experimental application of the amendments made by this title, which shall begin on the first day of the first applicable pay period which begins on or after October 1, 1981. Such regulations shall provide that the merit pay system and the cash

award program will apply with respect to positions only in 3 Executive departments designated by the Director.

(2) Within 30 days after the end of each of the first two fiscal years to which such amendments apply, the Director shall prepare and transmit to each House of the Congress a report on the merit pay system and the cash award program, including an evaluation of their effectiveness and the manner in which they are administered. The second such report shall include proposed regulations which would provide for adjustments which would be appropriate in the event such system or such program does not continue by reason of paragraph (3).

(3) The provisions of the regulations under paragraph (1) providing for an initial, limited experimental application with respect to the merit pay system and the cash award program shall cease to have effect and the amendments made by this title relating to such system and such program shall have full effect (without regard to the limitations under paragraph (1)) beginning on the 90th day of continuous session of Congress following the date on which the second annual report is transmitted to the Congress under paragraph (2), unless the Congress before such day adopts a concurrent resolution which states that the Congress does not favor the continuance of such system and such program. If such a resolution is adopted with respect to such system and such program before such date, then the provisions of such regulations and such amendments relating to such system and such program shall cease to have effect on such 90th day (or, if later, 30 days after the date of the adoption of such resolution).

(4) For purposes of paragraph (3), the continuity of a session of Congress shall be considered to be broken only by an adjournment of the Congress sine die, and the days on which either House of the Congress is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in the computation of the 90-day period under such paragraph.

"(b)(1) Except as provided in paragraph (2) of this subsection, a career appointee in an agency may not be involuntarily removed—

"(A) within 120 days after an appointment of the head of such agency; or

"(B) within 120 days after the appointment in such agency of such career appointee's most immediate supervisor who—

"(i) is a noncareer appointee; and

"(ii) has the authority to remove such career appointee.

"(2) Paragraph (1) of this subsection does not apply with respect to any removal under section 4314(b)(3) of this title.

Page 232, line 20, strike out "(b)" and insert in lieu thereof "(c)".

—Page 228, insert after the line 16 the following:

"(e) Except in cases where a reassignment is the result of an action initiated under section 4313(b)(3) of this title, a career appointee may be reassigned under subsection (a)(1) only if—

"(1) he consents to the reassignment; and

"(2) the reassignment is part of a program designed to enlarge the responsibilities of the career appointee and to advance his career in the Senior Executive Service.

No adverse personnel action shall be taken against a career appointee who exercises his right under this subsection to not consent to such a reassignment.

—Page 232, insert after line 19 the following:

Any career appointee removed under paragraph (2) of this subsection shall be entitled to appeal such removal to the Merit System Protection Board under section 7701 of this title.

—Page 237, insert after line 22 the following:

"(c) The Comptroller General of the United States shall review each performance appraisal system established under this section to determine if it meets the requirements of this subchapter and is consistent with the merit system principles established under chapter 23 of this title. The Comptroller General shall report the results of each such review to the Office of Personnel Management to assist the Office in carrying out its responsibilities under subsection (d) of this section.

Page 237, line 23, strike out "(c)" and insert in lieu thereof "(d)".

Page 237, beginning on line 25, strike out "or regulations under this subchapter," and insert in lieu theerof ", regulations under this subchapter, or the merit system principles established under chapter 23 of this title,".

—Page 245, after line 15, insert the following:

"(d) The rate of basic pay for any career appointee may be reduced from any rate of basic pay to any lower rate of basic pay only—

"(1) for such cause as will promote the efficiency of the service; and

"(2) after 15 days' advance written notice to such appointee, containing a complete statement of all the reasons for such reduction.

Any career appointee whose rate of pay is reduced in violation of this subsection may appeal such reduction to the Merit Systems Protection Board.

---

H.R. 11280

By Mr. HARRIS:

—Page 382, after line 9, insert the following new section:

BASIC WORKWEEK OF FIREFIGHTERS

SEC. 1101. (a) Chapter 61 of title 5, United States Code, relating to hours of work, is amended by inserting after section 6101 the following new section:

"§ 6102. Basic workweek of firefighters

"(a) The regularly scheduled administrative workweek of each firefighter shall be an average of 56 hours per week, computed on the basis of a period of 21 consecutive days. The duration and frequency of work-shifts occurring within such period shall be determined under regulations prescribed by the Office of Personnel Management.

"(b) For the purpose of this section, 'firefighter' means an employee in an Executive agency, the duties of whose position are primarily to perform or to supervise work directly connected with the control and extinguishment of fires or the maintenance and use of firefighting apparatus and equipment. Such term does not include any employee who has a regularly scheduled administrative workweek of 40 hours which is established under section 6101(a)(2)(A) of this title."

(b)(1) Section 5545 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(e)(1) Each firefighter with a regularly scheduled administrative workweek established under section 6102(a) of this title shall be entitled, in lieu of premium pay provided by other provisions of this subchapter (other than premium pay provided in paragraph (2) of this subsection), to premium pay equal to 25 percent of so much of his annual rate of basic pay as does not exceed the minimum rate of basic pay for GS–10.

"(2) Hours of work officially ordered or approved in excess of the regularly scheduled administrative workweek established under section 6102(a) of this title are overtime work and shall be paid for in accordance with the rates specified in section 5542 of this title.

"(3) For the purpose of this subsection, 'firefighter' has the meaning set forth in section 6102(b) of this title.".

(2) Section 5545(c)(1) of title 5, United States Code, is amended by inserting ", unless subject to subsection (e) of this section," after "shall receive".

(3) Section 5547 of title 5, United States Code, is amended by striking out "sections 5542, 5545(a)–(c), and 5546 (a), (b)" and inserting in lieu thereof "sections 5542, 5545 (a)–(c) and (e), and 5546 (a) and (b)".

(4) Sections 5595(c), 8114(e), 8331(3)(C), and 8704(c) of title 5, United States Code, are each amended by striking out "section 5545 (c)(1)" and inserting in lieu thereof "section 5545(c)(1) and (c)(1)".

(c) The analysis of chapter 61 of title 5, United States Code, is amended by inserting after the item relating to section 6101 the following new item:

"6102. Basic workweek of firefighters.".

(d) The amendments made by this section shall take effect at the beginning of the first applicable pay period which begins at least 60 days after the date of the enactment of this Act.

Redesignate the following sections (and references thereto) accordingly.

H.R. 11280

By Mr. STEERS:

—Page 144 strike out line 16 and all that follows down through line 19 on page 145 and insert in lieu thereof the following:

"§ 1102. Appointment of members of the Office of Personnel Management

"The Office of Personnel Management is composed of three Commissioners appointed by the President, by and with the advice and consent of the Senate, not more than two of whom may be adherents of the same political party. No Commissioner of the Office of Personnel Management may hold another office or position in the Government of the United States.

"§ 1103. Term of office; filling vacancies; removal; quorum

"(a) The term of office of each Commissioner of the Office of Personnel Management is four years.

"(b) Any Commissioner appointed to fill a vacancy occurring before the end of a term of office of his predecessor serves for the remainder of that term.

"(c) Any Commissioner appointed for a four-year term may be re-appointed to any following term.

"(d) Any Commissioner may be removed by the President only upon notice and hearing and only for misconduct, inefficiency, neglect of duty, or malfeasance in office.

"(e) Except as otherwise provided in this title, the Office of Personnel Management shall act upon majority vote of those members present, and any two members present shall constitute a quorum for the transaction of business of the Board.

"§ 1104. Chairman; Vice Chairman

"(a) The President shall from time to time designate one of the Commissioners of the Office of Personnel Management as the Chairman of the Office of Personnel Management. The Chairman is the chief executive and administrative officer of the Office of Personnel Management.

"(b) The President shall from time to time designate one of the members of the Office of Personnel Management as Vice Chairman of the Office of Personnel Management. During the absence or disability of the Chairman, or when the office of Chairman is vacant, the Vice Chairman shall perform the functions vested in the Chairman.

"§ 1105. Functions of the Office.

"The following functions are vested in the Commissioners of the Office of Personnel Management, and shall be performed by the Commissioners, or by such employees of the Office of the Commissioners designate:"

Page 146, lines 23, 24, and 25; page 147, line 25; and page 148, line 1 strike out "Director" and insert in lieu thereof "Commissioner".

Redesignate the following provision (and references thereto) accordingly.

—Page 148 strike out lines 12 through 24 and insert in lieu thereof the following:

(b)(1) Section 5314 of title 5, United States Code, is amended by inserting at the end thereof the following new paragraph:

"(67) Director of the Office of Personnel Management".

(2) Section 5315 of such title is amended by inserting at the end thereof the following new paragraph:

"(122) Deputy Director of the Office of Personnel Management."

(3) Section 5316 of such title is amended by inserting at the end thereof the following new paragraph:

"(144) Associate Directors of the Office of Personnel Management (5).".

Page 165 strike out line 24 and all that follows down through line 12 on page 166 and insert the following:

(C)(1) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(123) Chairman of the Merit Systems Protection Board".

(2) Section 5316 of such title is amended by adding at the end thereof the following new paragraphs:

"(145) Members, Merit Systems Protection Board.

"(146) Special Counsel of the Merit Systems Protection Board."

(3)(A) Paragraph (17) of section 5314 of such title is hereby repealed.

(B) Paragraph (66) of section 5315 of such title is hereby repealed.

(C) Paragraph (99) of section 5316 of such title is hereby repealed.

Page 300, line 6, strike out "Senate" and insert in lieu thereof the following: "Senate, and shall be paid at an annual rate of basic pay equal to the maximum annual rate of basic pay currently paid, from time to time, under the General Schedule,".

Page 347, strike out lines 5 through 8 and insert in lieu thereof the following:

(e) Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(147) Members, Federal Labor Relations Authority (2).".

—Page 200, line 13, after "308." insert "(a)".

Page 200, after line 20, insert the following new subsection:

(b)(1) Section 8339(d) of title 5, United States Code, is amended by inserting "(1)" after "(d)" and by adding at the end thereof the following new paragraph:

"(2) The annuity of an employee retiring under this subchapter with less than 20 years, but at least 5 years of service as a law enforcement officer or firefighter, or any combination thereof, is computed under subsection (a) of this section, except that the annuity of such employee is computed with

respect to the service of such employee as a law enforcement officer or firefighter, or any combination thereof, by multiplying 2½ percent of his average pay by the years of that service.".

(2) The amendments made by this section shall apply with respect to individuals who become entitled to receive an annuity on or after the effective date of this Act.

—Page 200, line 13, after "308." insert "(a)".

Page 200, after line 20, insert the following new subsection:

(b)(1) Section 8339(d) of title 5, United States Code, is amended by inserting "(1)" after "(d)" and by adding at the end thereof the following new paragraph:

"(2) The annuity of an employee retiring under this subchapter with less than 20 years, but at least 5 years of service as a law enforcement officer or firefighter, or any combination thereof, is computed under subsection (a) of this section, except that the annuity of such employee is computed with respect to the service of such employee as a law enforcement officer or firefighter, or any combination thereof, by multiplying 2½ percent of his average pay by the years of that service.".

(2) Section 8339(h) of such title is amended by striking out "section 8336(d)" and inserting "section 8336(d)(1).".

(3) The amendments made by this section shall apply with respect to individuals who become entitled to receive an annuity on or after the effective date of this Act.

---

H.R. 11280

By Mr. TRIBLE:

—Page 209, line 14, insert "(a)" before "The amendments".

Page 209, insert after line 20 the following new subsection:

(b) In the case of any individual who, immediately before the date of the enactment of this Act, was a preference eligible (as defined in section 2108(3) of title 5, United States Code) employed in the civil service (as defined in section 2101(1) of title 5, United States Code)—

(1) the amendments made in section 305 of this Act shall not apply; and

(2) such individual shall be subject to the same requirements and restrictions as are provided in the provisions so amended (as in effect immediately before the date of the enactment of this Act) in the same manner and to the same extent as if this title had not been enacted;

except that references in such provisions (as in effect immediately before the date of the enactment of this Act) to the Civil Service Commission shall be construed to be references to the Office of Personnel Management.

—Page 390, insert after line 18 the following:

PREVAILING RATE EMPLOYEES; NIGHT DIFFERENTIAL

SEC. 1107. (a) Section 5334 of title 5, United States Code, is amended by adding at the end thereof the following:

"(g) A prevailing rate employee, as defined in section 5342(a)(2) of this title, who together with his position is brought within the purview of this subchapter and chapter 51 of this title at any time on or after January 1, 1966, and who within one year before, but not at the time of, such personnel action was receiving night differential on a regular night shift tour worked on a rotational basis or at regularly scheduled intervals or on an irregular basis shall be entitled to inclusion at the time of such personnel action of such night differential as a part of his basic pay, as a result of conversion to the General Schedule, to the same extent as if he was receiving such night differential on a regularly scheduled night shift at the time of such conversion.".

(b) The amendment made by this section shall apply with respect to pay periods beginning before, on, or after the effective date of this section. Any sums to which an individual is entitled under this section for pay periods ending before the effective date of this section and which have not been paid to such individual shall be paid to such individual in a lump sum.

Revise the table of contents accordingly.

---

H.R. 11280

By Mr. UDALL:

—Strike out title VII (beginning on line 12 of page 288 and ending on line 12 of page 348) and insert in lieu thereof the following:

TITLE VII—FEDERAL SERVICE LABOR-MANAGEMENT RELATIONS

FEDERAL SERVICE LABOR-MANAGEMENT RELATIONS

SEC. 701. So much of subpart F of part III of title 5, United States Code, as precedes subchapter II of chapter 71 thereof is amended to read as follows:

"Subpart F—Labor-Management and Employee Relations

"Chapter 71—LABOR-MANAGEMENT RELATIONS

"SUBCHAPTER I—GENERAL PROVISIONS

"Sec.
"7101. Findings and purpose.
"7102. Employees' rights.
"7103. Definitions; application.
"7104. Federal Labor Relations Authority.
"7105. Powers and duties of the Authority.
"7106. Management rights.

"SUBCHAPTER II—RIGHTS AND DUTIES OF AGENCIES AND LABOR ORGANIZATIONS

"Sec.
"7111. Exclusive recognition of labor organizations.
"7112. Determination of appropriate units for labor organization representation.
"7113. National consultation rights.
"7114. Representation rights and duties.
"7115. Allotments to representatives.
"7116. Unfair labor practices.
"7117. Duty to bargain in good faith; compelling need; duty to consult.
"7118. Prevention of unfair labor practices.
"7119. Negotiation impasses; Federal Service Impasses Panel.
"7120. Standards of conduct for labor organizations.

"SUBCHAPTER III—GRIEVANCES, APPEALS, AND REVIEW

"Sec.
"7121. Grievance procedures.
"7122. Exceptions to arbitral awards.
"7123. Judicial review; enforcement.

"SUBCHAPTER IV—ADMINISTRATIVE AND OTHER PROVISIONS

"Sec.
"7131. Reporting requirements for standards of conduct.
"7132. Official time.
"7133. Subpenas.
"7134. Compilation and publication of data.
"7135. Regulations.
"7136. Continuation of existing laws, recognitions, agreements, and procedures.

"SUBCHAPTER I—GENERAL PROVISIONS

"§ 7101. Findings and purpose

"(a) The Congress finds that experience in both private and public employment indicates that the statutory protection of the right of employees to organize, bargain collectively, and participate through labor organizations of their own choosing in decisions which affect them safeguards the public interest and contributes to the effective conduct of public business. Such protection facilities and encourages the amicable settlement of disputes between employees and their employers involving conditions of employment. Therefore, labor organizations and collective bargaining in the civil service are in the public interest.

"(b) It is the purpose of this chapter to prescribe certain rights and obligations of the employees of the Federal Government and to establish procedures which are designed to meet the special requirements and needs of the Federal Government.

"§ 7102. Employees' rights

"Each employee shall have the right to form, join, or assist any labor organization, or to refrain from any such activity, freely and without fear of penalty or reprisal, and each employee shall be protected in the exercise of such right. Except as otherwise provided under this chapter, such right includes the right—

"(1) to act for a labor organization in the capacity of a representative and the right, in such capacity, to present the views of the labor organization to heads of agencies and other officials of the executive branch of the Government, the Congress, or other appropriate authorities,

"(2) to engage in collective bargaining with respect to conditions of employment through representatives chosen by employees under this chapter, and

"(3) to engage in other lawful activities for the purpose of establishing, maintaining, and improving conditions of employment.

"§ 7103. Definitions; application

"(a) For the purpose of this chapter—

"(1) 'person' means an individual, labor organization, or agency;

"(2) 'employee' means an individual—

"(A) employed in an agency; or

"(B) whose employment in an agency has ceased because of any unfair labor practice under section 7116 of this title and who has not obtained any other regular and substantially equivalent employment, as determined under regulations prescribed by the Federal Labor Relations Authority;

but does not include—

"(i) an alien or noncitizen of the United States who occupies a position outside the United States;

"(ii) a member of the uniformed services;

"(iii) a supervisor or a management official; or

"(iv) an officer or employee in the Foreign Service of the United States employed in the Department of State, the Agency for International Development, or the International Communication Agency;

"(3) 'agency' means an Executive agency (including a nonappropriated fund instrumentality described in section 2105(c) of this title and the Veterans' Canteen Service, Veterans' Administration), the Library of Congress, and the Government Printing Office, but does not include—

"(A) the General Accounting Office;

"(B) the Federal Bureau of Investigation;

"(C) the Central Intelligence Agency;

"(D) the National Security Agency;

"(E) the Tennessee Valley Authority;

"(F) the Federal Labor Relations Authority; or

"(G) the Federal Service Impasses Panel;

"(4) 'labor organization' means an organization composed in whole or in part of employees, in which employees participate and pay dues, and which has as a purpose the dealing with an agency concerning grievances and conditions of employment, but does not include—

"(A) an organization whose basic purpose is entirely social, fraternal, or limited to special interest objectives which are only

incidentally related to conditions of employment;

"(B) an organization which, by its constitution, bylaws, tacit agreement among its members, or otherwise, denies membership because of race, color, creed, national origin, sex, age, preferential or nonpreferential civil service status, political affiliation, marital status, or handicapping condition; or

"(C) an organization sponsored by an agency;

"(5) 'dues' means dues, fees, and assessments;

"(6) 'Authority' means the Federal Labor Relations Authority described in section 7104(a) of this title;

"(7) 'Panel' means the Federal Service Impasses Panel described in section 7119(c) of this title;

"(8) 'collective bargaining agreement' means an agreement entered into as a result of collective bargaining pursuant to the provisions of this chapter;

"(9) 'grievance' means any complaint—

"(A) by any employee concerning any matter relating to the employment of the employee;

"(B) by any labor organization concerning any matter relating to the employment of any employee; or

"(C) by any employee, labor organization, or agency concerning—

"(i) the effect or interpretation, or a claim of breach, of a collective bargaining agreement; or

"(ii) any claimed violation, misinterpretation, or misapplication of any law, rule, or regulation affecting conditions of employment;

"(10) 'supervisor' means an individual employed by an agency having authority in the interest of the agency to hire, direct, assign, promote, reward, transfer, furlough, layoff, recall, suspend, discipline, or remove employees, to adjust their grievances, or to effectively recommend such action, if the exercise of the authority is not merely routine or clerical in nature but requires the consistent exercise of independent judgment, except that, with respect to any unit which includes firefighters or nurses, the term 'supervisor' includes only those individuals who devote a preponderance of their employment time to exercising such authority;

"(11) 'management official' means an individual employed by an agency in a position the duties and responsibilities of which require or authorize the individual to formulate, determine, or influence the policies of the agency;

"(12) 'collective bargaining' means the performance of the mutual obligation of the representative of an agency and the exclusive representative of employees in an appropriate unit in the agency to meet at reasonable times and to confer, consult, and bargain in a good-faith effort to reach agreement with respect to the conditions of employment affecting such employees and to execute, if requested by either party, a written document incorporating any collective bargaining agreement reached, but the obligation referred to in this paragraph does not compel either party to agree to a proposal or to make a concession;

"(13) 'confidential employee' means an employee who acts in a confidential capacity with respect to an individual who formulates or effectuates management policies in the field of labor-management relations;

"(14) 'conditions of employment' means personnel policies, practices, and matters, whether established by rule, regulation, or otherwise, affecting working conditions, except that such term does not include policies, practices, and matters—

"(A) relating to discrimination in employment on the basis of race, color, religion, sex, age, national origin, or handicapping condition, within an agency subject to the jurisdiction of the Equal Employment Opportunity Commission;

"(B) relating to political activities prohibited under subchapter III of chapter 73 of this title;

"(C) relating to the classification of any position; or

"(D) to the extent such matters are specifically provided for by Federal statute;

"(15) 'professional employee' means—

"(A) an employee engaged in the performance of work—

"(i) requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study in an institution of higher learning or a hospital (as distinguished from knowledge acquired by a general academic education, or from an apprenticeship, or from training in the performance of routine mental, manual, mechanical, or physical activities);

"(ii) requiring the consistent exercise of discretion and judgment in its performance;

"(iii) which is predominantly intellectual and varied in character (as distinguished from routine mental, manual, mechanical, or physical work); and

"(iv) which is of such character that the output produced or the result accomplished by such work cannot be standardized in relation to a given period of time; or

"(B) an employee who has completed the courses of specialized intellectual instruction and study described in subparagraph (A)(i) of this paragraph and is performing related work under appropriate direction or guidance to qualify the employee as a professional employee described in subparagraph (A) of this paragraph;

"(16) 'exclusive representative' means any labor organization which—

"(A) is certified as the exclusive representative of employees in an appropriate unit pursuant to section 7111 of this title; or

"(B) was recognized by an agency immediately before the effective date of this chapter as the exclusive representative of employees in an appropriate unit—

"(i) on the basis of an election, or

"(ii) on any basis other than an election, and continues to be so recognized in accordance with the provisions of this chapter;

"(17) 'firefighter' means any employee engaged in the performance of work directly connected with the control and extinguishment of fires or the maintenance and use of firefighting apparatus and equipment; and

"(18) 'United States' means the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, the Trust Territory of the Pacific Islands, and any territory or possession of the United States.

"(b) The President may issue an order excluding any agency or subdivision thereof from coverage under this chapter if the President determines that—

"(1) the agency or subdivision has as a primary function intelligence, counterintelligence, investigative, or security work, and

"(2) the provisions of this chapter cannot be applied to that agency or subdivision in a manner consistent with national security requirements and considerations.

§ 7104. Federal Labor Relations Authority

"(a) The Federal Labor Relations Authority is composed of three members, not more than two of whom may be adherents of the same political party. No member shall engage in any other business or employment or hold another office or position in the Government of the United States except as otherwise provided by law.

"(b) Members of the Authority shall be appointed by the President by and with the advice and consent of the Senate, and may be removed by the President only upon notice and hearing and only for misconduct, inefficiency, neglect of duty, of malfeasance in office. The President shall designate one member to serve as Chairman of the Authority.

"(c)(1) One of the original members of the Authority shall be appointed for a term of 1 year, one for a term of 3 years, and the Chairman for a term of 5 years. Thereafter, each member shall be appointed for a term of 5 years.

"(2) Notwithstanding paragraph (1) of this subsection, the term of any member shall not expire before the earlier of—

"(A) the date on which the member's successor takes office, or

"(B) the last day of the Congress beginning after the date on which the member's term of office would (but for this subparagraph) expire.

An individual chosen to fill a vacancy shall be appointed for the unexpired term of the member replaced.

"(d) A vacancy in the Authority shall not impair the right of the remaining members to exercise all of the powers of the Authority.

"(e) The Authority shall make an annual report to the President for transmittal to the Congress which shall include information as to the cases it has heard and the decisions it has rendered.

"(f)(1) The General Counsel of the Authority shall be appointed by the President, by and with the advice and consent of the Senate, for a term of 5 years. The General Counsel may be removed by the President.

"(2) The General Counsel may—

"(A) investigate alleged violations of this chapter,

"(B) file and prosecute complaints under this chapter,

"(C) intervene before the Authority in proceedings brought under section 7118 of this title, and

"(D) exercise such other powers of the Authority as the Authority may prescribe.

"(3) The General Counsel shall have direct authority over, and responsibility for, all employees in the office of General Counsel, including employees of the General Counsel in the regional offices of the Authority.

"(4) If a vacancy occurs in the office of General Counsel, the President shall promptly designate an Acting General Counsel and shall submit a nomination for General Counsel to the Senate within 40 days after the vacancy occurs, unless the Congress adjourns sine die before the expiration of the 40-day period, in which case the President shall submit the nomination to the Senate not later than 10 days after the Congress reconvenes.

"§ 7105. Powers and duties of the authority

"(a) The Authority shall provide leadership in establishing policies and guidance relating to matters under this chapter, and, except as otherwise provided, shall be responsible for carrying out the purpose of this chapter.

"(b) The Authority shall adopt an official seal which shall be judicially noticed.

"(c) The principal office of the Authority shall be in or about the District of Columbia, but the Authority may meet and exercise any or all of its powers at any time or place. Except as otherwise expressly provided by law, the Authority may, by one or more of its members or by such agents as it may designate, make any appropriate inquiry necessary to carry out its duties wherever per-

sons subject to this chapter are located. Any member who participates in the inquiry shall not be disqualified from later participating in a decision of the Authority in any case relating to the inquiry.

"(d) The Authority shall appoint an Executive Director and such regional directors, administrative law judges under section 3105 of this title, and other individuals as it may from time to time find necessary for the proper performance of its functions.

"(e)(1) The Authority may delegate to any regional director its authority under this chapter—

"(A) to determine whether a group of employees is an appropriate unit;

"(B) to conduct investigations and to provide for hearings;

"(C) to determine whether a question of representation exists and to direct an election; and

"(D) to conduct secret ballot elections and certify the results thereof.

"(2) The Authority may delegate to any administrative law judge appointed under subsection (d) of this section its authority under section 7118 of this title to determine whether any person has engaged in or is engaging in an unfair labor practice.

"(f) If the Authority delegates any authority to any regional director or administrative law judge to take any action pursuant to subsection (e) of this section, the Authority may, upon application by any interested person filed within 60 days after the date of the action, review such action, but the review shall not, unless specifically ordered by the Authority, operate as a stay of the action. The Authority may affirm, modify, or reverse any action reviewed under this subsection. If the Authority does not undertake to grant review of the action under this subsection within 60 days after the later of—

"(1) the date of the action; or

"(2) the date of the filing of any application under this subsection for review of the action;

the action shall become the action of the Authority at the end of such 60-day period.

"(g) In order to carry out its functions under this chapter, the Authority may—

"(1) hold hearings; and

"(2) administer oaths, take the testimony or deposition of any person under oath, and issue subpenas as provided in section 7133 of this title.

"(h) The Authority shall, by regulation, establish standards which shall be applied in determining the amount and circumstances in which reasonable attorney fees and reasonable costs and expenses of litigation may be awarded under section 7188(a)(6)(C) or 5596(b)(1)(B) of this title in connection with any unfair labor practice or any grievance processed under a procedure negotiated in accordance with this chapter.

"(i) Except as provided in section 518 of title 28, relating to litigation before the Supreme Court, attorneys designated by the Authority may appear for the Authority and represent the Authority in any civil action brought in connection with any function carried out by the Authority pursuant to this title or as otherwise authorized by law.

"§ 7206. Management rights

"(a) Subject to subsection (b) of this section, nothing in this chapter shall affect the authority of any management official of any agency—

"(1) to determine the mission, budget, organization, number of employees, and internal security practices of the agency; and

"(2) in accordance with applicable laws—

"(A) to hire, assign, direct, layoff, and retain employees in the agency, or to suspend, remove, reduce in grade or pay, or take other disciplinary action against such employees;

"(B) to assign work, to make determinations with respect to contracting out, and to determine the personnel by which agency operations shall be conducted;

"(C) with respect to filling positions, to make selections for appointments from—

"(i) among properly ranked and certified candidates for promotion; or

"(ii) any other appropriate source; and

"(D) to take whatever actions may be necessary to carry out the agency mission during emergencies.

"(b) Nothing in this section shall preclude any agency and any labor organization from negotiating—

"(1) at the election of the agency, on the numbers, types, and grades of employees or positions assigned to any organizational subdivision, work project, or tour of duty, or on the technology, methods, and means of performing work;

"(2) procedures which management officials of the agency will observe in exercising any authority under this section; or

"(3) appropriate arrangements for employees adversely affected by the exercise of any authority under this section by such management officials.

"SUBCHAPTER II—RIGHTS AND DUTIES OF AGENCIES AND LABOR ORGANIZATIONS

"§ 7111. Exclusive recognition of labor organizations

"(a) Exclusive recognition shall be accorded to a labor organization which has been selected by a majority of employees in an appropriate unit who participate in an election in conformity with the requirements of this chapter.

"(b)(1) If a petition is filed with the Authority—

"(A) by any person alleging—

"(i) in the case of an appropriate unit for which there is no exclusive representative that 30 percent of the employees in the appropriate unit wish to be represented for the purpose of collective bargaining by an exclusive representative, or

"(ii) in the case of an appropriate unit for which there is an exclusive representative that 30 percent of the employees in the unit allege that the exclusive representative is no longer the representative of the majority of the employees in the unit; or

"(B) by any person seeking clarification of, or an amendment to, a certification then in effect or a matter relating to representation;

the Authority shall investigate the petition, and if it has reasonable cause to believe that a question of representation exists, it shall provide an opportunity for a hearing (for which a transcript shall be kept) after reasonable notice. Except as provided under subsection (e) of this section, if the Authority finds on the record of the hearing that a question of representation exists, the Authority shall conduct an election on the question by secret ballot and shall subject to paragraph (2) of this subsection certify the results thereof. An election under this subsection shall not be conducted in any appropriate unit or in any subdivision thereof within which, in the preceding 12 calendar months, a valid election under this subsection has been held.

"(2)(A) If, after the 60-day period beginning on the date on which the petition is filed pursuant to paragraph (1) of this subsection, unresolved issues exist concerning—

"(i) the appropriateness of the unit in accordance with section 7112 of this title;

"(ii) the eligibility of one or more employees to vote in the proposed election; or

"(iii) other matters determined by the Authority to be relevant to the election;

the authority shall direct an election by secret ballot in the unit specified in the petition and announce the results thereof.

"(B) After conducting an election under subparagraph (A) of this paragraph, the Authority shall expedite the resolution of any disputed issues described in subparagraph (A) of this paragraph. If the Authority determines that matters raised by the disputed issues did not affect the outcome of the election, the Authority shall certify the results of the election. If the Authority determines that the matters affected the outcome of the election, it shall conduct a new election by secret ballot in accordance with such requirements as are appropriate on the basis of its determination, and shall certify the results thereof.

"(c) A labor organization which—

"(1) has been designated by at least 10 percent of the employees in the unit specified in any petition filed pursuant to subsection (b) of this section;

"(2) has submitted a valid copy of a current or recently expired collective bargaining agreement for the unit; or

"(3) has submitted other evidence that it is the exclusive representative of the employees involved;

may intervene with respect to a petition filed pursuant to subsection (b) of this section and shall be placed on the ballot of any election under such subsection (b) with respect to the petition.

"(d) The Authority shall determine who is eligible to vote in any election under this section and shall establish rules governing any such election, which shall include rules allowing employees eligible to vote the opportunity to choose—

"(1) from labor organizations on the ballot, that labor organization which the employees wish to have represent them; or

"(2) not to be represented by a labor organization. In any election in which no choice on the ballot receives a majority of the votes cast, a runoff election shall be conducted between the two choices receiving the highest number of votes. A labor organization which receives the majority of the votes cast in an election shall be certified by the Authority as the exclusive representative.

"(e) The Authority may, on the petition of a labor organization, certify the labor organization as an exclusive representative—

"(1) if, after investigation, the Authority determines that the conditions for a free and untrammeled election under this section cannot be established because the agency involved has engaged in or is engaging in an unfair labor practice described in section 7116(a) of this title; or

"(2) if, after investigation, the Authority determines that—

"(A) the labor organization represents a majority of employees in an appropriate unit;

"(B) the majority status was achieved without the benefit of any unfair labor practice described in section 7116 of this title;

"(C) no other person has filed a petition for recognition under subsection (b) of this section or a request for intervention under subsection (c) of this section; and

"(D) no other question of representation exists in the appropriate unit.

"(f) Any labor organization described in section 7103(a)(16)(B)(ii) of this title may petition for an election for the determination of that labor organization as the exclusive representative of an appropriate unit.

"(g) A labor organization seeking exclusive recognition shall submit to the Authority and the agency involved a roster of its officers and representatives, a copy of its constitution and bylaws, and a statement of its objectives.

"(h) Exclusive recognition shall not be accorded to a labor organization—

"(1) if the Authority determines that the labor organization is subject to corrupt influences or influences opposed to democratic principles;

"(2) in the case of a petition filed pursuant to subsection (b)(1)(A) of this sec-

tion, if there is not credible evidence that at least 30 percent of the employees in the unit specified in the petition wish to be represented for the purpose of collective bargaining by the labor organization seeking exclusive recognition;

"(3) if there is then in effect a lawful written collective bargaining agreement between the agency involved and an exclusive representative (other than the labor organization seeking exclusive recognition) covering any employees included in the unit specified in the petition, unless—

"(A) the collective bargaining agreement has been in effect for more than 3 years, or

"(B) the petition for exclusive recognition is filed not more than 120 days and not less than 60 days before the expiration date of the collective bargaining agreement; or

"(4) if the Authority has, within the previous 12 calendar months, conducted a secret ballot election for the unit described in any petition under this section and in such election a majority of the employees voting chose a labor organization for certification as the unit's exclusive representative.

"(i) Nothing in this section shall be construed to prohibit the waiving of hearings by stipulation for the purpose of a consent election in conformity with regulations and rules or decisions of the Authority.

"§ 7112. Determination of appropriate units for labor organization representation

"(a)(1) The Authority shall determine the appropriateness of any unit. The Authority shall determine in each case whether, in order to ensure employees the fullest freedom in exercising the rights guaranteed under this chapter, the appropriate unit should be established on an agency, plant, installation, functional, or other basis and shall determine any unit to be an appropriate unit only if the determination will ensure a clear and identifiable community of interest among the employees in the unit and will promote effective dealings with, and efficiency of the operations of, the agency involved.

"(b) A unit shall not be determined to be appropriate under this section solely on the basis of the extent to which employees in the proposed unit have organized, nor shall a unit be determined to be appropriate if it includes—

"(1) except as provided under section 7136(a)(2) of this title, any management official or supervisor, except that, with respect to a unit a majority of which is composed of firefighters or nurses, a unit which includes both supervisors and employees may be considered appropriate;

"(2) a confidential employee;

"(3) an employee engaged in personnel work in other than a purely clerical capacity;

"(4) an employee engaged in administering the provisions of this chapter;

"(5) both professional employees and other employees, unless a majority of the professional employees vote for inclusion in the unit;

"(6) any employee engaged in intelligence, counter-intelligence, investigative, or security work which directly affects national security; or

"(7) any employee primarily engaged in investigation or audit functions relating to the work of individuals employed by an agency whose duties directly affect the internal security of the agency but only if the functions are undertaken to ensure that the duties are discharged honestly and with integrity.

"(c) Any employee who is engaged in administering any provision of law relating to labor-management relations may not be represented by a labor organization—

"(1) which represents other individuals to whom such provision applies; or

"(2) which is affiliated directly or indirectly with an organization which repesents other individuals to whom such provision applies.

"(d) Two or more units which are in an agency and for which a labor organization is the exclusive representative may, upon petition by the agency or labor organization, be consolidated with or without an election into a single larger unit if the Authority considers the larger unit to be appropriate. The Authority shall certify the labor organization as the exclusive representative of the new larger unit.

"(e) In the case of the reorganization of one or more units for which, before reorganization, a labor organization was the exclusive representative of any such unit, the labor organization shall continue to be the exclusive representative for each such unit until new elections are held or a period of 45 days has elapsed, whichever first occurs.

"§ 7113. National consultation rights

"(a)(1) If, in connection with any agency, no labor organization has been accorded exclusive recognition on an agency basis, a labor organization which is the exclusive representative of a substantial number of the employees of the agency, as determined in accordance with criteria prescribed by the Authority, shall be granted national consultation rights by the agency. National consultation rights shall terminate when the labor organization no longer meets the criteria prescribed by the Authority. Any issue relating to any labor organization's eligibility for, or continuation of, national consultation rights shall be subject to determination by the Authority.

"(b)(1) Any labor organization having national consultation rights in connection with any agency under subsection (a) of this section shall—

"(A) be informed of any substantive change in conditions of employment proposed by the agency, and

"(B) be permitted reasonable time to present its views and recommendations regarding the changes.

"(2) If any views or recommendations are presented under paragraph (1) of this subsection to an agency by any labor organization—

"(A) the agency shall consider the views or recommendations before taking final action on any matter with respect to which the views or recommendations are presented; and

"(B) the agency shall provide the labor organization a written statement of the reasons for taking the final action.

"(c) Nothing in this section shall be construed to limit the right of any agency or exclusive representative to engage in collective bargaining.

"§ 7114. Representation rights and duties

"(a)(1) A labor organization which has been accorded exclusive recognition is the exclusive representative of the employees in the unit it represents and is entitled to act for, and negotiate collective bargaining agreements covering, all employees in the unit. An exclusive representative is responsible for representing the interests of all employees in the unit it represents without discrimination and without regard to labor organization membership.

"(2) Before any representative of an agency commences any investigatory interview of an employee in a unit concerning misconduct which could reasonably lead to suspension, reduction in grade or pay, or removal, the employee shall be informed of that employee's right under paragraph (3)(B) of this subsection to be represented by an exclusive representative.

"(3) An exclusive representative of an appropriate unit in an agency shall be given the opportunity to be represented at—

"(A) any formal discussion between one or more representatives of the agency and one or more employees in the unit or their representatives concerning any grievance or any personnel policy or practice or other general condition of employment; or

"(B) any investigatory interview of an employee in the unit by a representative of the agency if—

"(i) the employee reasonably believes that such interview may result in disciplinary action against the employee; and

"(ii) the employee requests such representation. Any agency and any exclusive representative of any appropriate unit in the agency, through appropriate representatives, shall meet and negotiate in good faith for the purpose of arriving at a collective bargaining agreement. The rights of an exclusive representative under the preceding provisions of this subsection shall not be construed to preclude an employee from being represented by an attorney or other representative, other than the exclusive representative, of the employee's own choosing in any appeal action under procedures other than procedures negotiated pursuant to this chapter.

"(b) The duty of an agency and an exclusive representative to negotiate in good faith under subsection (a) of this section shall include the obligation—

"(1) to approach the negotiations with a sincere resolve to reach a collective bargaining agreement;

"(2) to be represented at the negotiations by duly authorized representatives prepared to discuss and negotiate on any conditions of employment;

"(3) to meet at reasonable times and convenient places as frequently as may be necessary, and to avoid unnecessary delays;

"(4) in the case of an agency, to furnish to the exclusive representative involved, or its authorized representative, upon request and, to the extent not prohibited by law, data—

"(A) which is normally maintained by the agency in the regular course of business;

"(B) which is reasonably available and necessary for full and proper discussion, understanding, and negotiation of subjects within the scope of collective bargaining; and

"(C) which does not constitute guidance, advice, counsel, or training provided for management officials or supervisors, relating to collective bargaining; and

"(5) if agreement is reached, to execute on the request of any party to the negotiation a written document embodying the agreed terms, and to take such steps as are necessary to implement such agreement.

"§ 7115. Allotments to representatives

"(a) If an agency has received from an employee in an appropriate unit a written assignment which authorizes the agency to deduct from the pay of the employee amounts for the payment of regular and periodic dues of the exclusive representative of the unit, the agency shall honor the assignment and make an appropriate allotment pursuant to the assignment. Any such allotment shall be made at no cost to the exclusive representative or the employee. Except as provided under subsection (b) of this section, any such assignment may not be revoked for a period of 1 year.

"(b) An allotment under subsection (a) of this section for the deduction of dues with respect to any employee shall terminate when—

"(1) the agreement between the agency and the exclusive representative involved ceases to be applicable to the employee; or

"(2) the employee is suspended or expelled from membership in the exclusive representative.

"(c)(1) Subject to paragraph (2) of this

subsection, if a petition has been filed with the Authority by a labor organization alleging that 10 percent of the employees in an appropriate unit in an agency have membership in the labor organization, the Authority shall investigate the petition to determine its validity. Upon certification by the Authority of the validity of the petition, the agency shall have a duty to negotiate with the labor organization solely concerning the deduction of dues of the labor organization from the pay of the members of the labor organization who are employees in the unit and who make a voluntary allotment for such purpose.

"(2)(A) The provisions of paragraph (1) of this subsection shall not apply in the case of any appropriate unit for which there is an exclusive representative.

"(B) Any agreement under paragraph (1) of this subsection between a lobar organization and an agency with respect to an appropriate uniti shall be null and void upon the certification of an exclusive representative of the unit.

"§ 7116. Unfair labor practices.

"(a) For the purpose of this chapter, it shall be an unfair labor practice for an agency—

"(1) to interfere with, restrain, or coerce any employee in the exercise by the employee of any right under this chapter;

"(2) to encourage or discourage membership in any labor organization by discrimination in connection with hiring, tenure, promotion, or other conditions of employment;

"(3) to sponsor, control, or otherwise assist any labor organization, other than to furnish, upon request, customary and routine services and facilities if the services and facilities are also furnished on an impartial basis to other labor organizations having equivalent status;

"(4) to discipline or discriminate against an employee because the employee has filed a complaint, affidavit, or petition, or has given any information or testimony under this chapter;

"(5) to refuse to consult, confer, or negotiate in good faith with a labor organization as required by this chapter;

"(6) to fail or refuse to cooperate in impasse procedures and impasse decisions as required by this chapter;

"(7) to prescribe any rule or regulation which restricts the scope of collective bargaining permitted by this chapter or which is in conflict with any applicable collective bargaining agreement; or

(8) to otherwise fail or refuse to comply with any provision of this chapter.

"(b) For the purpose of this chapter, it shall be an unfair labor practice for a labor organization—

"(1) to interfere with, restrain, or coerce any employee in the exercise by the employee of any right under this chapter;

"(2) to cause or attempt to cause an agency to discriminate against any employee in the exercise by the employee of any right under this chapter;

"(3) to coerce discipline, fine, or attempt to coerce a member of the labor organization as punishment, reprisal, or for the purpose of hindering or impeding the member's work performance or productivity as an employee or the discharge of the member's duties as an employee;

"(4) to discriminate against an employee with regard to the terms or conditions of membership in the labor organization on the basis of race, color, creed, national origin, sex, age, preferential or nonpreferential civil service status, political affiliation, marital status, or handicapping condition;

"(5) to refuse to consult, confer, or negotiate in good faith with an agency as required by this chapter;

"(6) to fail or refuse to cooperate in impasse procedures and impasse decisions as required by this chapter;

"(7)(A) to call, or participate in, a strike, work stoppage, or slowdown, or picketing of an agency in a labor-management dispute if such picketing interferes with an agency's operations, or

"(B) to condone any activity described in subparagraph (A) of this paragraph by failing to take action to prevent or stop such activity; or

"(8) to otherwise fail or refuse to comply with any provision of this chapter.

Nothing in paragraph (7) shall result in any informational picketing which does not interfere with an agency's operations being considered as an unfair labor practice.

"(c) For the purpose of this chapter it shall be an unfair labor practice for an exclusive representative to deny membership to any employee in the appropriate unit represented by such exclusive representative except for failure—

(1) to meet reasonable occupational standards uniformly required for admission, or

(2) to tender dues uniformly required as a condition of acquiring and retaining membership.

This subsection does not preclude any labor organization from enforcing discipline in accordance with procedures under its constitution or bylaws to the extent consistent with the provisions of this chapter.

"(d) Issues which may properly be raised under—

"(1) an appeals procedure prescribed by or pursuant to law, or

"(2) any grievance procedure negotiated pursuant to section 7121 of this title;

may, at the election of the aggrieved party, be raised either—

(A) under such appeals procedure or such grievance procedure, as appropriate; or

(B) if applicable, under the procedure for resolving complaints of unfair labor practices under section 7118 of this title.

An election under the preceding sentence shall be made at such time and in such manner as the Authority shall prescribe. Any decision under subparagraph (B) of this subsection on any such issue shall not be construed to be a determination of an unfair labor practice under this chapter or a precedent for any such determination.

"§ 7117. Duty to bargain in good faith; compelling needs; duty to consent

"(a)(1) Subject to paragraph (2) of this subsection, the duty to bargain in good faith shall, to the extent not inconsistent with any Federal law or any Government-wide rule or regulation, extend to matters which are the subject of any rule or regulation only if the rule or regulation is not a Government-wide rule or regulation.

"(2) The duty to bargain in good faith shall, to the extent not inconsistent with Federal law or any Government-wide or regulation, extend to matters which are the subject of any agency rule or regulation referred to in paragraph (3) of this subsection only if the Authority has determined under subsection (b) of this section that no compelling need (as determined under regulations prescribed by the Authority) exists for the rule or regulation.

"(3) Paragraph (2) of this subsection applies to any rule or regulation issued by any agency or issued by any primary national subdivision of such agency, unless an exclusive representative represents an appropriate unit including not less than a majority of the employees in the issuing agency or primary national subdivision, as the case may be, to whom the rule or regulation is applicable.

"(b)(11) In any case of collective bargaining in which an exclusive representative alleges that no compelling need exists for any rule or regulation referred to in subsection (a)(3) of this section which is then in effect and which governs any matter at issue in such collective bargaining, the Authority shall determine under paragraph (2) of this subsection, in accordance with regulations prescribed by the Authority, whether such a compelling need exists.

"(2) For the purpose of this section, a compelling need shall be determined not to exist for any rule or regulation only if—

"(A) the agency, or primary national subdivision, as the case may be, which issued the rule or regulation informs the Authority in writing that a compelling need for the rule or regulation does not exist; or

"(B) the Authority determines, after a hearing under this subsection, that a compelling need for the rule or regulation does not exist.

"(3) Any hearing under this subsection shall be expedited to the extent practicable and shall not include the General Counsel as a party.

"(4) The agency, or primary national subdivision, as the case may be, which issued the rule or regulation shall be a necessary party at any hearing under this subsection.

"(c)(1) Except in any case to which subsection (b) of this section applies, if an agency involved in collective bargaining with an exclusive representative alleges that the duty to bargain in good faith does not extend to any matter, the exclusive representative may appeal the allegation to the Authority in accordance with the provisions of this subsection.

"(2) The exclusive representative may, on or before the 15th day after the date on which the agency first makes the allegation referred to in paragraph (1) of this subsection, institute an appeal under this subsection by—

"(A) filing a petition with the Authority; and

"(B) furnishing a copy of the petition to the head of the agency.

"(3) On or before the 15th day after the date of the receipt by the head of the agency of the copy of the petition under paragraph (2)(B) of this subsection, the agency shall—

"(A) file with the Authority a statement—

"(i) withdrawing the allegation; or

"(ii) setting forth in full its reasons supporting the allegation; and

"(B) furnish a copy of such statement to the exclusive representative.

"(4) On or before the 15th day after the date of the receipt by the exclusive representative of a copy of a statement under paragraph (3)(B) of this subsection, the exclusive representative shall file with the Authority its response to the statement.

"(5) The Authority shall expedite proceedings under this subsection to the extent practicable and shall issue to the exclusive representative and to the agency a written decision on the allegation and specific reasons therefor at the earliest practicable date.

"(d)(1) A labor organization which is the exclusive representative of a substantial number of employees, determined in accordance with criteria prescribed by the Authority, shall be granted consultation rights by any agency with respect to any Government-wide rule or regulation issued by the agency effecting any substantive change in any condition of employment. Such consultation rights shall terminate when the labor organization no longer meets the criteria prescribed by the Authority. Any issue relating to a labor organization's eligibility for, or continuation of, such consultation rights shall be subject to determination by the Authority.

"(2) A labor organization having consultation rights under paragraph (1) of this subsection shall—

"(A) be informed of any substantive change in conditions of employment proposed by the agency, and

"(B) shall be permitted reasonable time to present its views and recommendations regarding the changes.

"(3) If any views or recommendations are presented under paragraph (2) of this subsection to an agency by any labor organization—

"(A) the agency shall consider the views or recommendations before taking final action on any matter with respect to which the views or recommendations are presented; and

"(B) the agency shall provide the labor organization a written statement of the reasons for taking the final action.

"§ 7118. Prevention of unfair labor practices

"(a)(1) If an agency or labor organization is charged by any person with having engaged in or engaging in an unfair labor practice, the General Counsel shall investigate the charge and may issue and cause to be served upon the agency or labor organization a complaint. In any case in which the General Counsel does not issue a complaint because the charge fails to state an unfair labor practice, the General Counsel shall provide the person making the charge a written statement of the reasons for not issuing a complaint.

"(2) Any complaint under paragraph (1) of this subsection shall contain a notice—

"(A) of the charge;

"(B) that a hearing will be held before the Authority (or any member thereof or before an individual employed by the Authority and designated for such purpose); and

"(C) of the time and place fixed for the hearing.

"(3) The labor organization or agency involved shall have the right to file an answer to the original and any amended complaint and to appear in person or otherwise and give testimony at the time and place fixed in the complaint for the hearing.

"(4)(A) Except as provided in subparagraph (B) of this paragraph, no complaint shall be issued based on any alleged unfair labor practice which occurred more than 6 months before the filing of the charge with the Authority.

"(B) If the General Counsel determines that the person filing any charge was prevented from filing the charge during the 6-month period referred to in subparagraph (A) of this paragraph by reason of—

"(i) any failure of the agency or labor organization against which the charge is made to perform a duty owed to the person, or

"(ii) any concealment which prevented discovery of the alleged unfair labor practice during the 6-month period,

the General Counsel may issue a complaint based on the charge if the charge was filed during the 6-month period beginning on the day of the discovery by the person of the alleged unfair labor practice.

"(5) The Authority (or any member thereof or any individual employed by the Authority and designated for such purpose) shall conduct a hearing on the complaint not earlier than 5 days after the date on which the complaint is served. In the discretion of the individual or individuals conducting the hearing, any person involved may be allowed to intervene in the hearing and to present testimony. Any such hearing shall, to the extent practicable, be conducted in accordance with the provisions of subchapter II of chapter 5 of this title, except that the parties shall not be bound by rules of evidence, whether statutory, common law, or adopted by a court. A transcript shall be kept of the hearing. After such a hearing the Authority, in its discretion, may upon notice receive further evidence or hear argument.

"(6) If the Authority (or any member thereof or any individual employed by the Authority and designated for such purpose) determines after any hearing on a complaint under paragraph (5) of this subsection that the preponderance of the evidence received demonstrates that the agency or labor organization named in the complaint has engaged in or is engaging in an unfair labor practice, then the individual or individuals conducting the hearing shall state in writing their findings of fact and shall issue and cause to be served on the agency or labor organization an order—

"(A) to cease and desist from any such unfair labor practice in which the agency or labor organization is engaged;

"(B) directing that a collective bargaining agreement be amended and that the amendments be given retroactive effect;

"(C) requiring an award of reasonable attorney fees;

"(D) requiring reinstatement of an employee with backpay in accordance with section 5596 of this title; or

"(E) including any combination of the actions described in subparagraphs (A) through (D) of this paragraph or such other action as will carry out the purpose of this chapter.

If any such order requires reinstatement of an employee with backpay, backpay may be required of the agency (as provided in section 5596 of this title) or of the labor organization, as the case may be, which is found to have engaged in the unfair labor practice involved.

"(7) If the individual or individuals conducting the hearing determine that the preponderance of the evidence received fails to demonstrate that the agency or labor organization named in the complaint has engaged in or is engaging in an unfair labor practice, the individual or individuals shall state in writing their findings of fact and shall issue an order dismissing the complaint.

"(b) In connection with any matter before the Authority in any proceeding under this section, the Authority may request from the Director of the Office of Personnel Management an opinion concerning the proper interpretation of rules, regulations, or other policy directives issued by the Office of Personnel Management. Any interpretation under the preceding sentence shall be advisory in nature and shall not be binding on the Authority.

"§ 7119. Negotiation impasses; Federal Service Impasses Panel

"(a) The Federal Mediation and Conciliation Service shall provide services and assistance to agencies and exclusive representatives in the resolution of negotiation impasses. The Service shall determine under what circumstances and in what manner it shall provide services and assistance.

"(b) If voluntary arrangements, including the services of the Federal Mediation and Conciliation Service or any other third-party mediation, fail to resolve a negotiation impasse—

"(1) either party may request the Federal Service Impasses Panel to consider the matter, or

"(2) the parties may agree to adopt a procedure for binding arbitration of the negotiation impasse, but only if the procedure is approved by the Panel.

"(c)(1) The Federal Service Impasse Panel is an entity within the Authority, the function of which is to provide assistance in resolving negotiation impasses between agencies and exclusive representatives.

"(2) The Panel shall be composed of a Chairman and at least six other members, who shall be appointed by the President, solely on the basis of fitness to perform the duties and functions involved, from among individuals who are familiar with Government operations and knowledgeable in labor-management relations.

"(3) Of the original members of the Panel 2 members shall be appointed for a term of 1 year, 2 members shall be appointed for a term of 3 years, and the Chairman and the remaining members shall be appointed for a term of 5 years. Thereafter each member shall be appointed for a term of 5 years, except that an individual chosen to fill a vacancy shall be appointed for the unexpired term of the member replaced. Any member of the Panel may be removed by the President.

"(4) The Panel may appoint an Executive Director and any other individuals it may from time to time find necessary for the proper performance of its duties. Each member of the Panel who is not an employee (as defined in section 2105 of this title) is entitled to pay at a rate equal to the daily equivalent of the maximum annual rate of basic pay then currently paid under the General Schedule for each day he is engaged in the performance of official business of the Panel, including travel time, and is entitled to travel expenses as provided under section 5703 of this title.

"(5)(A) The Panel or its designee shall promptly investigate any impasse presented to it under subsection (b) of this section. The Panel shall consider the impasse and shall either—

"(i) recommend to the parties procedures for the resolution of the impasse; or

"(ii) assist the parties in resolving through whatever methods and procedures, including factfinding and recommendations, it may consider appropriate to accomplish the purpose of this section.

"(B) If the parties do not arrive at a settlement after assistance by the Panel under subparagraph (A) of this paragraph, the Panel may—

"(i) hold hearings;

"(ii) administer oaths, take the testimony or deposition of any person under oath, and issue subpenas as provided in section 7133 of this title; and

"(iii) take whatever action is necessary and not inconsistent with this chapter to resolve the impasse.

"(C) Notice of any final action of the Panel under this section shall be promptly served upon the parties, and the action shall be binding on such parties during the term of the agreement, unless the parties agree otherwise.

"§ 7120. Standards of conduct for labor organizations.

"(a) A labor organization representing or seeking to represent employees pursuant to this chapter shall adopt, maintain, and enforce governing requirements containing explicit and detailed provisions to which it shall subscribe, which include provisions for—

"(1) the maintenance of democratic procedures and practices, including—

"(A) provisions for periodic elections to be conducted subject to recognized safeguards, and

"(B) provisions defining and securing the right of individual members to—

"(i) participate in the affairs of the labor organization,

"(ii) fair and equal treatment under the governing rules of the organization, and

"(iii) fair process in disciplinary proceedings;

"(2) the prohibition of business or financial interests on the part of labor organization officers and agents which conflict with their duty to the organization and its members; and

"(3) the maintenance of fiscal integrity in the conduct of the affairs of the labor organi-

zation, including provisions for accounting and financial controls and regular financial reports or summaries to be made available to its members.

"(b) This chapter does not authorize participation in the management of a labor organization or acting as a representative of a labor organization by a management official or a supervisor, except as specifically provided in this chapter, or by an employee if the participation or activity would result in a conflict or apparent conflict of interest or would otherwise be incompatible with law or with the official duties of the employee.

"SUBCHAPTER III—GRIEVANCES

"§ 7121. Grievance procedures

"(a) Any collective bargaining agreement shall provide procedures for the settlement of grievances, including questions of arbitrability. Any employee who has a grievance and who is covered by a collective bargaining agreement may elect to have the grievance processed under a procedure negotiated in accordance with this chapter.

"(b) Any negotiated grievance procedure referred to in subsection (a) of this section shall—

"(1) be fair and simple,

"(2) provide for expeditious processing, and

"(3) include procedures that—

"(A) assure an exclusive representative the right, in its own behalf or on behalf of any employee in the unit represented by the exclusive representative, to present and process grievances;

"(B) assure such an employee the right to present a grievance on the employee's own behalf, and assure the exclusive representative the right to be present during the grievance proceeding; and

"(C) provide that any grievance not satisfactorily settled under the negotiated grievance procedure shall be subject to binding arbitration which may be invoked by either the exclusive representative or the agency.

"(c) Any party to a collective bargaining agreement aggrieved by the failure, neglect, or refusal of the other party to proceed to arbitration pursuant to the negotiated grievance procedure provided in the agreement may file a petition in the appropriate United States district court requesting an order directing that arbitration proceed pursuant to the procedures provided therefore in the agreement. The court shall hear the matter without jury, expedite the hearing to the maximum extent practicable, and issue any order it determines appropriate.

"(d) The preceding subsections of this section shall not apply with respect to any grievance concerning—

"(1) any claimed violation of subchapter III of chapter 73 of this title (relating to prohibited political activities);

"(2) retirement, life insurance, or health insurance;

"(3) a suspension or removal under section 7532 of this title;

"(4) an examination, certification, or appointment; or

"(5) the classification of any position which does not result in the reduction in grade or pay of an employee.

"(e) The processing of a grievance under a procedure negotiated under this chapter shall not limit the right of an aggrieved employee to request the Equal Employment Opportunity Commission to review a final decision under the procedure—

"(1) pursuant to section 3 of Reorganization Plan Numbered 1 of 1978; or

"(2) where applicable, in such manner as shall otherwise be prescribed by regulation by the Equal Employment Opportunity Commission.

"§ 7122. Exceptions to arbitral awards

"(a) Either party to arbitration under this chapter may file with the Authority an exception to any arbitrator's award pursuant to the arbitration. If upon review the Authority finds that the award is deficient because—

"(1) it is contrary to any law, rule, or regulation;

"(2) it was obtained by corruption, fraud, or other misconduct;

"(3) the arbitrator exercised partiality in making the award; or

"(4) the arbitrator exceeded powers granted to the arbitrator;

the Authority may take such action and make such recommendations concerning the award as it considers necessary, consist with applicable laws, rules, or regulations.

"(b) If no exception to an arbitrator's award is filed under subsection (a) of this section during the 60-day period beginning on the date of such award, the award shall be final and binding. An agency shall take the actions required by an arbitrator's final award. The award may include the payment of backpay (as provided in section 5596 of this title).

"§ 7123. Judicial review; enforcement

"(a) Any person aggrieved by a final order of the Authority under—

"(1) section 7118 of this title (involving an unfair labor practice);

"(2) section 7122 of this title (involving an award by an arbitrator); or

"(3) section 7112 of this title (involving an appropriate unit determination),

may, during the 60-day period beginning on the date on which the order was issued, institute an action for judicial review of the Authority's order in the United States court of appeals in the circuit in which the person resides or transacts business or in the United States Court of Appeals for the District of Columbia.

"(b) The Authority may petition any appropriate United States court of appeals for the enforcement of any order of the Authority and for appropriate temporary relief or restraining order.

"(c) Upon the filing of a petition under subsection (a) of this section for judicial review or under subsection (b) of this section for enforcement, the Authority shall file in the court the record in the proceedings, as provided in section 2112 of title 28. Upon the filing of the petition, the court shall cause notice thereof to be served to the parties involved, and thereupon shall have jurisdiction of the proceeding and of the question determined therein and may grant any temporary relief (including a temporary restraining order) it considers just and proper, and may make and enter a decree affirming and enforcing, modifying and enforcing as so modified, or setting aside in whole or in part the order of the Authority. The filing of a petition under subsection (a) or (b) of this section shall not operate as a stay of the Authority's order unless the court specifically orders the stay. Review of the Authority's order shall be on the record in accordance with section 706 of this title. No objection that has not been urged before the Authority, or its designee, shall be considered by the court, unless the failure or neglect to urge the objection is excused because of extraordinary circumstances. The findings of the Authority with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive. If any person applies to the court for leave to adduce additional evidence and shows to the satisfaction of the court that the additional evidence is material and that there were reasonable grounds for the failure to adduce the evidence in the hearing before the Authority, or its designee, the court may order the additional evidence to be taken before the Authority, or its designee, and to be made a part of the record. The Authority may modify its findings as to the facts, or make new findings by reason of additional evidence so taken and filed. The Authority shall file its modified or new findings, which, with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive. The Authority shall file its recommendations, if any, for the modification or setting aside of its original order. Upon the filing of the record with the court, the jurisdiction of the court shall be exclusive and its judgment and decree shall be final, except that the judgment and decree shall be subject to review by the Supreme Court of the United States upon writ of certiorari or certification as provided in section 1254 of title 28.

"(d) The Authority may, upon issuance of a complaint as provided in section 7118 of this title charging that any person has engaged in or is engaging in an unfair labor practice, petition any United States district court within any district in which the unfair labor practice in question is alleged to have occurred or in which such person resides or transacts business for appropriate temporary relief or restraining order. Upon the filing of the petition, the court shall cause notice thereof to be served upon the person, and thereupon shall have jurisdiction to grant any temporary relief (including a temporary restraining order) it considers just and proper.

"SUBCHAPTER IV—ADMINISTRATIVE AND OTHER PROVISIONS

"§ 7131. Reporting requirements for standards of conduct

"The provisions of subchapter III of chapter 11 of title 29 shall be applicable to labor organizations which have been or are seeking to be certified as exclusive representatives under this chapter, and to the organizations' officers, agents, shop stewards, other representatives, and members to the extent to which the provisions would be applicable if the agency were an employer under section 402 of title 29. In addition to the authority conferred on him under section 438 of title 29, the Secretary of Labor shall prescribe regulations, with the written concurrence of the Authority, providing for simplified reports for any such labor organization. The Secretary of Labor may revoke the provision for simplified reports of any such labor organization if the Secretary determines, after any investigation the Secretary considers proper and after reasonable notice and opportunity for a hearing, that the purpose of this chapter and of chapter 11 of title 29 would be served thereby.

§ 7132. Official time

"(a) Any employee representing an exclusive representative in the negotiation of a collective bargaining agreement under this chapter shall be authorized official time for such purposes, including attendance at impasse proceeding, during the time the employee otherwise would be in a duty status. The number of employees for whom official time is authorized under this subsection shall not exceed the number of individuals designated as representing the agency for such purposes.

"(b) Any activities performed by any employee relating to the internal business of a labor organization (including the solicitation of membership, elections of labor organization officials, and collection of dues) shall be performed during the time the employee is in a nonduty status.

"(c) Except as provided in subsection (a) of this section, the Authority shall determine whether any employee participating for, or on behalf of, a labor organization in any phase of proceedings before the Authority shall be authorized official time for such purpose during the time the employee otherwise would be in a duty status.

"(d) Except as provided in the preceding subsections of this section—

"(1) any employee representing an exclusive representative, or

"(2) in connection with any other matter covered by this chapter, any employee in an appropriate unit represented by an exclusive representative,

shall be granted official time in any amount the agency and the exclusive representative

involved agree to be reasonable, necessary, and in the public interest.

"§ 7133. Subpenas

"(a) Any member of the Authority, the General Counsel, or the Panel, any administrative law judge appointed by the Authority under section 3105 of this title, and any employee of the Authority designated by the Authority may—

"(1) issue subpenas requiring the attendance and testimony of witnesses and the production of documentary or other evidence from any place in the United States; and

"(2) administer oaths, take or order the taking of depositions, order responses to written interrogatories, examine witnesses, and receive evidence.

"(b) In the case of contumacy or failure to obey a subpena issued under subsection (a)(1) of this section, the United States district court for the judicial district in which the person to whom the subpena is addressed resides or is served may issue an order requiring such person to appear at any designated place to testify or to produce documentary or other evidence. Any failure to obey the order of the court may be punished by the court as a contempt thereof.

"(c) Witnesses (whether appearing voluntarily or under subpena) shall be paid the same fee and mileage allowances which are paid subpenaed witnesses in the courts of the United States.

"§ 7134. Compilation and publication of data

"(a) The Authority shall maintain a file of its proceedings and copies of all available agreements and arbitration decisions, and shall publish the texts of its decisions and the actions taken by the Panel under section 7119 of this title.

"(b) All files maintained under subsection (a) of this section shall be open to inspection and reproduction in accordance with the provisions of sections 552 and 552a of this title.

"§ 7135. Regulations

"The Authority, the Federal Mediation and Conciliation Service, and the Panel shall each prescribe rules and regulations to carry out the provisions of this chapter applicable to each of them, respectively. The provisions of subchapter II of chapter 5 of this title shall be applicable to the issuance, revision, or repeal of any such rule or regulation.

"§ 7136. Continuation of existing laws, recognitions, agreements, and procedures

"(a) Nothing contained in this chapter shall preclude—

"(1) the renewal or continuation of an exclusive recognition, certification of an exclusive representative, or a lawful agreement between an agency and an exclusive representative of its employees, which is entered into before the effective date of this chapter; or

"(2) the renewal, continuation, or initial according of recognition for units of management officials or supervisors represented by labor organizations which historically or traditionally represent management officials or supervisors in private industry and which hold exclusive recognition for units of such officials or supervisors in any agency on the effective date of this chapter.

"(b) Policies, regulations, and procedures established under and decisions issued under Executive Orders 11491, 11616, 11636, 11787, and 11838, or under any other Executive order, as in effect on the effective date of this chapter, shall remain in full force and effect until revised or revoked by the President, or unless superseded by specific provisions of this chapter or by regulations or decisions issued pursuant to this chapter.".

BACKPAY IN CASE OF UNFAIR LABOR PRACTICES AND GRIEVANCES

SEC. 702. Section 5596(b) of title 5, United States Code, is amended to read as follows:

"(b) An employee of an agency who, on the basis of a timely appeal or an administrative determination (including a decision relating to an unfair labor practice or a grievance) is found by appropriate authority under applicable law, rule, regulation, or collective bargaining agreement, to have been affected by an unjustified or unwarranted personnel action which has resulted in the withdrawal or reduction or all or a part of the pay, allowances, or differentials of the employee—

"(1) is entitled, on correction of the personnel action, to receive for the period for which the personnel action was in effect—

"(A) an amount equal to all or any part of the pay, allowances, or differentials, as applicable, which the employee normally would have earned or received during the period if the personnel action had not occurred, plus 5 percent, less any amounts earned by the employee through other employment during that period; and

"(B) reasonable attorney fees and reasonable costs and expenses of litigation related to the personnel action which, with respect to any decision relating to an unfair labor practice or a grievance processed under a procedure negotiated in accordance with chapter 71 of this title, shall be awarded in accordance with standards established under section 7105(h) of this title; and

"(2) for all purposes, is deemed to have performed service for the agency during that period, except that—

"(A) annual leave restored under this paragraph which is in excess of the maximum leave accumulation permitted by law shall be credited to a separate leave account for the employee and shall be available for use by the employee within the time limits prescribed by regulations of the Office of Personnel Management, and

"(B) annual leave credited under subparagraph (A) of this paragraph but unused and still available to the employee under regulations prescribed by the Office shall be included in the lumpsum payment under section 5551 or 5552(1) of this title but may not be retained to the credit of the employee under section 5552(2) of this title. "For the purpose of this subsection, 'grievance' and 'collective bargaining agreement' have the meanings set forth in section 7103 of this title, 'unfair labor practice' means an unfair labor practice described in section 7116 of this title, and 'personnel action' includes the omission or failure to take an action or confer a benefit.".

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 703. (a) Subchapter II of chapter 71 of title 5, United States Code, is amended—

(1) by redesignating sections 7151 (as amended by section 312 of this Act), 7152, 7153, and 7154 as sections 7201, 7202, 7203, and 7204, respectively;

(2) by striking out the subchapter heading and inserting in lieu thereof the following:

"Chapter 72—ANTIDISCRIMINATION; RIGHT TO PETITION CONGRESS

"SUBCHAPTER I—ANTIDISCRIMINATION IN EMPLOYMENT

"Sec.
"7201. Antidiscrimination policy; minority recruitment program.
"7202. Marital status.
"7203. Handicapping condition.
"7204. Other prohibitions.

"SUBCHAPTER II—EMPLOYEES' RIGHT TO PETITION CONGRESS

"7211. Employees' right to petition Congress.";

and

(3) by adding at the end thereof the following new subchapter:

"SUBCHAPTER II—EMPLOYEES' RIGHT TO PETITION CONGRESS

"§ 7211. Employees' right to petition Congress

"The right of employees, individual or collectively, to petition Congress or a Member of Congress, or to furnish information to either House of Congress, or to a committee or Member thereof, may not be interfered with or denied.".

(b) The analysis for part III of title 5, United States Code, is amended by striking out—

"Subpart F—Employee Relations

"71. Policies ..... 7101".

and inserting in lieu thereof

"Subpart F—Labor-Management and Employee Relations

"71. Labor-Management Relations ..... 7101
"72. Antidiscrimination; Right to Petition Congress ..... 7201".

(c)(1) Section 2105(c)(1) of title 5, United States Code, is amended by striking out "and 7154" and inserting in lieu thereof "and 7204".

(2) Section 3302(2) of title 5, United States Code, is amended by striking out "7152, 7153" and inserting in lieu thereof "7202, 7203".

(3) Sections 4540(c), 7212(a), and 9540(c) of title 10, United States Code, are each amended by striking out "7154 of title 5" and inserting in lieu thereof "7204 of title 5".

(4) Section 410(b)(1) of title 39, United States Code, is amended by striking out "chapters 71 (employee policies)" and inserting in lieu thereof the following: "chapters 72 (antidiscrimination; right to petition Congress)".

(5) Section 1002(g) of title 39, United States Code, is amended by striking out "section 7102 of title 5" and inserting in lieu thereof "section 7211 of title 5".

(d) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following clause:

"(124) Chairman, Federal Labor Relations Authority.".

(e) Section 5316 of such title is amended by adding at the end thereof the following clause:

"(145) Members, Federal Labor Relations Authority (2), and its General Counsel.".

MISCELLANEOUS PROVISIONS

SEC. 704. (a) Except as provided in subsection (b) of this section, the amendments made by this title shall take effect on the first day of the first calendar month beginning more than 90 days after the date of the enactment of this title.

(b) Sections 7104, 7105, and 7136 of title 5, United States Code, as added by section 701 of this title, shall take effect on the date of the enactment of this title.

(c) The regulation required under section 7105(h) of this title shall be prescribed and made effective by the Authority not later than 90 days after the date of the enactment of this Act.

(d)(1) The wages, terms, and conditions of employment, and other employment benefits with respect to Government prevailing rate employees to whom section 9(b) of Public Law 92-392 applies shall be negotiated in accordance with prevailing rates and practices without regard to any provision of—

(A) chapter 71 of title 5, United States Code (as amended by this title);

(2) No provision of chapter 71 of title 5, United States Code; or

(C) any other law, rule, regulation, decision, or order relating to rate of pay or pay practices with respect to Federal employees.

(2) provision of chapter 71 of title 5, United States Code (as amended by this title), shall be considered to limit—

(A) any rights or remedies of employees referred to in paragraph (1) of this subsection under any other provision of law or before any court or other tribunal; or

(B) any benefits otherwise available to such employees under any other provision of law.

# EXTENSIONS OF REMARKS

## THE TAX CUT

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for August 30, 1978, into the CONGRESSIONAL RECORD:

THE TAX CUT

The multibillion dollar tax cut bill now halfway through Congress is remarkable in two respects: it shows an unmistakable new emphasis and it rejects an attractive but unsound tax reduction of massive proportions.

The congressional mood on taxes has changed markedly since the talk of tax reform in the 1976 election campaign. The shift has been away from widespread tax reforms and toward tax breaks for middle-income wage earners. The change in the bill just passed by the House is a reaction to the protest of middle-income taxpayers who have felt the pinch of inflation. It reflects the perception—which most of us share—that middle-income families are overtaxed. The new emphasis is expected to be sharpened by the Senate.

Since Congress has enacted five tax cuts in the past ten years, a reduction in taxes is nothing new. But the provisions of the House-passed bill are significant. They include:

RELIEF FOR THE MIDDLE- AND UPPER-INCOME TAXPAYER

The major departure from tradition in the bill is a tax cut that would go primarily to persons in the $15,000 to $50,000 bracket rather than to those earning less than $15,000. Tax cuts since the mid-1960s have been slanted in favor of lower-income taxpayers at the expense of those better off.

BREAKS FOR BUSINESS

Corporate taxes would be trimmed by $3.8 billion, with reduced corporate tax rates, graduated rates for small businessmen and a liberalization and extension of the investment tax credit.

HELP FOR INVESTORS

Taxes on profits from the sale of stock and other property would be lowered, with the maximum rate falling from 49 percent to 35 percent.

AID TO HOMEOWNERS

Homeowners would be freed on a once-in-a-lifetime basis from the capital gains tax on profits up to $100,000 from the sale of a home.

INDEXATION

Taxpayers would be insulated from one type of taxation on capital gains—that produced by inflation. Inflationary increases would be automatically counterbalanced by a reduction in the tax at the annual rate of inflation.

The House also defeated a much larger tax cut proposal (Kemp-Roth) that would have slashed income taxes by 30 percent over the next three years. Kemp-Roth would begin with a tax cut of $30 billion in 1979 and would build to a $120-billion reduction in 1981. Its proponents argue that the huge tax cut would generate an economic boom of such scale that in a few years the government would recoop all the revenues that were lost, and then some. They believe that the huge tax cut would increase the incentive to work, save and invest, thereby resulting in greater economic growth, lower prices, more jobs and higher government revenues. Supporters of Kemp-Roth claim that the tax cuts could be made without increasing the federal deficit and without any drop in spending.

The House voted down Kemp-Roth, believing it would overheat the economy and lead to catastrophic deficits and runaway inflation. It is almost certain that Kemp-Roth supporters have overestimated the benefits of the proposal and seriously underestimated its inflationary potential. The "free lunch" rationale of Kemp-Roth just does not hold up under scrutiny and has been rejected by economists of all persuasions. Without offsetting reductions in government spending—which Kemp-Roth does not provide—such tax reductions would bring on enormous deficits, estimated to be $90 billion in 1980. There might be a formidable surge in spending that would lead to either a dangerous acceleration of inflation or a crippling credit crunch. Economists agree that a tax cut would increase total demand and national income and would thus partly compensate for the initial revenue loss. But to make up for the effect of the lower tax rates called for by Kemp-Roth, total income in the country would have to rise by some four or five times the original amount of the cut. The evidence is simply overwhelming that no cut in taxes could generate a rise in spending and income of that size.

Kemp-Roth advocates point to the 1964 Kennedy tax cut as historical proof of their claims. After that tax cut unemployment dropped and the gross national product rose. However, the Kennedy tax cut and the economic activity during that period differ greatly from Kemp-Roth and the current economic situation. First, the Kennedy cut was nowhere near the magnitude of the Kemp-Roth cut. Second, the inflation rate was running at slightly less than 2 percent per year in 1964 and there was no great concern, as there is now, about the inflationary impact of a large tax cut. Third, the federal deficit has grown immensely since 1964, posing a whole set of complex problems. Finally, the claim that the Kennedy measure was solely responsible for the economic recovery and the increase in revenues in the 1960s is plainly false. In 1964 the economy was already on the upswing because of the effects of the Vietnam War.

Nothing I have said about the dangers of a massive tax cut in 1979–1980 applies to a moderate tax cut of $15 billion to $20 billion. Since joblessness is still high and the economy is still operating well below its potential—and with payroll tax boosts and inflation adding to the taxpayer's burden—it is desirable to enact a tax cut to neutralize these factors and to supply some stimulus for an economy that would otherwise slow down.●

## PERSONAL EXPLANATION

### HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. BONIOR. Mr. Speaker, on August 12, the House of Representatives considered the Dornan amendment to the defense appropriations bill. In the RECORD of that date, I was listed as paired against the amendment (rollcall No. 644). Due to an error which I have already pointed out to the pairing clerk, I should have been listed as voting for the amendment. I would like the following statement placed in the next available RECORD:

"Mr. Speaker, on August 12, the House considered the Dornan amendment to the defense appropriations bill. That amendment prohibited the use of Department of Defense funds for elective abortions except where the life of the mother was endangered. In the RECORD of that date, I was incorrectly paired against the amendment. I would have voted in favor of the Dornan amendment.

"I believe that it is Government's primary responsibility to protect the lives of its people. I believe that it is inconsistent with that principle to have Government, through the expenditure of public dollars, sanction the taking of life. For these reasons, I oppose the expenditure of public funds for elective abortions except in those cases where the life of the mother is endangered."

## CONGRESSIONAL CONDUCT

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. TEAGUE. Mr. Speaker, I have today introduced a resolution which would address a most serious problem that relates to the perception of this body in the public mind.

The resolution would express the sense of the House that any Member of the House who is the chairman of a permanent, select, special or joint committee of the Congress or any subcommittee thereof should refrain from exercising the function of that office when he has been indicted for an offense for which he could be sentenced to 2 or more years imprisonment. The resolution would not affect voting rights in either the committee or the House. That subject is already provided for in clause 10 of House rule XLIII, in the event a conviction follows from such indictment.

The resolution would also provide machinery for temporary restoration of suspended chairmanships if the Committee on Standards of Official Conduct, on which I serve, determined that such restoration is warranted.

Mr. Speaker, I am aware some constitutional purists will oppose this resolution but I am persuaded that being only a sense of the House expression, it is constitutionally sound.

I am also aware that some will oppose it on the grounds that it offends the innocent-until-proven-guilty doctrine. But, Mr. Speaker, it is a fact that the Federal criminal justice system in this country is so filled with prior safeguards for the accused that of the indictments which fi-

nally evolve an overwhelming number ends in convictions.

With these odds do we dare to be in fact, as well as appear to be, indifferent to such situations? No one argues with the proposition that committee chairmen have a disproportionate impact on the legislative functions of this body. I know, I have chaired two permanent and one select committees and numerous subcommittees in the House.

The problem is simply one of the balancing of interests. On the one hand shall we have the most important functions of this body managed by men under a cloud, with all the wear and tear on the fabric of public confidence such a situation brings about, or on the other hand shall we express ourselves that we too are concerned about this and feel that it is far better to let others not under any cloud perform these functions until the matter is finally resolved?●

## TERAMANA AMERICAN LEGION POST OHIO BASEBALL CHAMPIONS

### HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. APPLEGATE. Mr. Speaker, with the close of summer comes the end to many summer activities. I wish to take this opportunity to bring to the attention of my colleagues in the House of Representatives an event of which we in Ohio and its 18th Congressional District are extremely proud.

As we all know, summertime baseball has long been a tradition in America. But, perhaps the most skillful leagues at the amateur level are the American Legion league teams that play across this land. It is a highly competitive league and one that possesses much talent. I am privileged to announce today that the Ohio State champion for 1978 is the Teramana American Legion Post 33 of Steubenville, Ohio. They have proven beyond a shadow of a doubt that they are the champions that they have been proclaimed.

Following their State championship title in Athens, Ohio, the team went to the Great Lakes Regional Tournament, where they missed advancing to the American Legion World Series by only two runs of the final game, certainly not a performance to be ashamed of in any way.

Throughout this past and all previous seasons, Post 33 has displayed the meaning of teamwork. All team members and personnel have had a hand in achieving the State championship. Members of the 1978 playing team include: Terry Romey; Jimmy Joe DeFrank; Mark Chetock; Tim Cutri; Larry Whetstone; Bill Mason; John Maltese; Dave Morelli; Vince Lamatrice; Mike Montgomery; Tim Werkin; Paul Simpson; Ron Sismondo, named pitcher of the year; Lance Coulter, named player of the year; Mike Judy and Ken Peterson. Carmen Barbetta is the team statistician and Johnny Binkiewicz is the batboy.

While these young men have provided the talent on the playing field, they have been directed by an outstanding coaching staff. The staff includes: Jake Hollowood; Chuck Watt; Red Coulter and head coach Ang Vaccaro, who has taken teams to the State finals 27 times.

The entire State of Ohio should be proud of this team for carrying the State banner so far and so well. And on behalf of the 18th Congressional District, in particular, I extend my sincerest congratulations on a job well done.●

## MARIHUANA

### HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. COLLINS of Texas. Mr. Speaker, we have all heard the liberal cliche about drug use being among a category of "victim-less crimes." Marihuana, particularly, inspires its devotees to the use of this hackneyed cliche because its effects upon the health of the user have, until only very recently, been among the least studied of all dangerous drugs. Beginning with the building bombers on our college campuses during the 1960's and continuing today with the advocates of legalization, both in and out of the Carter White House, marihuana has become the "drug of choice" of chic liberals.

Tragically, their choice may be influencing millions of younger Americans to pursue a form of slow suicide. That appears to be the major conclusion of a new report issued by the Education and Research Institute (ERI) of Washington, D.C. This important new report summarizes all available study evidence regarding the effect of marihuana upon the human body and provides some disturbing conclusions about marihuana usage which should be of concern to every American.

Marihuana usage has reached epidemic proportions, particularly among young people. Reliable authorities estimate that some 53 percent of all Americans between the ages of 18 and 25 have at least tried marihuana. The Federal Drug Abuse Council estimates that 15 million young Americans are now steady marihuana users. The effects of this drug upon these young Americans are only now beginning to be quantified scientifically.

The first study included in the ERI report is that of Gabriel Nahas of Columbia University. Dr. Nahas' study indicates that marihuana's active chemical ingredient, delta-9-tetrahydrocannabinal (THC), accumulates in the fatty tissue of the body, including the brain, and is not eliminated with normal rapidity. The substance settles in the liver, brain, bone marrow, and adrenal glands. Due to the body's natural tolerance functions, users find it necessary to increase continually their dosages to achieve the desired euphoric levels.

Citing a study done at the University of California by Prof. Hardin Jones, professor of medical physics, Dr. Nahas contends that since THC accumulates in the fatty tissues of the body, the long term effect of the body's natural adjustment to the chemical's presence is more severe than that associated with alcohol.

The effects of marihuana usage on the brain are also documented in the ERI report. Among the effects upon the mental activities of the brain indicated by studies included in the ERI report are impairment of the memory, an inability to think sequentially, and slurring of words and sentence structures.

More disturbing, however, is the evidence included in the ERI report that marihuana usage of no more than 1 to 3 years can lead to pathological forms of thought, followed, in the case of the continued heavy user, by the development of paranoia.

To mask these effects, one study included in the ERI report noted, many regular users, particularly those in classroom situations, resort to phrase memorization and rambling, disjointed speech. This evidence must be especially frightening to parents whose children seem incapable of speaking without resort to that worn-out rhetorical duo, "like * * * you know."

Damage to the brain from marihuana does not appear to end with the mental processes. Actual measurable physical damage is also documented in the ERI report. Five different studies cited in the report indicate conclusions similar to those of Dr. A. M. G. Campbell of the Royal University Hospital in Bristol, England:

> You can see under the acute effects of marihuana-smoke changes in many sites (of the brain). The amygdala, septal and hippocampus show the most pronounced changes and these are brain areas where activity has been correlated with various specific emotional states. The septal region is the site for pleasure—stimulating it activates pleasure feelings. When its activity is impaired, as it is in schizophrenia, you have a lack of pleasure and a reduction of awareness toward a sleepy, dreamy state.

All the studies conclude that this type of physical damage is irreversible.

Parents whose youngsters seem to be chronically ill may also find the ERI report disturbing because among the effects of marihuana usage it documents is a marked decrease in the user's ability to combat the germs of diseases. Experiments by Dr. Nahas revealed a 40-percent reduction in the body's ability to manufacture white blood cells which attack foreign germs. This particular segment of the Nahas work dealt with light users, averaging but three or four joints a week. It would seem that even the briefest exposure to marihuana can result in harm to the user.

Finally, the ERI report summarizes studies which indicate that continued use of marihuana can lead to sexual impotence among male users. This effect seems to be the result of the accumulation of THC in the testicles and sexual glands which produce sexual differentiation. Yet another study in this particular area indicated that sperm counts among moderate users—at least four joints per week—dropped 44 percent. The sperm count reduction observed in these studies appeared to be proportionate to mari-

huana amounts consumed. Among heavy users, the counts plummeted to almost zero.

Once the reproductive system has been damaged by marihuana use the incidence of birth defects related to the drug must inevitably increase. According to the Staab-Lynch study cited in the ERI report, kidney deformation, runting, and even death were observed at uncommonly high levels among lightly exposed laboratory mice.

Millions of American youth today use or experiment with marihuana. How many of these youths will be permanently harmed because they believed those adults among us today who preach the gospel of legalization, decriminalization or justification of marihuana as a "victim-less" drug? I believe the American public, and particularly the young people suffering, probably unaware, the damage of this drug, deserve to know the truth. For this reason, I commend this fine study by ERI to the attention of this Congress.●

---

## BUFFALO: A SUNNY BUSINESS CLIMATE

### HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. LaFALCE. Mr. Speaker, Buffalo, N.Y., has been the butt of many jokes, largely because of the monumental blizzard of 1977. Added to that unfortunate event was the widespread perception, even among western New Yorkers, of the Buffalo area as one of inevitable economic decline.

This negative and often self-defeating attitude obscured the underlying reality. Buffalo, having undergone a period of economic stagnation similar to that of many old Northern cities, is now experiencing a cultural, educational, and economic renaissance. Mike McKeating who is the financial editor of the Buffalo News has done an excellent job of setting the record straight in an article entitled "In Buffalo the Joke's on Johnny," which was published by the mid-America Outlook in its summer 1978 issue.

The article follows:

IN BUFFALO THE JOKE'S ON JOHNNY

(By Mike McKeating)

If your view of Buffalo has been polarized by Johnny Carson's jokes about the "Blizzard of '77", then consider this cold fact: In an average year, say local air transportation authorities, the Greater Buffalo International Airport is closed fewer hours from snow than LaGuardia, Kennedy or O'Hare.

Johnny Carson doesn't tell you that. And there are some other things Johnny Carson doesn't tell you that might be a surprise if you haven't visited the Queen City of the Great Lakes lately.

Despite a decline in manufacturing jobs, total employment in the Buffalo metropolitan areas has increased by 14,000 in the past decade due to an employment surge in the service and trade sectors.

The Buffalo metropolitan area is a center of higher education with 11 colleges and three universities. One, the State University of New York at Buffalo, is currently building a new campus in suburban Amherst at a cost of $500 to $650 million which is currently the largest university construction project in the world.

Buffalo is a banking center. Although only the 28th largest city in the U.S., it is headquarters for the nation's 13th largest commercial bank, Marine Midland with deposits of over $10 billion; the eighth largest savings bank, Buffalo Savings Bank with $2 billion in deposits, and the 16th largest savings bank Erie Savings with $1.6 billion in deposits.

The Buffalo Philharmonic Orchestra, conducted by the precocious Michael Tilson Thomas, ranks among the finest and has appeared in major cities across the nation.

The Albright-Knox Art Gallery, home to millions of dollars in art treasure, has a worldwide reputation.

Buffalo remains the largest flour milling center in the world, producing 1.2 million tons of flour a year—or 50 percent more than Kansas City and three times as much as Minneapolis, the nation's other large flour milling centers.

And, finally, those suits with the Johnny Carson label are made in Buffalo at the M. Wile Co., a subsidiary of Hart, Schaffner & Marx.

These are just a few of the facts that comprise the other side of the Buffalo story. But actually, the Buffalo story is more like a prism—with many sides. And like a prism, it reflects light differently, depending on the angle from which you view it.

The Buffalo saga is one of early prominence as an industrial and cultural center, subsequent decline and now a renaissance.

Due to its strategic location as the Eastern terminus of Great Lakes shipping and as the entrance to the Erie Canal, Buffalo quickly became a transportation hub and one of America's earliest industrial centers. By the late 19th and early 20th centuries, it was an important center for the manufacture of steel, other primary metals, machinery, foundry and forge products, and later, autos and aircraft.

Buffalo peaked early, both in population and as an industrial and transportation center. In 1940, Buffalo's population of 575,904 ranked 14th among U.S. cities. By 1960 the population had fallen to 532,759 and the rank to 20th, and in 1970 it had 432,768 people and ranked 28th.

The apparent population decline is misleading, however. The municipal boundaries were fixed in the 19th century, and the city became hemmed in by suburban townships. Under the New York State Constitution, suburban annexation is extremely difficult. Furthermore, in New York there's no such thing as unincorporated land. Every square inch of the state is already incorporated into either a city, township or village.

Therefore, the option of annexing more land, an option followed after World War II by Columbus, Jacksonville, Nashville, Denver, and many other cities, was not open to Buffalo.

The fact is the population of the Buffalo metropolitan area has remained relatively constant—at about 1.5 million—since 1940. There has simply been a large exodus of population from the city itself to its suburbs.

The industrial picture, however, is different. Following World War II, the Buffalo area began to lose industries. There were several reasons.

Buffalo was a city of old industries. Many were proprietary companies, founded in the 19th century by men who were inventors or entrepreneurs. As these companies passed into the hands of the second and third generations, often the heirs either lacked the talent or the desire to run them. Also, estate tax considerations encouraged sale, and one after another of the old-line Buffalo companies were sold to outside companies.

As years went by, these Buffalo plants became obsolete. The new owners lacked personal commitment to the city and to revitalizing their plant. Eventually, the Buffalo plant became the highest cost plant in a multi-plant operation, and was closed or moved.

With the opening of the St. Lawrence Seaway, Buffalo lost its position as the Eastern terminus of the Great Lakes. Ships sailing the Great Lakes could now make a left turn at Pt. Colborne, Ontario, about 30 miles west of Buffalo, and go through the Welland Canal and out the St. Lawrence to the Atlantic.

They no longer needed to stop in Buffalo and transfer their cargos to trains, and this, coupled with the rise of the trucking industry after the war, diminished Buffalo's importance as a railroad center as well.

The net result: Between 1958 and 1974, the Buffalo metropolitan area lost 218 manufacturing plants and 30,974 manufacturing jobs.

The biggest losses have come in the areas of primary metals, which lost 14,000 jobs in the past decade, transportation equipment, which declined 5,000, and chemicals and allied products, which declined by 6,000 jobs.

Probably the biggest single reduction has been suffered by Bethlehem Steel's Lackawanna plant. Although it has some ultra-modern components, in general it is one of the oldest and most obsolete in the Bethlehem system. It peaked at an employment of nearly 20,000 in the boom year of 1967, but has since undergone several downgradings and reductions in capacity, and now employs only 8,500.

That is the Buffalo story viewed through the prism from one angle. But viewed from another angle, simultaneous to the decline in the heavy industry sector, a rebirth was taking place in other areas, including downtown redevelopment, higher education and high-technology industry.

The redevelopment of downtown was initially spurred by the banks in the mid 1960's.

The Manufacturer's and Trader's Trust Company, the nation's 79th largest commercial bank, led off by building a new 20-story headquarters building.

Erie Savings Bank followed with a new 26-story headquarters tower and office building atop a block-long shopping mall across the street.

Finally, Marine Midland, the patriarch of Buffalo's banks, built a 40-story world headquarters building atop a U-shaped 3-story plaza.

The Buffalo Evening News, deposed from its 90-year-old building by the Marine Midland complex, built an ultra-modern 5-story building two blocks away.

Then the government sector became active. Erie County built a new 16-story office building to house county offices, and the Niagara Frontier Transportation Authority erected a 10-story office building attached to a new bus terminal in the heart of downtown.

Erie County and the City of Buffalo teamed to use county bonds and city funds to build a $20 million convention center downtown.

San Francisco architect and developer Clement Chen will begin construction soon on a $17-million, 500-room hotel on Buffalo's waterfront, and has an option to build another hotel on land across the street from the convention center.

The theater district is another example of successful downtown revitalization. Located at the northern end of downtown, it boasts several stately old movie theaters and the Studio Arena Theater, a successful Buffalo professional theater which has hosted world premiers of plays by Edward Albee and others.

The Studio Arena was looking for larger quarters, and a $940,000 grant from the federal Economic Development Administration made possible the purchase and renovation of the Palace Burlesque across the street. At the same time, a non-profit group received a $693,000 EDA grant to renovate the Shea's

Buffalo, an historic legitimate theater seating over 3,000.

But the real jewel of downtown redevelopment will be the $425 million rapid transit system. Federal grants have been approved, and construction will begin this year.

The rapid transit system will be 6.4 miles long initially, and will connect downtown with the State University of New York's Main Street Campus. Plans call for later extensions to the university's new Amherst Campus, and to other northern suburbs. The system will be a subway through the downtown area, then will surface in the theater district and run at grade through most of the rest of the route to the campus.

The State University of New York at Buffalo is a major economic force in the community. Surprising to many, it ranks among the top employers with 7,500 people and an annual payroll of $78 million.

It was the private University of Buffalo until it joined the State University system in 1964, but is still commonly referred to as UB. It is now spread over two campuses.

The Main Street Campus on the northern edge of the city was founded by former President Millard Fillmore in 1848. It now houses the graduate school and the medical school. The new Amherst Campus consists of ultramodern college complexes surrounding beautifully landscaped lakes, and houses the undergraduate school and the law school.

In addition to the $78 million payroll, the university spends $13 million a year on materials and supplies, and university officials say the 25,000 students spend $41 million a year in the Buffalo community.

UB also spends $2.4 million a year on off-campus leases, and brings into the community $22 million a year in research grants.

While employment has been decreasing in old-line, heavy industries, Buffalo has seen a significant growth in high-technology industries primarily because of the presence of three institutions: UB, Cornell Aeronautical Laboratories (now Calspan Corporation), and Bell Aerosystems. Many fast-growing high-technology companies have been formed by engineers and scientists who got their start at these three institutions. Some examples:

Sierra Research Corporation was founded in 1957 by several engineers from Bell Aerosystems and a handful of employees, some of whom loaned their salaries back to the company to help it grow.

Sierra, which makes sophisticated navigational and radar equipment for aircraft and a line of inventory-control computers for industry, now has 550 employees, a payroll of $7 million and annual sales of $17 million.

Astronics Corporation, founded in 1970 by an ex-Calspan engineer, makes electroluminescent panels with applications as diverse as aircraft panels, subway tunnels and photo darkrooms. It now has 185 employees and sales of $7 million.

Comptek Research, another spinoff of Calspan engineers, designs radar systems for the Navy and also makes a line of word-processing computers for law offices. This fast-growing firm now has 250 employees, about 90 of them added in the past year.

Mennen-Greatbatch Electronics was founded in 1962 by Wilson Greatbatch, a Calspan engineer and the inventor of the heart pacemaker, and Herbert Mennen, a Sierra Research officer. It makes sophisticated medical monitoring equipment for hospitals. It has 450 employees and $14.5 million in annual sales.

These companies and others like them are the vanguard of an industrial renaissance that is underway in Buffalo. And if Buffalo has traded heavy metals industries for high-technology industries it has made a good bargain, for high-technology industries are clean, pollution-free industries with high capitalization, high average salaries and a highly-skilled work force.●

## RECOMBINANT DNA—RUNAWAY RESEARCH

### HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. EDWARDS of California. Mr. Speaker, in our atomic age of potential destruction of humanity, the subject of genetic manipulation and species change is not to be taken lightly. The prospect of curing the human race of birth defects and environmentally caused diseases is a tempting thought. With our current and increasing technological know-how, the possible eradication of impure social elements brings shades of "Dr. Strangelove" close to home. These are results that could evolve from improperly regulated recombinant DNA research.

H.R. 11192 is designed to extend the containment requirements set by the National Institutes of Health (NIH) to all private and public recombinant DNA research institutions. Though this bill appears to be progressive, it is actually a poor alternative to conscientious supervision of this blatantly dangerous field. DNA technology has such enormous potential for ecological disruption that all research, in these initial stages at least, must proceed slowly and carefully under the auspices of public control. Although the bill's primary intent is to efficiently regulate recombinant DNA research, it seriously fails to propose this.

A basic discrepancy is that the bill extends the NIH guidelines for regulation, when this body is also in charge of funding biomedical and DNA research. This inherent inconsistency needs to be resolved and H.R. 11192 does not do it adequately. It gives the Secretary of HEW broad discretion in the regulation process rather than giving more power to the public sector. This is a direct departure from recent congressional efforts to involve the people in our Nation's decision-making.

Another provision in H.R. 11192 which concerns me, is its deviance from recent environmental health legislation. It states that recombinant DNA research cannot be regulated by States or localities unless it is "necessary to protect health or the environment." This restriction is yet another instance of special interests determining the course of scientific research through self-regulation. The people whom these decisions affect do not have a say in what is happening to their lives. This issue is not so complicated that it must elude the public arena.

The biohazard committees set up by H.R. 11192 to protect communities from scientific mistakes, also would not be responsive to public needs. At present, membership on such committees is decided by the research institution itself, and this bill makes no mention of any new makeup, selection processes, or the like. This deficiency is not adequately addressed.

It is essential that recombinant DNA research be subject to public scrutiny. As it stands now, it is not. A proper balance between rapid scientific advancement and thorough consideration of social consequences can and should be attained. H.R. 11192 fails to combine these two issues into a truly responsive piece of legislation. Public input must be given a freer hand in determining the future technological directions this country is taking. Our survival depends on it.●

## VETERANS' PREFERENCE

### HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. UDALL. Mr. Speaker, during the next few days the House will be considering H.R. 11280, the Civil Service Reform Act. An important provision in this legislation is the proposal to modify existing veterans' preference laws.

The following editorial from the Washington Post is an excellent statement on behalf of Vietnam and disabled veterans, who need this legislation in order to receive a fair deal in the Federal labor market.

[From the Washington Post, Aug. 11, 1978]

GIVING VIETNAM VETERANS A BREAK

We return today to a familiar complaint of ours: the injustices still being done to veterans who served in the era of the Vietnam War. We have in mind injustice deriving from, among other things, the lack of job opportunities, the stigma of service in a profoundly controversial conflict, the inadequacy of education benefits, the once-over-lightly approach to the upgrading of "bad-paper discharges"—and, above all, the shameful incapacity of so many members of Congress to stand up to pressures from powerful, old-line veterans organizations heavily weighted in their membership and their priorities to the veterans of earlier wars. We will spare you today a discussion of what may or may not account for the tendency of so many people, in general—and so many public officials, in particular—to turn away from this unfinished business of the Vietnam War. The point is simply that the tendency is there, and it is nicely illustrated by the trouble the Carter administration is having in Congress with a relatively modest provision in its program for civil-service reform that attempts to narrow and refine the present system for awarding sweeping and repeated government job preference to veterans.

The idea, quite simply, is to concentrate job preference on those who need it the most: the 7 million Vietnam-era veterans with no disability, and the 2.2 million disabled veterans of all wars.

Now, it is true this reform would reduce the job preference available to older, able-bodied veterans of, let us say, World War II or the Korean War. It would also severely limit the preference awarded retired veterans who made the armed services their career. Those are the veterans who make up the bulk of the membership of the American Legion, the Veterans of Foreign Wars and the other mainstays of the veterans lobby.

But they are also the veterans who need job preference the least—who have already in many cases used their preference more than once, sometimes to shift from one government job to another. For most of them, the original purpose of job preference—to ease their readjustment to civilian life—has long since been achieved. Some limit on their continued preferential treatment, what is more, would provide more job opportunities

not only for those who served in Vietnam but also for a host of non-veterans—women, for example, and minorities—who are also supposed to be entitled to go to the head of the line.

This is, in short, a civil-service reform long overdue. And yet a modified version of the administration proposal was knocked out of the administration's civil service reform bill by a narrow vote of the Senate Governmental Affairs Committee. Its chances of revival on the Senate floor are uncertain, at best, which leaves its fate largely up to what happens in the House. The House Post Office and Civil Service Committee approved the modified administration proposal, and the administration has accepted a refinement sponsored by Rep. David E. Bonior (D-Mich.) that would give veterans who actually served in the Vietnam theater more time to use their preferences. The Bonior amendment is likely to come up for a vote on the House floor today, and it ought to be approved. Also up for a vote, probably today, is an amendment by Rep. James M. Hanley (D-N.Y.) that would substantially undo all the contemplated improvements in veterans preferences and retain most of the injustices of the present law. We need scarcely add that this latest effort to walk away from the unfinished business of Vietnam should be resoundingly rejected.●

## THE KOREAN INVESTIGATION

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for September 6, 1978, into the CONGRESSIONAL RECORD:

THE KOREAN INVESTIGATION

The public is confused and skeptical about various aspects of the Korean investigation.

For one-and-a-half years the House Committee on Standards of Official Conduct has been investigating alleged South Korean influence-buying on Capitol Hill. From the beginning, the investigation was clouded with doubt that Congress would aggressively and thoroughly investigate charges of wrongdoing by its own members.

Thus far much has been uncovered about the South Korean activities, but much remains to be investigated by the House Committee.

Under the direction of former Watergate prosecutor Leon Jaworski, the Committee's staff gathered mountains of information about the alleged South Korean activities. These facts were presented to the House Committee in October, 1977. The report proved that some sort of influence-buying scheme had existed.

The next phase of the investigation proved to be more difficult, for it involved trying to get sworn testimony from foreign nationals who were not in the United States, and not subject to U.S. law.

After much pressure was put on the South Korean government by the President and Congress to obtain testimony from Mr. Tongsun Park, supposedly an independent South Korean businessman, Park testified before the Committee. He testified that he gave almost a million dollars to present or former members of Congress as campaign contributions. Although he claimed he had no connection with the South Korean government, the established facts strongly suggest he was an agent of that government.

Several specific actions have resulted from that phase of the Korean investigation. Four sitting members of Congress have been charged by the Committee with unethical conduct and notified of possible disciplinary action. Evidence relating to possible criminal activity by others has been sent over to the Justice Department. One former Congressman has pleaded guilty to accepting more than $200,000 from Park. Another former Congressman is under indictment and a third is facing possible charges.

There is evidence that other members of Congress may have taken some money from South Korean agents, but the reliability of the evidence is doubtful. Even if they are guilty of wrongdoing, there is no way of pursuing them without the testimony of Mr. Kim Dong Jo, the former South Korean Ambassador to Washington. There is every reason to believe that Kim Dong Jo had some money to spread around Congress to influence legislation concerning South Korea. Until very recently, the South Korean government had refused all requests for his testimony. Mr. Jaworski left the staff because he felt that this refusal ended any chance to complete the investigation.

Congress made numerous attempts to persuade the Korean government to allow Kim to testify, including a House vote to deny nearly $56 million of aid to Korea and offers to have House members go to Korea to encourage his testimony. On August 3, the Korean government gave assurance that Kim would supply new, concrete evidence to Congress.

So the investigation has taken on new life. As we begin the final phase of our investigation, several thoughts come to mind.

Although charges have been made that the Congress is determined to keep the scandal from being fully revealed, I have seen no evidence to support that charge. Indeed, my experience is just the opposite. Throughout the investigation, the Committee has had the full support of the Speaker of the House and the leadership of both political parties. Not once has a member of Congress come to me and suggested that the investigation be deferred or delayed.

Most certainly, the Congress must take every reasonable step to avoid the charge of a coverup. It will not be easy to do because of the unfortunate charges that 115 or more Congressmen were involved—statements that really had no basis in fact.

I believe a full public Committee report is a critical ingredient to a credible investigation. All the testimony, depositions and other information gathered by the Committee should be made public, and, if at all possible, done so in advance of the November elections. The Committee should also make recommendations to curtail such activities in the future.

One beneficial result of the Korean investigation has already occurred. Congressmen are more careful now about our involvement in any kind of conduct that would be misconstrued, and we are paying more attention to our own codes of conduct.●

## PERSONAL EXPLANATION

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. McDONALD. Mr. Speaker, due to my absence on August 16 and August 17, I missed certain votes. I requested to be paired on each vote missed, but did not receive a live pair on each vote. Therefore, I would like to explain how I would have voted if I had been present.

*Rollcall No. 707, "yes."
*Rollcall No. 708, "yes."
Rollcall No. 709, "yes."
*Rollcall No. 710, "yes."
*Rollcall No. 711, "yes."
*Rollcall No. 712, "yes."
*Rollcall No. 713, "No."
*Rollcall No. 715, "No."
Rollcall No. 716, "no."
*Rollcall No. 717, "no."
Rollcall No. 718, "yes."
Rollcall No. 719, "no."
Rollcall No. 720, "no."
Rollcall No. 721, "yes."
Rollcall No. 722, "no."
Rollcall No. 723, "no."●

## MARRIAGE TAX

### HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. PICKLE. Mr. Speaker, a problem in our present tax code that has not yet been corrected is the so-called marriage tax, the result that now occurs, where both spouses are working, where they actually pay a higher tax after marriage than they would if they were each filing as a single person. This problem is a particularly difficult one, because as long as we have a progressive tax system, if we try to correct it, it results in injustice to another class of taxpayers. Jane Bryant Quinn has written an excellent article in Newsweek, August 28, 1978, that explains the dilemma. I recommended the article to my colleagues, and it is submitted:

THE "MARRIAGE PENALTY"

(By Jane Bryant Quinn)

Missing from the tax-cut bill now moving through Congress is a solution to the "marriage penalty," that anomaly of the tax law that hits most working couples with higher income taxes after marriage than before. President Carter, in the early days of his Administration, promised to address this problem in his tax-reform package. But today, Treasury spokesmen will say only that they think the tax on marriage is unfair, and something should be done.

Exactly *what*, however, they'd rather not imagine. The marriage penalty is a curiosity of the tax code that defies easy reform. Anything that ends it would create new forms of discrimination against other classes of taxpayers.

An equitable tax system, Harvey S. Rosen of Princeton University observes, is generally expected to meet three tests: (1) the tax should be progressive, taxing a person's first dollar of income at a lower rate than the extra dollars he piles on top; (2) your tax burden shouldn't be changed by marital status; (3) other things being equal, families with the same incomes should pay the same tax. Any two of these goals can be achieved at the same time, Rosen says, but not all three. As long as we accept progressivity, we have to choose either point 2 or point 3, but not both.

CLASH OF PRINCIPLES

This calls for an example. First take point 2, that marital status shouldn't make any difference to your tax. Under this principle, each person's income would be taxed in-

* Live pair.

dividually, and at the same rate. A person with a $20,000 taxable income would owe the same amount, whether married or single. But look at what this does to family income: a $20,000, single-earner family is in a higher tax bracket than a family where the man makes $15,000 and the wife $5,000. The latter, in turn, pays more than the family where each makes $10,000. That's three different $20,000 families, each paying a different tax. A clear violation of point 3.

Now let's explore point 3, that all families with the same income should pay the same level of tax. Couples with taxable incomes of $20,000 owe the same amount, regardless of who earns what; similarily, single-person households with $20,000 would pay at the same rate as marrieds (although they would normally have fewer exemptions). This contradicts point 2. Working couples would pay less if they stayed single.

Prior to the Tax Reform Act of 1969 there was no marriage penalty. When a working couple married and filed a joint return, their combined tax was generally the same before and after marriage. Point 2 triumphant, but point 3 up the creek. A single person paid up to 41 per cent more than a married person with the same income.

This tremendous inequity was eased by Congress in 1969. The tax advantage of joint filing was reduced, so that the extra tax paid by singles wouldn't rise more than 20 per cent above the married amount. The change in rates created a marriage penalty for working couples—not intentionally, but as an arithmetical by-product of a progressive-tax system.

SPREADING THE GRIEF

The present law is actually fairer than the old one, despite the marriage penalty, because it spreads the grief around. In the old days, only singles paid an excess tax. Today, singles still pay at a higher rate than marrieds, but the differential isn't as high. Working couples pay a marriage penalty. Only traditional, single-earner families (or families where one earner makes very little) come out relatively ahead.

C. Lowell Harriss, consultant to the Tax Foundation, says that much of the problem could be solved by widening tax brackets. The same inequities would persist, but fewer people would be affected by them.

Rep. Millicent Fenwick, a New Jersey Republican, would let a married couple file either jointly or singly, whichever gave them the lower tax (England went this route in 1972). But this re-creates the singles penalty in all its former glory. Would it help if the Fenwick proposal were extended to singles, allowing them to file at the lower, married-couple rate? It would not. The upshot would be yet another marriage penalty.

Me, I'd leave the relative tax rates alone but add a deduction for working couples, because their expenses are higher than those of one-earner families. For politicians, it's a no-win situation. Whatever they do, they're going to make somebody sore.●

## INTERNATIONAL PRO-AM BIKE RACE

### HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. HUGHES. Mr. Speaker, I am proud to announce that the Third International Pro-Am Bike Race will be held in Wildwood, N.J., on September 23–24, 1978.

This particular race is recognized as one of the major events in international bike racing. The quality of competitors is outstanding, and many of these men and women racers have traveled all the way from Europe to participate in this event.

Several people have worked exceedingly hard to make this competition a very special one by their leadership, support, and enthusiasm. Catherine Cramer of Ventnor, N.J., the president and organizer of the International Pro-Am Bike Race, along with the mayor of Wildwood, Guy Muziani, and Charles Thomas, the president of the Wildwood Chamber of Commerce, have, by their hard work and diligent support of an idea made this competition an example of the success that results from the private and public sectors working together.

I feel that this exciting sporting event will establish New Jersey as one of the world's cycling capitals. The actual competition will be held on the Wildwood Boardwalk, part of which was built with lumber used for President Carter's inaugural platform and bleachers.

I urge my colleagues to take advantage of this opportunity to attend this unique international sporting event.●

## LEAGUE OF WOMEN VOTERS AND JAPAN: WHO IS IN WHOSE HIP-POCKET?

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. McDONALD. Mr. Speaker, frequently staff members of the League of Women Voters appear before Congressional committees attesting to their self-assumed right to speak for the consumers of this country.

The League of Women Voters insists, and rightfully, that no one is more concerned about the cost of living than the housewife. I doubt, Lowever, if the staff of the League of Women Voters have very much knowledge of the problems of the average housewife of the Seventh District of Georgia.

I am now thinking of the wives of the textile workers and the machinists whose jobs are each day threatened by imports and others in public service whose livelihoods have been adversely affected by imports.

At these hearings of our congressional committees, the leadership of the League of Women Voters always insists that we must keep our markets open to the very imports of textiles, clothing, and machinist products which are endangering the livelihood of my constituents and eroding my district's industrial and economic base. Fundamentally, I believe in free trade, but most of what is going on in the world today is neither free nor fair trade.

Within the last few days I have been presented with evidence gleaned from the files of the U.S. Justice Department that leads me to believe that the leaders of the League of Women Voters may not be speaking objectively in behalf of the consumers of America. Instead, it appears they may be speaking in behalf of the interests of Japan, whose largesse they have been enjoying for some time. For so long the League of Women Voters has portrayed itself as an objective nonpartisan voter information organization. However, the evidence I am presenting here today appears to belie that theme.

The evidence of which I am speaking are the following entries filed with the Department of Justice pursuant to the Foreign Agents Registration Act of 1938:

REFERENCE A

Supplemental Statement of the U.S.-Japan Trade Council, an agency of the government of Japan, for the six-month period ending December 31, 1969

(1) Item 15(a) page two: "Occasionally, League of Women Voters, contribution, $1,000.

*Question:* Had the League of Women Voters rendered any prior service to the Government of Japan to prompt an agency of that government to contribute $1,000 and if so, what was that service?

REFERENCE B

Registration Statement made by the Japan Trade Promotion Office, an agency of the government of Japan, in compliance with a court order issued by the U.S. District Court of the District of Columbia in September, 1976, to truthfully disclose their activities in the United States. The following items under "Statement on Project Expenses for the United States-Japan Trade Council

(1) January 1 to March 31, 1972:

(a) "Women's Project, $7,500.

*Question:* Was this "Womens Project an anti-Buy America campaign? Did any of these funds go to the League of Women Voters or any of its members? If so, did they register as agents of the government of Japan?

(b) "League of Women Voters, $450.

*Question:* Was this in payment for services rendered?

(2) April 1 to June 30, 1972: (a) "Goodwill tours, $2,150.

*Question:* Who were the recipients of these "goodwill tours?"

(3) April 1 to June 30, 1972: (a) "Goodwill tours, $17,150.

*Question:* Who were the recipients of these "good will tours?

(4) July 1, to September 30, 1972: (a) "Goodwill tours, $5,000.

*Question:* Who were the recipients of these "goodwill tours"?

(5) January 1 to March 31, 1973: (a) "Charles von Loewenfeldt—Symposia and goodwill, $15,000.

*Question:* Who were the recipients of this "goodwill"?

(b) "State Buy American, $8,194.60.

*Question:* For what purpose and how were these funds spent?

(6) January 1 to March 31, 1973: (a) "Symposia and goodwill tours, $7,625.

*Question:* Who were the recipients of these goodwill tours?

(b) "State Buy American Activities, $6,000.

*Question:* For what purpose and how were these funds spent?

REFERENCE C

Supplemental Statement of the U.S. Japan Trade Council, an agency of the Japanese government, for the six-month period ending June 30, 1971, filed in September 1976 in response to a court order issued by the U.S. District Court of the District by the U.S. District Court of the District

(1) "On March 2 the Council wrote the

President of the League of Women Voters in Connecticut congratulating her on the League's testimony in opposition to Buy American legislation in the Connecticut legislature."

*Question:* Did any agency of the Japanese government provide any information that was used by this spokeswoman during the testimony, and did she or the League receive any gifts of payment prior to or after this testimony?

REFERENCE D

Supplemental Statement of the U.S. Japan Trade Council, an agency of the Japanese Government, for the period ending June 30, 1972, filed in September 1976 in response to a court order issued by the U.S. District Court of the District of Columbia

(1) "Similar arrangements were made by Charles von Loewenfeldt for a fact-finding trip to Japan which the League of Women Voters was making under arrangements that the League had made with the government of Japan."

*Question:* What are the names of these members of the League who made this trip to Japan? Have any of these women used their influence in any way to direct the course of legislation in this country or attempt to do so?

REFERENCE E

U.S. Japan Trade Council Report of January 1–June 30, 1978 filed with the Department of Justice, page 15

(1) Arranged appointments for Rep. Jones and House Ways and Means staffers Loren Cox and John Meager in connection with their trip to Japan.

Arranged appointments for Mr. R. Ryan, Jr., Executive Seminar, State Dept. with Sony, Sanyo and Matsushita's offices in the U.S. Helped plan League of Women Voters trips to Japan with B. Perkins of their International Affairs Dept.

(a) *Question*: Have any of these staffers used their influence in any way to direct the course of tariff or trade legislation or attempted to do so?

REFERENCE F

Supplemental Statement filed by Charles von Lowenfeldt Inc., an agent for the Japanese government, on January 5, 1978

(1) The item under "Advice to the Consulate"

"a. Registrant, at the request of the Consulate, submitted suggestions of several community leaders to be considered to be invited to visit Japan as guests of the Japanese government."

(a) *Question*: Were any of these "community leaders" members of the League of Women Voters?"

REFERENCE G

Supplemental Statement filed by the U.S.-Japan Trade Council, an agency of the government of Japan, for the period ending December 31, 1972, filed in September, 1976 in compliance with a court order issued by the U.S. District Court of the District Court of the District of Columbia

(1) Charles von Loewenfeldt, a registered agent of the Government of Japan, gave "Advice to the Japanese Government" on September 15 and the League of Women Voters Project to Combat Protectionism."

(a) *Question*: Was this project in any way financed by the Japanese government or any of its agencies? How much money did the League or its staff receive?

I am so concerned about what this evidence implies that I have today written the U.S. Department of Justice the following letter:

DEAR MR. ATTORNEY GENERAL: The enclosed evidence gleaned from your Department's registry of foreign agents leads me to believe that certain staff members of the League of Women Voters have engaged in lobbying and other activities in behalf of the government of Japan, for which they, or the League, have been receiving payments in cash or in kind. That as such, they are required to file with your Department a statement as to their activities in behalf of the government of Japan.

I am further wondering if the members of the staff of the League of Women Voters who accepted trips to Japan and other gifts from the Japanese government should not declare these trips as income if these trips should be determined to be "shallowly disguised vacations."

I would like to ask that you investigate this matter and obtain from the Japanese officials and others involved a complete explanation of the entries with reference to the questions posed, as contained in my enclosures.

Your cooperation in this matter will be greatly appreciated.

Sincerely,

/s/ LARRY P. MCDONALD.●

## CZECHOSLOVAKIAN EXILES PETITION UNITED NATIONS

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. BIAGGI. Mr. Speaker, last month marked the 10th anniversary of the repressive invasion of Czechoslovakia by Soviet troops on August 21, 1968. The spark of freedom and democracy nurtured by the freely elected leaders of that small country was swiftly snuffed out and replaced with the iron hand of authoritarian rule.

Those of Czechoslovakian nationality living outside the homeland are seeking to focus international attention on the plight of the oppressed people of their country. Jan Papanek, formerly Ambassador of Czechoslovakia and Permanent Delegate to the United Nations under the Dubcek government, submitted a Petition '78 to the Secretary-General of the United Nations Kurt Waldheim. Mr. Papanek submitted the petition as president of the American Fund for Czechoslovak Refugees on behalf of more than 6,000 signators and 17 organizations with memberships totaling more than 250,000.

The appeal to the United Nations asks only that the human rights of the people of Czechoslovakia be guaranteed by its own laws and international obligations freely assumed and that the oppressive puppet government now in control of the country with the assistance of Soviet troops be removed. For the edification of my colleagues, I include the full text at this point in the CONGRESSIONAL RECORD:

PETITION '78

The year 1978 has an extraordinary significance for the nations of Czechoslovakia. It marks several important milestones in its most recent history:

60 years ago—in 1918, Czechoslovakia became an independent country, based upon democratic and humanistic ideas of T. G. Masaryk.

30 years ago—in 1948, three years after the end of World War II and the Nazi occupation, the democratic parliamentary order in the country was again destroyed, its peaceful and democratic evolution interrupted to be replaced gradually by Stalinism which sapped the national will, spirit and resources for many years.

10 years ago—in 1968, the armed forces of the Soviet bloc invaded the country to halt the process of regeneration of its national culture, the humanization and democratization of its public life which resulted in a massive violation of fundamental civil and political rights . . .

Remembering these three anniversaries—we the petitioners.

(1) Demand the withdrawal of Soviet troops from Czechoslovakia and restoration of independence, sovereignty and rights of the people of Czechoslovakia to self-determination as according to Articles I, II, III, IV and VII of the Helsinki Final Act of 1975,

(2) Support the Charter '77 in demanding from the Government of the Czechoslovak Socialist Republic to implement the civil and political rights as defined in the said Helsinki Accord, as well as, in Law 120/75 Sb., adopted by the Federal Parliament of the Czechoslovak Socialist Republic on November 11, 1975,

(3) Call upon the Government of the Czechoslovak Socialist Republic to desist from persecuting the Chartists and other citizens who merely demand that the government observes the Czechoslovak Laws and international agreements on civil and political rights it has signed,

(4) Call upon the Government of the Czechoslovak Socialist Republic to remove or reform all laws which either violate or limit the enjoyment of civil and political rights as defined in the Helsinki Final Act,

(5) Call upon the Human Rights Committee of the United Nations to hold the Government of the Czechoslovak Socialist Republic accountable for periodical reports on the measures undertaken to implement the International Covenant on Civil and Political Rights in the country,

(6) Call upon all signatory countries of the Helsinki Final Act to hold the Government of the Czechoslovak Socialist Republic acountable for the full implementation of the Accord and of all related international agreements which the Helsinki Final Act invokes. . .

Dated this 1st Day of January, 1978, New York.

The document Petition '78 has been signed originally by the following individuals:

Jan Babinec. Antonin Bartos, Marie Bartos, Jiri Blaha, Josef Bursik, Jana Bursik, Jiri Corn, Ota Coufalik, Marie Coufalik, Antonin Cech, Stepanka Cech, Jan Dohnalek, Anna Dohnalek, Libuse Drobilkova, Anna Faltus, Miroslav Fic, Richard Fries, Milan Frybort, Eva Hladik, Ota Hora, Lida Hora, Karel Kalenda, Eliska Kalenda, Ota Kobylka, Gita Kobylka, Vladimir Krajina, Marie Krajina, Jiri Krupicka, Ada Krupicka, Vladimir Krivanek, Horty Krivanek, Jan Kuncir, Josef Kucera, Zdenka Kucera, Milos Kunta, Miloslav Malecek, Anna Malecek, Jaroslav Maliska, Rozina Nehasil, Frantisek Novy, Zdenek Otruba, Hana Otruba, Jan Papanek, Betka Papanek, Jozka Pejskar, Anna Pejskar, Zdenek Prazak, Evelyn Prazak, Olga Radimsky, Ota Rambousek, Zdenka Rambousek, Antonin Roubik, Viera Roubik, Lumir Salivar, Milan Schiller, Josef Schneider, Emil Sklenar, Zdenek Slavik, Drahomira Slavik, Antonin Strnad, Josef Skvorecky, Zdenka Skvorecky, Eduard Vondracek, Vera Vondracek, Antonin Votruba, Vlasta Votruba, Jaromir Zastera.

Petition '78 has been sponsored and approved by the following organizations:

Alliance of Czechoslovak Democratic Associations in Australia and New Zealand.

Associations of Czechoslovak Legionnaires.

Association of Free Czechoslovaks—Queensland.

Association of Free Czechoslovak Sportsmen.
Ceske Slovo—Newspaper of the Czechoslovak Exiles.
Council of Free Czechoslovakia.
Czechoslovak Advisory Committee in West Europe.
Czechoslovak Christian Democracy in Exile.
Czechoslovak National Association of Canada.
Czechoslovak National Council of America.
Czechoslovak Orel in Exile.
Czechoslovak Sokol Abroad.
F.C.I. News Agency Ltd.
Naarden Committee—Czechoslovakia.
National Council of Women of Free Czechoslovakia.
The Czechoslovak National Socialist Party in Exile.
The Swedish Socialdemocratic Youth.
With the membership of over 250,000 all over the world.

We, Ota Rambousek and Mike M. Kunta of New York City duly declare that we have received 6,438 signatures, from various individuals and organizations sponsoring and approving Petition '78. August 18, 1978.

I, Jose Cabanas of New York City duly declare, that I know the above named individuals, and that I have seen and recounted the signatures received by them sponsoring and approving Petition '78. August 18, 1978.

On this 18th day of August, 1978, before me personally came Jose Cabanas, Ota Rambousek and Mike M. Kunta to me known to be the individuals described in, who, being by me duly sworn, duly acknowledged they executed the foregoing instrument. August 18, 1978.

ANGEL R. RODRIGUEZ,
*Notary Public, State of New York.*●

## REGENERATION

## HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. FRENZEL. Mr. Speaker, the following article on regeneration appeared first in the Saturday Review and then was reprinted in the Washington Post.

It was called to my attention by a remarkable Washington-based organization, Paraplegia Cure Research, with which I have worked closely since its founding in 1976. Paraplegia Cure Research's sole mission is to liberate paraplegics from their wheelchairs through central nervous regeneration. As this article points out, research in regeneration has exciting possibilities not only for curing sufferers of central nervous system disorders, but also for eventual regrowth of limbs.

Mr. Speaker, research in regeneration and the efforts of Paraplegia Cure Research deserve the fullest support of the Congress and the public. The eventual payoff in terms of alleviating human suffering is tremendous—both in the United States and through the world.

The article follows:

GROWING NEW LIMBS—SCIENCE'S SEARCH FOR A WAY TO RESTORE LOST ARMS AND LEGS

(By Susan Schiefelbein)

Physicians may one day treat patients who have shattered limbs, crippled joints and injured spines in a way that man never before dared to dream of: regrowing the damaged part—whole, perfect and undiseased.

For centuries, man has watched in wonder as the salamander regenerated its severed limbs, never imaging that complicated human parts could grow back in such a way. The halt and the lame could be made whole, it seemed, only by the healing waters of Bethesda or the touch of a god incarnate. But in recent years, scientists have grown back a frog's leg from elbow to toes and a rat's leg from shoulder to the top half of the elbow, with cartilage and bone, muscle, nerves and veins, all in awesome anatomical precision.

One of the pioneers in the field, Dr. Robert Becker, chief of orthopedic surgery at the Veterans Administration Hospital in Syracuse, N.Y., has already applied the newly found healing mechanism to broken human bones, successfully knitting fractures that previously had failed to heal even after extensive surgical procedures. He and his colleagues have now reached the point where they can confidently predict that a regeneration of human parts can and will be achieved, possibly in the next few decades.

A brave new world? Not a bit. The magic of regeneration has been with us all along, hidden in the wondrous complexity of every organism's bodyworks. These scientists are not performing miracles; they are witnessing them.

Their challenge, then, has been not so much to recreate a limb as to discover how some animals do so naturally. The chronicle of their quest reads like a detective story; for clue by clue, Becker and his colleagues have been unraveling a medical mystery that began with creation.

The tale begins with a few known biological principles about regeneration that were to serve as the departure point for their search. The way regenerative healing works has been observed, if not explained, for hundreds of years; the process still seems so magical that even the most clinical of researchers must shake his head in amazement as he watches the microscopic metamorphosis unfold.

The body of every animal, from the flatworm on up the evolutionary scale, possesses primitive, undifferentiated cells that could best be described as being like raw clay. When a creature which can regenerate loses a limb, these cells migrate to the injury, forming a mass called a blastema. Some of the mature, specialized cells at the site of the injury dedifferentiate, reverting to primitive form, and add further to the blastema. The blastema then respecializes, transforming itself into whatever types of cells are needed to replace the missing part—bone cells, cartilage cells and so forth. Somehow, the blastema absorbs information about what to produce along the way, so that at the appropriate moment, it creates an elbow joint or a tibia or a fibula, a left leg or a right one.

TWO IMPORTANT CLUES

The first formal paper on regeneration was written by the great Italian physiologist Luigi Spallanzani and appeared in 1768. Spallanzani's experiments uncovered the first two important clues: The younger the animal, the greater its capacity for regeneration; and the lower an animal is on the evolutionary scale, the greater its capacity for regeneration.

This latter finding was especially interesting, for it provided a clue in itself. The lower orders that regenerate are biologically just as complicated as man; their parts are just as difficult to replace. The main difference is—and this was later to become a significant clue—that animals in the lower orders have comparatively more nerves in their extremities.

A third clue was buried in the writings of the late 1700s. Every time a creature is injured, an electrical charge is generated at the site of the injury. This phenomenon is called the current of injury, and it is proportionate to the severity of the wound.

It was not until some 180 years later that scientists again began to delve into the mystery of regeneration. In 1945, the biologist Meryl Rose (a retired professor of anatomy at Tulane University College of Medicine who is currently affiliated with Woods Hole Marine Biological Laboratories) amputated the forelegs of some frogs below the elbows. Thinking he could perhaps promote growth by preventing the injuries from scarring over, he bathed the stumps of the frogs' limbs in a strong salt solution.

The result was startling. About half of each amputated limb regenerated, developing new bone and muscle and the some cases even showing the beginnings of digital growth. Thus Rose became the first to prove that an animal which cannot regenerate naturally can be made to do so artificially.

The next year, a Russian named Vladimirovic Polezhaev amputated frogs' legs in a similar fashion and then irritated the stumps by repeatedly jabbing them with needles. The result? Astonishingly, he regenerated about the same amount of growth that Rose had with the salt solution. It was possible that the salt not only had prevented scarring but, like the needle punctures, had actually exacerbated the injuries and thereby simulated growth. Now there was another clue: Regeneration may somehow be connected to the severity of injury.

In the early 1950s, Marcus Singer, now a professor of anatomy at Case Western Reserve University in Cleveland, became the next to uncover important evidence. He transferred nerves from a frog's healthy hind legs to the stump of its foreleg; his frog also regenerated about the same amount of growth that Rose's had. Singer's contribution to the collection of clues is an almost mathematical formulation: The nerve tissue required for regeneration must constitute at least 30 percent of the total tissue at the site of the injury.

Then, in 1958, a Russian named A. V. Zhirmunskii discovered that the current of injury is proportionate not just to the severity of the injury but also to the amount of nerve tissue in the area.

Becker's turn at medical detection also came in 1958. He assembled his evidence as a good detective would assemble his suspects: Injury is related to regeneration; nerve tissue is related to regeneration, and both injury and nerve tissue are related to the current of injury. Could the current of injury, Becker reasoned, thus be related to regeneration?

He measured the current of injury in a salamander's regenerating leg and in a frog's scarring stump. Sure enough, his findings seemed to support his hunch. On the day the legs were amputated, both creatures generated the same current of injury—a positive voltage. But there the similarity ended: As the frog's stump scarred over, the current of injury in its leg declined to zero, but the current of injury in the salamander's leg switched from a positive to a negative polarity and only then began to decline, reaching zero when regeneration was complete.

Becker had definitely discovered a connection between the current of injury and regeneration. In a sense, however, his discovery complicated rather than clarified the mystery. The way the current of injury worked in those limbs was simply not concurrent with the way nerves are supposed to produce electricity.

Nerve fibers have traditionaly been thought to respond to stimulation in only one way: Sodium penetrates into the nerve cell and potassium leaks out, creating a chemical reaction that generates a charge called an action potential. Whatever the stimulus—a gentle touch or an injury—the

action potential is exactly the same. Moreover, each nerve fiber can create only one of these potentials at a time. Becker compares the system to that of a digital computer, which transmits single impulses in rapid succession.

Herein lay Becker's problem: How could the action potential—a constant—account for the switch from positive to negative polarity that he had seen in the salamander's current of injury? How could the action potential account for the fact that the current of injury lasted many days after the stimulated nerve cells should have either died or repaired themselves and ceased their impulses? How could the action potential, which responds in the same way to every stimulus, account for the fact that creatures feel intensities of pain?

Becker guessed that in addition to its digital-computer impulses, the central nervous system can carry steady currents and potentials—in the way an analog computer can. He further theorized that the body's analog computer system has an input signal—could it be pain?—that triggers an output signal which switches on the healing function.

To verify his theory, Becker measured the electrical potentials of different points on the skin of humans and other animals. He found an electrical field that roughly parallels the nervous system. A disturbance in that field, such as an injury, might stimulate cells to begin repairs.

Becker's theory ran counter even to basic textbook explanations of the nervous system, and medical men let him know it. "That cells are capable of sensing and responding to levels of electrical current is hardly universally accepted," he wrote in one medical journal. But he stuck to his convictions; and today, more than a decade later, doctors are coming to accept his hypothesis. "They no longer march out of my lectures," he says. "The response has changed from complete rejection through amused disbelief to—at present—almost enthusiastic acceptance."

BONE REGENERATION

And no wonder. The experiments that Becker based on his unorthodox vision of the nervous system produced remarkable results. First, in 1964, Becker began to examine the spontaneous regeneration of human bone. Given the fact that bone is not well innervated, the theories about electrical stimulation would not apply—unless bone could generate its own electricity. Becker knew that bone accommodates automatically to mechanical stress. When he measured the currents around a stressed bone, he discovered that it generated a positive charge on the stretched side (which dissolved some bone) and a negative charge on the other side (which built up bone and provided the necessary added support). Then Becker administered a negative charge to a mouse's broken leg bone to see if he could artificially stimulate bone growth. He did.

In 1964, Steven Smith, then a student of Meryl Rose and now an associate professor on the department of anatomy at the University of Kentucky, studied Becker's findings and got the idea of implanting a simple electrode right into the muscle tissue of the stump of a frog's leg. He soldered together a piece of platinum wire, which has a positive charge, and a piece of silver wire, which has a negative charge, and embedded the metal into the animal tissue—with the negative end at the stump—thus improvising a crude battery. It worked. He regenerated about as much growth as the Rose, Polezhaev and Singer experiments had the decade before.

Breakthrough followed breakthrough. Becker examined his healing frog bones under a microscope and saw that the blastema around the regenerating bone was coming from a blood clot that had formed there. (A frog's red blood cells are prime candidates for blastema, for, unlike the red blood cells of mammals, they have nuclei and thus can easily divide and dedifferentiate.)

His next step? He had a student expose frog blood to various levels of electrical current in order to find out exactly how much of a charge is needed to turn blood cells into blastema. Days passed, then months. The student administered smaller and smaller currents to the blood (high ones either did nothing or began to cook the cells), but he saw no evidence of change. Finally, the week before the student was supposed to quit and return to his classes, he found that blood cells revert to blastema at a few billionths of an ampere.

In 1973, armed with the knowledge of how much current produces a blastema, Becker decided to brave the step from regenerating amphibians to regenerating mammals. He amputated a rat's foreleg below the shoulder and implanted the platinum-silver electrode device at the stump. Again, success—this time, the most exciting ever. The animal regenerated nerves and tissue and even formed the humerus, the upper-arm bone, complete with the rounded end that fits into the elbow joint. Other parts of the elbow joint began to take shape, including cartilage and two bony structures that Becker surmised were the forerunners of the radious and ulna bones of the lower leg. Everything about the new growth was precisely as it had been in the original limb. And all this growth took place in just three days.

But then the growth ended; for the electrode remained in the shoulder tissue, while the end of the stump, where regeneration was taking place, had grown beyond the reach of its vital current.

The rat's growth, though incomplete, was nevertheless significant, particularly in one respect: The fact that the rat, whose red blood cells have no nuclei, could form a blastema—probably from bone marrow—indicated that in all probability humans could do so as well.

About this time in London, two newborn infants lost their fingers, and the fingers regenerated naturally. The explanation, in Becker's view, probably lies with Spallanzani's early finding that the younger the creature, the better its ability to regenerate. But what was most significant about the babies' growth was that it indicated that the human body contains within it the capacity for regeneration.

Later in 1973, Smith devised an electrode that would travel with the regenerating stump. Again he amputated a frog's leg below the elbow: With the new device, the frog's entire leg grew back.

The year 1973 marked a third triumph as well: Becker began using his findings about the body's electricity in experiments on human bone. A patient of his who had fractured his ankle two years earlier suffered from a mild diabetic condition that was interfering with the bone's ability to regenerate. The ankle had failed to mend despite two corrective operations; and the bone on both sides of the break had deteriorated.

Under normal circumstances, Becker would have had to amputate the leg. Instead, he implanted an electrode into the fracture and administered the same current that he found had divided the frog's red blood cells. He waited three months, the time an ankle fracture would normally take to heal, and the fracture regenerated. A sample of the new bone showed it to be normal in every respect.

CLUE IN THE NERVES

The next year, during the course of routine experiments, Becker stumbled on another clue that finally shed considerable light on his nervous system theory. With the intention of impeding growth, he and his staff broke the tibia in a rat's leg and then cut the nerve that led to the broken limb, assuming that without a nerve supply the rat's bone would heal poorly, if at all. But the fracture healed well; the only drawback was that it took twice the normal time. Perhaps the severed end of the nerve needed time to degenerate, they thought. So they cut the nerve six days before breaking the bone. To their astonishment, the bone healed in the normal amount of time, as if the nerve had never been cut at all.

What was going on? They opened up the leg, only to discover that the nerve fiber had not healed. What had healed was the nerve's sheath of Schwann cells—one of a dozen types of cells that make up the "perineural group"—traditionally thought to serve no purpose other than the insulation of the nerve fiber. The perineural cells in the brain were known to carry a steady current—for what reason, no one knew. It now seemed apparent that Schwann cells also carry a steady current. This was proof enough for Becker that the analog computer system he had theorized was indeed contained in the perineural cells—cells that sheathe the entire central nervous system.

The perineural discovery is by no means the end of the tale. Experiments must still be conducted to determine if electrical regeneration is entirely safe. Could applications of electricity to the peripheral nervous system, for example, induce some sort of behavioral disorder? Or damage our cognitive powers? Every human body contains dormant cancer cells. Could an implanted electrode shock them into fatal multiplication?

Nevertheless, much of the mystery has been solved. Only the last chapter—the most exciting one— has yet to be written. It may well describe the modern world as a Shangri-La where damaged human parts are simply cut off and grown back properly. Our future may lie not with the bionic man but with the natural man.

The replacement of arthritic hip joints with Teflon parts, for example, is now a costly and not altogether satisfactory operation. The Teflon wears out. If the device is implanted in a young person, it may have to be replaced some four or five times in the course of his life. And with each hip operation, there is the risk of infection, which can be a deadly prospect. The alternative—growing a natural hip—would be safer and cheaper.

We may some day regenerate a damaged heart. Becker has discovered that salamanders replace some 50 percent of their cardiac muscles by regeneration. And Polezhaev has cut away the scar tissue on the hearts of dogs which had suffered severe heart attacks; all of the hearts regenerated and less than 5 percent of the dogs died. We may even replace parts defective at birth, given that damaged genes do not garble the instructions given to the blastema.

Becker himself is hesitant to herald regeneration as an immediate cure for amputees. The replacement of several parts, he says, is still pretty far off. Why not aim for more immediate uses that would be beneficial to greater numbers of people? Severing the spinal cord does not regenerate. Becker, however, thinks that since salamanders regenerate their spinal cords, man's spinal cord could perhaps be electrically stimulated to do the same thing. It would take only a year to see whether electrical stimulation works without complications in a paraplegic dog or monkey. And if such stimulation works safely in them, it could be safely applied to humans.

UNANSWERED QUESTIONS

The outstanding disappointment of the entire regeneration tale is that no one is conducting that experiment with paraplegic animals. Why? Money. Becker's own $100,000 grant from the Veterans Administration just covers staff salaries. Experiments are costly; keeping paraplegic animals in particular is frightfully expensive.

Still, it must not be forgotten that the financial problem—serious though it is—is the only laggard in regeneration's exhilarating face toward the future. It is the promise

of regeneration—not the problems—on which we must focus attention. Hundreds of questions wait to be answered.

Animals that regenerate don't get cancer. If a tumor is implanted in a lizard's body, which does not regenerate, it grows to fatal proportions. But if it is implanted in the tail, which does regenerate, the tumor disappears. If we learn how to turn on regeneration (controlled growth), can we learn to turn off cancer (uncontrolled growth)?

Hormones play an important role in regeneration. A chopped-up adrenal gland when implanted in a frog will generate some growth. Moreover, if the adrenal gland is removed from a lizard, the creature will lose its ability to regenerate its tail. If the hormone prolactin is then injected, the lizard will regain its regenerative potential. It has also been hypothesized that hormones secreted during stress can cause cancer. Prolactin is secreted during stress. Is there a connection? Do carcinogens impose a stress on the body, which then triggers a hormonal release that oversensitizes the body to its own electrical forces, thus sparking wild division of cells?

If a negative charge builds up bone and a positive charge dissolves bone, could positive charges have an effect on malignancies?

If pain is the input signal needed by the brain to trigger healing, does anethesia—the muffling of the pain signal—impede healing?

When power lines are stretched across the sea, the amplifiers are put in at regular points to boost the current along. The body's electrical system may run the same way, equipped with special spots along the analog nervous system that boost the signals as they are carried to or from the brain. Becker has found that half of the traditional acupuncture points correspond to the spots in the nervous system that seem to be amplifiers of electricity. Could acupuncture simply involve the insertion of a metal needle into one of the amplifiers, short-circuiting the pain signal so that it never reaches the brain?

Does the body's sensitivity to electricity explain why reversals in the earth's magnetic field are related to the extinction of certain animals?

When one electrical field is imposed on another, the currents are altered. When one human being approaches another, do their biological electric systems overlap? Is this a scientific explanation for the "psychic" mystery of ESP?

The characteristics of the analog nervous system are such that it should be influenced by external electrical fields. Becker has already found experimental evidence that would indicate that electrical fields such as those produced by power transmission lines produce stress in animals—with consequent physical effects that are shocking indeed to the layman. What is the relation between this unseen electrical pollution and human stress?

The possibilities seem infinite. Each is like a silver key. Which one will open the door to a new world? ●

## WHAT IS THE ENERGY PROBLEM?

### HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. COLLINS of Texas. Mr. Speaker, today, most people complain about energy but very few people understand the cause of the shortage. Just what is the energy problem?

My wife suggested I read an interesting report she received in The Key Reporter which is the news bulletin of Phi Beta Kappa. This paper had a long story on energy by Dr. Charles J. Hitch who is president of Resources for the Future. It was a comprehensive four-page report but I want to quote some of of its key sections about the energy problem.

ENERGY IN OUR FUTURE

(By Charles J. Hitch)

Public opinion polls consistently reveal that about half of the American people do not know that this country imports any oil from abroad, when in fact our imports constitute close to fifty percent of our current petroleum consumption.

Energy is a problem of national security and foreign policy, stemming from our dependence on foreign sources of oil.

In 1973–74 this combination resulted in an oil embargo, long lines at gas pumps, a fourfold price rise, inflation, recession, and prolonged economic disruption. We are even more vulnerable now for our oil imports are higher and the proportion of total imports that come from the Middle East is also higher.

Oil is a comparatively recent part of human society—its major use really has been confined to this century—but we have structured our whole society around it.

Over the long run, the domestic economic problem centers on making a smooth transition from fossil fuels to renewable or inexhaustible sources.

Energy is a balance of payments problem. Last year this nation's bill for imported oil came to $45 billion, a sum about fifty percent greater than our entire trade deficit. We are the world's number one agricultural exporter, but it now takes two years' worth of agricultural exports to pay for one year of imported oil. The shaky value of the dollar abroad is directly related to our astronomical oil bill and the transfers of wealth it represents. And the situation will get worse: projections for the mid-1980's are for the $45 billion tab to double or more.

Our main reliance must be placed on prices and markets. The market is now giving decidedly the wrong signals. They say that energy as a whole is cheaper than it really is, and that certain sources of energy are relatively cheaper than their alternatives, when that isn't true either. The result is that we are subsidizing imported oil, penalizing domestic production, and discouraging both conservation and fuel switching by industrial and final consumers.

Let us take several examples of what I mean by "wrong signals" in the case of natural gas which is kept at artificially low prices in the interstate market by federal regulation: Most gas furnaces are very inefficient, but since wasting gas doesn't waste much money, there is little incentive to improve efficiency.

There is resistance to expensive shipments of gas and liquefied natural gas from Mexico and Alaska but these are overpriced only when compared to controlled prices of domestic natural gas. They are cheap when compared with imported oil. Similarly, so-called unconventional sources of gas, such as the geopressurized brines in the Gulf of Mexico, are neglected because they are much more expensive than controlled-price conventional sources. Finally, it is nearly impossible for solar water and space heating to compete with gas. This is particularly unfortunate because it reverses the priorities: gas, with its cheap, efficient storage, is the perfect backup for solar. Controlled prices have similar effects in the case of oil.

In general, we can say that pricing a unit of energy below the cost of providing another unit is the chief obstacle to substantial conservation and to the development of new, benign sources such as solar. It is ironic that we impose price controls on the one product—energy—which we most want to conserve and to develop new sources for.

Because of price controls, the market is confusing both producers and consumers, and we are compelled to cope with the problem by all sorts of devices which aren't working well, such as exhortation and detailed regulation.

Further, when compared with prices of two decades ago, 1956, gasoline is up only 4 percent, fuel oil up 31 percent, gas service up 5 percent, and electricity down 37 percent.

This reliance on prices and taxes is an historic turnaround, for the nearly instinctive response heretofore has been to create a complete set of regulations, along with a new bureaucracy to try to enforce them. This approach hase been as ineffective as it has been ubiquitous.●

## SAVING THE ENVIRONMENT IS NOT INFLATIONARY

### HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. BROWN of California. Mr. Speaker, as we attempt to discover the various causes for our unacceptable rate of inflation, we are bound to reach some wrong conclusions. An excellent example of this is the assertion by some economists that environmental regulations are a major cause of inflation. It is easy to see how a superficial analysis could lead to this conclusion, but it is discouraging to see the acceptance of this assertion by responsible individuals.

Our economic indicators measure money flows. They do not measure nonmonetary values. They do not generally measure second-order effects, and seldom have any relationship to the quality of life, in contrast to their ability to measure the dollar costs of goods and services. Despite these well known limitations economic indicators are frequently misused to imply that they measure qualities that they do not.

It hardly needs to be noted that environmental regulations that improve the health of individuals or at least prevent the deterioration of health have economic benefits. The GNP might be adversely affected if health care costs decreased, but the economic benefit to the individual, not to mention the noneconomic benefits, are indisputable. Similarly, laws that improve the quality of air and water have real economic benefits to property values, recreational values, agricultural production, and health. The point of all this is that our economic indicators are not devised to measure the general welfare, which our Constitution calls on us to promote.

Even in conventional terms, environmental regulations do not cause a significant amount of inflation. This fact has been well documented by those who have examined inflation in our society.

Mr. Speaker, at this time I insert excerpts from a recent speech on this subject by Gus Speth, a member of the President's Council on Environmental

Quality which appeared in the August 18 issue of the Christian Science Monitor.

The article follows:

SAVING THE ENVIRONMENT IS NOT INFLATIONARY

(By Gus Speth)

Five years ago, when the OPEC nations suddenly hiked the price of crude oil, the U.S. began looking for ways to resolve the energy crisis. As any well-informed observer might have predicted, environmental regulations immediately came in for a close look—and schemes were quickly hatched to speed the development of new energy sources by revising or outflanking laws.

Then, as unemployment inched upward, environmental regulations were attacked again—this time, as a barrier to creating jobs. Critics of environmental regulation did, indeed, have some numbers on their side: according to the Environmental Protection Agency's analyses, the costs of pollution control by 1976 had forced the closing of plants employing about 20,000 people. But the defenders of such regulation came back with another set of numbers that deserved attention: air and water pollution control investments forced by local, state, and federal regulation had also *created* more than 600,000 jobs—roughly 30 new jobs for every one they had destroyed.

Today environmental, including health and safety, regulations—having weathered, at least temporarily, the energy crisis arguments and the unemployment arguments—are being criticized on a new ground: as contributing substantially to inflation.

How much do our present environmental protection laws cost us?

To date, only one really comprehensive analysis of the inflationary impact of pollution control regulations has been done. It was performed by Chase Econometrics at the behest of the Council on Environmental Quality. Thus there might be a certain suspicion here of the contractor coming up with answers that the client liked. But Chase Econometrics has its own reputation to protect; more to the point, the Chase findings have been published, widely disseminated, and they have never been refuted.

Chase's study indicates that, for the period 1970–1983, federal pollution-control requirements would cause an average annual increase in the Consumer Price Index (CPI) of between 0.3 percent and 0.4 percent with the 1978 figure estimated at 0.5 percent. This is in line with figures from the Council on Wage and Price Stability. COWPS estimates that the inflationary impact of all federal regulatory efforts adds seven-tenths of one percent to the CPI.

The first point to note is that, even by standard economic measures, any conceivable modification of federal environmental and health regulations would produce no significant reduction in the overall CPI. If the inflationary impact of these requirements could be reduced by 20 percent—a substantial relaxation—the CPI's increase would be restrained 0.1 percent: the net effect of even draconian measures could be the difference between a 10 percent and a 10.1 percent increase in the CPI. Further, even if we were to order modifications in our federal environmental and health regulations tomorrow morning, the economic effects would not be noticeable for some years . . . and we do not know what the inflationary pressures will be at that time.

Moreover, we must recognize that the CPI, like the GNP, is a very limited measuring stick. It gauges inflation by measuring the price increases of a typical market basket of goods. Expenditures to improve the environment can and do greatly increase consumer welfare—I have in mind improvements in public health, reduced property damage, increased agricultural and resource yields, and enhanced recreation and enjoyment of leisure time—but these benefits to consumers are poorly reflected in the CPI. Moreover, while it is true that enhancing environmental quality leads to price increases for some goods, it is quite likely that consumers will change their consumption patterns, switching away from the goods whose relative prices have increased. To the extent that such substitution takes place, the CPI will overstate the effect of these price changes since it is computed on the presumption that the "typical" market basket remains the same.

For both these reasons, the CPI is not a satisfactory measure of the inflationary impacts of federal environmental regulations: a measured increase in the CPI does not mean that such requirements, on balance, cause inflation. Inflation is best understood as an increase in price without a corresponding increase in value. It follows that as long as the full benefits of environmental regulations exceed the full costs—and I believe that this is clearly the case today—these regulations cannot be considered truly inflationary. The Council of Economic Advisers made a similar point in its 1978 economic report to the President when it noted that insofar as federal regulatory efforts "result in improvements in public well-being, we may simply have taken part of our productivity gains in forms that are not measured in GNP."

Occasionally some unusual incident brings the limits of our economic measures to our attention. In 1952, London experienced a five-day episode of extreme air pollution. Annual pollution damages to health and property resulting from that incident were estimated at $700 million—and there is, of course, no method for quantifying the value of a human life in terms that make sense to anyone but an insurance company.

We have had plenty of analogous incidents more recently, ranging from the Kepone disaster in Hopewell, Virginia, to the destruction of the Amoco Cadiz off the coast of Brittany. Such dramatic events help us gauge the costs of environmental disaster or weak regulation. Perhaps even more important, they suggest the unmeasured but nonetheless real benefits of property drawn and properly enforced environmental statutes that prevent damage. Our economics counts up the money we have spent; it is not beginning to take account of the money that we did not have to spend to repair the consequences of our carelessness.

I believe that we must make every effort to ensure that environmental and health regulations are not unnecessarily expensive and are set after due consideration of economic impacts—and I want to stress that this is required by almost all federal environmental laws and is an integral part of the program of the Environmental Protection Agency and other agencies—but we must look elsewhere than environmental regulations for the underlying sources of inflation and the appropriate targets for our anti-inflation efforts.

## MILLIONS OF DOLLARS FOR HANOI

### HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. BOB WILSON. Mr. Speaker, I would like to share with my colleagues the following article from the Air Force Times of August 4, 1978:

MILLIONS OF DOLLARS FOR HANOI

(By Ira C. Eaker )

The World Bank and associated agencies have promised $90 million to Hanoi, $60 million as a 50-year, no-interest loan, $30 million as a three-percent interest, 25-year loan. Ostensibly this is provided to repair war-damaged Vietnam rice production, now 15 percent short of need.

Red sympathizers in this country pointed out that the Marshall Plan helped Germany and Japan to recover with mutual benefit to their conquerors.

There are some obvious errors in this slanted sophistry:

Hanoi did not lose the Vietnam War; we did, because of Hanoi's callous repudiation of the Paris Peace Treaty.

The Marshall Plan did not aid Germany and Japan until each had installed democratic, non-tyrannical governments allied with the free world.

It was the vast, forced urbanization program, post-war, which decreased rice production. Millions of people were thrown out of the cities to starve. Other millions were thrown into concentration camps for "reeducation." It was this convulsion that drastically reduced the food supply.

The volume of human suffering and tragedy which has occurred in Southeast Asia as a result of the Red tyranny exceeds that caused by either Hitler or Stalin, as a percentage of population. Hitler's holocaust accounted for some six million dead out of a half-billion conquered peoples. Stalin killed 10 million farmers who opposed his collectivization program, out of 180 milion people.

The World Bank gets 98 percent of its funds from the free-world nations. Why should communist-dominated nations get most of its gifts or loans? Are there no needy, worthy recipients in the free world? What about the brave "boat people," the 150,000 refugees who have fled from the hell of Red-controlled Vietnam, Laos and Cambodia? This $90 million could be of great help to the 150,000 escapees now living in poverty in refugee camps in Thailand and elsewhere.

This unconscionable gift to Hanoi could not have come at a more inappropriate time. It makes a mockery of President Carter's campaign for human rights, when the most flagrant violators of human rights in this century are thus rewarded for their tyranny.

There are other astounding international implications. It rewards a Soviet ally; it helps Russia to achieve world domination. For example, the vast naval base at Cam Ranh Bay, which we built, is now available to the Russian fleet, greatly aiding its threat to free-world oil routes, including those to the Philippines and Japan.

It also trumps our "China card." At the very time Red China is withdrawing its support from the Vietnamese tyrants, the World Bank rushes in with aid.

The tragic consequences of this error are redoubled since the World Bank head is an American. I can already hear the worldwide Red propaganda machine grinding into gear for endless repetition of the condemnation, "The U.S. now admits its war crimes in Vietnam."

Two excellent articles, by eminent authorities on Southeast Asia appearing in the 1978 summer issue of *Strategic Review*, completely confirm the fallacy of these World Bank gifts and loans.

It is irrational to take money earned from the free enterprise system and use it to aid the always-faltering economies in communist countries.

The Carter administration and Congress must stop this outrage.

## DISPLACED HOMEMAKERS: A COMPREHENSIVE APPROACH

**HON. JOHN J. LaFALCE**
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. LaFALCE. Mr. Speaker, the problems faced by that segment of our society known as displaced homemakers are receiving necessary and warranted attention. As important as the role of the Federal Government is in providing funds for pilot projects for displaced homemaker job placement and counseling centers, the equal importance of community involvement cannot be overlooked.

In the Buffalo, N.Y., area, we are fortunate to have displaced homemaker centers providing excellent programs for widows and separated or divorced spouses in need of counseling for entry into the job force. In addition to these centers, we have active community involvement on behalf of widows, whose emotional adjustment is sometimes greater than, or at least equal to, the financial adjustment following the loss of their husbands.

I would like to share with my colleagues a program initiated by Dr. and Mrs. Andre Toth who organized, through Sisters Hospital in Buffalo, N.Y., free group counseling sessions for widows. I believe this kind of community program, which helps widows realize that their feelings of identity loss, fear, frustration, guilt, and loneliness are shared by others, is an excellent example of the comprehensive approach which must accompany career planning for displaced homemakers. A summary of the Toth's program follows:

ABSTRACT

It describes a group therapy approach designed to help the widow deal less painfully with her situation. This is done by focusing on questions relevant to this population, by individual catharsis and by reinforcement of behaviors which would otherwise be thought as "abnormal". It also tries to find some common denominators so that others may use the information and start similar groups.

### GROUP WORK WITH WIDOWS

#### STATISTICS

In 1976, of the 12.6 million widowed individuals in this country, 10.7 million were widows. Further: "the chances that the marriage of today's typical bride of 20 and groom of 23 will eventually be broken by the death of the husband are 70 in 100." Lastly, "one out of every eight women 14 years or older is widowed." Even the cold and detached aseptic quality of numbers cannot hide the pretty grim reality that there must be a whole lot of lonely women out there.

#### PLANNING

It was partially in response to these numbers that in March of this year, we began thinking about, and planning for a group therapy program for widows. As another group program we had been running for three and one half years for post myocardial infarction patients and their spouses, it was also to be sponsored and housed by our employer, Sisters of Charity Hospital of Buffalo, New York. In some ways, both of these programs have been an attempt to fulfill roles that go beyond those traditionally associated with hospitals.

In any event, even though we had experience running groups of different types, we had none with widows; a search of the literature found a relative abundance of books written by widows for widows, but nowhere could we locate a formally organized group therapy program for this particular population.

As we continued reading, we found that the death of one's husband provided such a strong common denominator that our initial question concerning the composition of the group was indirectly answered and we felt that we could try to mix women of different socio-economic background and ages without jeopardizing the quality of the therapeutic experience; it turned out that we were right.

We decided that we would conduct six sessions, and that we would limit the group size to a maximum of 12. We selected a number of issues we had learned to be significant to widows, but we also left plenty of time for the clients to express individual concerns. Should this require a couple of additional sessions, we would add them, but we did not want to keep meeting indefinitely as we did not care to foster dependence and repetitiveness.

To find our widows, we went through our medical records and located a number of women whose husbands had died in our hospital. We selected women who had been widowed for no less than six months and no more than fourteen. These, we realized, were in some ways arbitrary decisions, for if it is true that the first three or four months, identified as the shock stage (4), will not allow the individual to be therapeutically receptive, it is also true that it is a highly individualized process that hinges on a long list of variables. We tentatively excluded individuals at the other end of this period because we felt that probably, the most difficult time would be in the eight to ten months following the inital shock, and since we would only have one group of ten to twelve individuals at the time, we wanted to reach those whom we felt needed it most.

We also tried not to include women whose present status did seem to indicate psychological problems that went beyond grief and whose presence in the group, we felt, may be distracting or disruptive of the group process. In so doing, we realize that these individuals too should get help, but we could not provide it. As it turned out, some of the individuals that were not included were already receiving active phychiatric support.

#### PURPOSE

Our program would allow individual widows to share with each other, in a protected environment, the meaning of the widowhood experience. We, as therapists, would provide this environment, prop up emotional casualties and prevent the development of pathology. Our hope was that the catharsis and the sense of group identity would help our clients develop insight that would help them to deal more effectively with their situation.

#### CATHARSIS AND IDENTITY

The first session found us with twelve women who had never seen each other before and whose only link was their widowhood. After a brief introduction to the program and a statement concerning confidentiality, we asked that each widow narrate the events that lead to the death of the spouse: length and type of illness, location of death, memories of the last days or weeks, or in lengthy illnesses, months, the funeral, the first few days following it, and anything they felt signicant to the event. This was perhaps the most dramatic portion of any session: as every widow narrated her story, interrupted by her tears at recollecting those very painful moments, those listening nodded their heads each time they heard facts and feelings they themselves could identify with. As this process of identification began, some of the pain lessened. As one of these widows told us later: "After listening to each lady tell her sad story, it suddenly became clear that I wasn't alone anymore. I really found a place I belonged. I am a widow and so are all the other ladies."

At the end of our first session, something rather significant happened: where we had one and one half hours earlier 12 total strangers, we now had a group. So strong was the bond of widowhood that their behavior was that of old friends who had gotten together after a long separation. The occasion was obviously not a happy one, but the feeling that the group exuded, somehow, lacked the earlier depressing pall; we would characterize the atmosphere as one of nervous exuberance—nervous, yes, but nonetheless exuberant.

#### DEPRESSION: SLEEPLESSNESS, ACHES, AND PAINS

Following the first few weeks after the death of the spouse, most of our clients began experiencing all kinds of somatic complaints. Sleeplessness was regularly experienced by all group members. Headaches, backaches, and a general feeling of malaise were also experienced by most participants, even by those who had had no such problems prior to their husband's death. There was no change that group attendance produced in terms of these various aches and pains, however few members reported on our second session, that on the night following the group, they had had the first good sleep in weeks. Obviously, we do not know if there was a connection, but we were nonetheless pleased. At the end of the sixth session, several members were sleeping better, but not regularly so. Others still experienced troublesome insomnia. One of the women whose insomnia continued, however, stated to the group that, "Now when I can't sleep, I know other women who are going through the same thing and somehow it helps."

Another symptom of depression everyone in the group felt to varying degrees was a general feeling of aimlessness, a felt difficulty in making decisions, an inability to get going, especially in the morning. As in many other grief caused situations, we let the group express these thoughts, we then threw the question back at them, but the responses were of an intellectual nature and we were at an impasse. Since that first group, we have learnt that there are no formulas to deal with this type of situational depression, but that the understanding on the part of the client that what she is experiencing is a part of a normal and healthy grieving process helps her to deal with it somewhat better.

#### THE SOCIAL CONTEXT: FRIENDS AND RELATIVES

Realizing the supporting role that friends and relatives can play, we asked the group to share their experiences in this area; what we heard was another proof that no matter how much we, in the field, think that death and dying have become overly popularized and have saturated the field of human services, we have apparently reached a very small minority: the fact of the matter is that most people feel uncomfortable with the subject of death and act clumsily at best, in these supportive roles.

It was the consensus of the group that there seemed to be a conspiracy of silence among many of their friends and relatives. In social situations, the name of the deceased was carefully avoided, as was any reference to anything, however remotely connected with him. In the words of one of the widows: "It was as if he had never existed. I kept on bringing his name up and they kept on changing the subject. I felt a tremendous resentment against them all, even though I realized that it was because they wanted to spare my feelings."

One of the sources of strength for the wid-

ow is the realization that her husband has not been forgotten by all those who loved him while he was living. Hearing people reminisce about positive experiences they may have had with him, humorous episodes, anything good linked with him, will provide the widow with temporary, but nonetheless, significant coping ability.

Additionally, we found another example of people's discomfort with death. This manifests itself in wishfully expecting the widow to exhibit a stiff upper lip attitude, not caring to witness any display of emotions, and generally handling the whole situation with as many platitudes as available at the time. This Hallmark Greetings mentality is one additional piece of evidence in the case of lack of understanding vs comforting the bereaved. "People were asking me, how are you, and you know darn well that the only answer they wanted to hear was "fine", commented one widow. Another said, "Everyone was telling me how great I was doing and how fine I looked. All I wanted to tell them was, 'What do you want me to do, crawl and writhe on the floor? Paint my face black?' "

IDENTITY

"When I walk alone into a room full of people, I feel terribly uncomfortable." "When confronted, even with the simplest situation, I have a very hard time." "Ever since he died, I have had these overwhelming attacks of insecurity. Where do you think they are coming from?"

These, and other similar comments, have reinforced for us, at a very practical level, the cultural notion that thinking of women as spouses, mothers, and perhaps lastly, as individuals will accentuate the trauma of widowhood. Having been known for 20–30 years as "John's wife", it should not come as a surprise that on his death, she should have tremendous identity problems. "Now that my husband is gone, who am I?", one of our clients cried very pointedly.

When one's children grow up and leave the household, a similar identity question emerges, especially for the woman whose primary concept of the self was derived from motherhood. The difference of course, is that growing up is a gradual and timely process; the death of one's spouse, is not.

We handled this topic by finding its intellectual explanation, and by first encouraging each participant to gradually begin the rediscovery of the self as unique individuals, slowly disassociating themselves from labels that had become painful.

We realized that the search for identity is a task so complex that it cannot be handled in such a cursory fashion, however, we felt that implanting the intellectual awareness was at least a necessary, if not sufficient condition for change.

GUILT

Although not always at a conscious level, guilt seems to be a feeling that many widows have; when it is not conscious, it may bring havoc to the resolution of grief. The obvious advantage that group interaction creates, is that those who are able to verbalize it, may allow others to bring this vague, uneasy feeling to a level of consciousness where it can be dealt with intellectually at first, and hopefully, emotionally later on.

For the widow, guilt seems to originate, in many instances, from the sorrow at not having been able to do more to prevent the death. "Had I just taken him to one more doctor, had we tried some different drugs" was an often voiced regret. There also is a tendency to remember episodes where the widow, either rightfully so or not, perceives her behavior as unacceptable, as during arguments for instance, and wishes she could take her words back. Even when unable to pinpoint the specific origins of these feelings of guilt, it was obvious that they existed nonetheless and were based on feelings of failure; that his death was a direct reflection on her inability to care for him adequately, that somehow, had she been a better person, this would not have happened. Positive feedback was a natural way to handle these situations in our group and it was provided by both the other clients, and by us. It is our impression that these feedbacks provided the beginning of insight that would, in most instances, lead to a healthy resolution of this problem.

ANGER

Anger, as it pertains to the widow, is a rather puzzling response, and it too will cause the widow to feel guilty.

One of the new behaviors is that of the widow talking to the deceased. This will take many forms: it may simply be an exclamation at the widow's inability to find a missing document, it may be when she experiences car troubles of the type that he used to fix, it may be during a particularly painful moment of loneliness, when she may say: "Oh John, why did you leave me?" First of all, one of the immediate results of the widows' ability to share these one way conversations was that, where as before they were beginning to experience doubts about their sanity they now knew that others did the same thing and that it was perfectly acceptable and normal behavior; this and the wearing of his favorite robe, sweater, or the keeping of a particularly significant item.

Secondly, and just as significant, we began to explore the feelings connected with some of the things the widows were saying.

"I remember getting badly stuck in a snowbank at the end of my driveway and saying, "Where are you John now that I need you," and yes, there was some anger in me; a few seconds later I felt so terrible for feeling this way. How could I possibly feel angry with him, as obviously, he didn't die by choice."

As we explored similar episodes, we found that one of the commonly shared feelings was that of abandonment. Intellectually, they all knew that their husbands did not choose to die. Emotionally, they felt abandoned; their anger was perhaps abstractly directed against circumstances; on a more concrete level, with all of its frightening implications, it was directed towards those who had done the abandoning.

Although, not all members of our groups identified with all this, those who did, received some therapeutic benefits when they realized that what they were feeling was a normal stage in the grieving process and that they were not experiencing it alone.

We are now at the point where we have finished six sessions each, with three groups of widows. A follow up will take place at three, six, and twelve month intervals. Many of the participants confirmed to us what we had already suspected: that the experience had been a worth while one.

In the words of one of the group members: "The group did so much for me; to be able to talk it all out, all the sorrow, guilt, abandonment, and hurt from friends. There was so much inside of me that I couldn't express to relatives or friends, but with the group, I could say it all." ●

## THE NEW POPE AND THE PRESIDENT

### HON. JEROME A. AMBRO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. AMBRO. Mr. Speaker, his brother said: "Don't be misled, behind that charming smile, he is like a diamond—brilliant, strong. What more can one ask of a leader?" And so, not only 700 million Catholics, but the world rejoiced at the selection of a new Pope.

Some knew of his deeds, but no one really knew the man. As a parish pastor, he sold his church's gold to help the poor. He voted for the pill as a birth control device, but silently accepted Paul VI's rejection of it. His father was a migrant bricklayer. He himself was outgoing and learned, but not a world traveler. The media enthusiastically delivered these tidbits providing the hint of a vignette, yet no clear picture emerged.

But this man—now a direct descendant of Peter—imbued with the inner strength of Jesus Christ—assumes the burdens of an office that are staggering; and the world rejoices even over one hardly any mortal really knows.

It may be that this very limited knowledge of the man raises so many expectations. Surely, mystery can be magic for it can turn out many ways. Consider Pope John, an unknown cardinal who ascended Peter's throne. No Pope in the memory of living man did so much to transform the church, while projecting the image of a jovial and benign grandfather—a pious Santa Claus. Did not Albino Cardinal Luciani unabashedly take as one of his papal names that of his universally loved predecessor? That, in itself, we are assured by all and sundry, has great symbolic meaning.

This planet's masses for a brief moment are riding on the high tide of hopeful euphoria. Just as they were when John Kennedy became the 35th President of the United States, and just as they were on January 20, 1977, when a little known former Governor with an enchanting smile became the Chief Executive of this great Nation.

John XXIII proved to be mortal; John Fitzgerald Kennedy was the victim of a mindless atrocious act. They both died in the same year.

Jimmy Carter is still with us. Many are still mystified by this President who, as with the new Pontiff, inherited problems that the less courageous and less compassionate of his predecessors refused to address.

John Paul I comes to his pontificate at a time when his church is in a period of transition and questioning. The two, Pope and President, will eventually meet as did John F. Kennedy and John XXIII. The two will recognize in each other deep similarities in their even deeper disparities. And maybe they will come to know that fate placed them in tandem to do the deeds that others would not dare for surely they know, as does the world, that God works in mysterious ways.●

## NCSL SUPPORT FOR CIVIL SERVICE REFORM ACT

### HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. UDALL. Mr. Speaker, I would like to share with my colleagues a letter of support from the National Conference of State Legislatures for the Civil Service

Reform Act. The letter expresses the belief of the conference that the Civil Service Reform Act will substantially improve the effectiveness of the Federal departments and agencies and thereby improve Federal-State relationships. The letter follows:

NATIONAL CONFERENCE
OF STATE LEGISLATURES,
*Washington, D.C., August 11, 1978.*

Hon. MORRIS UDALL,
*Chairman, Committee on Interior and Insular Affairs, U.S. House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: The National Conference of State Legislatures wishes to express its full support for HR 11280, the Civil Service Reform Act, as reported by the House Committee on Post Office and Civil Service. Our association of legislatures is deeply committed to making government employees at all levels more responsive to the citizens and more efficient in carrying out their public duties. HR 11280 incorporates many of the goals established by state legislatures in their civil service reform laws and would also serve as a model for effective personnel management at the state and local levels of government.

We believe that the Civil Service Reform Act will substantially improve the effectiveness of the federal departments and agencies, thereby improving federal-state relationships which depend upon responsive and experienced civil servants. Toward this end, we would support an amendment to HR 11280 which would expand the Senior Executive Service to make it a government-wide improvement immediately rather than an isolated pilot project.

We would appreciate it, Congressman Udall, if you would please convey our support to the full House during the floor debate on HR 11280. Legislatures at every level of government in our federal system have a fundamental and continuing responsibility to review and improve our personnel management systems to insure an effective and efficient government for the benefit of our common constituents. Concurrently, we legislators must be sensitive to the reasonable expectations of our partners in governance, the professional civil servants. Our organization, representing all 50 State Legislatures, believes that your Committee bill satisfies these demands and merits the support of your House colleagues.

Sincerely,

STANLEY STEINGUT,
*Chairman,*
*NCSL State-Federal Assembly.*●

---

## FOREIGN INTELLIGENCE SURVEILLANCE ACT WOULD DAMAGE U.S. INTELLIGENCE EFFORTS

### HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. RUDD. Mr. Speaker, the House will today start consideration of H.R. 7308, the Foreign Intelligence Surveillance Act, which I can say with assurance after a full career as a special agent for the Federal Bureau of Investigation would severely damage and weaken our Nation's security.

Serious flaws in the bill, as reported to the full House by the Permanent Select Committee on Intelligence, would be remedied by a substitute bill to be offered by our colleague, ROBERT MCCLORY, of Illinois. I strongly urge adoption of this substitute.

Other good amendments to improve H.R. 7308 will be offered by Congressman JOHN ASHBROOK and others, for which I also urge support by all our colleagues. Without them, the bill should be defeated.

A good article spelling out the flaws and weaknesses of the Foreign Intelligence Surveillance Act was published in the current issue of Human Events, a weekly Washington newspaper.

I would like to include that article at this point in the RECORD:

[From Human Events, Sept. 9, 1978]

CARTER-BACKED BILL WOULD DAMAGE INTELLIGENCE EFFORTS

The Carter Administration is helping to push through the Congress another measure to weaken this nation's security. Called the Foreign Intelligence Surveillance Act of 1978 and also heavily championed by Sen. Edward Kennedy (D.-Mass.), it has overwhelmingly passed the Senate and this week may be taken up by the House.

In essence, the bill (which, ironically, has the support of the new FBI director and the American Civil Liberties Union) would require a judicial warrant before our intelligence agencies could use electronic surveillance to gather foreign intelligence information in this country. Currently, the executive branch has the power to use wiretaps and bugs to obtain foreign intelligence without having to seek prior approval from the judiciary.

Despite some prestigious backing, the bill, as Rep. Robert McClory (R.-Ill.), a key member of the House intelligence panel, has noted, is seriously flawed. For the first time, a single judge will have the authority to block surveillance of foreign spies and potential saboteurs. Moreover, the Judiciary has neither the expertise nor the background to determine when surveillance is needed.

As Federal Judge Albert V. Bryan said in the recent opinion in the Humphrey/Truong espionage case: "It is not at all certain that a judicial officer, even an extremely well-informed one, would be in a position to evaluate the threat posed by certain actions undertaken on behalf of or in collaboration with a foreign state. . . . The Court is persuaded that an initial warrant requirement [for foreign intelligence electronic surveillance] would frustrate the President's ability to conduct foreign affairs in a manner that best protects the security of our government."

Aside from giving a special panel of 17 judges the power to "frustrate" the President's current ability to employ electronic surveillance against foreign enemies, the measure would also jeopardize our most sensitive secrets by greatly expanding the number of people who would be privy to them.

As McClory points out, the bill requires that a steady stream of highly sensitive written information flow to at least 17 judges, their clerks, reporters and bailiffs, none of whom is trained in the proper security procedures needed to protect this material. Clearly, the more people who become familiar with these intelligence activities, the greater the risk of disclosure.

As the Director of Central Intelligence Adm. Stansfield Turner has said: "Minimizing the number of people who have access to this information is a basic security principle."

Judges would not only receive briefings as to why a tap should be placed, but, should they issue a warrant for such surveillance, they would then be allowed to gain access to all the information obtained by the intelligence agency to see that it was not misused or improperly received. Thus the courts, as a repository for top secret information, would themselves become key—and highly vulnerable—targets for espionage.

Yet the judicial warrant requirement is only a small part of what's wrong with this legislation. The wording of this measure is so restrictive that the U.S. Government would be severely hamstrung in its ability to engage in electronic surveillance for the most reasonable of purposes. For instance:

Even if a domestic terrorist group is suspected of acting in concert with a foreign power (or a foreign organization), that domestic group could not be tapped if the government couldn't prove to a judge's satisfaction that the group was receiving both substantial "direction and control" from a foreign power.

If a domestic terrorist group is largely subsidized by a foreign power, this group could still not be surveilled unless the government could show that the money went to the group's illegal—rather than legal—activities.

If it is known that someone is setting up a large, anti-American propaganda compaign in behalf of a foreign power, the U.S. government could still not tap that person unless it could be shown that the campaign was "about to" go into effect, and that when it did it would unquestionably violate the law.

An American citizen engaged in espionage for a foreign country could not be placed under surveillance if the judge believed that the information sought was not "necessary" to U.S. security or foreign policy interests.

Under this bill, U.S. intelligence agents in this country would not be able to use electronic surveillance to target the head of a non-government sponsored foreign trade mission; an intimate of a foreign leader who does not serve in an "official" capacity for his government or a junior minister of a foreign nation who is visiting friends in this country.

In testifying against this bill, the Association of Former Intelligence Officers (AFIO), whose members include such prominent figures as ex-CIA director William Colby and the ex-chief of the Defense Intelligence Agency, Gen. Daniel O. Graham, pointed out that there are hundreds of thousands of foreigners in the United States at any given time, and to limit intelligence collection efforts only to employes of foreign powers and to those who may engage in clandestine activities is far too restrictive.

"Why," ask AFIO, "should our policy-makers be denied valuable positive foreign intelligence by barring collection from a visiting scientist, businessman or any other foreigner in the United States known to possess information of value to the United States? We know of no other country that so limits its intelligence capabilities. . ."

Indeed, even though U.S. intelligence officials, because of clear Administration pressures to approve, okayed the proposed restrictions, it is equally clear that they recognize the risks involved. Adm. Turner, for example, asknowledged there would be "risks" and said it was possible that the definitions will prove "too narrow . . . to permit the acquisition of genuinely significant communications. It is likewise possible that justified warrant applications will be denied or that application papers will be mishandled and compromised." The proliferation of information, he also stated, always involves risks, and the "statutory procedures will unquestionably lead to such a proliferation." Compliance, he added, will also "be somewhat onerous." Nevertheless, Turner says he now wants to share the surveillance power with the "courts."

This legislation is zipping through the Congress because of supposed abuses of foreign intelligence surveillance by the executive in days gone by, but just what those abuses were is not quite clear. Furthermore,

even the supposed abuses have been corrected in that warrantless electronic surveillance in the field of foreign intelligence can only be implemented pursuant to very strict procedures—some would say too strict—laid down by the attorney general.

In short, the legislation is not only not needed, but will dangerously hamper our efforts to gather critical information. Nevertheless, unless Rep. McClory and Rep. John Ashbrook (R.-Ohio), who are expected to lead the fight against the legislation's most injurious provisions, receive strong support from their colleagues, another blow will have been struck at our government's rapidly declining capacity to collect information vital to American security.●

## HOG BOOK NO "PIG IN A POKE"

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. FINDLEY. Mr. Speaker, today I want to bring to your attention a recent publication that has tickled my fancy entitled "The Hog Book," written by William Hedgepeth and published by Doubleday.

For years I have worn a "Hogs are Beautiful" pin—sometimes even on the floor of the House. I speak with special pride today, because my hometown, Pittsfield, Ill., has earned the title, "Hog Capital of the World" and proclaims that honor with a marker in the town square. Pittsfield is the county seat of Pike County, which has the prestigious and enviable record of producing over 100 million pounds of pork annually. Most of that good ham is shipped nationwide, and occasionaly one even comes to Washington. Which brings me back to Mr. Hedgepeth's delightful book that should be recognized from now on as the "Webster's of Hog Insight"—what it does not tell you about hogs is not worth knowing, or is not funny.

Mr. Hedgepeth delves into such areas as the ancestry of the swine world, how to tell a hog from various other four-footed creatures of the Earth, how hogs broke into show business, and even some of his favorite selections of hog poetry to wit:

You can't put a hog in a zoo—
There's no telling what he will do.
He may get loud
And charge at the crowd
Or just lie there not looking at you.

As Mr. Hedgepeth says:

The attainable possibilities for developing hogs of pleasure are virtually infinite. It is just a matter of breaking through the public's resistance to unfamiliar concepts; yet the fact remains of the hog's emerging potential for greater freedom and fresh manifestations of soul. The barriers exist only in the minds of men. But improbable enterprises are often sustained by faith. And there is ample reason for faith in the creature, for it has long been realized that "the hog may be on to something."

A chapter on Hoglore, placing the porcine creature in its rightful place in Greek mythology, is perhaps the most enthralling of all. Hedgepeth relates various cultural ties with the hog and reminds us that a consistently recurring figure in the earliest myths of ancient folk is that of an Earth-Mother goddess who is associated with the soil, planting, fertility, and with human sacrifice, and who—more often than not—is represented in porcine form.

The importance of hogs to American politics is not overlooked, either Harry S. Truman, while on a campaign trip around the country, once stepped into a hog lot and declared, "No man should be allowed to be President who does not understand hogs, or has not been around a manure pile." Hedgepeth would no doubt heartily agree. The "Hog Book" seems to point out the inevitable fact, we are becoming pig-aware people.

For the most, of course, the hog is still admired in the form of refrigerated meat or in the shape of a football on lazy Sunday afternoons, rather than a bona fide animal come into its own. However, the fact remains, the hog is an animal of unique beauty. It has made a tremendous contribution to man for more than 9,000 years and William Hedgepeth is right on target with his perception of a country united with hogs. Hedgepeth suggests we embark on a series of consciousness-raising activities in the name of the hog and get people tapping into the hog current. From here the possibilities are endless. Noteworthy citizens could hold gala hog expositions, there could be multimedia displays, pig exhibit halls, and Broadway plays based on the lively hoofer.

I am proud to mention that in my hometown of Pittsfield one such awareness session, "Pig Day," is already an annual event. The happy occasion was on July 7–8 this year, and included such hog-honoring events as choosing the Pig Day Queen and Little Miss Piglet (chosen by the length of her pigtails), a huge sidewalk sale, roast pork sandwiches, games, and just plain fun for the hundreds of pig-enthusiasts who attend yearly.

The hog has been a misunderstood creature of circumstance for too long. I congratulate Mr. Hedgepeth and the "Hog Book" for joining the evergrowing ranks of pig lovers everywhere. The future can only hold more glorious tributes for this porcine animal as the world catches up on 9,000 years of delayed thanks to swinedom. And, as Mr. Hedgepeth speculates, perhaps someday there will be the formation of hog clubs around the country—not the existing breed associations but urban organizations whose members devote themselves to the pure esthetics of fine swine, pig poetry reading, and fine cuisine. I would proudly join, as even now I think of myself as a "pork scout" at heart.●

## A SOUND INVESTMENT

### HON. JOHN T. MYERS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. JOHN T. MYERS. Mr. Speaker, the recording industry is a major employer in my district with several thousand jobs directly related to the production and marketing of sound recordings. We are proud to have Columbia House in Terre Haute and know how important the recording industry is to our area.

Over the years, I have read and heard much about the pleasures of listening to sound recordings. The following article, which appeared in the New York Times, should be read by all who enjoy recordings.

As author Hans Fantel puts it:

High-quality music reproduction in the home has advantages no concert hall can match. . . .

Besides, the disk never has an off night. It is never indisposed, or simply bored. The moment of inspiration can be recaptured. It no longer perishes with its own sound.

The article follows:

[From the New York Times, July 20, 1978]

SOUND—PHONOGRAPH CONVEYS MORE THAN ONE HEARS IN THE CONCERT HALL

(By Hans Fantel)

On a buggy but otherwise balmy evening in the Berkshires last week, we were listening to some Haydn on the porch, looking out on the darkening hills. Music and landscape conjoined and gave rise to a feeling of surpassing serenity, such as probably would not have been induced by the same performance in a concert hall. Afterward, my wife remarked that we were the first generation in the millennial history of music for whom such an experience was possible. For, thanks to electronics, music has become independent of time and space.

To hear music at the time and place of our choice seems to have been an ancient desire. Princes and potentates (to use the ringing phrase of the Founding Fathers) would take their private musicians to their chambers or on trips. King Saul, according to reliable sources, had a young harpist named David. Goldberg, for whom Bach wrote his famous variations, would lull his Saxon master's insomniac nights. And the mostly scandalous annals of the Congress of Vienna took awestruck note of the fact that Talleyrand traveled with his own pianist to play for him wherever he went.

But such privilege belonged to the few, and their enjoyment of the music may have been colored by the fact that the artists were their servants. Besides, the repertory was necessarily limited to what could be performed under portable conditions, while we enjoy the effortless electronic transport of entire orchestras into our homes or even our automobiles.

Our conversation naturally ambled toward musical settings—concert hall contrasted to living room, and the astounding fact that in this electronic age most music is no longer heard in the presence of the performer.

Today's sound equipment, as the ads relentlessly tell you, aims to give the listener the virtual equivalent of a concert. I think the ads, for all their flamboyance, understate the case. The fact is that, due to sophisticated multichannel recording techniques, the phonograph today conveys more of the music than you are likely to hear from the average seat in the concert hall.

Still, no amount of technical finesse can replace the actual concert. The physical presence of the artists adds an extra dimension that still eludes even the best phonograph—the rapport between the performers and the audience. In this respect, a concert is a unique experience, as personal as a handshake. And even at its best, reproduced music cannot convey the excitement and the festive mood of a gala occasion.

Conversely, high-quality music reproduction in the home has advantages no con-

cert hall can match. By delivering music directly into the living room, electronics opens up a wholly new range of musical experience. It forms a direct bridge between the music and the listener. No matter where or when the music was played, modern sound equipment always puts it in the present, always on the spot. No concert organization in the world could match the range of repertory or the impressive roster of artists we command with the flick of a switch.

Besides, the disk never has an off night. It is never indisposed, or simply bored. The moment of inspiration can be recaptured. It no longer perishes with its own sound.

Finally, there's the matter of your own mood. After a frantic rush to get ready, a hectic drive to the concert hall and a desperate search for parking space; you may strive in vain for the frame of mind that lets you abandon yourself fully to the music. And concert hall seats, invariably designed for very proper people who like to sit up straight in the presence of the muse, aren't much help when it comes to relaxing. As one critic observed apropos Wagner, "The mind will absorb no more than the seat of the pants will endure."

By contrast, you can attend your home concerts comfortably recumbent, with no neighbors to rattle their programs, dive for pralines or snap their handbags. And with the help of a snifter of brandy you may find yourself far more responsive to the music than in the formally restrained atmosphere of the concert hall.

And, of course, you can always revise the program. If you don't quite feel up to the sublimities of the B-minor Mass, you can unceremoniously switch to a casual Mozart Cassation or maybe some Scott Joplin. You're your own impresario, in complete control of the musical proceedings. You pick the program, the time, and the artist—an inestimable advantage over the concert hall, where you have to take your music as, and with whom, it comes. In effect, a sound system is like a permanent house party with the world's best musicians as your guests. Paradoxically, their physical absence may be an added boon—a contribution to the kind of privacy that opens the doors of imagination.

That evening last week with Haydn in the Berkshires, I remembered briefly how I first became aware of the phonograph's uncanny ability to transcend time, place, and circumstance. It was long ago in Africa, where I had gone as a very young man to get away from the Gestapo. In the parlor of a dingy Tunisian "pension," I discovered a wind-up Victrola with a few records of Schubert songs and a couple of arias from "Aida." Even the wheery sound of that ramshackle machine had the power to banish the war for a life-sustaining moment and take me back to the home I had left. In doing so, that old phonograph transformed a dark time and somehow kindled hope for the future.●

## AMENDMENTS TO CIVIL SERVICE REFORM ACT

### HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. MITCHELL of Maryland. Mr. Speaker, I have introduced into the RECORD three proposed amendments on H.R. 11280.

Mr. Speaker, the first amendment which I have introduced to H.R. 11280, the Civil Service Reform Act, establishes that employees should not waive statutory rights by pursuing negotiated procedure rights.

I have submitted this particular amendment because I believe that the intent of the Congress in defining "conditions of employment" in section 7103(A)(14) is unclear.

Since we have all studied the bill, or at least I suppose I can safely presume so, we know that section 7103(A)(14), page 315, defines "conditions of employment" as meaning personnel policies, practices, and other matters whether established by rule, regulation, or otherwise; however, policies, practices, and matters relating to discrimination, prohibited political activities, and policies specifically provided for by Federal statute are excluded from the concept of conditions of employment.

It is obvious that this definition is intended to exclude certain matters from the negotiated provisions. However, inasmuch as precedent under the National Labor Relations Act will be important in determining how chapter VII will be interpreted, it is submitted that providing exceptions to the definition of "conditions of employment" simply leaves a gaping hole in the intent of Congress.

It is generally recognized that there are three types of bargaining subjects; namely, mandatory subjects, prohibited or illegal subjects, and permissive subjects. By defining "conditions of employment" to eliminate racial discrimination, political activities, and matters specifically provided for by Federal statute, Congress has not prohibited a labor organization and an agency from bargaining concerning such subjects. In other words, they would be permissive subjects and thus it would not be unlawful for an agency and a labor organization to negotiate with respect to a clause pertaining to them.

With the negotiation, an issue would arise concerning whether or not employees must follow the negotiated grievance procedure in resolving their complaints regarding this clause, or whether they would be free to use the statutory procedures. I am not so concerned that the employees would have rights in both areas. That is quite clear. However, it is not clear that they would have remedies in both areas. While it is suggested that at least in the area of title VII discrimination, employees have remedies in both areas, with respect to political activities and matters specifically provided for in Federal statute, dual remedies are not so guaranteed.

My amendment is specifically designed to hopefully prevent the possibility that the courts will misinterpret the intent of the Congress in this matter. It should be clearly stated that employees will have the right to pursue remedies other than remedies provided in the negotiated procedure in any instance where there is an overlap between the negotiated procedures and those provided by Federal statute. Further, it should be provided that employees will have the right to pursue their statutory remedy and their negotiated procedures remedy in all cases. To impose exceptions would be to defeat the purpose of the intent.

There may be a question that such an amendment as the one which I have proposed would result in duplication. To that, let me respond by saying that such duplication is not uncommon where dual rights are provided by Congress. For example, in many cases, employees who claim racial discrimination must pursue their administrative remedies through a hearing, and these same employees get a full blown trial in court if they lose at the agency level.

In this vital matter, it is of the utmost importance that we in Congress make our intent very clear. We must undoubtedly show that in all cases, the employee will have a right to utilize both the statutory and negotiated procedures.

Mr. Speaker, my second amendment to H.R. 11280, the Civil Service Reform Act, is a genuine reflection of my belief that the right of an employee to select a representative of his own choosing should be protected in all respects.

If we refer to section 7114(A)(2) of the bill, dealing with representation rights and duties, we will note that the following appears:

> The rights of an exclusive representative under the preceding provisions of this subsection shall not be construed to preclude an employee from being represented by an attorney or other representative, other than exclusive representative, of the employee's own choosing in any appeal action under procedures other than procedures negotiated pursuant to this chapter.

This section is indicative of the fact that in view of the proposed expanded scope of bargaining, an exclusive representative would be able to negotiate with respect to virtually every aspect of the employee's working conditions mandatory negotiated procedures required to be followed in resolving claims of violation, thus placing the employee in a position where his total rights as a Federal employee would be contingent upon the good faith with which the exclusive representative handled his claim. It is my fear that this would place many employees, particularly minority group employees, in a position where the exclusive representative would control their fate.

As you all probably know, in January 1977, I sponsored H.R. 2722, a bill relating to collective bargaining representation of postal employees. If I may, I would like to briefly touch on a few of my findings while working with this legislation.

The experience with what happened in the Postal Service raises serious doubts as to whether or not minorities are being protected by the predominately white exclusive representative where all procedures must be handled through the negotiated grievance procedure. Thus, prior to the Postal Reorganization Act minorities composed approximately 19 percent of the working force in the post office. In a recent survey, it was cited that this number has dwindled to 16 percent with a special note that this statistic is based upon an expanded definition of minorities which includes many individuals who are not black. Let me further state that in addition, in the mailhandlers craft of the Postal Service the minorities have lost in excess of 8,000

jobs since the enactment of the Postal Reorganization Act.

It is quite clear that this pattern of systematically removing minorities from gainful employment in the Postal Service came about when the so-called craft unions were given the power by the courts pursuant to language provided by Congress, to be the "exclusive union" of postal employees. Consequently, it is sad but true that the interests of the blacks and minorities in the Postal Service simply has not been protected by the so-called craft unions.

It is my concern that this very same thing could easily occur in the Federal service unless there is adequate language to protect the right of the employee to select a representative who will protect his interest and not allow the agency to further the cause of "institutional racism."

As originally envisioned by President Kennedy the Federal employee occupied a position substantially different from that of the private sector employee. Thus, President Kennedy gave to Federal employees the right to be represented in every respect of his or her employment relationship, even under negotiated procedures, by a representative of his own choosing so that the Federal employee when adversely acted upon by an agency would not be able to claim that he did not have the representation that was best for him or her as opposed to the best for the Federal service or best for a particular organization.

I believe that my amendment which on page 332, would strike out line 14 and all that follows down through line 7 on page 333, and insert "(d) The processing of any grievance of any employee under a procedure negotiated under this chapter shall not preclude the employee from pursuing any right provided to him by or under any other provision of law," would be appropriate to protect employees against weak, corrupt, ineffective, biased, or otherwise unsatisfactory representation.

Mr. Speaker, the third amendment I have introduced to H.R. 11280, the Civil Service Reform Act, will I hope lend greater clarity to the meaning of a "labor organization" as it is defined in section 7101(4)(A) of the bill. Of course I realize that we are going to have organizations that do not fit into this definition. These types are very clearly cited in that section of the bill which I seek to amend. However, although I do not believe that the definition of a "labor organization" in H.R. 11280 is intended to exclude "exclusive representatives," this cautious step certainly cannot hurt.

My amendment, which simply inserts on page 292, line 22, after "organization," the following: "(other than an exclusive representative as defined in paragraph (16)(B) of this section)," is strictly a technical one to assure that none of our Nation's 86 labor organizations holding exclusive recognitions will be adversely affected by the definition of a "labor organization" as has been cited in H.R. 11280.

It is imperative that the language in section 7103(4)(A) be amended in order to eliminate any question that may be raised with concern for whether or not the large number of labor organizations which are smaller than the giants are organizations "limited to special interest objectives." By amending this language we can remove all doubts that organizations such as the National Alliance of Postal and Federal Workers which were founded out of the discriminatory practices of several white controlled unions would not be regarded as organizations "limited to special interest objectives" merely because they are gravely concerned with the fight against racial and other discrimination.

With regard to the connotation of a "special interest objective," let me just briefly add that because of the absence of a clear definition in this area, the enactment of the Civil Service Reform Act, would leave the courts and the Federal Labor Relations Authority with the task of determining which organization is and which is not a chapter VII labor organization. Thus, it is entirely possible that by simply indicating that an establishment is a "special interest" organization, the Federal Labor Relations Authority could eliminate the structure.

Let me reiterate that I do not believe that the intent of the Civil Service Reform Act's definition of a "labor organization" is to exclude exclusive representatives. However, I do believe that at this point, it is feasible to be cautious in this area so that by no means of interpretation can these structures be placed outside the realms of labor organization status.●

## SHORTSIGHTED VIETNAM POLICY SHOULD CHANGE

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. SIMON. Mr. Speaker, our policy toward Vietnam is a shortsighted one.

Other nations now recognize that Vietnam is trying to build a course of international political independence and economic independence, and so other countries are establishing ties, both diplomatic and economic, with Vietnam.

I learned recently that Japan is providing assistance to Vietnam. For fiscal year 1978, Japan has provided 10 billion yen of credit, which will be used for commodity aid.

They gave the Vietnamese the following list of items from which they could choose their commodity assistance:

(A) Equipments and General Merchandise (5,500 million yen)

1—1.400 million yen: Electric fittings; magnetic wire; electric cable and electric spare parts (including materials for manufacturing of electric fans).

2—700 million yen: Fine chemicals (for hides and leathers), electric bulbs; welding rods; printing ink; phosphoric acid.

3—460 million yen: Dye-stuffs.

4—1,300 million yen: Paper of different varieties; packing paper board; printing paper, and cigarette paper.

5—30 million yen: PVC for artificial leather.

6—920 million yen: Metal of various kinds; steel strips, steel wires, non-ferrous-metal, etc.

7—650 million yen: Woolen acrylic yarns, satin.

8—40 million yen: Diamond powder.

(B) Machinery and Parts (2,500 million yen)

Motor for water pumps—230 million yen; electric motors—200 million yen; ball bearings—230 million yen; tools (sawing blades, milling nipper, precision tools)—460 million yen; tyres and tubes, spare parts for trucks HB3-120—115 million yen; machines and spare parts for soda, electric power, freezing, fiber-cement, paper, spinning, thermos bottle, gourment, power plant—1,265 million yen.

Mr. Speaker, what Japan is doing in the process is, first of all, helping Vietnam, but they are doing much more than that.

They are establishing ties of friendship with Vietnam that help to nurture political and enormous independence on the part of the Vietnamese.

In addition, the items which they are providing will provide jobs for people in Japan.

And, third, and by no means insignificant, the Vietnamese become accustomed to using the Japanese products and, presumably, will buy the Japanese products as their economy improves.

I am aware that our colleague, Congressman SONNY MONTGOMERY, has lead a delegation to Vietnam and Laos, and I hope that delegation will keep in mind the Japanese example.●

## CONTINUING CRISIS IN FOSTER CARE

### HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. MILLER of California. Mr. Speaker, in a front page story today, the Wall Street Journal calls attention to the continuing crisis in foster care and adoption in the United States today. The facts and figures recited by the Journal in this very fine story are all too familiar to the Congress: Thousands of children kept in inappropriate foster placements for years, at great cost to taxpayers; inadequate reviews and placement procedures; insufficient attention to preventive and reunification services; funding priorities favoring long-term placement over permanency for these children.

The story does not mention that the House has recognized these serious problems, and has addressed them in comprehensive legislation passed last year. H.R. 7200, in the House version, includes many of the recommendations proposed by foster care and child welfare experts in the Journal's story. In fact, many of these same experts testified before House and Senate committees in 1975, 1976, and 1977, and were active in the preparation of the legislation which has become H.R. 7200. These proposals, which have the widespread support of nearly every child welfare organization in the country, of many States and local program officials, of the Carter administration, and many others knowledgeable in the field, would not only better protect the

rights and interests of natural and foster parents, and the children, but would substantially reduce costs by emphasizing cost effectiveness, accountability, and prevention.

The House, in passing H.R. 7200 by an overwhelming margin in June 1977, spoke out for reform of the foster care program. The legislation, unfortunately and unnecessarily, has been stalled in the Senate Finance Committee where it has not only been weakened, but also burdened down with wholly irrelevant welfare amendments. In the year since this measure could have been enacted, and should have been enacted, tens of thousands of children have unnecessarily entered, or remained within, the foster care system. The cost to those children, and to the taxpayers who pay for unnecessary and inappropriate care, will continue to grow so long as we delay implementing needed, broadly supported change.

The House has spoken, and the experts are in support of the child welfare provisions of H.R. 7200. The Journal's story forces us again to confront this issue, to turn to the Senate and ask, when will the Senate, too, indicate its concern for these children and their families, and pass the child welfare provisions of H.R. 7200?

The story follows:

NOBODY'S KIDS—FOSTER-CARE SYSTEM IS ACCUSED BY CRITICS OF HARMING CHILDREN

(By Jonathan Kwitny)

Seven-year-old Bobby lives in foster care.

He was born in San Francisco, the fourth child of a woman with a decade-long record of arrests for prostitution and heroin possession (Bobby himself became addicted in the womb). He went immediately into foster care.

In 1975, some foster parents sought to adopt him. Bobby liked the idea, and so did the social worker who had his case. But a judge refused to free him from his biological mother (the father was long gone). After two years of investigations and hearings, the mother moved to Los Angeles. So the judge ended Bobby's adoption hearings in San Francisco and sent him to a Los Angeles judge, who ordered him to live with his biological mother (she had kidnapped two of her other children from their foster home, and so they also lived with her). Two weeks later, she was arrested again, and Bobby and his siblings, now under Los Angeles jurisdiction, went on to new homes and new social workers there.

CASE CALLED TYPICAL

Bobby's current social worker says he is typical of the cases she handles. Indeed, he seems typical of the nearly 200,000 American children believed to be in long-term foster care (nobody keeps an accurate count). Under the current system, these children spend their formative years bouncing from one foster home to another, deprived of roots, unsure of the future, calloused in outlook and, authorities say, much more likely than the average youth to wind up an unemployed adult living off welfare and crime.

Yet, according to numerous adoption workers, there doesn't seem to be any shortage of families eager to adopt most of these children. Critics say many children are kept in foster care only by outmoded laws and by the self-preservation instincts of a social-service industry that would shrink drastically if foster children were put into permanent homes.

Stories like Bobby's have sparked a growing movement to encourage adoption and to put the foster-care industry under federal regulation. Critics already have the Carter administration's ear and think they can win over Congress next year. Peter Forsyth, a leading critic, says, "My guess is we spend in this (foster-care) system about $2 billion a year, of which $1 billion could be eliminated. And the kids would be much better off."

MANY STUDIES

Mr. Forsyth, a former chief of the Michigan Department of Social Services, moved to New York in 1973 to head a foster care project being started by the Edna McConnell Clark Foundation. Many of his complaints about foster care are echoed in a 1975 congressional report, a 1977 General Accounting Office report and a 1977 audit of New York City's foster care agencies by the city's comptroller, Harrison Goldin, as well as by social service workers across the country. The Clark Foundation also financed creation of the National Commission for Children in Need of Parents which has been holding hearings for the past 10 months and is expected to recommend federal regulation in a report this month.

Defenders of the foster-care system term much of the criticism unfair and express doubts that adoption really is a panacea, although even they concede that some changes in the relevant laws might be desirable.

What opened the door for reformers was the revolutionary impact of legalized abortion on the once-booming adoption market, because of a shortage of healthy, young, adoptable children, hundreds of thousands of qualified childless couples are being turned away by adoption agencies. Demand has jumped even for older, problem and handicapped children, who previously had nearly always been consigned to foster care. Yet most of these children haven't benefitted from the strong demand. Critics of the system pin much of the blame on two kinds of laws, which are fairly consistent from state to state with certain exceptions.

One set of laws tends to preserve the rights of biological parents to prevent adoption of their children by other people, even when the children have been removed from home because of beatings and other abuse and even when parents haven't tried to see their children for years. So the children stay as Bobby did, in foster care.

AID CUT OFF

The other laws tend to cut off government financial aid for foster children as soon as they are adopted, or shortly afterwards. Thus foster parents lose their expense allowance—perhaps $200 a month—if they adopt the children and give them permanent homes, as many want to do. And because the children typically need expensive medical, educational or counseling help that the government will pay for only in foster care, adoption often is simply impossible.

The cutoff in support funds after adoption also creates a conflict of interest for professionals in the field. More than half of the nearly $2 billion a year paid by taxpayers to support foster children goes for salaries of social workers and their bureaucracies, authorities say; by encouraging adoptions, social-service agencies would be putting themselves out of business—a threat that they naturally resist even though they are nonprofit.

That, at least, was the gist of the Harrison Goldin study of 35,000 foster children in New York City. The study found that they had been in foster care an average of 6.7 years and that only one in seven was either returned home or adopted in 1976, the year of the study. The report found that the agencies had failed to plan a future for nearly a third of the children and that most other children weren't benefiting from supposed plans for their return home or adoption. The report concluded: "The discrepancy between the number of children who the agencies say should be adopted and those actually adopted last year is so enormous that it leads one to question the agencies' seriousness of purpose."

The privately run agencies attacked in the Goldin study are represented by the Council of Voluntary Child Care Agencies (COVCCA—pronounced "Kafka"). Its members—many with religious affiliations—get more than 90 percent of their income from per diem foster-care stipends from governmental bodies. COVCCA contends that the Goldin report is "full of holes," that the "emphasis on adoption" is "relatively recent" and that the desirability of adoption is "still open to some doubt."

Similarly dubious about adoption is the National Association of Homes for Children, an organization of 400 agencies housing 30,000 children in group foster homes. A leader of the association says that he can't estimate how heavily his members depend on government funds, but that he is sure the children are where they belong.

Even COVCCA and the National Association of Homes for Children say they support the major specific suggestions being made for change in the laws relating to foster care and adoption. But their arguments come out with a different emphasis. Says Joseph B. Gavrin, executive director of COVCCA, for example, "In general, we're in favor of measures to make it easier to terminate parental rights. We also want to make sure that kids aren't snatched from their natural parents until they (the parents) have had a chance to rehabilitate themselves. We want to make sure that when parents place a child into foster care, they aren't ceding all rights to get that child back again."

Mr. Gavrin says he agrees with suggestions that a judge should tell biological parents at the outset of a child-care case exactly what they will have to do to prevent termination of rights, and should give them a date for compliance. But Mr. Gavrin emphasizes that the conditions and the date shouldn't be "unrealistic."

"I HAD A TOUGH MOTHER"

Says a spokesman for the National Association of Homes for Children, defending institutional care, "I don't know how your childhood was, but I had a tough mother and I've paid for it over the years. I don't think family life is always best."

Nevertheless, Mr. Goldin says another audit, to be released this month, will show that nearly half of the foster children confined to institutional care in New York—largely with COVCCA members—could be put in private homes and would be better off there. And the most extensive indictment of the foster-care industry across the country is expected this month as the result of the study by the National Commission for Children in Need of Parents.

In thousands of pages of testimony before the commission, the foster-care system is depicted as rife with inefficiency, waste and downright cruelty. State officials have confessed that they don't even know how many foster children are under their supervision, or the children's ages. Interagency squabbles have kept qualified couples from adopting handicapped children in other cities. Turnover among caseworkers has run so high—100 percent a year in some places—that real supervision is impossible.

SUPPORT FOR CHANGE

Although the social-work industry is severely criticized by the commission staff, some of the strongest support for change comes from within the industry itself. Many social workers are truly dedicated people. Unlike coworkers who have become so frustrated by the conditions that they do little more than go through the motions, the dedicated ones still toil in the slums and

the courts trying to help children, often despite staggering caseloads.

Occasionally, they contend with real horror stories. In Chicago, for example, judges continued to send six-year-old Johnny Lindquist back to his biological parents despite repeated evidence that they beat him. Then, in 1972, the parents killed him. Both went to jail, but continued to claim parental rights to their other four children until last year, when Mrs. Lindquist, out on parole, finally agreed after heavy newspaper publicity to free the children for adoption (as had her husband shortly before).

While such extreme cases get heavy publicity, the sad stories such as Bobby's are perhaps more important because apparently they occur day after day without any publicity at all. They are routine, not unusual. Social workers and agency chiefs interviewed in various parts of the country complain of an almost-identical list of problems.

SOME CASES CITED

One such critic is John F. Boyne, director of Spaulding for Children in Orange, N.J. (one of five Spaulding centers operating independently in different states and specializing in adoption for children with serious emotional or physical handicaps). Mr. Boyne tells of a mentally retarded, heart-damaged infant girl in Saratoga County, N.Y., for whom he found a qualified adoptive family in New Jersey. He offers copies of correspondence in which the Saratoga County Department of Social Services refused to give up the child because, the department said, it would lose federal supplements paid on behalf of the infant and also because the department didn't want to pay Spaulding's $750 placement fee.

The department suggested that the infant be sent to the family as a foster child so that Saratoga County could continue to get the federal money, of which $7 a day would be sent to New Jersey for expenses. Mr. Boyne, a believer in adoption, declined. The infant remained in foster care in New York, and the New Jersey family later adopted another retarded child. Mr. Boyne says that only the blatant candor of the Saratoga County department's letter distinguishes this case from many others.

Joseph Gemmiti, Saratoga County Commissioner of Social Services, whose name is typed at the bottom of the letter to Spaulding, says he won't comment unless he is told the child's name. He agrees, however, that Mr. Boyne can't ethically disclose it. So there isn't any comment.

New York State law at least theoretically provides for continued subsidies to children adopted in, say, New Jersey. But many states refuse to pay medical and other expenses for children who leave, or do so only after much foot-dragging. Mr. Boyne says that he twice found adoptive homes for the same retarded boy from Washington County, Md., but that both arrangements were scotched by the county's refusal to pay Spaulding's $750 fee (which the agency says it needs in order to survive). Richard Bateman, Maryland's Director of Social Services, says that this might have happened a year ago, but that under a new state law such payments and other subsidies now are permitted and that a deserving adoption wouldn't be prevented again.

DUNNED BY HOSPITALS

In another case, Kenneth and Beth Larson of Succasunna, N.J., have adopted three children with spina bifida, a severe birth defect. They say that Massachusetts, from which two of the children came, balked at paying the heavy medical bills (one child has had 17 operations) as it had promised. So the thanks that the Larsons got for giving the children a home was harassment from hospitals. "They were trying to take our house away," Mrs. Larson says. She adds that the office of New Jersey Sen. Harrison Williams, after contacting the office of Massachusetts Sen. Edward Kennedy, eventually persuaded Massachusetts to accept responsibility, although nearly $20,000 of bills still haven't been paid.

Social workers complain that it's useless even to try to bring in children from many states, particularly if the youngster is severely handicapped and adoption would saddle a family with staggering medical bills. Some states discontinue benefits after adoption even within the state, although the taxpayers pay the medical expenses anyway, plus much more, if the child stays in foster care.

Some states' rules have peculiar—and regrettable—effects. California, for example, puts a five-year limit on benefits; as a result, children often can't be adopted until age 13 (five years later, at 18, the children would lose foster-care benefits anyway, and at the age of majority can apply for state assistance regardless of their adoptive parents' income). Mr. Boyne comments, "No way is a kid with cystic fibrosis going to get cured in five years."

The courts also are a major source of complaint. Social workers say that many judges, inexperienced in child problems, are unpredictable at best. One of Chicago's two adoption courts has been presided over by six different judges in two years; two were reassigned to other duties after Chicago Tribune editorials blasted them for returning children to unfit parents. "Judges don't want the assignment," says Carol Amadio, attorney for the Illinois Department of Child and Family Services. "You make decisions where children end up dying a lot of the time."

In Los Angeles, Janet Ter Veen, the social worker assigned this year to supervise Bobby, gripes that although state law allows a child to be freed for adoption if his biological parents have either abused or neglected him, judges usually won't act unless there is both abuse and neglect. She explains that charges of abuse usually are plea-bargained away when the child is first taken from home. To avoid a lengthy court fight and to get the child out of an unsafe home quickly, the state agrees to drop charges of abuse, which can bring criminal penalties; in exchange, the parents agree to put the child in foster care on grounds of mere neglect. Years later, when another social worker brings the child up for adoption, the record doesn't contain evidence of abuse, and so the judge refuses to free the child from his biological parents.

Moreover, many courts don't consider a child legally abandoned even if his parents haven't tried to see him in years, adds Marilyn Wright, an attorney for the Los Angeles Department of Adoptions. A social worker—who may have scores of cases—must find the parents (often living in different cities), notify them where and when they can see the child and provide them with transportation and even such services as job help or drug rehabilitation. Only if the parents still don't want to see the child has "abandonment" taken place.

Judge John Mendoza of Las Vegas, vice president of the National Council of Juvenile and Family Court Judges, acknowledges "some partial validity" to social workers' complaints that judges are more interested in parents' rights than in children's. But he and other judges prefer to blame the lackadaisical attitudes of social-work agencies.

SOME RECOMMENDATIONS

Judge Mendoza, whose council recently reviewed foster-care case files in 23 courts, recommends a federal law requiring agencies getting federal foster-care funds to make plans for each child's removal, if possible, from foster care. He also wants frequent judicial reviews of such plans to be required.

In a similar stand, the staff of the National Commission for Children in Need of Parents, urges mandatory reviews, by a court or other outside authority, of every agency's plans for every child every 60 days.

Other recommendations currently being studied by commission members include a full federal takeover of the system or a federal law withholding money from states whose own laws don't meet certain guidelines; clear standards for terminating parental rights; defining adoption as a service to children, not parents, so that the child's medical bills would be paid for regardless of the adopting parents' income; federal funds to pay for services, such as day care, that might prevent children from being removed from homes disrupted by hospitalization or other problems; federal or state licensing of tax-aided foster-care agencies, plus standards for social workers' qualifications, maximum caseloads, etc.; and a national exchange to register children needing homes and to facilitate placement.●

## WHERE ARE THE CARRIERS?

### HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. BENNETT. Mr. Speaker, in the latest issue of Horizons, is an article based on conversations with the naval expert Norman Polmar. The title of the article is taken from the conclusion of the article:

It's no wonder that whenever trouble flares up around the world, one of the first responses by our leaders in the White House, State Department, Pentagon and Congress: "Where are the carriers?"

I insert entire article at this point in the RECORD.

WHERE ARE THE CARRIERS?

(NOTE.—In their 56-year history, U.S. aircraft carriers have been active in more than 50 wars and lesser crises. Among the more memorable: the Korean conflict, early 1950s; Lebanon uprisings in 1958 and 1976; Cuban missile crisis, 1962; Dominican Republic civil war, 1965; Southeast Asian combat and evacuations, 1960s and 1970s; Jordan uprising, 1970; India-Pakistan war, 1971; Arab-Israeli war, 1973; and the Mayaguez "rescue," 1975. Clearly, when the United States wants to shake its fist, carrier aviation provides the muscle—ready for any degree of response.)

If you were to fly over Truk lagoon in an Air Micronesia airliner today, you would see a scattering of masts poking mournfully from the sparkling waters—tombstones for some 30 ships silenced three decades ago by U.S. aircraft carriers. These are the visible remains of thousands of tons of naval and merchant shipping sunk or disabled at the Pacific atoll, largely by Hellcats and Avengers from the fast carriers *Bunker Hill, Enterprise, Essex, Intrepid,* and *Yorktown.*

The striking power and extreme mobility of American aircraft carrier task groups revolutionized naval warfare. The carriers could destroy the enemy's fleets and his air power, preventing interference with our amphibious assaults. And they highlighted a basic flaw in Japan's island chain of "unsinkable carriers": the islands, like Truk, couldn't be moved to safety. But the aircraft carrier, truly a floating island, was able to elude its attackers while moving to and from the scene of action.

CARRIER IS MORE SURVIVABLE THAN LAND BASE

Despite the advent of advanced weapons, the aircraft carrier is more survivable than any land base. One big reason, Norman Polmar says, is that the ship cannot be pre-

targeted. An aerial or satellite photo of a land base, even if several months old, permits pinpointing of the target—firmly anchored in concrete—right down to the nearest foot. In contrast, the carrier could probably move more than 15 miles in any direction during an ICBM's time of flight. Although the enemy might know the ship's position precisely at a given time, the carrier could be anywhere within a 25,000-square-mile circle just three hours later.

FLEET'S BEST DEFENSE AGAINST CRUISE MISSILES

Today the carrier is the fleet's best defense against cruise missiles because its aircraft can attack most launching platforms—ships, aircraft, or submarines—before they are within missile-firing range. And, with proper warning, carrier-based Grumman F–14 fighters can shoot down some anti-ship missiles in flight with their long-range Phoenix missiles.

In fact, carriers proved highly survivable against guided missiles in World War II. More than 2,300 kamikaze attacks were made against U.S. ships, with carriers the principal targets. Although these suicide aircraft were controlled by the most sophisticated guidance system known—the human brain—they failed to sink a single fast carrier. Kamikazes did damage several American fast carriers, some rather severely. However, those were "thin-skinned" ships when compared to their British contemporaries which had armored flight decks, as do modern carriers. When, on several occasions, British flattops were hit by kamikazes, they were usually back in full operation as soon as the debris could be pushed off the flight deck.

No U.S. carriers designed in World War II or later have been sunk, despite their active role in many of more than 50 wars and lesser crises. Land bases have not fared as well. For example, all the jet-capable air bases in South Korea were overrun by enemy ground forces, not once but twice. In South Vietnam, more than 400 planes were destroyed on the ground and some 3,000 more damaged by enemy attacks. Also, not one of the dozens of major air bases that were built in the past 28 years on the Asian mainland remains available to U.S. forces today.

Similarly, most of the U.S. air bases that once ringed the Mediterranean—in Morocco, Greece, France, and Spain—are effectively gone. We spent some $10 billion to build or lease bases in France, Libya, and Morocco. But they've all been "repossessed," something that has never happened to any of our aircraft carriers.

CARRIER IS TOUGHEST SHIP TO SINK

Today's large carrier, with armored flight deck, improved torpedo protection, and internal damage-limiting features, is the toughest ship in the world to sink. When nine large bombs with the explosive force of a half-dozen Soviet cruise missiles accidentally detonated on the flight deck of the nuclear-powered Enterprise, the ship was judged to be capable of resuming air operations within one hour of the accident, had the need arisen.

And, despite its size, a fast, large-deck carrier is not easy to track. An enemy planner who knows where the ship is today cannot automatically order her attacked tomorrow because his shadowing forces may lose contact or the carrier may move out of range of his land- or sea-based attack forces.

It's not that hard for even the world's largest warship, the nuclear-powered *Nimitz*, to "get lost." The ship can sail off at night in a silent EMCON (electronic emission control) mode, with a Grumman Hawkeye early-warning radar plane overhead to provide undetectable eyes, ears, and communications functions. Even a ship's infrared signature can be suppressed. Decoy merchant ships fitted with radar reflectors could also spoof enemy trackers, and it could take until daylight the next day for the enemy to figure out exactly who is where.

LARGE-DECK CARRIERS ARE BEST PROTECTED

The carrier's escorts—surface ships and submarines—also have warning and attack capabilities to defend the carrier. Of course, the principal defensive weapons of the carrier are her high-performance fighters and attack aircraft. The latter, augmented by ASW planes and helicopters, are equipped to destroy hostile surface ships and submarines before they can attack the carrier. But vulnerability must be a secondary consideration in evaluating aircraft carriers. As Admiral Elmo Zumwalt stated in 1971, when he was Chief of Naval Operations:

"We do not buy ships because they are invulnerable, but because they are useful despite their vulnerability, and then we work hard to minimize the vulnerability . . . The *Nimitz* class carriers . . . will be the best protected and least vulnerable carriers ever designed."

The only way the U.S. can maintain forward deployment in the world is to station large aircraft carriers and their air wings on the vast oceans that cover more than 70% of our planet. Today, two such carrier task groups are deployed in the Mediterranean (the Sixth Fleet), two in the Western Pacific (the Seventh Fleet), with one more normally operating out of Hawaii (the Third Fleet), and one along the Atlantic Coast and in the Gulf of Mexico (the Second Fleet).

To maintain four carriers forward in peacetime requires eight others in local operations, training, overhaul, and modernization. This seemingly inefficient two-back-for-one-forward deployment schedule is based mainly on the current personnel situation. In today's all-volunteer environment, the Navy must compete in the United States for skilled personnel to man its ships. Trained sailors are always in short supply. Even when not deployed, a flattop is often at sea for trials, training, and actual operations.

Generally, a carrier sailor spends half or more of his time at sea. In periods of international crisis or conflict, the percentage of carrier force forward-deployed climbs dramatically. During the Vietnam War, for example, well over half the total number of carriers were maintained in the combat zone, a ratio of about one-for-one.

The Navy now has 13 carriers in commission: eight post-World-War-II *Forrestal* types, the nuclear-powered *Enterprise*, the two nuclear *Nimitz*-class ships, and the wartime-built *Midway*. The 13th—the wartime-built *Coral Sea*—is a non-deploying ship, soon to be used only for pilot and reserve training. Another *Nimitz*-class ship—the *Vinson*—is scheduled to be completed in the early 1980s. Thus, in theory, the Navy will sail into the next decade with 12 modern carriers.

However, the oldest of the *Forrestal*-class carriers were commissioned in the mid-1950s. These ships must undergo an extensive modernization, known as Service Life Extensive Program (SLEP), to gain a service life of some 40–45 years. While one carrier is in the yard for SLEP, she must have a replacement in order to keep the force at 12 operational carriers. The *Midway* will permit operation of the 12th deployable carrier as well as the training ship into the 1980s.

But the *Midway* (completed in 1945 and modernized in the late '60s) and *Coral Sea* (1947) simply will not last beyond the mid-1980s. Then, in order to have 12 deployable flattops while "SLEPing" one *Forrestal* at a time, another "large-deck" carrier must be built.

BETTER TO BUY ONE CVN THAN ONE CVV

The Navy and Department of Defense are considering two large-deck designs, a 60,000-ton, oil-fired CVV and another 95,000-ton, improved nuclear-propelled *Nimitz* CVN. "I am convinced," says Polmar, "that Congress will fund only one more large-deck carrier in the next 5 to 10 years. In that case, I would rather have one more *Nimitz*-class CVN than just one CVV. The nuclear-powered carrier has a number of operational advantages over the CVV, including, of course, virtually unlimited high-speed endurance.

"If I were guaranteed two more CVVs," he adds, "then I would start considering that option. If guaranteed three or more CVVs, I'd jump at it."

Current cost estimates are $2.3 billion for the next *Nimitz* CVN and up to $1.75 billion for the first CVV. Some analysts immediately cite the comparative life-cycle fuel costs of the two ships to further demonstrate that the nuclear carrier is a better option; however, says Polmar, considering the additional costs for the CVN and certain other factors, it makes more sense to compare the ship construction costs. Put more simply, the additional $550 million for a CVN provides a much greater combat capability because it carries nearly double the number of aircraft on a CVV, plus twice the ammunition and almost three times the aircraft fuel storage, and twice as many catapults, elevators, and propellers.

It's important to note, also, that the higher CVN cost includes the initial set of two reactor cores which will provide at least 13 years of operation. This is the equivalent of some 11 million barrels of fuel oil which would cost about $360 million to buy, store, and deliver at *today's* prices.

NEED MORE THAN 12 CARRIERS

Actually in Polmar's view, the debate over holding to a 12-carrier force makes little sense, budgetary arguments notwithstanding. We actually need more than 12 large-deck carriers to meet our worldwide roles and commitments. The crucial need is for more air power—on land and sea—to offset the disparity between U.S. strength and that of our potential adversaries.

The trends have been made clear . . . and they are most disturbing. Polmar lists them as follows:

Decline of the U.S. Navy from more than 5,700 ships at the end of World War II, to just over 800 active ships before Vietnam, to less than 460 today.

The increasing capabilities and operations of the Soviet Navy.

The arming of several Third-World nations with modern aircraft and cruise missiles.

The demise of British carrier aviation.*

Increased Western reliance on African and Middle Eastern resources.

All of these developments point to the need for an increase in U.S. tactical air power for use at sea worldwide. And, some of this can *only* come about through an increase in carriers.

V/STOL technology, once it matures, will surely provide a way of increasing the amount of air power we can deploy at sea. But it does not rule out the need for the conventional type of aircraft carrier. The latter will still be the most efficient way of concentrating air power—whether it be vertical or conventional takeoff and landing.

V/STOL CARRIERS NO SUBSTITUTE FOR LARGE-DECKS

Within the next few years, Polmar figures, advanced fixed-wing V/STOL aircraft (as distinct from helicopters) should prove themselves suited to shipboard use. There already has been, he notes, a significant degree of success with use of the Marine Corps AV–8A Harrier jet at sea. Even further advanced V/STOLs will offer the extremely important opportunity of putting more fixed-wing aircraft to sea—on aircraft carriers and, possibly, on cruisers, destroyers, and amphibious vessels as well.

Such new V/STOL planes will permit us to

*The last remaining conventional British carrier, HMS Ark Royal, is scheduled for decommissioning within a year. Then the Royal Navy will retain only a limited carrier capability with helicopters and V/STOL aircraft at sea.

build considerably smaller carriers of a new class, the V/STOL Support Ship (VSS), which should weigh-in at about 25,000 tons. The VSS carrier would be deployed not as a substitute for, but rather in addition to, our 12 or 13 large-deck carriers. And there is every reason to predict, says Polmar, that V/STOL aircraft will eventually share space on the large-decks with F–14s, A–6Es, and other carrier-based aircraft, especially in antisubmarine warfare (ASW) and airborne early warning (AEW) roles.

The VSS would, in Polmar's view, embark perhaps a dozen V/STOL aircraft plus a similar number of helicopters. The V-planes would perform limited strike, reconnaissance, air intercept, and other tactical missions in areas where we might not, for economic reasons, be able to deploy a large-deck carrier or where the potential threat was limited.

Thus, the VSS would bring fixed-wing air power to bear in areas and situations that do not warrant use of the more extensive and powerful capabilities of the large-deck carrier air wing. In particular, the smaller carrier would conduct anti-submarine warfare operations in mid-ocean areas where the size of the larger carrier and its fighter/attack aircraft would be superfluous. In addition to ASW, the VSS would use fixed-wing V/STOL aircraft and helicopters for AEW, radar jamming of missile attacks against convoys, interception of enemy reconnaissance planes, and mine counter-measures.

The same V/STOL aircraft would also be operated in smaller numbers from cruisers and possibly destroyers, for reconnaissance, over-the-horizon targeting for ship-launched cruise missiles, and even for long-range ASW against contacts located with the ship's long-range passive sonar arrays (TACTASS). Of course, the Type "A" V/STOL concepts being studied by the U.S. Navy for ASW and AEW would also be available in a troop-carrying variant for amphibious assault, either from specialized amphibious ships or, on an emergency basis, from the VSS.

CARRIER AIRCRAFT FIGURE IN FUTURE USE OF THE SEAS

Inevitably, Polmar asserts, the future of the large-deck carrier—and all other possible variants for that matter—figures preeminently in the future of the U.S. Navy, despite the debate and controversy that currently obscure it. Based on his grasp of naval history and close analyses of probable future conflict scenarios, Polmar feels it is safe to conclude that manned carrier-based aircraft will remain a dominant factor in the future use of the seas by the United States.

Land-based aircraft such as the Navy's P–3 Orion long-range patrol plane and even "navalized" B-52 bombers could doubtlessly undertake many naval missions. However, for the foreseeable future, such high-performance aircraft as the F–14 Tomcat fighter, A–6E Intruder all-weather/night attack plane, and other specialized types, embarked on forward-deployed carriers, will be vital to the United States, if this nation is to continue to derive political, economic, and military benefits from use of the seas.

While noting that sea-based air can play a particularly valuable role in Third World areas, Polmar tends to downplay the need for carrier-based action in possible NATO-Warsaw Pact conflicts. Of all potential tinderbox areas in the world, he feels the Central European front is the least likely to flare up first. The fact that the U.S. and its NATO allies have faced Soviet-led forces for so long—armed, trained, in place, and psyched-up for any of dozens of well-rehearsed eventualities—diminishes, in his view, the chances of actual conflict.

"Were the Soviets to move against NATO," says Polmar, "I believe it would be more likely to be against the northern or southern flanks. Here, again, the U.S. aircraft carriers in the eastern Mediterranean could be exceedingly valuable in view of the limited availability and relative vulnerability of the relatively few land bases for air responses to protect NATO's flanks."

CARRIER AIR COVERS MIDDLE EAST OIL

The carriers in the eastern Mediterranean or in the northwest Indian Ocean also represent the only effective U.S. tactical airpower in the Middle East—the region that supplies vital oil resources to the West. And, notes Polmar, most of the region is within range of long-range *Backfire* bombers based in the Soviet homeland which are closer to the vital oil routes than any existing air bases in the U.S. or possible ones in the NATO countries. "Aggravating the threat to our interests in the Middle East," he adds, "is the possibility that the Soviets may strengthen their own tactical air capabilities in the region by sending their *Kiev*-class V/STOL carriers into the Indian Ocean."

Reflecting the lesson of the impermanency of U.S. bases in foreign countries, airfields have become somewhat questionable alternatives for U.S. leaders to consider when evaluating our military or political options in the Middle East or many other troubled areas. The October 1973 "Yom Kippur War" showed how precarious even the NATO bases were in support of U.S. national interests.

CARRIERS WERE READY OFF LEBANON

Then, too, there was the recent crisis in Lebanon. Our cariers were first on the scene to cover the evacuation of U.S. nationals and conducted tactical air patrols off the Lebanese coast for 52 days before being relieved by Air Force units. On a typical day during that crisis, the *Nimitz* carrier task force was in position south of Crete ready to back up the *America* task force which, in turn, was deployed south of Cyprus in position to support the U.S. Marine Corps amphibious ready group on station 25 miles off Lebanon. At the same time, a further option was provided by the F–14s and A–6Es of another carrier task force operating in the Indian Ocean within three hours' flying time of the crisis area.

"The point I want to get across here," declares Polmar, "is that the flexibility and striking power of those three carrier task forces were many times greater than the U.S. land-based tactical air power available in that part of the world . . . or any other forces for that matter.

"It's no wonder that whenever trouble flares up around the world, one of the first responses by our leaders in the White House, State Department, Pentagon, and Congress is: "Where are the carriers?" "●

## STARTING TO FARM ISN'T IMPOSSIBLE

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. FINDLEY. Mr. Speaker, Keith Wilkey, farm editor of Quincy Herald-Whig, Quincy, Ill., is one of those agricultural journalists who not only covers the day-to-day news but who has a keen feeling for perspective, putting the past into focus with the present, which goes meaningfully beyond a simple nostalgic approach.

This is evidenced by the following column, "Starting To Farm Isn't Impossible," which appeared in the August 22 issue of the Herald-Whig. We commend it to your reading and to those in your constituencies who may have that same hopeful yearning to become farmers.

STARTING TO FARM ISN'T IMPOSSIBLE

(By Keith Wilkey)

The farmer who had been sitting in the porch swing rose to greet the young man who had walked up the front walk. "Hi, Jim. Come on up and sit down a while; take the weight off your feet."

The two men made small talk for a while. The farmer was in his mid-sixties, while Jim was approaching his 27th birthday. Presently Jim's tone took a different note.

"Mr. Johnston," he said. "I would like to get started farming, but I can't see any way. Everyone tells me that it is virtually impossible for a young man to start farming today, and I'm beginning to believe it."

The older man didn't answer right away; he seemed to be gathering words and thoughts. "Son," he said slowly, "there are some things that are impossible all right. Starting in farming is certainly one of them . . . for some. But not for everyone."

Jim started to speak, but Mr. Johnson continued; "I don't want to bore you Jim, but listen a minute. My grandfather came to this country during the German immigration of the 1850's. When he got off the ship he had less than $10 in his pockets; didn't know a soul and couldn't speak a word of English. When he died he had owned this 240-acre farm for 30 years. So be careful what you call impossible."

The young man answered, "Yes, but costs weren't so high in those days. You didn't have to have all this expensive machinery and land could be bought for a low figure. It was easier to do in those days."

Again the elderly man paused. "Remember, son, he didn't get started immediately. His first job was being a handy man around a wagon factory. But he wanted to be a farmer and become a land owner.

"He worked as a farm hand for nine years; that's a long time to work virtually as a common day laborer—nine years. Finally he could rent a small patch and he farmed that for the next six years. That was 15 years and he still hadn't made what we could call much of a start today."

"Fifteen years!" ejaculated the young man "If I'd do that today I would be 42 years old before I could buy a farm . . . practically an old man!"

The wisdom and tolerance that come with years restrained the farmer's answer. "Son, today it is really easier, and you know it isn't going to come over night. You have a pretty good job in town, don't you?" The young man said he did. "What time do you get off in the afternoon . . . 4 o'clock?"

"3:30."

"That 2:30 God's time. You could just about get in a good half day. I'll tell you what I'll do . . . I'll help you and we will see if we can't find some farmer about ready to retire, or a man who wants to give full-time to a city job. Then we'll try and find a little patch where you can raise some hogs. You can buy a tractor for $400 or $500 and comparable machinery. You are mechanically-minded, and can keep it running.

"When you've made a start, you can get an operating loan (OL) from Farmers Home Administration. When the situation is right, you can apply for an FmHA farm ownership loan. But you can't do all this in a few weeks. And it will take hard work, discouragement, disappointment and perseverance.

"Not everyone has these qualities, plus good judgment. But you do. You'll make it."

A silence fell between the two men. Then the old man spoke again;

"You see, son, you have it easier than grandpa did."●

TRIAL OF ALI BHUTTO

## HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. McCLOSKEY. Mr. Speaker, judicial proceedings against heads-of-state and former heads-of-state are occurring with increasing regularity.

The case of former Pakistani Prime Minister Zulfikar A. Bhutto has been recently described in an article in The Nation by former Attorney General Ramsey Clark, following a visit to Pakistan.

The impeachment proceedings against former President Richard M. Nixon furnish a standard of comparison, as do the proceedings against India's former Prime Minister Indira Ghandi.

In the continuing battle to prove to our young people that the systems of justice of the Western World merit our continued resistance to communism and a continued adherence to Anglo-Saxon standards of fairness, I am hopeful that the Pakistani Supreme Court will shortly bend over backwards to remove all sense of political influence or vengeance from their nation's judicial procedures in Mr. Bhutto's case.

I am attaching Ramsey Clark's observations on the subject for the review of our colleagues:

THE TRIAL OF ALI BHUTTO AND THE FUTURE OF PAKISTAN

(By Ramsey Clark)

(NOTE.—Ramsey Clark, Attorney General of the United States from 1967 to 1969, recently returned from Pakistan where he went as a private citizen to observe the legal proceedings in the case involving the former President, Zulfikar Ali Bhutto, now under sentence of death for murder. He was present for the opening arguments in Pakistan's Supreme Court in Bhutto's appeal and while he was there he met with General Zia ul-Haq, leader of the coup that ousted Bhutto in 1977, with Law Minister A. K. Brohi and with other government officials. He also conferred with lawyers, judges, labor leaders, politicians and students and met with the U.S. Ambassador and his senior political adviser.)

Rarely has a criminal proceeding held such potential to alter history as does the trial of Zulfikar Ali Bhutto. Its impact can reach beyond the fate of a man and the unity of a nation to affect fundamentally economic, political and military power worldwide. The Supreme Court of Pakistan is now considering an appeal from his conviction for murder and the sentence of death. Its decision is expected in the very near future. Executions are carried out immediately following final judgment in Pakistan.

The idea of Pakistan, nurtured by a poet, Allama Iqbal, and consummated by a statesman, Mohammed Ali Jinnah, was fragile from conception. To bind a political union of widely differing, proud and often warring people by a single tie, the religion of Islam, was a unique experiment. The dream of Pan Islam fitted neatly with desires of the Islamic populations of British India to be independent of the majority Hindu population when "freedom came at midnight" to the subcontinent of Asia. The result was a new nation of East and West Pakistan divided by 1,000 miles of land mass.

The West contained four distinct regions with diverse and sometimes hostile populations: the dominant Punjab, the North West Frontier Province, the Sind and Baluchistan. The traumatic separation from India in 1947 split both Punjab in the west and Bengal in the east between India and Pakistan, resulting in waves of migrating millions and recurring massacres. Pakistan, cantaining the poorest areas of the former colony, was cut off from markets, industry and the continuity of government administration, all primarily located in India.

Movements for political separation were powerful forces throughout the new nation from its birth. A bloody civil war began in East Pakistan in March 1971. Four months after the India-USSR treaty of August 1971, Indian invaded East Pakistan and in two weeks crushed West Pakistan forces, ending the war. East Pakistan seceded and became Bangladesh. It contained the majority of the population of the former nation and an even greater majority of its poverty and problems. Henry Kissinger's "tilt" to Pakistan at that time probably deterred India from invading and partitioning the West.

Separatist movements were not limited to tensions between East and West. Within the West there were, among others, a Baluchistan Liberation Movement sometimes based in Iraq and a Pakhtoonistan movement involving both Baluchistan and the North West Frontier—giving rise to the possibility of a new nation in the event of the breakup of Pakistan, a nation that would include Afghanistan and most of Pakistan west of the Indus, excluding the Sind and Punjab, forming a corridor hundreds of miles wide from the Soviet Union to the Arabian Sea. The movements have involved guerrilla warfare countered by martial law and military casualties that may exceed those of the war in the East.

Bhutto came from a wealthy land-owning family in the very poor Sind. Graduated from the University of California at Berkeley and with a law degree from Oxford, he was Minister of Commerce for Pakistan at 30 and Foreign Minister when 33. He resigned as Foreign Minister in protest against military government policies in 1966, having established good relations for his country with China. He was imprisoned briefly in 1968 by President Ayub Khan for criticizing the government.

Founding the grass-roots Pakistan Peoples Party, Bhutto became the dominant political figure in the West by 1970. After the war in which East Pakistan was lost, he became President in 1972 (the first civilian chief of state in more than twenty years) and then in 1973, the first elected Prime Minister. Presenting himself as a democrat, a Socialist, a Populist and reformer, he initiated programs for land reform, economic development, social services, family planning, a strong Pakistan Peoples Party, internal security, Moslem leadership and international prominence based on nonalignment.

It is conceded by friend and foe alike that Bhutto is keenly intelligent, popular and charismatic. On the international scene he was called on to mediate in Cyprus, Korea and elsewhere. He assisted in preliminary contacts that led to President Nixon's visit to China. He negotiated difficult prisoner exchanges with India and Bangladesh, restored relations with Bangladesh, and eased tensions with India.

The United States expressed its strong disapproval of his role in calling for a Third World Summit, fearing concerted action by poor countries. President Carter urged Bhutto to abandon plans for a nuclear reprocessing plant France agreed to build in Pakistan. (India has had the bomb since 1974.)

Within the nation, he helped bring about the adoption of a new written Constitution in 1973 which some saw as a foundation for democratic government protecting human rights and securing economic justice. Economic policies stimulated growth despite difficult international problems including rising energy costs. Agriculture, health, education and housing were major concerns for his government and some progress was made.

But his years in power were in most ways the worst of times. He assumed office in the aftermaths of a humiliating military defeat, the severing of the nation, loss of most of its population to Bangladesh and the psychological and physical impairment of the dominant power in the society—the Army. Floods (including those of 1973 which were called the worst natural disaster in the area's history), earthquakes and other calamities befell the people during those years.

And above all there was the random violence, gun-running, guerrilla skirmishing, constant tension and high risk of revolution or invasion caused by political, tribal, cultural and international ambitions for power and dominance in surviving Pakistan and its very different parts. The Shah of Iran strongly supported Bhutto's efforts to contain the separatist movements. The Shah has no interest in seeing another state arise capable of dominating the strategic Persian Gulf, particularly a Baluch state that could lay claim to the loyalty of Iran's own sizable Baluch population. (Within Iran live one-third of the Baluch people.) World powers, principally the United States, the USSR and China are also keenly interested in Pakistan.

Growing instability was addressed with tough military and police measures. While parliamentary government endured, there were political arrests and detentions numbering in the thousands, martial law for whole cities and provinces at times, and a growing Federal Security Force not greatly concerned for life and liberty. Amnesty International, among others, protested human rights violations in a well-documented 1976 report.

The first six months of 1977 ware difficult. Bhutto's popular appeal seemed to slip badly with the turbulence and the harsh government reaction to it. He called elections which were held in March and the surprisingly strong showing of his party brought immediate outcries of vote fraud by other parties. Hundreds of protests and demonstrations, including some by women and children, led to violence and deaths and brief periods of martial law in major cities. Conditions were reminiscent of Chile before the golpe in 1973. Though most observers concede Bhutto candidates actually received a clear majority, probably 60 percent of the votes, a settlement among the parties that might have restored relative calm had not been reached by July, and new elections were planned for October.

On July 5, 1977 there was a bloodless military coup. General Zia ul-Haq, who had attended advanced command courses in the United States and the United Kingdom between 1972 and 1975, assumed government power as Chief Martial Law Administrator. The stated purpose was to stop the "drift toward political chaos." But drastic police measures were taken which created doubt as to General Zia's purpose. Severe penalties were immediately promulgated by fiat. Martial Law Order 12 provided for preventive detention and it was used liberally. Martial Law Regulation 11 of July 5 declared simply: "No one shall, either directly or indirectly, participate in any political activity. Maximum punishment 5 years Rigorous Imprisonment, fine and/and or whipping not exceeding 10 stripes." Martial Law Regulation 13 provided the same punishment for any form of communication critical of the Armed Forces or "calculated to create alarm or despondency amongst the public."

Public executions and floggings were authorized and carried out. The amputation of a hand was made legal punishment. General Zia says, "it is the humiliative rather than the punitive aspect of flogging which is important." He tells one that the death penalty and life imprisonment were not deterrents to criminal conduct but the threat

of flogging was. His new Law Minister A. K. Brohi says floggings are necessary to control the people and asks what do you do with a "mad dog." He defends stoning women to death for adultery and is the principal government spokesman justifying these cruel, inhuman and degrading puunishments as being ordained by the law of Islam.

Bhutto was arrested on the night of the coup and held for several weeks. Most of the high officials in his administration have been confined. Leaders of the Pakistan Peoples Party were also arrested. Many are still in prison, joined this year by leaders of other parties. Bhutto, released to campaign for the October elections, was greeted by enormous crowds. In early September he was arrested and charged with ordering the murder of a minor political figure in November 1974. General Zia publicly spoke of documentary evidence establishing Bhutto's guilt. Released on *habeas corpus* by a court, he was promptly rearrested under both military and civil process and has been detained virtually incommunicado since September 17, 1977.

While he was originally to be tried by a military court, it was decided he should be tried before five members of the High Court in Lahore. The two justices who had granted his writ of *habeas corpus* were excluded. The presiding judge was acting Chief Justice by appointment of General Zia; he was also an old enemy who had heard Bhutto's case when he was arrested in 1968. He should have been disqualified.

The murder charge, if believed, takes the case out of politics. Officials in the Zia government assure you this is a routine murder case. (Ferdinand Marcos of the Philippines, a master at authoritarian deceit, has used an ordinary murder charge to convict and condemn Benigno Aquino, a major political opponent, to death.)

This murder charge, while the most serious that can be made, was not taken seriously at first. The allegations themselves are so inherently improbable. The murder rate in Pakistan is high enough to make Houston seem peaceful. This assault was said to have been an attempt to kill a man named Ahmad Raza Kasuri, a dissident in the Pakistan Peoples Party. On June 3, 1974 Bhutto had become irritated with Mr. Kasuri on the floor of Parliament and expressed his feelings sharply, but not threateningly. This incident is the prosecution's case for a motive. Others had spoken far more sharply. Even threateningly, including Kasuri himself who said of another group, "Time had come for their being killed."

Kasuri's father was apparently killed by automatic gunfire which hit a moving car occupied, according to the evidence by Kasuri, his father, mother and an aunt, near Lahore shortly after midnight on November 12, 1974. Kasuri, who had no way of knowing who fired or ordered the shooting, immediately blamed Bhutto and used the charge politically. In 1972 he had claimed nine attempts had been made on his life for which he had blamed another politician. He claimed three attempts were made on his life in 1974. An investigation of the death of Kasuri's father was closed in 1975 without charges being brought. From 1975 through June 1977 Kasuri sought through intermediaries to establish friendly relations with Bhutto, obtained a meeting with the Prime Minister and returned to the party.

Shortly after the coup, two members of the Federal Security Force were arrested, questioned and confessed to the shooting. Masood Mahmud, Director General of the FSF, was taken into protective custody on July 5, 1977, and on August 14 wrote General Zia making "a clean breast of the misdeeds of the Federal Security Force under the orders of Bhutto." He later confessed to ordering the assault on instructions from Bhutto. His testimony is the only evidence directly linking the Prime Minister to the murder. It is more than suspect. He says Bhutto threatened him and made him personally responsible for "taking care" of Kasuri, commanding him to instruct a subordinate, Mian Muhammed Abbas, to "produce the dead body of Ahmad Raza Kasuri or his body bandaged all over." The body was never produced, of course. Abbas confessed, and then retracted, then on July 10, 1978 his lawyer again filed a confession before the Supreme Court.

The trial was not fair. The acting Chief Justice's conduct would make Judge Julius Hoffman in the Chicago 7 trial a model of decorum. He publicly commented on Bhutto's "guilt" outside the courtroom before conviction. His prejudice is spread through his 145-page decision. Even there he could not restrain himself from characterizing Bhutto, who did not present a defense, as a "compulsive liar," "unruly," "hurling threats as well as insults on us."

As one illustration, before the defense abandoned the case, Bhutto's lawyers had cross-examined Masood Mahmud, the prosecutions second witness. He was asked whether he had caused police to hold a Mrs. Ibrat while "rats were let loose in her *shalwar* and its ends tied." The purpose obviously was to examine the credibility and character of the witness. The acting Chief Justice, in referring to this cross-examination, wrote: "It appears that these questions were put to prove that P.W. 2 (Mahmud) was well-qualified from the point of view of the principal accused (Bhutto) to be appointed as Director General of the Federal Security Force."

The evidence presented against Bhutto, even if believed, would not support a verdict of guilt. The prosecution case was based entirely on several witnesses who were detained until they confessed, who changed and expanded their confessions and testimony with each reiteration, who contradicted themselves and each other, who, except for Masood Mahmud, were relating what others said, whose testimony led to four different theories of what happened, who were contradicted by ballistics and other physical evidence and who were absolutely uncorroborated by an eyewitness, direct evidence, or physical evidence. There were records showing that one of the FSF officers who allegedly fired the shots was in Karachi at the time, but no defense evidence was presented on this. Each of these witnesses had an urgent motive to inculpate the Prime Minister, each alleged that he resisted and protested but was forced by threat and command to participate in the shooting. That Kasuri remained alive in spite of the alleged fury of the Prime Minister did not seem to affect belief that his murder was ordered. Kasuri himself was shown to be a highly erratic, untruthful and opportunistic politician of no standing who sought favor from Bhutto until his overthrow.

Critical stages of the trial were conducted in camera. Comments and rulings by the court and conflicts between counsel and the court caused Bhutto to discharge his attorneys and boycott the trial before the prosecution completed its case. The remaining prosecution witnesses were not cross-examined, no defense case was presented and Mr. Bhutto was unrepresented during the concluding, critical phases of the trial.

All five defendants—Bhutto, the two FSF officers who allegedly fired the shots and their two superiors who were charged with participating in carrying out the order allegedly communicated by Masood Mahmud—were sentenced to hang, Mahmud, who alone testified that Bhutto ordered the acts, was pardoned. Efforts of the other four defendants to involve Bhutto and justify their conduct did not save them, at least not yet.

The decision of the High Court is full of errors of fact and law. Its characterizations of evidence show its bias. There was no objective effort to determine fact.

The case is now on appeal in the Supreme Court of Pakistan at Rawalpindi. There from Saturday through Wednesday each week, the nine justices engage in a meticulous review of the trial record. They are impressive men, learned in the law and skillful in their examination of the trial transcript, counsel and each other. The Chief Justice Anwar ul-Haq questions most frequently, but all participate in a lively manner.

The Court has maintained some judicial power. In an important decision in Bhutto's wife Nusrat's application for a writ of *habeas corpus*, the Court boldly declared that precedents suspending judicial power under similar circumstances through the law or necessity were in error. But no writ was issued and Mrs. Bhutto remains incommunicado in custody, though not charged with any crime.

The Supreme Court of Pakistan is not in an easy position. The Chief Justice was selected by General Zia who had removed his predecessor. Four of his associates were appointed by General Zia. Everyone is looking for political motivation. Each justice has the rule of law in Pakistan, his professional reputation, his personal future, perhaps his own freedom and life before him in this case. The decision will be historic. It is due within weeks now.

We shall see whether the world sits quietly by and watches if Ali Bhutto is executed. Just 51 years old, he moved impressively on the international stage for nearly two decades. Many viewed him as a "scholar statesman," a phrase used by Kasuri in 1976. Political vengeance can be dressed up as a pure criminal trial. Such a method defames former leaders and dissipates support for them. It is not a happy or humane precedent. Even a commutation of the death sentence by the Supreme Court or by General Zia will only diminish the personal tragedy and perhaps temper political significance of this method of destroying democratic institutions.

For Pakistan and Islam, the execution of Bhutto would have devastating effects. If an election were held today, most concede that Bhutto would win overwhelmingly He is the one leader with broadly based popular support in Pakistan His prosecution and his mistreatment in prison, where no foreign observer has been permitted to see him or examine conditions of his confinement, have created new and greater public sympathy for him. Even some soldiers have openly expressed their view that the charges were fabricated

Martial law does not sit easy on the people. Public lashings of members of the press (more than eighty have been arrested) and of many poor people has caused a bad reaction, so that General Zia was quick to observe in mid-July that there had been no lashings for four months. Still, even government-controlled daily papers report sentences of imprisonment and lashing by military courts presided over by a major or a colonel. The Law Minister, who believes in the law of the lash and says both Islam and the people demand it, doesn't seem to hear even supporters of General Zia say that the floggings, executions and threatened amputations are causing greater unrest and alienation. Both at home and abroad the Draconian punishments have greatly damaged the nation and its religion.

The execution of Bhutto would be extremely destabilizing. Rioting, even civil war, is a possibility. The military is not of a single mind. Eighty percent of the soldiers are from Punjab, which creates hostility in Sind, Baluchistan and the North West Frontier. A foreign power with a suitcase full of money might easily establish another General.

Poor Pakistan with its staggering human problems, hunger, violence, illiteracy, illness, population growth, underdeveloped economy, fragile confederation of dissimilar and warring people needs help. A haunting part of the planet running from the Arabian Sea coast to Nanga Parbat in the Himalayas, most of its more than 70 million people live in staggering want.

But foreign interest in Pakistan may prove its greatest problem and peril. It is the wrong country, in the wrong place, at the wrong time. And it will not be left alone.

Afghanistan it is tempting because it contains many people of common tribe and culture in the Frontier and Baluchistan. It also offers access to the sea, the chance to realize a greater Afghanistan and a vast increase in power. To Iran it presents a threat on a long border with a large common population of Baluchs and the threat of encirclement by hostile forces from the Arabian Sea to the Turkish border, along with the possibility of strategic domination by the USSR of the Persian Gulf, the Arabian Sea, the Middle East. To India the prospect of the disintegration of Pakistan offers the chance to consolidate Punjab, to return to British India's borders geographically, along with the elimination of an enemy, control over a wide buffer to the Soviet Union. These are historical and regional concerns.

To China, the Soviet Union and the United States, Pakistan is of the greatest strategic importance. From the days of the wars with the Ottoman Empire, Czarist Russia sought warm-water ports. Pakistan has hundreds of coastal miles on the Arabian Sea, dominating, with Oman, the entrance to the Persian Gulf. Control of Pakistan would directly increase Soviet power over Middle East oil, magnify its influence with India, give it access to the Indian Ocean and to East Africa and greatly contribute to the encirclement of China. With the new, stronger Soviet influence in Afghanistan, destablization in Pakistan holds enormous meaning.

China, with a common border and open highway from Sinkiang to Karachi, may see Pakistan as a key to containing Soviet influence and holding a protected position throughout the subcontinent and Southeast Asia. With Pakistan controlled by the Soviets, China would be cut off on the west, and India, Burma and Thailand would be more vulnerable to influence by the USSR.

The United States may see in the balance the Middle East and its vast oil reserves, along with greatly altered influence in southern Asia and eastern Africa. People in Pakistan speak of CIA activity in establishing Zia. They name names. It is believable to many. After all, is not Iran—"we helped restore the Shah to his throne," William Colby says—the CIA's proudest achievement?

Whatever the cause, the United States is again in the position of supporting a military dictatorship, harsher in its public pronouncements than any, even claiming religious authority for its harsh rule.

General Zia may have greater difficulty maintaining himself in power than Marcos or General Pinochet or Park or the neighboring Shah. He is unknown. He is inexperienced. He has not been judged effective by international observers. He presides over historic dissension and contemporary turbulence. He rules by the threat of the lash with absolute authority. He postpones elections.

And he may execute Ali Bhutto.

The role of the United States should be clear by now. We cannot live other nations' lives for them. We can only live by our own principles and believe that right may make might.

We should stand for life and implore with all our moral suasion a commutation of the death sentence. We should stand for justice and urge freedom, or—if the facts warrant prosecution, which I have not seen—a new and fair trial for Ali Bhutto. We should stand for democracy and urge popular elections in Pakistan at the earliest date by which all parties and candidates can be fairly presented and voting honestly monitored. We should urge an immediate end to martial law and cruel, inhuman and degrading punishments. We should stand for humanity and send massive economic aid, assuring delivery to those in greatest need—offering food, independence in food production, health care, education, an expanding, independent economy, decent housing and human digity for all the people of Pakistan. It is to these issues that our imagination, energy and foreign policy should be addressed.●

## AN OBSERVATION ON CAPITOL DEVELOPMENT PLANS

**HON. GEORGE E. BROWN, JR.**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. BROWN of California. Mr. Speaker, the recent attention paid to future plans by the Architect of the Capitol for the U.S. Congress has given each of us cause to ponder the future of this immediate area.

A similar controversy to that in Washington existed in California's capitol area when Jerry Brown became Governor. A recent column by Neal Peirce accurately describes the innovative steps the California State architect, Sim Van der Ryn, took to humanize Sacramento's plans.

I commend this article to all my colleagues:

[From the Los Angeles Times, Sept. 3, 1978]

SACRAMENTO BUILDS, WASHINGTON EMBELLISHES

(By Neal R. Peirce)

SACRAMENTO.—The truly frightening plans of the architect of the U.S. Capitol to construct as many as 16 grandiose new marble mausoleums, otherwise known as Senate and House office buildings, find a refreshing counterpoint in California's capital city.

The Washington plans—so far just alternative proposals—are massive aggrandizing, and likely to cost several billion dollars. Sacramento is looking instead to low-rise, energy-efficient, human-scale buildings, interspersed with housing, restaurants and shops in what its designers hope will be a 24-hour-a-day living environment.

The total cost of Sacramento's proposed six buildings is expected to be $80 million to $100 million, most or all of it recouped by terminating expensive leases for government offices in privately owned buildings around Sacramento. California is building at a cost of $60 a square foot; the heavily marbled Hart Senate Office Building, now under construction in Washington, is costing $101 a square foot, a figure critics say could rise to $185. (The future of the Hart Building is currently in some doubt because the House recently voted to deny $54.8 million to cover its cost overruns.)

The full scope of the federal architect's edifice ambitions was recently brought to light by the National Journal's Richard Cohen. He pierced through the obfuscatory jargon of an official report to reveal building plans that would consume most of the placid grassland between the existing Senate office buildings and Union Station, send a new group of House office buildings sprawling to the south of the Capitol complex and devour part of the Capitol Hill Historic District. That area of charming townhouses was described in Capitol Architect George White's report as "an unacceptable neighbor to new House office buildings." He said the townhouses "should be rehabilitated"—a phrase reminiscent of the military's approach to troublesome villages during the Vietnam war.

The architect even would force the U.S. Supreme Court to evacuate Capitol Hill entirely, though he generously noted the Court "probably should be in Washington." The present Court building, it was proposed could become an adjunct of Congress or the Library of Congress. The plan also expansively proposes adding close to 8,000 new congressional parking spaces—presumably free, like the existing 7,676 Capitol Hill spaces, even though public downtown parking costs $3 to $4 daily.

Until the 1960s, the Senate and House made do with a total of three office buildings. Now there are five, with the sixth under construction—all necesary, architect White claims, because of national population growth. Sen. John H. Chafee (R-R.I.), a chief critic of Capitol Hill's "Mussolini-style" new structures, calls White's claim hogwash. Chafee notes that the congressional staff has expanded 300% in 20 years (latest total: 18,370), while total U.S. population has grown only 25%.

California state payrolls, like those on Capitol Hill, grew topsy-turvy in the '60s and '70s. But even before Proposition 13, the state had done an about-face on its capital plan. In the early '60s, the state bought and razed structures in 50 square blocks south of the Capitol. Gov. Jerry Brown told me the plan amounted "to kicking out all the people, putting up huge, tall government buildings, creating a bureaucratic monoculture"—even though the proposal emerged from the administration of Gov. Edmund G. (Pat) Brown, his father.

Then came Ronald Regan, with his free-enterprise bias. He decided to lease needed new office space, rather than build and so cleared acres became a desert of parking lots.

Jerry Brown, taking office in 1975, moved to create an entirely new capital area plan by appointing a broadly representative advisory committee of government officials, businessmen and neighborhood spokesmen. And he picked a highly unconventional state architect, Sim Van der Ryn, a UC Berkeley professor, counterculture ecologist and founder of the communal Farralones Institute.

Van der Ryn says the new plan is intended to be "sensibly scaled to people, to include a lively diversity of uses, and to work with the environment" of the Sacramento Valley by using lower buildings, and courtyards, trees and narrow spaces to create shade. In between the government structures will be 2,400 units of new housing, as well as restaurants and shops, built and operated by the private sector under long-term leases.

One major street will become a pedestrian mall; use of private autos will be discouraged and reliance on mass transit and bicycles encouraged. The few remaining old structures will be rehabilitated and recycled and efforts will be made to retain housing for low-income people along with newer units for the more affluent. The entire complex will be within 10 minutes' walking time of the Capitol, now undergoing repair to make it earthquake-proof.

The energy-saving theme is illustrated by the first new office building, a climate-sensitive four-story structure to be completed by spring of 1980. Designed by Van der Ryn and a team of young architects and ecologists, it will have an exposed concrete structure acting as a thermal mass, hidden bedrock and a spacious central atrium topped by skylights—all especially designed to store, exchange and distribute heat in winter and cool air in summer. To ward off the summer sun (temperatures here often reach 100 degrees), the plan includes automatically controlled canvas

sunshades along the exterior walls. Backup air conditioning and heating units should rarely be needed. Van der Ryn claims that the $17 million building—compared to standard structures of the same size—will use 40% less energy and thus save $28 million over 50 years.

The contrast to the new congressional office buildings, energy gluttons all, could scarcely be more striking.

For a second building, Van der Ryn's office sponsored a competition for energy-efficient designs. He received a startling 41 submissions, many of them highly imaginative—seeming proof of growing interest among architects in active and passive solar systems. The winning design wasn't done by some small, ecology-minded firm, but rather by Benham Blair and Associates, one of the country's largest architectural-engineering conglomerates. It involves two buildings. One will be buried under a landscaped park providing thermal "earth insulation." Thirteen small apartment houses, to be built by a private developer, will dot the same park. The second building will be above ground, hidden behind a giant solar "slab" set at a 45-degree angle.

The sensitive, imaginative impulses of the Sacramento plan may spread in the coming years—expressions of a new ethos in the design of civic buildings and their relation to their physical and human environments. "To the extent our capital plan succeeds," says Gov. Brown, "we will send out a message . . . that urban living makes sense." Architect of the U.S. Capitol: Please note.●

## REPRESENTATIVE CONYERS NOTES ARMS CONTROL NEEDS

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. SIMON. Mr. Speaker, a few weeks ago, our colleague from Michigan, Congressman JOHN CONYERS, sent around a letter to some of us, and I am taking the liberty of placing a portion of that in the RECORD.

JOHN CONYERS has testified several times before the Budget Committee on the warped priorities that we as a nation have and of the calamity that awaits us if there is not a shift in priorities.

I believe my colleagues will be interested in reading his letter:

HOUSE OF REPRESENTATIVES,
*Washington, D.C., July 27, 1978.*

I want to share with you and other concerned colleagues a few thoughts about the Special United Nations Session on Disarmament that concluded a month ago in New York.

Chuck Whalen's weekly newsletters on the Session were extremely helpful in furthering understanding of the issues. Paul Simon's excellent analysis of the conference's results provided an important outline of the problems and obstacles that stand in the way of significant break-throughs in halting the arms race. We were well-represented at this first international disarmament conference in 46 years, and Chuck is to be commended for his leadership.

It is difficult, however, not to be left with the sinking feeling that the nations and citizens of the world are headed for catastrophe unless far greater attention is brought to the issue of the arms race and far greater will is summoned to take the actions necessary to reverse it.

A few benchmarks indicate the sweeping changes in the military and technological structure of the world that ought to compel us to deal more urgently and fundamentally with arms control and disarmament.

The United States and the Soviet Union possess more than 50,000 strategic and tactical nuclear weapons twice the number that existed only 8 years ago;

7 nations already possess nuclear weapons; 20 or so will have the capability in another decade;

Third World Nations now spend more than $70 billion annually on weapons, a 700 percent increase in 20 years;

More than 18 tons of plutonium now exist as the byproduct of nuclear processes (a speck of which is lethal), and an estimated 450 tons will exist by 1990, which we know of no way to dispose of;

The nations of the world currently spend $400 billion annually on armaments, double the amount of only 8 years ago, and equivalent to the annual income of an estimated 1.8 billion people in the 36 poorest countries.

Two ongoing developments further aggravate, if such is possible, these worldwide trends. One reflects the technological imperative that the distinguished social philosopher Erich Fromm has pointed out numerous times has made man captive to the powerful machines he has built. Newspapers are filled daily with fascinating, almost worshipful, accounts of the new weapons being planned and developed, among them the laser and particle beam weapons that can direct explosive energy at the speed of light to any object on earth, including missiles on the ground and in the air.

The second development involves the attempt on the past of military planners and other officials to win acceptance of the remarkable notion that the new miniaturized nuclear and neutron weapons are the only things that stand in the way of all-out, global nuclear war. Is there any doubt that the contrary is the case, namely, that each new round of weaponry is far more lethal, costly, and destabilizing than the last? Yet we permit ourselves to entertain this notion that our salvation and that of the world rests with the stepped-up and uninterrupted development of every manner of nuclear weapon. With the announcement a few weeks ago that there now exists the capability to convert conventional battlefield weapons into nuclear ones, we have not only crossed the threshold to nuclear way but of equal importance trivialized it to the point that it is ever more likely to be countenanced and implemented.

What explains the incredible discrepancy between the knowledge we now possess of the arms race and the failure of our understanding of its enormous costs and ruinous consequences? In the few days I had the opportunity to spend at the Disarmament Session, it was painfully clear that the discussion taking place within the U.N. chambers was substantially lost on the rest of the world. The meaning of the arms race and nuclear proliferation has not sunk into public consciousness. To be sure, these matters are not easy ones to comprehend, let alone deal with. They involve unthinkable thoughts about a level and scale of devastation for which mankind has no precedends. The glaring inattention of the mass media further contributes to the current state of ignorance and the sense of helplessness.

The effort to educate the public and its leaders, needless to say, cannot slacken. Ways have to be found to communicate effectively to the public the meaning of armaments and nuclear war. Permit me to make a few proposals for further action. Would not a presidential commission or select congressional committee devoted to the examination of the arms race and the monitoring of its costs generate much-needed attention? Would not a regular MCPL seminar series that brings Members together with leaders from other nations as well as students of disarmament be a useful addition to forums that already exist? We have already witnessed the international concern and, hopefully, we can find ways to internationalize our discussions.●

## THE 85TH ANNIVERSARY OF FRIENDSHIP BAPTIST CHURCH, PASADENA, CALIF.

### HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. MOORHEAD of California. Mr. Speaker, I would like to take this opportunity to commend the Friendship Baptist Church of Pasadena, Calif., on its 85th anniversary.

While it is clear that in the chronicles of history's major events, occasions such as this are seldom given the attention they deserve, it is equally true that the collective impact of church groups like the Friendship Baptist Church play a fundamental and vital role in shaping the direction of our country and our society by influencing our thoughts and behavior patterns.

In this manner then, it is also clear that the shape and definition of history is influenced. This impact, I believe, becomes even more pronounced in the case of the Friendship Baptist Church when one considers the graciousness and longevity of its own history.

The Friendship Baptist Church survived its formative years. It grew from infancy into a group possessing venerability and the wisdom of maturity. It is appropriate here to give a brief accounting of that growth.

The church was founded on September 2, 1893, in a hall at 12 Kansas Street, which later became known as Green Street. The founding fathers were the Reverends C. H. Anderson and J. M. Fowler. The church's first congregation was a small but determined nine.

Shortly thereafter, under the direction of the Reverend J. H. Kelly, the Friendship Baptist Church purchased land on South Vernon Street for the grand price of $400, on which they constructed a building for $850.

In 1925, the congregation, growing rapidly, moved to its new grounds at Dayton and DeLacey Avenues. The cost of the new complex was $125,000. It is a credit to the deacons of the church, who guided the organization through this expansion period with care and flair, that the Friendship Baptist Church has been designated a historical landmark by the city of Pasadena.

With sincerity, I offer my congratulations to the leaders and members of the church on this very special birthday. I am especially grateful to the pastor, the Reverend S. W. Lewis, for his faith, for his stewardship to his parishioners, and for his outstanding service to this community.

Mr. Speaker, I salute the Friendship Baptist Church for providing 85 years of spiritual guidance and fellowship to its congregation, for giving 85 years of

service to the community of Pasadena, and, most of all, for providing 85 years of loving labor and devotion to God.●

## CONSUMER PRODUCT SAFETY COMMISSION

### HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. COLLINS of Texas. Mr. Speaker, I have long been concerned over the excessive costs, both direct and indirect, that the Consumer Product Safety Commission presents annually to each and every American. Over the past few months, I have undertaken an extensive study of this situation, and have found some very startling figures—and reached some very important conclusions.

In annual appropriations for the Commission alone, the CPSC has cost the American taxpayer over $200 million over the past 5 years. In addition to this, the Department of Justice has spent over $650,000 in litigating suits which have arisen out of CPSC-promulgated regulations.

These direct costs, however, are truly minimal when compared with the billions of dollars spent each year by the American consumer in increased costs of goods and services subject to CPSC regulations. Take, for instance, the example of one small firm, the Columbia Match Co. of Cleveland, Ohio. Columbia Match is a small company with only 60 employees. Yet the cost to this small, private firm of complying with recently-promulgated CPSC regulations is estimated at $98,000.

The purpose of the matchbook regulations? It was CPSC's idea to get all striking plates on matchbooks moved from the front of the matchbook cover to the back. The agency thus unilaterally ruled that all matchbook manufacturers would have to redesign their entire system of production in order to achieve this change. Unfortunately, the agency did not see fit to consider the massive cost of the changeover to the match industry, hundreds of thousands of dollars which, of course, was paid out in increased prices by the very consumers the CPSC is supposed to be protecting.

A cross-section of CPSC-incurred costs more of the same. Other match companies report similar costs—$73,000 to D. D. Bean of New Hampshire and an incredible $190,000 to the Ohio Match Co. In the bicycle industry, America's largest bicycle manufacturer, the Schwinn Co., reports that they have spent $728,200 in complying with CPSC standards. The Bicycle Manufacturers' Association of America estimates that CPSC alone adds 10 percent to the price of every bicycle sold in the United States today.

In the miniature Christmas-tree light industry, the National Ornament and Electric Light (NOEL) Association assessed costs to the industry over the 2-year period before any changes were made in compliance with newly promulgated CPSC standards at $122,000. In this case, the CPSC used as its basis for new regulations 20 indepth investigations of Christmas-tree light accidents. Of the 20, only 2 of the light sets had been purchased within a year of the incident in question. No age, condition, use or abuse information is contained in any of these reports. Once again, the CPSC acted blindly and unilaterally to regulate an entire industry—at incredible cost the consumer—without any serious study or knowledge of the situation at hand.

The Stanford Research Institute estimates that proposed regulation of the lawnmower industry by CPSC would increase the average price of a lawnmower by up to 35 percent, depending upon the model in question. The institute's study also notes that such regulation, had it been instituted in the 1976 model year, would have cost the American consumer $470 milion in price increases.

A frightening example of the cost of overregulation by the CPSC can be found in the case of Marlin Toy Products, Inc., a small toy firm in Horicon, Wis. This single firm spent a staggering $1,126, 801 in order to comply with CPSC regulations. In addition, the president of Marlin Toy informed my staff that two FBI agents spent a week at his plant investigating the company's "Flutter Ball" and "Birdie Ball" toys.

In the crib manufacture industry, Childcraft Co. reports that the price of their least expensive crib has increased by approximately 46 percent due to CPSC regulations. As the head of one firm told me in a letter, "The most ridiculous aspect of the problem is the mattress flammability standard—the whole thing is based on a lighted cigarette igniting the mattress—I am sure you will agree that very few infants smoke in bed."

These few examples give one pause to reflect upon and reassess the role of the CPSC, to compare the benefits provided in light of the sobering costs incurred. The creation of the Commission was predicated on the theory that the American people are not intelligent enough to distinguish between a product that presents a severe danger and one that is safe. Thus, the whole idea of the agency from the start was to place further limits on our freedom of choice, and to put into practice the notion that a bureaucratic elite knows better than we how to run our own lives.

Mr. Speaker, the House will soon be asked to extend authorization for CPSC appropriations in the amount of $55 million, $60 million, and $65 million for fiscal years 1979, 1980, and 1981, respectively. The average of these figures represents a quantum leap of 50 percent in the cost of maintaining this harmful agency. Will this increase in appropriations mean that the American people will be treated to a 50-percent increase in regulation—and the billions of dollars in price increases and hundreds of thousands of lost jobs that will most assuredly follows?

I urge my colleagues, Mr. Speaker, to take a hard look at what the CPSC is really costing the consumers of our Nation. If we really want to whip inflation, cut the cost of Government, keep our relatively low unemployment rate, and increase the amount of economic freedom to be had in this country; commencing an in-depth reappraisal of the activities of the Consumer Product and Safety Commission is a perfect place to start.●

## GAO REPORTS ON COST OF SUGAR PRODUCTION AND PROFITS

### HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. VANIK. Mr. Speaker, attached is a letter from the GAO in response to my questions concerning the cost of production of sugar and profits in the sugar industry in recent years.

The letter points out that—

The diversity of (cost of production) estimates raises questions as to what is the cost of production in any area;

Some sugar producers have "rebuffed" efforts by the U.S. Department of Agriculture to determine costs of production;

Many studies and reports on the cost of production of sugar indicate costs below the 16¢ price objective level set in the sugar bill reported by the House Agriculture Committee; and

While many producers complain now of losses from the production of sugar, they fail to mention the extraordinary windfall profits which occurred throughout the industry in 1974 and 1975.

The GAO data shows that sugar production involves the risk of high and low price cycles. We are now in a low price cycle—a period of lean years. What the industry does not tell us is that just 3 years ago, they were making incredibly fat windfall profits. According to the GAO, the profits of the Hawaii producers amounted to $428 million in 1974 alone. The profits of the whole industry, according to the U.S. International Trade Commission, were over $1.5 billion in 1974.

The consumer was given no relief during those sweet days for the producers; now, that production has temporarily turned sour, the taxpayer and consumer are being asked to be sugar daddy for the industry.

The GAO data provides important new information against the Church/de la Garza sugar bills and in support of the bill proposed by the Ways and Means Committee.

The letter follows:

COMPTROLLER GENERAL
OF THE UNITED STATES,
*Washington, D.C., September 1, 1978.*

Hon. CHARLES A. VANIK,
*Chairman, Subcommittee on Trade, Committee on Ways and Means, House of Representatives.*

DEAR MR. VANIK: This is in response to your letter of August 29, 1978, requesting information on sugar production costs for any domestic sugar producing areas. In the course of our work, we have obtained information from a variety of sources including the U.S. Department of Agriculture (USDA), published sources, and data provided by firms and industry groups.

The cost of producing sugar in Hawaii is estimated at 13.16 cents per pound, raw value, in 1978 based on industry data. This

may be an understatement of cost, however, due to the absence of imputed land values; inadequate depreciation and other factors. Adding an estimate for imputed land costs and for capital investment not covered by depreciation would yield an estimated production cost of 14.3 cents per pound, raw value.

Industry data on production costs in Florida and Louisiana were not available to us. USDA officials told us they had approached Florida and Louisiana producers several years ago about doing a cost study and were rebuffed. We did identify university studies on production costs in each state. A University of Florida researcher, D. L. Brooke, estimates production costs of 15.79 cents per pound, raw value, in Florida for 1977 on a net cash rent for land basis and 16.54 cents on a current market value of land basis. These figures contrast sharply with USDA's estimate of 1977 Florida production costs of 14.202 cents per pound, raw value. A Louisiana State University researcher, Joe R. Campbell, estimates a break-even cost of 14.8 cents per pound, raw value, in Louisiana in 1977. Dr. Campbell has advised us that the Louisiana cost estimate is based on a 500 acre operation, which would maximize use of a mechanical harvester, and would represent the production cost of a reasonably efficient farm. USDA data indicate that only about 14 percent of Louisiana sugarcane farms are 500 acres or more but that they produce about 65 percent of the State's sugar. The Louisiana State figure of 14.8 cents contrasts sharply with USDA's estimate of 1977 Louisiana production costs of 17.913 cents per pound, raw value.

We are aware of no 1978 estimates for Florida and Louisiana other than those made by USDA, which are contained on pages 30–31 of your Subcommittee print on sugar dated August 14, 1978. It is important to note that all the figures are estimates. The University of Florida, Louisiana State University, and USDA estimates are based on projections of data developed in earlier studies, with a variety of base years. USDA notes on page 14 of the August 14 Subcommittee print that differences in cost concepts, computational methodology, and yield assumptions for sugar and other crops are frequent sources of differences in cost estimates. The diversity of estimates raises questions as to what is the cost of production in any area.

USDA has recently conducted a study of the cost of growing sugarbeets. They advised us that they do not have recent data on the cost of processing sugarbeets. Based on the USDA study, industry supplied data and our computations based on these data, we estimate the cost of producing refined sugar from sugarbeets to be 17.81 cents per pound in 1977/78. This does not include marketing costs estimated by USDA to be about 2.5 cents. These data are based on actual 1977 production costs obtained from sugarbeet processors and USDA estimates of 1978 sugarbeet growing costs. Since sugarbeets are processed directly into refined sugar in the United States, there is no raw sugar stage. There is no accepted method to estimate the equivalent cost of raw beet sugar.

Subsequent to the receipt of your letter, your office requested information on profitability in any of the sugar producing areas. We have very limited data in this regard.

A spokesman for most of the beet sugar companies recently testified on their serious financial problem before the House Committee on Agriculture. The spokesman stated:

* * * each and every one of the nation's beet sugar processing firms for whom I speak is in serious financial straits—indeed jeopardy * * *".

The spokesman pointed out that one company had lost $6.1 million on revenue of $152.9 million during its most recent fiscal year and a cooperative failed by $14 million to meet its contractual obligations with its grower-owners for the 1976 crop. In a case we identified, a recently established cooperative with a relatively new plant has been unable to pay interest on its debt for 2 years, while another processor told us his company has reported financial losses for the last 4 quarters.

In 1974 and 1975, the Hawaiian sugar industry realized sizable profits when prices were at historically high levels. Since then prices have fallen markedly. The 1977 crop would have resulted in losses except for Federal direct support payments.

We have developed estimates on the returns over cost of the Hawaiian sugar industry based on industry supplied cost data and USDA reported data on the value of production. We have also added government payments.

HAWAIIAN SUGAR INDUSTRY RETURNS OVER (UNDER) COST

[In millions of dollars]

| Year | Net cost of raw sugar production | Value of production | Returns over (under) cost | Government payments | Returns over (under) cost after Government payments |
|---|---|---|---|---|---|
| 1972 | $172.3 | $176.6 | $4.3 | $9.7 | $14.0 |
| 1973 | 170.5 | 203.8 | 33.3 | 9.5 | 42.8 |
| 1974 | 239.4 | 659.2 | 419.8 | 8.6 | 428.4 |
| 1975 | 271.2 | 354.6 | 83.4 | 0 | 83.4 |
| 1976 | 263.6 | 245.5 | (18.1) | 0 | (18.1) |
| 1977 | 259.5 | 219.1 | (40.4) | 48.7 | 8.3 |

The U.S. International Trade Commission (ITC), in its March 1977 report to the President stated that:

"All segments of the sugar industry—growing, milling, processing and refining—enjoyed a dramatic increase in net sales during 1972–74. Net sales for most segments of the industry declined, however, in 1975—a period of declining sugar prices. With the exception of proprietary cane sugar refining, the sugar industry also enjoyed an increase in profits for proprietary firms and an increase in payments to members of cooperatives during 1972–74. Profits and payments like net sales, declined in 1975 for most segments of the industry."

The report went on to state that:

"The period 1972–75 was, overall, an era of prosperity for growers, grower-millers, and nongrower-millers of sugar cane situated in Florida, Louisiana, Texas, and Hawaii. The year 1974 was exceptionally prosperous. The forecast for the sugar cane industry for the 1976/77 crop year, however, appears bleak. It appears that declining sugar prices, coupled with increasing farming and milling costs, will turn numerous farm and mill operations into marginal or unprofitable operations."

Appendix I is Table 19 from the ITC report, which contains data on profits supplied to the ITC by various elements of the sugar industry for the accounting years 1972–76.

We trust that this information satisfies your request.

Sincerely yours,

ELMER B. STAATS,
*Comptroller General of the United States.*

APPENDIX I

TABLE 19.—SUGAR: NET PROFIT OR (LOSS) BEFORE INCOME TAXES OR NET PROCEEDS PAID OR PAYABLE TO COOPERATIVE MEMBERS FOR U.S. GROWERS, PROCESSORS, MILLERS AND REFINERS ON THEIR SUGAR OPERATIONS, ACCOUNTING YEARS 1972–76

[In thousands of dollars]

| Item | 1972 | 1973 | 1974 | 1975 | To Sept. 30 [1]— 1975 | To Sept. 30 [1]— 1976 |
|---|---|---|---|---|---|---|
| Sugar beet growers and beet sugar processors: | | | | | | |
| 27 growers (total farm) | (2) | (2) | (2) | (2) | (2) | (2) |
| 10 processors | 45,534 | 108,229 | 395,402 | 234,419 | [3] 111,117 | [3] 37,987 |
| Total | 45,534 | 108,229 | 395,402 | 234,419 | 111,117 | 37,987 |

| Total | 55,187 | 121,613 | 641,553 | 357,405 | 40,887 | 16,267 |
| Cane sugar refiners: | | | | | | |
| 8 refiners | | | | | | |
| 1 Florida cooperative refiner | | | | | | |
| California & Hawaiian Sugar Co | | | | | | |
| Total | 169,757 | 202,535 | 438,851 | 367,150 | 225,943 | 193,977 |
| Grand total | 277,820 | 452,910 | 1,548,802 | 1,034,919 | 377,947 | 248,231 |

[1] The interim 1975 and 1976 accounting periods for each of the reporting concerns range from 1 mo to 12 mo and end no later than Sept. 30.
[2] Data are insignificant of the total for all U.S. sugar beet growers.
[3] Data are for 7 processors.
[4] Not available.
[5] The 14 Hawaiian growers are also millers. Their sugarcane is transferred to their mill at cost.
[6] Commenced operation on Dec. 8, 1973.
[7] Data are for 6 refiners.

Source: Compiled from data submitted to the U.S. International Trade Commission by U.S. growers, processors, millers, and refiners.

## ANOTHER LOOK AT GUN CONTROL

### HON. CHARLES E. GRASSLEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. GRASSLEY. Mr. Speaker, there are approximately 5 weeks remaining before the Congress of the United States adjourns for the year. It is obvious that neither the House of Representatives nor the Senate will take up Federal gun control legislation prior to adjournment. Nonetheless, I would like to share with my colleagues an article which was published in the August 27, 1978, Washington Post. The writer's discussion and analysis of this most controversial issue warrant review by my colleagues and other devotees of the CONGRESSIONAL RECORD.

The article follows:

BANNING GUNS DOESN'T WORK

(By Don B. Kates Jr.)

Despite almost 100 years of often bitter debate, federal policy and the policies of 44 states continue to allow handguns to any sane adult who has not been convicted of a felony. Over the past 20 years, as some of our progressive citizens have embraced the notion that handgun confiscation would reduce violent crime, the idea of closely restricting handgun possession to police and those with police permits has been stereotyped as "liberal." Yet when the notion of sharply restricting pistol ownership first gained popularity, in the late 19th century, it was under distinctly conservative auspices.

In 1902, South Carolina banned all pistol purchases, the first and only state ever to do so. (This was nine years before New York began requiring what was then an easily acquired police permit.) Tennessee had already enacted the first ban on "Saturday night specials," disarming blacks and the laboring poor while leaving weapons for the Ku Klux Klan and company goons.

In 1906, Mississippi enacted the first mandatory registration law for all firearms. In short order, permit requirements were enacted in North Carolina, Missouri, Michigan and Hawaii.

In 1922, a national campaign of conservative business interests for handgun confiscation was endorsed by the (then) arch-conservative American Bar Association.

Liberals at that time were not necessarily opposed in principle to a ban on handguns, but they considered such a move irrelevant and distracting from a more important issue—the prohibition of alcohol. To Jane Addams, William Jennings Bryan and Eleanor Roosevelt (herself a pistol carrier), liquor was the cause of violent crime. (Before dismissing this out of hand, remember that homicide studies uniformly find liquor a more prevalent factor than handguns in killings.)

Besides, liberals were not likely to support the argument advanced by conservatives for gun confiscation: that certain racial and immigrant groups were so congenitally criminal (and/or politically dangerous) that they could not be trusted with arms. But when liberalism finally embraced handgun confiscation, it was by applying this conservative viewpoint to the entire populace. Now it is all Americans (not just Italians, Jews or blacks) who must be considered so innately violent and unstable that they cannot be trusted with arms. For, we are told, it is not robbers or burglars who commit most murders, but average citizens killing relatives or friends.

It is certainly true that only a little more than 30 percent of murders are committed by robbers, rapists or burglars, while 45 percent are committed among relatives or between lovers. (The rest are a miscellany of contract killings, drug wars and "circumstances unknown.") But it is highly misleading to conclude from this that the murderer is, in any sense, an average gun owner.

For the most part, murderers are disturbed, aberrant individuals with long records of criminal violence that often include several felony convictions. In terms of endangering his fellow citizen, the irresponsible drinker is far more representative of all drinkers than is the irresponsible handgunner of all handgunners. It is not my intention to defend the character of the average American handgun owner against, say, that of the average Swiss whose government not only allows, but requires, him to keep a machine gun at home. Rather, it is to show how unrealistic it is to think that we could radically decrease homicide by radically reducing the number of civilian firearms.

Study after study has shown that even if the average gun owner complied with a ban, the one handgun owner out of 3,000 who murders (much less the one in 500 who steals) is not going to give up his guns. Nor would taking guns away from the murderer make much difference in murder rates, since a sociopath with a long history of murderous assault is not too squeamish to kill with a butcher knife, ice pick, razor or bottle. As for the extraordinary murderers—assassins, terrorists, hit men—proponents of gun bans themselves concede that the law cannot disarm such people any more than it can disarm professional robbers.

THE CASE OF BRITAIN

The repeated appearance of these facts in studies of violent crime has eroded liberal and intellectual support for banning handguns. There is a growing consensus among even the most liberal students of criminal law and criminology that handgun confiscation is just another plausible theory that doesn't work when tried. An article written in 1968 by Mark K. Benenson, longtime American chairman of Amnesty International, concludes that the arguments for gun bans are based upon selective misleading statistics, simple-minded non sequiturs and basic misconceptions about the nature of murder as well as of other violent crimes.

A 1971 study at England's Cambridge University confounds one of the most widely believed non sequiturs: "Banning handguns must work, because England does and look at its crime rate!" (It is difficult to see how those who believe this can resist the equally simple-minded pro-gun argument that gun possession deters crime: "Everybody ought to have a machine gun in his house because the Swiss and the Israelis do, and look how low their crime rates are!")

The Cambridge report concludes that social and cultural factors (not gun control) account for Britain's low violence rates. It points out that "the use of firearms in crime was very much less" before 1920 when Britain had "no controls of any sort." Corroborating this is the comment of a former head of Scotland Yard that in the mid-1950s there were enough illegal handguns to supply any British criminal who wanted one. But, he continued, the social milieu was such that if a criminal killed anyone, particularly a policemen, his own confederates would turn him in.

When this violence-dampening social milieu began to dissipate between 1960 and 1975, the British homicide rate doubled (as did the American rate), while British robbery rates accelerated even faster than those in America. As the report notes, the vaunted handgun ban proved completely ineffective against rising violence in Britain, although the government frantically intensified enforcement and extended controls to long guns as well.

Thus, the Cambridge study—the only in-depth study done of English gun laws—recommends "abolishing or substantially reducing controls" because their administration involves an immense, unproductive expense and diverts police resources from programs that might reduce violent crime.

The latest American study of gun controls was conducted with federal funding at the University of Wisconsin. Advanced computerized techniques allowed a comprehensive analysis of the effect of every form of state handgun restriction, including complete prohibition, on violence in America. Published in 1975, it concludes that "gun-control laws have no individuals or collective effect in reducing the rate of violent crime."

Many previous studies reaching the same conclusion had been discounted by proponents of a federal ban, who argued that existing state bans cannot be effective because handguns are illegally imported from free-sale states. The Wisconsin study compared rates of handgun ownership with rates of violence in various localities, but it could find no correlation. If areas where handgun ownership rates are high have no higher per capita rates of homicide and other violence than areas where such rates are low, the utility of laws designed to lower the rates of handgun ownership seems dubious.

Again, the problem is not the "proliferation of handguns" among the law-abiding citizenry, it is the existence of a tiny fraction of irresponsible and criminal owners whom the law cannot possibly disarm of these or other weapons.

Far from refuting the Wisconsin study, the sheer unenforceability of handgun bans is the main reason why most experts regard them as not worth thinking about. Even in Britain, a country that, before handguns were banned, had less than 1 percent of the per capita handgun ownership we have in the United States, the Cambridge study reports that "50 years of very strict controls has left a vast pool of illegal weapons."

It should be emphasized that liberal defectors from gun confiscation are no more urging people to arm themselves than are those who oppose banning pot or liquor necessarily urging people to indulge in them. They are only saying that national handgun confiscation would bring the federal government into a confrontation with millions of responsible citizens in order to enforce a program that would have no effect upon violence, except the negative one of diverting resources that otherwise might be utilized to some effective purpose. While many criminologists have doubts about the wisdom of citizens trying to defend themselves with handguns, the lack of evidence to justify confiscation requires that this remain a matter of individual choice rather than government fiat.

Nor can advocates of gun bans duck the evidence adverse to their position by posing such questions as: Why should people have handguns; what good do they do; why shouldn't we ban them? In a free country, the burden is not upon the people to show why they should have freedom of choice. It is upon those who wish to restrict that freedom to show good reason for doing so. And when the freedom is as deeply valued by as many as is handgun ownership, the evidence for infringing upon it must be very strong indeed.

OTHER COSTS IGNORED

If the likely benefits of handgun confiscation have been greatly exaggerated, the financial and constitutional costs have been largely ignored. Consider the various costs of any attempt to enforce confiscation upon a citizenry that believes (whether rightly or not) that they urgently need handguns for

self-defense and that the right to keep them is constitutionally guaranteed. Most confiscationists have never gotten beyond the idea that banning handguns will make them magically disappear somehow.

Because they loathe handguns and consider them useless, the prohibitionists assume that those who disagree will readily turn in their guns once a national confiscation law is passed. But the leaders of the national handgun prohibition movement have become more realistic. They recognize that defiance will, if anything, exceed the defiance of Prohibition and marijuana laws. After all, not even those who viewed drinking or pot smoking as a blow against tyranny thought, as many gun owners do, that violating the law is necessary to the protection of themselves and their families.

Moreover, fear of detection is a lot more likely to keep citizens from constant purchases of liquor or pot than from a single purchase of a handgun, which, properly maintained, will last years.

To counter the expected defiance, the leaders of the national confiscation drive propose that handgun ownership be punished by a nonsuspendable mandatory year in prison. The mandatory feature is necessary, for otherwise prosecutors would not prosecute, and judges would not punish, gun ownership with sufficient severity.

The judge of a special Chicago court trying only gun violations recently explained why he generally levied only small fines: The overwhelming majority of the "criminals" who come before him are respectable, decent citizens who illegally carry guns because the police can't protect them and they have no other way of protecting themselves. He does not even impose probation because this would prevent the defendants, whose guns have been confiscated, from buying new ones, which, the judge believes, they need to live and work where they do.

These views are shared by judges and prosecutors nationwide; studies find that gun-carrying charges are among the most sympathetically dealt with of all felonies. To understand why, consider a typical case which would have come before this Chicago court if the district attorney had not dropped charges. An intruder raped a woman and threw her out of a 15th-floor window. Police arrived too late to arrest him, so they got the victim's roommate for carrying the gun with which she scared him off when he attacked her.

Maybe it is not a good idea for this woman to keep a handgun for self-defense. But do we really want to send her to federal prison for doing so? And is a mandatory year in prison reasonable or just for an ordinary citizen who has done nothing more hurtful than keeping a gun to defend herself—when the minimum mandatory sentence for murder is only seven years and most murderers serve little more?

Moreover, the kind of nationwide resistance movement that a federal handgun ban would provoke could not be broken by imprisoning a few impecunious women in Chicago. Only by severely punishing a large number of respectable citizens of every race and social class would resisters eventually be made to fear the law more than the prospect of living without handguns in a violent society.

At a very conservative estimate, at least half of our present handgun owners would be expected to defy a federal ban. To imprison just 1 percent of these 25 million people would require several times as many cells as the entire federal prison system now has. The combined federal, state, and local jail systems could barely manage. Of course, so massive an enforcement campaign would also require doubling expenditure for police, prosecutors, courts and all the other sectors of criminal justice administration.

The Wisconsin study closes with the pertinent query: "Are we willing to make sociological and economic investments of such a tremendous nature in a social experiment for which there is no empirical support?"

CAN IT BE JUSTIFIED?

The argument against a federal handgun ban is much like the argument against marijuana bans. It is by no means clear that marijuana is the harmless substance that its proponents claim. But it would take evidence far stronger than we now have to justify the enormous financial, human, institutional and constitutional costs of continuing to ferret out, try and imprison even a small percentage of the otherwise law-abiding citizens who insist on having pot.

Sophisticated analysis of the criminalization decision takes into account not only the harms alleged to result from public possession of things like pot or guns, but the capacity of the criminal law to reduce those harms and the costs of trying to do so. Unfortunately most of the gun-control debate never gets beyond the abstract merits of guns—a subject on which those who view them with undifferentiated loathing are no more rational than those who love them.

The position of all too many gun-banning liberals is indistinguishable from Archie Bunker's views on legalizing pot and homosexuality: "I don't like it and I don't like those who do—so it ought to be illegal."

The emotionalism with which many liberals (and conservatives as well) react against the handgun reflects not its reality but its symbolism to people who are largely ignorant of that reality. A 1975 national survey found a direct correlation between support for more stringent controls and the inability to answer simple questions about present federal gun laws. In other words, the less the respondent knew about the subject, the more likely he was to support national confiscation.

Liberals advocate severely punishing those who will defy confiscation only because the liberal image of a gun owner is a criminal or right-wing fanatic rather than a poor woman in Chicago defending herself against a rapist or a murderer.

Contrary to this stereotype, most "gun nuts" are peaceful hobbyists whose violence is exclusively of the Walter Mitty type. Gun owners' views are all too often expressed in right-wing terms (which does nothing for the rationality of the debate) because 20 years of liberal vilification has given them nowhere else to look for support. If only liberals knew it, handgun ownership is disproportionately high among the underprivileged for whom liberals traditionally have had most sympathy. As the most recent (1975) national demographic survey reports: "The top subgroups who own a gun only for self-defense include blacks (almost half own one for this reason alone), lowest income group, senior citizens."

The average liberal has no understanding of why people have guns because he has no idea what it is like to live in a ghetto where police have given up on crime control. Minority and disadvantaged citizens are not about to give up their families' protection because middle-class white liberals living and working in high-security buildings and/or well-policed suburbs tell them it's safer that way.

A final cost of national gun confiscation would be the vast accretion of enforcement powers to the police at the expense of individual liberty. The Police Foundation, which ardently endorses confiscation, recently suggested that federal agencies and local police look to how drug laws are enforced as a model of how to enforce firearms laws. Coincidentally, the chief topic of conversation at the 1977 national conference of supporters of federal confiscation was enforcement through house searches of everyone who sales records indicate may ever have owned a handgun.

In fact, indiscriminate search, complemented by electronic surveillance and vast armies of snoopers and informers, is how handgun restrictions are enforced in countries like Holland and Jamaica, and in states like Missouri and Michigan.

Even in England, as the Cambridge report notes, each new Firearms Act has been accompanied by new, unheard-of powers of search and arrest for the police.

These, then, are the costs of banning handguns: Even attempting an effective ban would involve enormous expenditures (roughly equal to the present cost of enforcing all our other criminal laws combined) to ferret out and jail hundreds of thousands of decent, responsible citizens who believe that they vitally need handguns to protect their families.

If this does not terrorize the rest of the responsible handgun owners into compliance, the effort will have to be expanded until millions are jailed and the annual gun-banning budget closely seconds defense spending. And all of this could be accomplished only by abandoning many restraints our Constitution places upon police activity.

What would we have to show for all this in terms of crime reduction? Terrorists, hit men and other hardened criminals who are not deterred by the penalties for murder, robbery, rape, burglary, etc. are not about to be terrified by the penalties for gun ownership—nor is the more ordinary murderer, the disturbed, aberrant individual who kills out of rage rather than cupidity.

What we should have learned from our experience of Prohibition, and England's with gun banning, is that violence can be radically reduced only through long-term fundamental change in the institutions and mores that produce so many violent people in our society.

It is much easier to use as scapegoats a commonly vilified group (drinkers or gun owners) and convince ourselves that legislation against them is an easy short-term answer. But violence will never be contained or reduced until we give up the gimmicky programs, the scapegoating, the hypocritical hand-wringing, and frankly ask ourselves whether we are willing to make the painful, disturbing, far-reaching institutional and cultural changes that are necessary.●

## THE 200TH MEETING OF THE NATIONAL SCIENCE BOARD

### HON. GEORGE H. MAHON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. MAHON. Mr. Speaker, I think it appropriate to take note of the 200th meeting of the National Science Board, the policymaking body of the National Science Foundation, which was held on last August 18.

The chairman and vice chairman are elected by the Board from among its members for 2-year terms. The present chairman is Dr. Norman Hackerman, president, Rice University. The vice chairman is my close friend, Dr. Grover E. Murray, university professor and former president of Texas Tech University Complex. Lubbock, Tex., in the congressional district which I represent.

The National Science Board plays a very vital role in the well-being of our Nation and I want to salute it as it continues its important work.●

## CONFERENCE REPORT ON H.R. 6669 NATIONAL CLIMATE PROGRAM ACT

### HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. WALKER. Mr. Speaker, the conference committee on H.R. 6669, the National Climate Program Act, has completed its work and reported this bill back to the House of Representatives for final passage.

As a member of the conference committee and as a resident of an agricultural area, I am well aware of the importance of predictable climate patterns to our economy. We hope that this bill will allow us to develop the knowledge and ability to predict long term climate trends.

This bill was the subject of hearings before the Committee on Science and Technology early in the 1st session of the 95th Congress, and was reported by that committee on May 6, 1977. Almost a year ago today, September 9, 1977, the House overwhelmingly passed the bill by a vote of 282–60.

Following hearings in the Senate Committee on Commerce, Science, and Transportation, the Senate passed a differing version of the bill on April 24, 1978. The two bills were substantially different in form, but closely allied in intent.

Mr. Speaker, I do not want to duplicate the remarks of my distinguished chairman, Mr. BROWN of California, but I would like to emphasize the fact that we have high hopes for the national climate program. One of the most persuasive arguments for this type of program was brought out in our hearings. We all remember the problems of last winter and the shortages of heating fuels in the Northeast portion of our Nation.

Testimony before our subcommittee indicated that it is scientifically possible to predict such long term climate trends as particularly harsh winters, and that with such a prediction it would have been possible to have stockpiled exceptionally large fuel supplies in the Northeast in advance. Such an action would have substantially reduced the adverse effects of the winter of 1977–78.

In my own section of the country such long term climate predictions might easily lead to substantial changes in the planting schedule of farmers in answer to anticipated climate abnormalities.

One point which I would like to stress is that the Congress has designed the national climate program to be user oriented. We expect that the product of this program will be targeted where it is most needed, the farmer, the contractor, and all those other Americans who are dependent on climate in their livelihoods.

While we have established the Department of Commerce as the lead Federal agency for this program, there is no intention to centralize all Federal activities relating to climate within the Department of Commerce. It is the intent of the Congress that the various mission agencies shall continue existing programs, but that budgeting and planning be comprehensive. We have no intention to reinvent the wheel, we just want to make sure that there are not a number of wheels spinning uselessly.

Mr. Speaker, now that the gentleman from California has assured me that there is no confusion over the permissive authority the bill contains for payments to members of the advisory committee, I urge my colleagues to join me in voting to adopt this conference report.●

## MORE AMERICAN FLIERS THAT THE U.S.S.R. HAS NOT ACCOUNTED FOR

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. McDONALD. Mr. Speaker, there have been many incidents since World War II, in which U.S.S.R. planes have made unprovoked attacks on American planes. What finally happened to the pilots and crews of these planes has been a matter of dispute in many cases. In most instances, however, none of the Americans have returned to tell the tale. The passengers in the South Korean plane were very fortunate recently, in that the world knew what had happened. Some recently declassified State Department messages have shed some new light on an incident that took place over the sea of Japan in 1953. In this incident there were survivors and information was received that Soviet ships picked up additional survivors. The Soviets denied that such ever happened. However, for some years now there have been stories circulating that the Soviets have a special camp in the Far East near Vladivostok where foreigners, Americans included, are held. These messages raise the possibility that some of these men may still be alive. The text of the messages follows:

Department has now received confirmation that US RB–50 aircraft was shot down by one or more Soviet Migs over Sea of Japan on July 29. Soviet vessels were sighted in immediate area of incident where survivors were also seen on life rafts. It appears almost certain that Soviets now have in custody some survivors. US vessel has rescued co-pilot of plane who was found approximately 40 miles off Soviet coast south of Mys Povortny, which is southeast of Vladivostok.

You are requested seek immediate appointment with Vyshinski or other available Foreign Ministry official and to convey to him following:

First, that you have been instructed by your government to protest in strongest terms against shooting down by Soviet aircraft on July 29 of a US Air Force RB–50 plane which was on a routine navigational training mission over Sea of Japan;

Second, that co-pilot of plane, who was rescued by US vessel approximately 40 miles off Soviet coast south of Mys Povortny, has confirmed that his plane with crew of 17 was attacked by one or more Soviet Mig–15 aircraft which brought about crash of plane through shooting its engines and setting aircraft afire;

Third, that information has also been received that other survivors have been picked up by Soviet vessels in vicinity of crash;

Fourth, that you have also been instructed by your Government to request immediate report from Soviet authorities RE condition of these survivors and what arrangements are being made for their early repatriation.

Please report outcome your demarche urgently. Department withholding publicity pending receipt your report.

---

From: Moscow
To: Secretary of State

I have been instructed by my government to protest in the strongest terms against the shooting down by Soviet aircraft on July 29, of a United States Air Force RB–50 airplane which was on a routine navigational training mission over the Sea of Japan.

The co-pilot of the American airplane, who was rescued by a United States vessel approximately 40 miles off the Soviet coast south of Cape Povorotny, has confirmed that his plane with a crew of 17 was attacked by one or more Soviet MIG–15 aircraft which brought about the crash of the American plane by shooting into its engines and setting the plane afire.

Information has also been received that other survivors have been picked up by Soviet vessels in the vicinity of the crash. My government has instructed me to request an immediate report from the Soviet authorities regarding the condition of these survivors and what arrangements are being made for their early repatriation.

---

BOHLEN.

From: Moscow
To: Secretary of State

Molotov received me in his old office at Kremlin and I took up with him question of survivors of B–50 along lines set forth in DEPTEL 74. Molotov did not attempt to argue any other aspect of B–50 incident but listened carefully to my outline of the additional information in possession of US Government which led us to believe that there were survivors other than co-pilot and then inquired whether Embassy had not yet received that second Soviet note on the plane which dealt with this question. (When I said no, he said it was on the way. He repeated the statement that Soviet Government had no information whatsoever concerning plane or any member of its crew and that according to verified information plane was last seen headed out to sea.

I told Molotov we understood that such was the preliminary report received by Soviet Government but that I was making a serious request from U.S. Government that in circumstances a further investigation in light information I had given him was justified. I repeatedly requested him to have further investigation made. With equal persistence Molotov maintained his position that a thorough investigation had been made and that there was no basis for conducting a further search. He repeated each time that had Soviet Government had any information concerning that plane or (repeat or) survivors it would "of course" have immediately communicated this to U.S. Government.

I outlined at some length possibility that some of these survivors were picked up by Soviet trawler or perhaps had been able to swim to shore and that therefore a further investigation in simple interests of humanity was justified. Molotov refused to commit himself to any such investigation but in the end said that "if any further information should be received by Soviet Government it would of course be transmitted to U.S. Government".

I don't however take this to mean any implied commitment on his part since it was in

reply to a question from me as to possibility further information being received by Soviet Government from local authorities.

At one point Molotov made a reference to the "surprise" of Soviet Government when in regard to another plane incident, the IL–12, U.S. Government stated it was shot down in Korea whereas Soviet Government found wreckage of plane, bodies of passengers and crew in Chinese territory at point indicated Soviet note. He added that they had photographs of the wreckage. He however did not pursue the subject when I told him that that was another subject and that I was only dealing with possibility of survivors of B–50.

I left with Molotov memorandum setting forth information I had given him orally with request for further investigation. I did this primarily to see if he was willing to accept document which he did without objection.

Throughout interview Molotov struck me as being very much on defensive in this matter and refrained from any disagreeable or provocative comments concerning this incident which he once described as "an encounter". At one point in discussion he quoted Russian proverb re unreliability of "eye-witnesses" which may reveal Soviet concern over evidence of rescued co-pilot.

In view of position he took consistently that complete and thorough investigation had already been made and there were no grounds for further search, it is not probable we will receive any satisfaction from Soviet Government on survivors. However, on outside chance intervention of Molotov might somehow produce results on this question, I believe we might, if possible, withhold publicity on fact of this personal call and confine publicity to formal exchange of notes. Press correspondents here are not aware of fact of my visit and unless Soviets break it there is no reason why it cannot be held secret from this end. If because of public interest in this matter it is necessary to release fact of visit, would appreciate guidance from Department as to how it is to be handled.

Will cable note referred to by Molotov as soon as received.

BOHLEN.●

## TAWES AWARD FOR A CLEAN ENVIRONMENT

### HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mrs. HOLT. Mr. Speaker, the congressional district I represent is one in which environmental concerns are of extreme importance. The Chesapeake Bay and the network of rivers and streams are critical to the quality of life enjoyed by our people.

We have many private organizations that devote much time, energy, and money to environmental interests, and we should never cease to applaud and encourage their efforts. Environmental protection should be a concern of every citizen.

However, we sometimes fail to note the superb work being done by Maryland public agencies and public employees for the protection of our marine environment. Fortunately, this oversight has been remedied by the creation of the annual "Tawes Award for a Clean Environment" for government workers who make unique or substantial contributions to the health of the State's marine environment.

The first awards were recently presented by former Gov. J. Millard Tawes, who was the first secretary of the Maryland Department of Natural Resources before he entered retirement several years ago. Sponsoring the awards program are the Department and private organizations such as the Maryland Petroleum Association and the Maryland Oil Jobbers Council.

The top award was presented to Robert F. Connor, of Baltimore, an employee of the Maryland Port Administration. The runner-up awards were presented to:

Paul G. Bingham, Jr., of Arnold, Department of Natural Resources;

William S. Burgess, of Annapolis, Department of Natural Resources;

Thomas A. Cooksey, of the Prince Georges County Bureau of Fire Prevention;

George L. Herlth, Jr., of Queenstown, Department of Natural Resources;

Richard D. Klein, of Forest Hill, Department of Natural Resources, and

John J. Smiechowski, of Crownsville, Department of Natural Resources.●

## INSULIN PRODUCTION THROUGH RECOMBINANT DNA RESEARCH

### HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. ROGERS. Mr. Speaker, I was informed today by Eli Lily & Co. an Indianapolis, Ind., based pharmaceutical manufacturer, that a team of scientists from Genentech, Inc., and City of Hope National Medical Center in California has successfully produced human insulin from bacteria in a laboratory experiment. Lilly, a pioneer in the development of the first commercial insulin following its discovery in the 1920's by two University of Toronto scientists, has entered into an agreement with Genentech to begin long-range development aimed at the eventual commercial production of human insulin. Although this research achievement is extremely significant, there still needs to be extensive development of technology, long-term studies in animals and humans, and regulatory approval before this insulin will be commercially available.

At present, insulin is produced by extracting the hormone from the pancreas glands of cattle and swine. Genentech's process reportedly involves the insertion of synthetic genes into a microorganism called E. coli, which is then grown in a fermentation process. The foundation for this work was laid by the early studies of researchers in the field of recombinant DNA at the University of California–San Francisco. Insulin production by this process is believed to have a chemical structure identical to human insulin. This achievement represents an important potential potential clinical application of recombinant DNA research.

I was delighted to learn of this particular scientific achievement. The potential medical benefit to those millions of Americans and countless other diabetics around the world is great indeed. While it will be several years before this research breakthrough can be translated into a marketable product, the critical first step has been taken. This achievement is just one further example of the pioneering research typical of American science and industry. I know my colleagues join me in saluting all those responsible for this milestone scientific and humanitarian accomplishment.●

## NEED TO GALVANIZE ARMS CONTROL SUPPORT

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. SIMON. Mr. Speaker, Dr. Homer A. Jack, the Secretary-General of the World Conference on Religion and Peace, delivered a sermon recently at the Community Church of New York on the U.N. Special Session on Disarmament.

Among other questions, he touches on the need for creating the political will in the United States to move ahead on arms control and the difficulties of structuring and galvanizing that will.

I hope my colleagues will take the time to read his observations.

INSIDE THE U.N. SPECIAL SESSION ON DISARMAMENT: SURVIVING BEYOND 1984

(By Homer A. Jack)

The world has witnessed, and the U.N. has just finished—yesterday morning at 2:30 a.m—what U.N. Secretary-General Kurt Waldheim early predicted would be the "largest, most representative gathering ever convened to consider the question of disarmament." The Special Session was also one of the largest, best-kept secrets. The chances are that many of you never heard of this event, so vital to your future, occurring during the past six weeks in our New York backyard, here at U.N. Headquarters along the East River.

As a non-governmental observer from the World Conference on Religion and Peace and as Chairman of the Non-Governmental Organization Committee on Disarmament, I had the privilege of participating in this Special Session. In the sermon this morning I will take you inside this world event which so much will affect your future, and mine, as well as the lives and future of your children and grandchildren. The U.N. session affirmed: "Removing the threat of a world war—a nuclear war—is the most acute and urgent task of the present day. Mankind is confronted with a choice: we must halt the arms race and proceed to disarmament or face annihilation."

I will begin by discussing why the U.N. convened a Special Session devoted to disarmament. Then I will describe the Special Session itself. I will also evaluate the success of the Special Session for our very future. Finally, I must discuss the posture of the U.S. Government toward the Special Session and what this posture means for us who are, I hope, concerned American citizens. This will not be a sermon devoted solely to religion, theology, philosophy, psychology, science, or politics, yet disarmament is a universal subject encompassing these and other disciplines. You who are not part of this morning's con-

gregation here in Community Church can easily flick the dial from WQXR, but your very existence to the year 1979 or 1984 or even 2000 is vitally involved. We human beings have the choice to deny unpleasant possibilities, but we as responsible citizens also have the opportunity to try to turn unpleasant possibilities into creative probabilities. We are not captives of fate—even in the nuclear arms race.

WHY AND HOW?

In 1969 the U.N. General Assembly decided to call the decade of the 1970s the Disarmament Decade in an effort to prod the world community toward "effective measures relating to the cessation of the nuclear arms race at an early date and to nuclear disarmament." Several very limited disarmament agreements were reached in the late 1960s and early 1970s, but "effective" nuclear measures continued to elude the grasp of the world community.

In 1971 the Soviet Union urged that a World Disarmament Conference be convened, and a majority of nations agreed. However, 1971 was the year that Peking took a seat in the U.N. China bitterly fought this Soviet proposal, as did the U.S. less strongly. As a result the proposal to convene a World Disarmament Conference was deferred annually, since it was agreed that there could be no conference without the active participation of all five nuclear weapons States.

Not willing to accept easily the escalating nuclear arms race, the Non-Aligned States at the U.N.—some 84 which are not military allies of either the U.S. or the U.S.S.R.—devised the clever scheme of convening a Special Session of the U.N. General Assembly devoted to disarmament instead of a World Disarmament Conference. Since both China and the U.S. are members of the General Assembly, they would attend a Special Session. The Non-Aligned initiative resulted in December 1976 in the adoption by consensus of a resolution of the General Assembly convening a Special Session in mid-1978.

The purposes of the Special Session became multiple: to curb the arms race, to bring France and China into the disarmament dialogue and negotiations, to make the world more aware of the arms race and the need for disarmament, to exert sustained pressure on the super-powers for drastic nuclear disarmament, to break the blockade in disarmament negotiations, and to make the U.N. more central in disarmament affairs and thus give the Non-Aligned and other non-nuclear States a greater role in disarmament affairs.

Early in 1977 a group of 54 nations was appointed to the Preparatory Committee for the Special Session. It met here in New York during five sessions over 18 months. The Preparatory Committee carefully considered the political parameters of this world event, producing about 2,000 pages of documents. The Special Session on disarmament in 1978 was to be the capstone of other U.N. conferences on global issues during the 1970s, beginning with the Environment Conference at Stockholm in 1972 and including world meetings on population, food, women's rights, habitat, and the new international economic order.

MAY 23–JULY 1

The Special Session began on 23 May under the presidency of a distinguished Yugoslav diplomat, Lazar Mojsov, who was also president of the 32nd regular session of the U.N. General Assembly last autumn and two additional special sessions on financing the U.N. force in Lebanon and on Namibia earlier in 1978. The first three weeks of the Session were devoted to what is called the general debate. A total of 126 nations spoke on disarmament issues before the plenary. Heads of State or Government from such nations as the U.K., France, Germany, and India assessed the international situation, tried to pinpoint reasons for past disarmament failures, and made specific and often new disarmament proposals. The general debate was followed by speakers from 25 Non-Governmental Organizations and six research institutes. This was a breakthrough in the U.N. system, at least in the field of disarmament. In the end, Einstein, Schweitzer, and Gandhi did not appear—despite the reading earlier in this church service—although several Nobel Peace Laureates did attend, including Philip Noel Baker of London and Sean MacBride of Dublin.

Beginning on June first, the Ad Hoc Committee of the Special Session began to complete what is called the final document. This was initially drafted during two sessions of the Preparatory Committee beginning in January. It was presented to the Special Session with what were called a "forest of square brackets"—meaning words or sentences proposed but not accepted because of political reservations—in the form of brackets—from one or more countries. The task of the Ad Hoc Committee was to produce a meaningful final document free of brackets and with consensus—no objections. Any one country, however large or small, could in effect exert a veto on any word, phrase, sentence, or paragraph.

The art of bracketmanship—taking out brackets, not putting them in—was supervised by the Chairman of the Ad Hoc Committee, Ambassador Carlos Ortiz de Rozas of Argentina. He was aided substantially by another Latin American diplomat, Ambassador Alfonso Garcia Robles of Mexico. Meeting in working groups, drafting committees, contact groups, and other circles, at the end often 20 hours a day, the Committee accomplished a miracle and submitted a document without brackets in the early morning hours last Tuesday—after the plenary allowed the Session to close up to 48 hours late.

The final document in 129 paragraphs contains a short preamble and four major sections: introduction, declaration on disarmament, program of action on disarmament, and machinery. The preamble contains several clauses. The first expresses alarm "by the threat to the very survival of mankind posed by the existence of nuclear weapons and the continuing arms race." A second clause expressed the conviction that "disarmament and arms limitation, particularly in the nuclear field, are essential for the prevention of the danger of nuclear war." This is not the subjective rhetoric of some itinerant peacenik, but the considered, unanimous judgment of the entire world community of nations.

The first major section of the final document is the declaration on disarmament. This contains a review and appraisal of the present situation. There is much rhetoric, but also much common sense, which is not necessarily conventional wisdom in the pentagons in Washington or Moscow. For example, there is the phrase: "enduring international peace and security cannot be built on the accumulation of weaponry by military alliances nor be sustained by a precarious balance of deterrence of doctrines of strategic superiority." Again, this was unanimously supported.

A second sub-section of the declaration discusses goals and priorities. Highest priority is given to "effective measures of nuclear disarmament and the prevention of nuclear war." A third and final sub-section of the declaration consists of a list of fundamental principles for disarmament negotiations. Many are too technical to repeat here. A new principle suggests "unilateral measures of arms limitation or reduction."

The heart of the final document is a long program of action. This repeats the long-time goal of the world community for general and complete disarmament. It then gives four categories of priorities in disarmament negotiations: nuclear weapons, other weapons of mass destruction, conventional weapons including those with indiscriminate effects, and reductions of armed forces. Again, the detailed paragraphs and items are too long, and complex, to repeat here. It is, however, a comprehensive catalogue of disarmament. Some more controversial items—such as the Soviet insistence on the abolition of the neutron bomb—were omitted. The effort of the Non-Aligned, and especially India, to stop nuclear weapons testing, pending the completion of a comprehensive test-ban treaty, was only faintly reflected in this consensus affirmation: "various views were expressed by non-nuclear-weapon States that, pending the conclusion of this (comprehensive test-ban) treaty, the world community would be encouraged if all the nuclear-weapon States refrained from testing nuclear weapons. In this connection, some nuclear-weapon States expressed different views." We understand that these "different views" included the Soviet Union and France. However, the U.S. in the closing hours of the session told why it was opposed to a moratorium on testing and China is known also to be opposed to the elimination at this time of nuclear testing. This demonstrates the complexity of inserting even the smallest specific disarmament step into the program of action.

The final section of the final document deals with machinery for disarmament deliberations, meaning the involvement of all nations, and disarmament negotiations, the latter implying a smaller but representative group of nations actually making treaties. The Special Session revived the U.N. Disarmament Commission, as a new deliberative body composed of all Member States of the U.N. The Session also created a new negotiating forum, the Committee on Disarmament. This will be the successor to the Committee of the Conference on Disarmament (CCD) which has been meeting at Geneva since 1962 The new body, to meet no later than January, will contain up to 40 Member States, including seats available for all five nuclear powers.

SUCCESS?

Was the Special Session a success? One could list many positive aspects of this world event. The Special Session was a success simply because it was held. It was indeed the fulfillment of the prediction of the Secretary-General as "the largest, most representative gathering ever convened to consider the question of disarmament." The Special Session produced a unanimous document—and for 149 Member States to produce anything by consensus is in itself a successful political feat. The document contained an excellent declaration on disarmament, not a lowest common denominator full of ambiguities. The document also contained an adequate—if not excellent—program of action, which can be a guide for world disarmament action for at least the next decade. The Special Session established a new disarmament negotiating forum, the Committee on Disarmament at Geneva, in which France will inevitably take a seat no later than January and which will be ready for China, any time the latter wishes to participate. The Special Session established new or firmer linkages between disarmament and other global issues, each with its own governmental and public constituencies: development, environment, and international security. The Special Session enhanced the formal role of NGOs in disarmament affairs. The Special Session produced a bundle of new disarmament proposals, most of which were too new for immediate acceptance but will be carefully examined in the immediate period ahead. The Special Session demonstrated the continued utility and indeed indispensability of the U.N. system. The Special Session authorized several new studies on disarmament which could

lead to action. The Special Session agreed to convene a Second Special Session on disarmament, probably in 1981.

There were two further achievements, less obvious, but more far-reaching in their potential. The Special Session put the U.N. more central in disarmament affairs. One result of this was to question, if not yet to eliminate, the monopoly—the Chinese call it hegemony—of the U.S. and the U.S.S.R. in disarmament affairs. Also the Special Session more than any recent international event, underlined the absolute necessity for stronger national disarmament movements and an international disarmament movement.

With this string of more than a dozen successes, were there any disappointments? The deepest is that, despite the Special Session, the quantitative and qualitative nuclear arms race continues unabated, and the several arms races involving conventional weapons also continue. Thus the threshold of hypocrisy was great: high rhetoric, modest performance. Nobody predicted that a disarmament treaty would be negotiated or even initialed at the Special Session. But many observers, including myself, 18 months ago thought that the Special Session would somehow lessen the arms race. This was not to occur. Indeed, few changes were perceived, or registered, in the basic disarmament positions of all 149 Member States of the U.N., although some new ratifications of treaties were announced.

No treaty banning underground nuclear tests (CTB) or limiting strategic arms (SALT II) was announced by the superpowers, despite rather bright hopes of six months ago. Little sustained pressure was engendered during the Session on the superpowers by the non-nuclear States for immediate and drastic cuts in their strategic nuclear stockpiles. Indeed, because of the method of consensus, the program of action contained no pressure on the super-powers, such as contained in some recent U.N. disarmament resolutions—where voting was allowed—demanding, for example, a moratorium of nuclear testing. Little evidence was demonstrated that the Third World wants to lessen its conventional arms; it is content to point a finger, perhaps justifiably, at the so-called Second and First worlds to lessen their nuclear stockpiles. No new disarmament caucus or bloc was established at the U.N. during the First Special Session as the Group of 77 on economic issues was formed during the First U.N. Conference on Trade and Development (UNCTAD). The Special Session produced no sustained interest of much of the world's media; despite the presence of 20 Heads of State or Government, the event hardly remained in the headlines. Only war or violence catch the sustained attention of even the most responsible of the media. Nobody got hurt or killed at the Special Session; it was a media non-event, yet the Special Session tried to head off the extinction of the totality of mankind.

The final determination of the success or failure of the Special Session is difficult and complex as the subject of disarmament is difficult and complex. One political litmus test is to compare the original purposes of the Special Session with the results. The Special Session did not curb the arms race, as some of us expected. The Special Session did not exert sustained pressure on the super-powers for drastic nuclear disarmament. The Special Session did not break the blockade in disarmament negotiations. However, it did bring France and China into disarmament affairs. The Special Session did make the world more aware of both the arms race and the need for disarmament. It did make the U.N. more central in disarmament affairs and is giving the non-nuclear States a greater role in this field.

Was the Special Session a success, a failure, or what? The Special Session was neither a huge success nor a dismal failure. The Special Session is a beginning, the start of a long process. The Special Session represents hopes deferred in the U.N. system, while the arms race accelerates in the world outside.

Those who worked hard on the Special Session feel now that it was a success; they were haunted with the possibility of failure. Those on the outside who looked to the Special Session to save the world from the scourge of nuclear war, they must still be hounded with possible failure.

THE U.S. DIMENSION

Let us, finally, turn to the relation of the Special Session to the U.S. Government. We U.S. citizens watching the Special Session were saddened by the clumsy performance of the Carter Administration. Of the major military powers, only the U.S. and China made no policy proposals during the 18 months of the Preparatory Committee. The Administration ineptly tried to prepare American opinion for the Special Session. A proposal for a Citizens' Advisory Committee, endorsed by Hubert Humphrey on his deathbed, never was approved. The President in a surprise move did not deliver the U.S. speech in the general debate, but managed in the same period to speak both to the NATO Summit and the U.S. Naval Academy. Few U.S. initiatives were proposed during the six-week session at the very time that the U.S. was escalating its over-reactions to the Soviet and Cuban presence in Africa. About the only wise action taken by the Administration was to put together a broad, able, versatile delegation to the Special Session, including not only such lawmakers as Senator George McGovern and Congressman Paul Simon, but public members, such as Paul Newman, Marjorie Benton, Harold Willens, Josephine Pomerance, Katherine Camp, and George Kistiakowsky.

The disenchanted American observer could easily blame the Carter Administration, the Pentagon, or the military-industrial-labor-science complex for this inadequate U.S. stance—one sadly but carefully observed by the Non-Aligned States. The major blame for U.S. action and inaction probably rests on the shoulders of us American citizens. There is no active American constituency for disarmament today. President Carter's actions accurately reflect this tragic truth, although he has done little if anything to alter this situation, except to place his hopes on a whirlwind SALT II ratification campaign at the appropriate political moment.

One of the most important lessons of the Special Session for some of us who were privileged to observe the historic event is to begin to help build an American disarmament movement as part of a world disarmament movement.

No American movement can easily be constructed. The U.S. so far appears to have been favored by God and history and thus appropriate movements have descended upon the American people when the time was ripe and the problem serious. However, we cannot automatically expect to be so favored again, especially on this international issue. We must try, however, to look backwards and examine at least three successful U.S. social movements in our time: the stopping of atmospheric nuclear tests in the early 1960s, the civil rights movement later in the 1960s, and that against the Vietnam War. We remember organizational cooperation and some chaos, charismatic leadership and petty jealousy, legislative action and grass-roots organizing, high-level negotiations and street action. We recall an implicit specialization of organizational functions. We recollect a pluralism of strategy, if not tight coordination, and—above all—efforts to reach "new publics."

While the civil rights and even the Vietnam War movements were basically domestic, all three had an international dimension. Especially with disarmament, there must be an effective international disarmament movement. One does not exist today which has balance and no ideological domination.

The U.N. Special Session on disarmament was a fragile beginning, a respite. There are lessons from the Special Session for each one of us. The arms race, deterrence, the $120 billion Pentagon budget—these can only end in war, sooner than later. War might come by calculation or miscalculation, by accident or terrorism in 1979, by George Orwell's magic year of 1984, certainly by the end of our century. We can only prevent war by significant disarmament. Yet resistance to curbing the arms race is multiple, formidable.

We Americans, especially attentive Americans who have tried to participate in social movements in the recent past, must begin to gear into an incipient American disarmament movement. We must begin where we are—church, synagogue, temple, labor union, PTA, League of Women Voters. We must insist on talking about the Pentagon budget, about a new Proposition 14 devoted to limiting federal taxes for the Pentagon, about economic conversion of war industries, about the largely artificial threats of Cuba or the Soviet Union or any other power to our American security. We must insist the stockpiles of weapons, outside Washington or Moscow or Peking—these are the threats to our security as human beings. We must show that the decay of our cities—all cities everywhere—is a result of the use of scarce funds for weapons, not for buildings or roads. We must show that inflation in our society is the result of the waste of resources—as is unemployment. We must take disarmament from the diplomats to the people—and then place it in the hands of the diplomats again, but with new political will. That is the lesson of the U.N. Special Section to some of us Americans.●

## SOVIET DISSIDENT IZRAIL ZALMANSON FREED

### HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. EDGAR. Mr. Speaker, yesterday I was very much heartened by the news that Izrail Zalmanson, an imprisoned Soviet dissident and my "adopted prisoner of conscience," has been released by the Soviet Government and allowed to join his sister in Israel. This week, Mr. Zalmanson will be visiting the Philadelphia area under the auspices of the Jewish Community Relations Council of Philadelphia.

I am sure that all of the Members of the Congress join me in welcoming Mr. Zalmanson to the United States. And I especially want to commend the Jewish Community Relations Council for its tireless devotion to the cause of human freedom and its attention to the plight of Soviet Jewry.

The nations of the world voluntarily have agreed to the human rights provisions of the United Nations Charter and have signed the Universal Declaration of Human Rights. In addition, many of the nations of Europe—including the Soviet Union—are a party to the Helsinki accords and thereby have pledged to maintain freedom of emigration. During the

past few years it has become increasingly apparent to the American people that the Soviet Government is not adhering to the spirit of these international documents. This has resulted in understandable scepticism about our entering into new agreements with the Soviet Government. What good is an agreement that is not lived up to?

Let us hope that the release of Izrail Zalmanson is a good sign. By adhering to the spirit of the human rights declarations it signed, the Soviet Government will pave the way for new agreements with the United States on issues of the highest mutual interest. Global problems like hunger and arms proliferation demand the joint attention of the world's two greatest powers, but in meeting these problems the United States must never lose sight of the human element of our foreign policy, and we must never compromise on the fundamental issue of human dignity.●

## TRIBUTE TO MICHAEL J. "MIKE" ROYER

### HON. HAROLD T. JOHNSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. JOHNSON of California. Mr. Speaker, the city of Roseville and all of northern California lost one of its finest citizens last month when Michael J. "Mike" Royer passed away. During his lifetime, he gave fully and freely of his time and energies for the betterment of his community and its individual citizens. He was always full of exuberance and good will. He worked hard and diligently not only on his business enterprises, but also on his many community projects.

Mike belonged to several citizens and fraternal organizations and helped to guide them in their efforts to be of service to the community. Much of what has been accomplished in Roseville in recent years has been assisted by the efforts of Mike Royer.

As a native of his community, Mike knew it well. He was not born to fame, but through diligence and personality soon became well known. The love which he shared with his friends and fellow citizens was returned many times over. His recognition as a leader of the community came through unselfish devotion and tireless efforts toward improving life in Roseville. He was at his peak when he was tragically stricken.

Mr. Speaker, we shall miss Mike Royer in Roseville. We want his wife Kay to know that the words and deeds of Mike will long serve as an outstanding example to us all. He will not soon be forgotten.

So that my colleagues in the House can get a better understanding of how highly respected Mike was in his community, I am pleased to place in the RECORD at this point a very fine editorial from our hometown paper, the Roseville Press-Tribune:

COMMUNITY CONCERN ROYER TRADEMARK

Michael J. "Mike" Royer Jr. was a man of integrity, responsibility and concern for his community.

A native of Roseville, he had moved to Grass Valley in 1939 and returned to Roseville in 1953 to enter business and later pursue his elaborate banking career, which included the presidency of Citizens Bank for nearly six years.

During his life and business career he also found time to dedicate himself to people and his community.

During his 14 years on the Roseville Hospital board of directors he helped the medical facility expand to its present 222 beds.

He served six years on the Roseville Planning Commission to help formulate the future growth of the city.

"Mike" was an original member of the city's off-street parking commission which helped establish Roseville's current policies on parking requirements for new construction.

He helped the business community expand through his membership eight years on the Roseville Area Chamber of Commerce board of directors.

He participated in community functions as a past president and member of the Roseville (Host) Lions Club, the Elks, Masonic Temple and Shrine Club.

"Mike" loved the people of his city, and they loved him. He will always be remembered that way by those who knew him.●

## DANGER OF "RECREATIONAL" DRUGS

### HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. WHITEHURST. Mr. Speaker, recently I received a letter from one of my constituents, a former student of mine at Old Dominion University. With his permission, I am taking this opportunity of sharing his comments with my colleagues; I think that the concerns which he has expressed are shared by many people.

604 BALFOUR COURT,
*Virginia Beach, Va., July 31, 1978.*

Hon. G. WILLIAM WHITEHURST,
*281 Independence Boulevard,*
*Virginia Beach, Va.*

With all of the problems that we are faced with in this great Nation, why is it that we have to put up with the horrible examples that are being set in our Nation's Capital?

How are we to trust the decisions being made by our leaders when many of them come from minds that are unnaturally distorted by so called "recreational drugs?"

How long are we expected to stand for the ever increasing effect of taxation when we find that our tax dollars are going to pay the salaries of coke sniffers and pot heads?

How are we to expect our children to obey laws that they may not agree with when the examples of our leaders nullify any of the examples that we try to set?

I ask these questions of myself and I know the answers. . . . I cannot. I ask these questions of you and would like to hear your answers. I have watched this situation grow like a cancer in our neighborhoods, in our schools, and now in our government and can no longer stand by silently saying "to each his own."

I can identify with the pressures that are involved with high level jobs, but I cannot buy the use of drugs, legal or illegal, as a means of coping. Nature has provided too many ways to find relief from these pressures. They are there, they are easy to find, and they are mostly for free. Drugs are a cop-out. If our leaders cannot cope with the pressures then they do not belong where they are.

If I am in the majority in the way I feel then I hope that others will express themselves and that we can work together to reverse this trend. If I am in the minority, then I am afraid.

E. RICK BOWLER, III.●

## THE MIRACLE OF REGENERATION

### HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. JACOBS. Mr. Speaker, the following article speaks for itself.

THE MIRACLE OF REGENERATION: CAN HUMAN LIMBS GROW BACK?

(By Susan Schiefelbein)

Physicians may one day treat patients who have shattered limbs, crippled joints, and injured spines in a way that man never before dared to dream of: regrowing the damaged part—whole, perfect, and undiseased.

For centuries, man has watched in wonder as the salamander regenerated its severed limbs, never imagining that complicated human parts could grow back in such a way. The halt and the lame could be made whole, it seemed, only by the healing waters of Bethesda or the touch of a god incarnate. But in recent years, scientists have grown back a frog's leg from elbow to toes and a rat's leg from shoulder to the top half of the elbow—with cartilage and bone, muscle, nerves, and veins, all in awesome anatomical precision. One of the pioneers in the field, Dr. Robert Becker—chief of orthopedic surgery at the Veterans Administration Hospital in Syracuse, New York—has already applied the newly found healing mechanism to broken human bones, successfully knitting fractures that previously had failed to heal even after extensive surgical procedures. He and his colleagues have now reached the point where they can confidently predict that regeneration of human parts can and will be achieved, possibly in the next few decades.

A brave new world? Not a bit. The magic of regeneration has been with us all along, hidden in the wondrous complexity of every organism's bodyworks. These scientists are not performing miracles; they are witnessing them.

Their challenge, then, has been not so much to re-create a limb as to discover how some animals do so naturally. The chronicle of their quest reads like a detective story; for clue by clue, Becker and his colleagues have been unraveling a medical mystery that began with creation.

The tale begins with a few known biological principles about regeneration that were to serve as the departure point for their search. The way regenerative healing works has been observed, if not explained, for hundreds of years; the process still seems so magical that even the most clinical of researchers must shake his head in amazement as he watches the microscopic metamorphosis unfold. The body of every animal, from the flatworm on up the evolutionary scale, possesses primitive, undifferentiated cells that could best be described as being like raw clay. When a creature that can regenerate loses a limb,

these cells migrate to the injury, forming a mass called a blastema. Some of the mature, specialized cells at the site of the injury dedifferentiate, reverting to primitive form, and add further to the blastema. The blastema then respecialize, transforming itself into whatever types of cells are needed to replace the missing part—bone cells, cartilage cells, and so forth. Somehow, the blastema absorbs information about what to produce along the way, so that at the appropriate moment, it creates an elbow joint or a tibia or a fibula, a left leg or a right one.

The first formal paper on regeneration was written by the great Italian physiologist Luigi Spallanzani and appeared in 1768. Spallanzani's experiments uncovered the first two important clues: The younger the animal, the greater its capacity for regeneration; and the lower an animal is on the evolutionary scale, the greater its capacity for regeneration. This latter finding was especially interesting, for it provided a clue in itself. The lower orders that regenerate are biologically just as complicated as man; their parts are just as difficult to replace. The main difference is—and this was later to become a significant clue—that animals in the lower orders have comparatively more nerves in their extremities.

A third clue was buried in the writings of the late 1700s: Every time a creature is injured, an electrical charge is generated at the site of the injury. This phenomenon is called the current of injury, and it is proportionate to the severity of the wound.

It was not until some 180 years later that scientists again began to delve into the mystery of regeneration. In 1945, the biologist Meryl Rose (a retired professor of anatomy at Tulane University College of Medicine who is currently affiliated with Woods Hole Marine Biological Laboratories) amputated the forelegs of some frogs below the elbows. Thinking he could perhaps promote growth by preventing the injuries from scarring over, he bathed the stumps of the frogs' limbs in a strong salt solution. The result was startling: About half of each amputated limb regenerated, developing new bone and muscle and in some cases even showing the beginnings of digital growth. Thus Rose became the first to prove that an animal which cannot regenerate naturally can be made to do so artificially.

The next year, a Russian named Vladimirovic Polezhaev amputated frogs' legs in a similar fashion and then irritated the stumps by repeatedly jabbing them with needles. The result? Astonishingly, he regenerated about the same amount of growth that Rose had with the salt solution. It was possible that the salt not only had prevented scarring but, like the needle punctures, had actually exacerbated the injuries and thereby stimulated growth. Now there was another clue: Regeneration may somehow be connected to the severity of injury.

In the early Fifties, Marcus Singer, presently a professor of anatomy at Case Western Reserve University, in Cleveland, became the next to uncover important evidence. He transferred nerves from a frog's healthy hind legs to the stump of its foreleg; his frog also regenerated about the same amount of growth that Rose's had. Singer's contribution to the collection of clues is an almost mathematical formulation: The nerve tissue required for regeneration must constitute at least 30 percent of the total tissue at the site of the injury.

Then in 1958, a Russian named A. V. Zhirmunskii discovered that the current of injury is proportionate not just to the severity of the injury but also to the amount of nerve tissue in the area.

Becker's turn at medical detection also came in 1958. He assembled his evidence as a good detective would assemble his suspects: Injury is related to regeneration; nerve tissue is related to regeneration; and both injury and nerve tissue are related to the current of injury. Could the current of injury, Becker reasoned, thus be related to regeneration?

He measured the current of injury in a salamander's regenerating leg and in a frog's scarring stump. Sure enough, his findings seemed to support his hunch. On the day the legs were amputated, both creatures generated the same current of injury—a positive voltage. But there the similarity ended: As the frog's stump scarred over, the current of injury in its leg declined to zero; but the current of injury in the salamander's leg switched from a positive to a negative polarity and only then began to decline, reaching zero when regeneration was complete.

Becker had definitely discovered a connection between the current of injury and regeneration. In a sense, however, his discovery complicated rather than clarified the mystery. The way the current of injury worked in those limbs was simply not concurrent with the way nerves are supposed to produce electricity.

Nerve fibers have traditionally been thought to respond to stimulation in only one way: Sodium penetrates into the nerve cell and potassium leaks out, creating a chemical reaction that generates a charge called an action potential. Whatever the stimulus—a gentle touch or an injury—the action potential is exactly the same. Moreover, each nerve fiber can create only one of these potentials at a time. Becker compares the system to that of a digital computer, which transmits single impulses in rapid succession.

Herein lay Becker's problem: How could the action potential—a constant—account for the switch from positive to negative polarity that he had seen in the salamander's current of injury? How could the action potential account for the fact that the current of injury lasted many days after the stimulated nerve cells should have either died or repaired themselves and ceased their impulses? How could the action potential, which responds in the same way to every stimulus, account for the fact that creatures feel intensities of pain?

Becker guessed that in addition to its digital-computer impulses, the central nervous system can carry steady currents and potentials—in the way an analogue computer can. He further theorized that the body's analogue computer system has an input signal—could it be pain?—that triggers an output signal which switches on the healing function.

To verify his theory, Becker measured the electrical potentials of different points on the skin of humans and other animals. He found an electrical field that roughly parallels the nervous system. A disturbance in that field—such as an injury—might stimulate cells to begin repairs.

Becker's theory ran counter even to basic textbook explanations of the nervous system, and medical men let him know it. "That cells are capable of sensing and responding to levels of electrical current is hardly universally accepted," he wrote in one medical journal. But he stuck to his convictions; and today, more than a decade later, doctors are coming to accept his hypothesis. "They no longer march out of my lectures," he says. "The response has changed from complete rejection through amused disbelief to—at present—almost enthusiastic acceptance."

And no wonder. The experiments that Becker based on his unorthodox vision of the nervous system produced remarkable results. First, in 1964, Becker began to examine the spontaneous regeneration of human bone. Given the fact that bone is not well innervated, the theories about electrical stimulation would not apply—unless bone could generate its own electricity. Becker knew that bone accommodates automatically to mechanical stress. When he measured the currents around a stressed bone, he discovered that it generated a positive change on the stretched side (which dissolved some bone) and a negative charge on the other side (which built up bone and provided the necessary added support). Then Becker administered a negative charge to a mouse's broken leg bone to see if he could artificially stimulate bone growth. He did.

In 1964, Steven Smith, then a student of Meryl Rose and now an associate professor in the department of anatomy at the University of Kentucky, studied Becker's findings and got the idea of implanting a simple electrode right into the muscle tissue of the stump of a frog's leg. He soldered together a piece of platinum wire, which has a positive charge, and a piece of silver wire, which has a negative charge, and embedded the metal into the animal tissue—with the negative end at the stump—thus improvising a crude battery. It worked. He regenerated about as much growth as the Rose, Polezhaev, and Singer experiments had the decade before.

Breakthrough followed breakthrough. Becker examined his healing frog bones under a microscope and saw that the blastema around the regenerating bone was coming from a blood clot that had formed there. (A frog's red blood cells are prime candidates for blastema, for—unlike the red blood cells of mammals—they have nuclei and thus can easily divide and redifferentiate.) His next step? He had a student expose frog blood to various levels of electrical current in order to find out exactly how much of a charge is needed to turn blood cells into blastema. Days passed, then months. The student administered smaller and smaller currents to the blood (high ones either did nothing or began to cook the cells), but he saw no evidence of change. Finally, the week before the student was supposed to quit and return to his classes, he found that blood cells revert to blastema at a few billionths of an ampere.

In 1973, armed with the knowledge of how much current produces a blastema, Becker decided to brave the step from regenerating amphibians to regenerating mammals. He amputated a rat's foreleg below the shoulder and implanted the platinum-silver electrode device at the stump. Again, success—this time, the most exciting ever. The animal regenerated nerves and tissue and even formed the humerus, the upper-arm bone, complete with the rounded end that fits into the elbow joint. Other parts of the elbow joint began to take shape, including cartilage and two bony structures that Becker surmised were the forerunners of the radius and ulna bones of the lower leg. Everything about the new growth was precisely as it had been in the original limb. And all this growth took place in just three days.

But then the growth ended; for the electrode remained implanted in the shoulder tissue, while the end of the stump, where regeneration was taking place, had grown beyond the reach of its vital current.

The rat's growth, though incomplete, was nevertheless significant, particularly in one respect. The fact that the rat, whose red blood cells have no nuclei, could form a blastema—probably from bone marrow—indicated that in all probability humans could do so as well.

About this time, in London, two newborn infants lost their fingers, and the fingers regenerated naturally. The explanation, in Becker's view, probably lies with Spallanzani's early finding that the younger the creature, the better its ability to regenerate. But what was most significant about the babies' growth was that it indicated that the human body contains within it the capacity for regeneration.

Later in 1973, Smith devised an electrode that would travel with the regenerating

stump. Again he amputated a frog's leg below the elbow. With the new device, the frog's entire leg grew back.

The year 1973 marked a third triumph as well: Becker began using his findings about the body's electricity in experiments on human bone. A patient of his who had fractured his ankle two years earlier suffered from a mild diabetic condition that was interfering with the bone's ability to regenerate. The ankle had failed to mend despite two corrective operations; and the bone on both sides of the break had deteriorated. Under normal circumstances, Becker would have had to amputate the leg. Instead, he implanted an electrode into the fracture and administered the same current that he found had divided the frog's red blood cells. He waited three months, the time an ankle fracture would normally take to heal, and the fracture regenerated. A sample of the new bone showed it to be normal in every respect.

The next year, during the course of routine experiments, Becker stumbled on another clue that finally shed considerable light on his nervous system theory. With the intention of impeding growth, he and his staff broke the tibia in a rat's leg and then cut the nerve that led to the broken limb, assuming that without a nerve supply the rat's bone would heal poorly, if at all. But the fracture healed well; the only drawback was that it took twice the normal time. Perhaps the severed end of the nerve needed time to degenerate, they thought. So they cut the nerve six days before breaking the bone. To their astonishment, the bone healed in the normal amount of time, as if the nerve had never been cut at all.

What was going on? They opened up the leg, only to discover that the nerve fiber had not healed. What *had* healed was the nerve's sheath of Schwann cells—one of a dozen types of cells that make up the "perineural group"—traditionally thought to serve no purpose other than the insulation of the nerve fiber. The perineural cells in the brain were known to carry a steady current—for what reason, no one knew. It now seemed apparent that Schwann cells also carry a steady current. This was proof enough for Becker that the analogue computer system he had theorized was indeed contained in the perineural cells—cells that sheathe the entire central nervous system.

The perineural discovery is by no means the end of the tale. Experiments must still be conducted to determine if electrical regeneration is entirely safe. Could applications of electricity to the peripheral nervous system, for example, induce some sort of behavioral disorder? Or damage our cognitive powers? Every human body contains dormant cancer cells. Could an implanted electrode shock them into fatal multiplication?

Nevertheless, much of the mystery has been solved. Only the last chapter—the most exciting one—has yet to be written. It may well describe the modern world as a Shangri-La where damaged human parts are simply cut off and grown back properly. Our future may lie not with the bionic man but with the natural man.

The replacement of arthritic hip joints with Teflon parts, for example, is now a costly and not altogether satisfactory operation. The Teflon wears out. If the device is implanted in a young person, it may have to be replaced some four or five times in the course of his life. And with each hip operation, there is the risk of infection, which can be a deadly prospect. The alternative—growing a natural hip—would be safer and cheaper.

We may also someday regenerate a damaged heart. Becker has discovered that salamanders replace some 50 percent of their cardiac muscles by regeneration. And Polezhaev has cut away the scar tissue on the hearts of dogs that had suffered severe heart attacks; all of the hearts regenerated and less than 5 percent of the dogs died. We may even replace parts defective at birth, given that damaged genes do not garble the instructions given to the blastema.

Becker himself is hesitant to herald regeneration as an immediate cure for amputees. The replacement of severed parts, he says, is still pretty far off. Why not aim for more immediate uses that would be beneficial to greater numbers of people? Severing the spinal cord in man produces paraplegia because man's spinal cord does not regenerate. Becker, however, thinks that since salamanders regenerate their spinal cords, man's spinal cord could perhaps be electrically stimulated to do the same thing. It would take only a year to see whether electrical stimulation works without complications in a paraplegic dog or monkey. And if such stimulation works safely on them, it could be safely applied to humans.

The outstanding disappointment of the entire regeneration tale is that no one is conducting that experiment with paraplegic animals. Why? Money. Becker's own $100,000 grant, from the Veterans Administration, just covers staff salaries. Experiments are costly; keeping paraplegic animals in particular is frightfully expensive.

Still, it must not be forgotten that the financial problem—serious though it is—is the only laggard in regeneration's exhilarating race toward the future. It is the promise of regeneration—not the problems—on which we must focus attention. Hundreds of questions wait to be answered.

Animals that regenerate don't get cancer. If a tumor is implanted in a lizard's body, which does not regenerate, it grows to fatal proportions. But if it is implanted in the tail, which does regenerate, the tumor disappears. If we learn how to turn on regeneration (controlled growth), can we learn to turn off cancer (uncontrolled growth)?

Hormones play an important role in regeneration. A chopped-up adrenal gland when implanted in a frog will generate some growth. Moreover, if the adrenal gland is removed from a lizard, the creature will lose its ability to regenerate its tail. If the hormone prolactin is then injected, the lizard will regain its regenerative potential. It has also been hypothesized that hormones secreted during stress can cause cancer. Prolactin is secreted during stress. Is there a connection? Do carcinogens impose a stress on the body, which then triggers a hormonal release that oversensitizes the body to its own electrical forces, thus sparking wild division of cells?

If a negative charge builds up bone and a positive charge dissolves bone, could positive charges have an effect on malignancies?

If pain is the input signal needed by the brain to trigger healing, does anesthesia—the muffling of the pain signal—impede healing?

When power lines are stretched across the sea, amplifiers are put in at regular points to boost the current along. The body's electric system may run the same way, equipped with special spots along the analogue nervous system that boost the signals as they are carried to or from the brain. Becker has found that half of the traditional acupuncture points correspond to the spots in the nervous system that seem to be amplifiers of electricity. Could acupuncture simply involve the insertion of a metal needle into one of the amplifiers, short-circuiting the pain signal so that it never reaches the brain?

Does the body's sensitivity to electricity explain why reversals in the earth's magnetic field are related to the extinction of certain animals?

When one electrical field is imposed on another, the currents are altered. When one human being approaches another, do their biological electric systems overlap? Is this a scientific explanation for the "psychic" mystery of ESP?

The characteristics of the analogue nervous system are such that it should be influenced by external electrical fields. Becker has already found experimental evidence that would indicate that electrical fields such as those produced by power transmission lines produce stress in animals—with consequent physical effects that are shocking indeed to the layman. What is the relation between this unseen electrical pollution and human stress?

The possibilities seem infinite. Each is like a silver key. Which one will open the door to a new world? ●

---

## CIVIL SERVICE REFORM ACT

### HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. STEERS. Mr. Speaker, for the benefit of my colleagues, I am inserting amendments, and accompanying explanations, to the civil service reform bill expected to be considered by the House of Representatives tomorrow.

**Expansion of Office of Personnel Management to Three Members**

AMENDMENT TO H.R. 11280 OFFERED BY MR. STEERS

Page 144 strike out line 16 and all that follows down through line 19 on page 145 and insert in lieu thereof the following:

"§ 1102. Appointment of members of the Office of Personnel Management

"The Office of Personnel Management is composed of three Commissioners appointed by the President, by and with the advice and consent of the Senate, not more than two of whom may be adherents of the same political party. No Commissioner of the Office of Personnel Management may hold another office or position in the Government of the United States."

"§ 1103. Term of office; filling vacancies; removal; quorum

"(a) The term of office of each Commissioner of the Office of Personnel Management is four years.

"(b) Any Commissioner appointed to fill a vacancy occurring before the end of a term of office of his predecessors serves for the remainder of that term.

"(c) Any Commissioner appointed for a four-year term may be re-appointed to any following term.

"(d) Any Commissioner may be removed by the President only upon notice and hearing and only for misconduct, inefficiency, neglect of duty, or malfeasance in office.

"(e) Except as otherwise provided in this title, the Office of Personnel Management shall act upon majority vote of those members present, and any two members present shall constitute a quorum for the transaction of business of the Board.

"§ 1104. Chairman; Vice Chairman

"(a) The President shall from time to time designate one of the Commissioners of the Office of Personnel Management as the Chairman of the Office of Personnel Management. The Chairman is the chief executive and administrative officer of the Office of Personnel Management.

"(b) The President shall from time to time designate one of the members of the Office of Personnel Management as Vice Chairman of the Office of Personnel Management. During the absence or disability of the

Chairman, or when the office of Chairman is vacant, the Vice Chairman shall perform the functions vested in the Chairman.

"§ 1105. Functions of the office.

"The following functions are vested in the Commissioners of the Office of Personnel Management, and shall be performed by the Commissioners, or by such employees of the Office as the Commissioners designate:"

Page 146, lines 23, 24, and 25; page 147, line 25; and page 148, line 1 strike out "Director" and insert in lieu thereof "Commissioner".

Redesignate the following provision (and references thereto) accordingly.

EXPLANATION

While I believe the Civil Service should be reformed I have serious reservations about whether this measure, H.R. 11280, is the appropriate vehicle.

I am most concerned about the concentration of personnel authority in the hands of one individual, the Director of the Office of Personnel Management. In my opinion this would politicize the Federal service and destroy the merit system which has served the American people well for nearly 100 years.

Placing governmentwide personnel authority in one Director takes the decisionmaking process out of the public's eye. The Director would merely have to make a proposal affecting governmentwide personnel systems to himself, debate it by himself, and make a unilateral decision whether to implement the proposal. Thus, there is no check on arbitrary and capricious actions by a Director.

My amendment would preserve the impartial administration of the Civil Service system. While it would not alter the split of the Civil Service Commission's responsibilities between the Office of Personnel Management and Merit System Protection Board, it would vest the powers of the Office of Personnel Management in three Commissioners. By so doing, it will provide for checks and balances against misuse of authority.

As a Commission, the decisionmaking process will be opened to the public and all decisions would require a majority vote. Moreover, it is a bipartisan Commission, therefore, it will act as a check against an incumbent President using the authority of the Office of Personnel Management for personal political reasons.

While no system is "fail safe," as the Watergate era demonstrated, I believe the public would be better served by an open system which decentralizes authority instead of the system proposed in this bill.

[Computation of Certain Annuities]

AMENDMENTS TO H.R. 11280 AS REPORTED

OFFERED BY MR. STEERS

Page 200, line 73 after "308." insert "(a)".

Page 200, after line 20, insert the following new subsection:

(b)(1) Section 8339(d) of title 5, United States Code, is amended by inserting "(1)" after "(d)" and by adding at the end thereof the following new paragraph:

"(2) The annuity of an employee retiring under this subchapter with less than 20 years, but at least 5 years of service as a law enforcement officer or firefighter, or any combination thereof, is computed under subsection (a) of this section, except that the annuity of such employee is computed with respect to the service of such employee as a law enforcement officer or firefighter, or any combination thereof, by multiplying 2½ percent of his average pay by the years of that service."

(2) The amendments made by this section shall apply with respect to individuals who become entitled to receive an annuity on or after the effective date of this Act.

[Computation of Certain Annuities]

AMENDMENTS TO H.R. 11280 AS REPORTED

OFFERED BY MR. STEERS

Page 200, line 73 after "308." insert "(a)".

Page 200, after line 20, insert the following new subsection:

(b)(1) Section 8339(d) of title 5, United States Code, is amended by inserting "(1)" after "(d)" and by adding at the end thereof of the following new paragraph:

"(2) The annuity of an employee retiring under this subchapter with less than 20 years, but at least 5 years of service as a law enforcement officer or firefighter, or any combination thereof, is computed under subsection (a) of this section, except that the annuity of such employee is computed with respect to the service of such employee as a law enforcement officer or firefighter, or any combination thereof, by multiplying 2½ percent of his average pay by the years of that service.".

(2) Section 8339(h) of such title is amended by striking out "section 8336(d)" and inserting "section 8336(d)(1).".

(3) The amendments made by this section shall apply with respect to individuals who become entitled to receive an annuity on or after the effective date of this Act.

---

[Pay Rates]

Amendment: H.R. 11280

OFFERED BY MR. STEERS

Page 148 strike out lines 12 through 24 and insert in lieu thereof the following:

(b)(1) Section 5314 of title 5, United States Code, is amended by inserting at the end thereof the following new paragraph:

"(67) Director of the Office of Personnel Management".

(2) Section 5315 of such title is amended by inserting at the end thereof the following new paragraph:

"(122) Deputy Director of the Office of Personnel Management."

(3) Section 5316 of such title is amended by inserting at the end thereof the following new paragraph:

"(144) Associate Directors of the Office of Personnel Management (5).".

Page 165 strike out line 24 and all that follows down through line 12 on Page 166 and insert the following:

(C)(1) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(123) Chairman of the Merit Systems Protection Board".

(2) Section 5316 of such title is amended by adding at the end thereof the following new paragraphs:

"(145) Members, Merit Systems Protection Board.

"(146) Special Counsel of the Merit Systems Protection Board."

(3)(A) Paragraph (17) of section 5314 of such title is hereby repealed.

EXPLANATION

The purpose of this amendment is to provide Federal Law enforcement and firefighting personnel with less than 20 years service, but at least five, a special 2½ percent retirement computation formula in recognition of the special hazardous duty service in which they perform. Current Law (P.L. 93-530) already extends this credit to those with 20 or more years of service, but failed to provide similar credit to those who serve less than 20 years.

This amendment would correct this inequity by extending the special, hazardous duty retirement rate to all Federal law enforcement and firefighting personnel who retire with between 5 and 20 years of service. A similar amendment has been accepted by the Senate.

(B) Paragraph (66) of section 5315 of such title is hereby repealed.

(C) Paragraph (99) of section 5316 of such title is hereby repealed.

Page 300, line 6, strike out "Senate" and insert in lieu thereof the following: "Senate, and shall be paid at an annual rate of basic pay equal to the maximum annual rate of basic pay currently paid, from time to time, under the General Schedule,".

Page 347, strike out lines 5 through 8 and insert in lieu thereof the following:

(e) Section 5316 of title 5, United States Code, is amended by adding at the end thereof of the following new paragraph:

"(147) Members, Federal Labor Relations Authority (2).".

EXPLANATION

The purpose of this amendment is to lower the level of compensation of officers and members of the Office of Personnel Management, Merit System Protection Board and the Federal Labor Relations Authority.

Both H.R. 11280 and Reorganization Plan Number 2 call for the creation of a number of new top-level appointed positions in the civil service system; increasing the number of top level management positions in the system from 3 to 11. Of these positions, the lowest salary level—for those of the five Associate Directors of the MSPB, Vice Chairman of the MSPB, Member of the MSPB, and Special Counsel of the MSPB—is fixed at the rate of compensation of Executive level IV, or $50,000 each. In addition, the Director of the OPM is compensated at the rate of Executive level II, $57,500; both the OPM Deputy Director and the Special Counsel of the MSPB are compensated at Executive level III are, $52,500. These positions will add $417,500 to the salary outlays for top level appointees.

In addition, the creation of the Federal Labor Relations Authority, will add three new highly paid positions: The Chairman, at Executive level II, $52,500 and two Members, at Executive level IV, $50,000.

In light of the President's recent proposal to put a cap on Federal pay, it is appropriate that we follow his suit and reduce the levels of compensation for these new positions.●

---

## NOISY AIRCRAFT BILL: THE OPPOSITION GROWS NOISIER

---

## HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. VANIK. Mr. Speaker, as the implications of the Airport and Aircraft Noise Reduction Act become clear to everyone, the opposition to title III, the so-called Noisy Aircraft Revenue and Credit Act, has grown noisier and more outspoken. In an editorial, entitled "Airline Sound and Fury," the New York Times on August 9 lambasted the noisy aircraft provisions as meaningless and setting a dangerous precedent for other "messy" industries. The editorial follows:

AIRLINE SOUND AND FURY

A few months ago it appeared that the quid pro quo for airline deregulation legislation would be Fedeal money to help the airlines meet new aircraft noise standards. Only by supporting noise control subsidies could the Administration muster the votes in the House to open air routes to new competitors and allow carriers to set their own fares. Congressional ardor for noise control funds has, how-

ever, cooled somewhat with reports of fat airline profits, and the deregulation effort is now apparently strong enough to stand on its own.

That is welcome. Airline deregulation is a fine first step towards reducing the inflationary role of government in private markets. The connection between deregulation and noise control has always been political, not logical. It is now up to the House to look hard at the dubious case for noise control subsidies. The subsidy program now contemplated would have very little impact on the airlines' ability to finance quiet aircraft. But it would set an unfortunate precedent for other industries to look first to the Federal Government for cash to clean up pollution.

The key provision of the House plan would divert a quarter of the revenues from the current 8 percent domestic ticket tax now going to the airport construction trust fund and use it to pay for quieter aircraft engines. No additional tax would be needed to make up the revenue loss to the trust fund; it now runs a substantial surplus. The airlines say they must have the Federal money because their bill for the new equipment will be enormous in coming years, and their ability to raise private capital will be limited by their large existing debts and poor profit record.

Some critics of the proposals dispute the industry's claims, citing its fine profits in recent months. But there is really no need to decide here who is right, since the program is unlikely to change airline financing for better or worse. Industry opinion notwithstanding, the competitive market in which the airlines operate would prevent them from using the subsidy to increase total revenues. It might temporarily increase revenues. But competition among the carriers—competition informally encouraged by the Government, and soon to be required by law—should insure that passengers get the tax money back. Any excess profits will be returned in the form of somewhat lower fares than could otherwise be expected.

The subsidy, then, is no subsidy at all: The effect would be virtually the same if the ticket tax were simply reduced from 8 percent to 6 percent and competition continued to determine ticket prices. That, ironically, is just what alternative legislation proposed by Congressman Charles Vanik—and bitterly opposed by the airlines—would do.

Since it wouldn't really change anything, cynics argue that Congress might as well make the airlines happy by approving the bill. But this route has its dangers. The program generates the appearance, if not the reality, of a Government bailout for one industry's special environmental program. And, as such, it could pave the way psychologically for special pleadings by other industries. The aircraft noise subsidy program is, in itself, neither good nor bad: It is meaningless. Competition among the carriers should nullify its economic impact. But that is certainly not sufficient reason to commit the Federal Government symbolically to a policy of cleaning up other peoples' messes.

I hope that my colleagues take these arguments into account when the closed rule for title III comes to the floor early next week. I ask you to vote against the previous question on the closed rule so that an open rule may be considered. This would allow amendments that would reduce the airline passenger tax and prevent the airlines from getting an investment tax credit on the Treasury giveaway.

We cannot afford to let a closed rule open the doors of the Treasury so that the airlines can airlift $3 billion from the Federal airport and airway trust fund.●

## HOPE TO A DIVIDED LEBANON

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. DERWINSKI. Mr. Speaker, I am pleased to direct the attention of the Members to the question and answer interview in this afternoon's Washington Star, featuring the Honorable Charles Malik, one of the world's most respected statesmen. Dr. Malik, former foreign minister of Lebanon who became the first Arab President of the United Nations General Assembly, expresses his concern with the fate of Lebanon's fragmentation and the threat to its Christian community.

In view of the overwhelming adoption by the House of my amendment to suspend aid to Syria for the fiscal year 1979, and the interest in a similar amendment pending in the other body, I insert the Q. & A., column so that the Members might appreciate the grave problems that beset Lebanon:

EX-LEBANESE AIDE DESCRIBES HOPES FOR HIS DIVIDED LAND

Question: What is the problem in Lebanon that has seen the country's central authority virtually evaporate in the last two years?

Malik: The problem of Lebanon is the breakdown of practically all its institutions: governmental, military, civil, economic, educational and judicial. Lebanon has been undergoing a tremendous upheaval for three years as a result of many internal and external factors. The question, therefore, that faces the Lebanese people today is how to reconstitute themselves in such a manner as to have a stable, strong, effective government and at the same time how to preserve their human rights and fundamental freedoms which they deeply cherish.

Q: How do you explain the fragmentation of the Christian community itself, the feuds within the Christian community and the feuds between the Christian community and the Palestinians?

A. Lebanon is a mosaic of diverse communities and cultures and interests. In a mosaic like this, when the central quality weakens, the difference among the components in the mosaic would naturally become more accentuated, with the result that hitherto hidden or covered up rivalries and competitions and differing ambitions would come to the surface and make themselves more felt. And that is more or less what's happened in Lebanon in recent years. The feuds among the Christians are all internal and a result of rivalries among themselves as to leadership and position in the country. I do not think you'd find any difference among all the feuding Christian factions of Lebanon about whether they would want Lebanon to lose its independence or its freedom or to become enslaved or to become assimilated into any other kind of society than its own proper society.

Q. How have external factors affected the situation?

A: External factors have accentuated the situation: the presence of massive armed Palestinians in the country; the interests of many Middle Eastern countries in Lebanon itself, either to settle old accounts or accounts among themselves on Lebanese soil, and the pouring in of lots of money to help certain elements in the country fight other elements in the country.

Q: Are people like Pierre Gemayel (a leader of the Christian community) looking for an integrated Lebanon? Or are they looking for a feudatory of their own without interference from any external authority, including Lebanese?

A: Your question is clearly a loaded question. The direct answer to it is that the people to whom you refer and by whom you call by certain derogatory names are very honest people. They will accept nothing short of a unified Lebanon. They are not looking for what you call feudatory interests. They are looking only for the interests of the Lebanese people as a whole. They do not accept any diminution in the fundamental freedoms and rights and open character of Lebanese society. It's for the preservation of these fundamental values in Lebanon that they are fighting and for nothing else.

Q: How do you view the work of the Syrian peacekeeping forces so far in Lebanon? Do you think they have helped or hurt the situation?

A: They did a very good job at the beginning. They stopped the carnage of the Lebanese people and especially the Lebanese Christians who were very fond of them and they fraternized with them. Also some of the people, some of the leaders to whom you referred did go to Damascus and see President (Hafez) Assad several times and they always came back and told us they found him a very honorable, understanding, well-intentioned leader who wants only good for Lebanon and who will not tolerate any injustice inflicted upon the Lebanese people. I heard that from these leaders many times and I fully believe them.

Q: Has the situation with Syria changed recently?

A: Something happened about eight or nine months ago which appears to have changed the policy of Syria. I cannot attribute that change to a change in the mind of President Assad because I do not know. Last month the Syrian forces which are the overwhelming majority of the Arab peacekeeping forces, shelled, bombed and virtually destroyed the three or four most important Christian suburbs of Beirut. You hear at times pretexts given for that strange change such as they were provoked into it, they were shot at by others. No conceivable pretext can justify that wholesale bombing, shelling and firing and burning and many incidents of looting. About 300,000 peaceful Christian civilians had to flee to the mountains and live as refugees in their own country.

Q: Let's turn to the Israeli policy on Lebanon, which was characterized by reprisal raids recently, then an invasion and then withdrawal. They maintain a strong position and strong ties to the Christian community in Lebanon. What do you make of Israeli policy as it affects Lebanon, a united Lebanon?

A: So far as I know there have been no Israeli raids except on Palestinian camps. And again as far as I know these raids almost always occur as reprisals for attacks publicly done by Palestinian elements. They did invade a considerable part of south Lebanon. And as far as I know they have withdrawn now completely from that part and United Nations forces, by decision of the Security Council, were sent to the south to replace the Israelis.

Q: Isn't it true that what has taken the place of the Israelis in the south are the armed Christian groups who will not permit a UN peacekeeping force from entering the south?

A: I was not present at the United Nations debate nor did I take any part in behind-the-scenes negotiations. But I read in the papers and heard on the radio that one of the conditions Israel insisted on was that the UN would not allow the Palestinians to go back to the south of Lebanon. I also hear that the United Nations forces have not been able to prevent Palestinians from going into the south of Lebanon. I have some figures that literally thousands of them have gone back and are now going back

with the knowledge of some United Nations forces and are receiving lots of arms.

Q: Obviously the problem in Lebanon inflicts the most pain on the Lebanese people with the chaos and the collapse of society and the danger to life itself. But it's not a problem only for Lebanon, because a weak and divided Lebanon invites foreign involvement and that in turn can lead to a war which can draw in the great powers. In view of that, what do you think should be done by the great powers or by anybody in the area now?

A: My view is that we should first of all have very clear in our minds what kind of values may be destroyed if the problem of Lebanon is allowed to take its own course without proper help, sympathetic help, from outside. First, the free and open and liberal and pluralist society of Lebanon could be destroyed. And this free and plural society is practically the only society of its kind in the whole earth. The second value that is likely to be destroyed is the only remaining free, secure and deeply rooted Christian community, and even more than that, a community whose traditions go back uninterrupted for 2,000 years. This would endanger our being overwhelmed and becoming extinct or at least being reduced to a second-class community. These two fundamental values are the values which are at stake in the agony of Lebanon today.

Q: What do you think specifically a concert of states can do?

A: I think there are very urgent things, intermediate things and long-range things. The most urgent thing is for the international community—including the United States—to use its good offices to make sure that the present lull, the present cease-fire holds for good. The second thing is an honorable withdrawal of the Syrian forces from the Christian area. Third, something must be done to facilitate the return of the 300,000 Christian refugees and make sure their homes are still livable and they can still live a decent life in them. Fourth, some consideration on all kinds of levels should be given to how long the Syrian army could stay in Lebanon. When consideration is given to that aspect of the situation then, of course, arises the problem of what alternative you ought to have to replace the Syrian peacekeeping force if the Lebanese army in the meantime has not been strengthened to take care of the security of the country by itself. I'm not prepared at all to say there's no solution. On the contrary, one may make a number of suggestions about how it may be solved, provided there is initial renewal to solve the problem.

Q: What about the presence of the Palestinians on Lebanese soil?

A: The question of 50,000 or 60,000 heavily armed Palestinians is priority five or six. It is inconceivable that there's going to be peace in Lebanon of any tolerable kind with the presence on Lebanese soil of about 100,000 armed forces, Syrian and Palestinian. That problem has to be faced and we cannot simply put it aside and say that all will go well by sheer good will and rhetoric. Nor will all go well by force, namely by intimidation and all this destruction of the basic freedoms of the Lebanese which they cherish more than life itself.

Q: What other problems need to be solved?

A: You have economic reconstruction. You have communal political reconstruction, you have psychological problems to be faced to heal the rifts between the diverse segments of the population. You have the problem of Lebanon's relations with its neighbors, the Syrians, whom we do not want to be an enemy at all, and with the rest of the Arab world. You have the problem also of the relations of Lebanon with the rest of the world.●

## SOVIET INVASION OF CZECHOSLOVAKIA

### HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 17, 1978*

● Mr. PICKLE. Mr. Speaker, the question of freedom is unsolved in many aspects. Man deserves the freedom to live in a free society. Man's material well being is sick without spiritual well being.

No people in our world's history have a greater claim to love of freedom than the Czechs. For in this land, the dynamic forces of free thought, intellectual attainment, and economic development have long flourished. This is so because the Czechs have, as a people, honored freedom and human dignity.

The only fault with the Czechs and Slovaks is they are far too few in number, and occupy a space of our globe too small to command great power.

And since this relatively small number of people lies in the path of one or another great superpower, the superpowers seem to have no qualm about stepping on Czechoslovakia's territory.

This is certainly the case with the infamous Soviet invasion of Czechoslovakia in 1968.

On the 10th anniversary of this tragic turn of events, it is worthwhile to note this Soviet action illustrates the horrors of communism.

Marxism, as practiced by the Soviet Union, at least, means no free speech and no free thoughts. Because it is the nature of Czechs to speak and think freely, Soviet Marxism had to send tanks and soldiers to stamp out, not guns or weapons, but free expression and reform.

We should not forget this.

Mr. Speaker, in my congressional district there are many, many Czechs. They are not refugees from the 1968 horror, or the 1948 horror, nor the 1939 horror, but the uprisings of 1848.

Seeking political freedoms, these 19th century immigrants came into Texas to carve a new life while maintaining their love of freedom. This they have done, and I know that I speak with them in condemning the Soviet "Day of Shame" of 1968.

The Czechs of my district—honorable, hard-working, respected citizens—have a great love for the "old country" of Moravia and Bohemia. They are pained to observe that the present Czechslovakia is under the dominance of the Soviets by armed pressure and force. Today, they still carry on the customs of the old country. They do not want to make matters worse on the present citizens of Czechoslovakia, but they yearn for a return of democracy to their previous country. During all these years, they are quietly and painfully regretful that there is little freedom in the old country. All this was brought on by the invasion of the Soviets. I am convinced there is a deep-rooted resentment over this invasion. Someday it will erupt again. Someday the old democracy will come again. And the sooner the better.●

## AIRPORT NOISE AND YOUR HEALTH

### HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. ANDERSON of California. Mr. Speaker, in recent years, numerous studies have demonstrated the harmful effects of constant exposure to aircraft noise. Investigations in Los Angeles, Japan, and England have linked constant exposure to jet noise to a rise in nervous breakdowns and birth defects.

While in my home district during our just completed recess, the results of a new University of California study were released. It reveals alarming evidence that links exposure to aircraft noise to higher death rates. Prof. William Meecham, the director of the study, compared mortality statistics for two areas similar in population, ethnic makeup and economic levels. The results indicated a death rate 19 percent higher in airport neighborhoods. Professor Meecham stated that the statistical odds against such differences occurring by sheer accident are 1,000 to 1.

As we near consideration of legislation which addresses the growing problem of aircraft noise, the Airport and Aircraft Noise Reduction Act, it seems most appropriate to share with you a recent Los Angeles Times news article which contains the details of Professor Meecham's study:

[From the Los Angeles Times, Aug. 25, 1978]

STUDY LINKS AIRPORT NOISE, INCREASE IN DEATH RATES—MORTALITY FIGURES UP 19 PERCENT FOR THOSE LIVING BENEATH LANDING PATTERNS AT L.A. AIRPORT

(By Richard C. Paddock)

A UCLA study of two communities near Los Angeles International Airport revealed a link between the constant noise of jet aircraft and higher death rates, it was disclosed Thursday.

The study, conducted by William Meecham, a professor of engineering specializing in aeroacoustics, showed that the death rate in neighborhoods directly beneath the landing pattern of jet aircraft and within three miles of the airport was 19 percent higher than among residents six miles from the airport.

"The evidence seems to clearly indicate a substantial increase in mortality rates for areas nearest the airport," Meecham said in a preliminary report on his investigation.

"It lends added weight to the results of earlier studies in Los Angeles, England and Japan linking constant exposure to jet noise to a rise in nervous breakdowns and birth defects," he said.

Another UCLA study released last February showed that children born to parents living under the airport landing pattern are much more likely to suffer birth defects such as harelips, cleft palates, anencephaly (missing brain) and spina bifida (spinal chord defect).

That study showed that in a test area next to Los Angeles International Airport—the same test area of Meecham's study—the rate of abnormal births was 61 percent higher among blacks, and 37 percent higher among whites, than in the rest of Los Angeles County from 1970 to 1972.

F. Nowell Jones, a UCLA psychology professor, and Judy Tauscher of UCLA's school of public health, who conducted that study,

speculated that the cause of the higher birth defect rate was stress suffered by pregnant women repeatedly exposed to the noise of jet aircraft. Another study conducted in 1974 showed that noise can produce stress by causing disturbances in sleep patterns.

According to Meecham's two-year study, residents living in 1971 and 1972 within three miles of the Los Angeles airport suffered more deaths due to stroke, heart-disease and cirrhosis of the liver than residents of an area six miles from the airport.

Meecham will present a full report to local citizens groups, aviation industry experts and public officials at a September UCLA extension conference open to the public.

For the study, Meecham and graduate student Neil Shaw compared mortality statistics for two areas similar in population, ethnic makeup and economic levels.

In the area closest to the airport, a section of Lennox and Englewood bounded by Aviation Blvd., Arbor Vitae St., Vermont Ave., and Imperial Highway, the sound level was measured at 90 decibels and higher.

About six miles from the airport, in the Carson-Gardena area bounded by Crenshaw Blvd., Rosecrans Ave., Central Ave., Victoria St., 190th St. and the San Diego Freeway, the noise level ranged from 45 to 50 decibels.

Since decibels are measured on a logarithmic scale, noise of 90 decibels is 10,000 times greater than 50 decibels.

Prolonged exposure to noise of 90 decibels already is considered by experts to be hazardous to mental and physical health, according to Meecham's report.

In the area nearer the airport, the researchers found that 890 residents died during the two-year period compared to 670 in the more distant area. Adjusting for some differences in population, Meecham said, the death rate is 9 percent higher in the area directly under the jet landing pattern.

"By standard statistical measures, the odds against such differences occurring by sheer accident are 1,000 to 1," Meecham said.

Deaths from cirrhosis of the liver—generally linked to alcoholism—were 140 percent greater, in the noisier neighborhood than in the quieter one.

Deaths from stroke and heart disease were 39 percent greater in the area closer to the airport, Meecham said.

On Sept. 21 and 22, Mecham will conduct a conference at UCLA entitled "Aircraft Noise and the Community." Officials from the Federal Aviation Administration, the California Office of Noise Abatement and the Environmental Protection Agency will participate along with representatives from the aviation industry and citizens groups from Santa Monica, Brentwood, and Pacific Palisades.

"Previous conferences have been largely directed toward government agencies and industry experts," Meecham said "This program attempts to bring citizens groups and individuals into the discussion."●

## U.S. NEWS & WORLD REPORT OPPOSES CARTER CIVIL SERVICE PROPOSALS

### HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. STEERS. Mr. Speaker, for the benefit of Members of the House of Representatives, I am providing a copy of an editorial in the August 28, 1978, edition of U.S. News & World Report. The points made by the editorial writer are indeed cogent as we consider H.R. 11280, the bill that would ostensibly "reform" the civil service system. Mr. Marvin Stone, the writer in question, urges that Congress send the President's task force back to the drawing board. I quite agree.

The article follows:

A GOOD TRY—NOT GOOD ENOUGH
(By Marvin Stone)

President Carter's plan to reform the civil service has generated widespread confusion. Administration arguments for the proposal have provided neither clarity nor reassurance.

Expressed the simplest way, the plan is to bring the bureaucracy under tighter rein by splitting the Civil Service Commission into two agencies, one for hiring and one for employee protection; to set up a corps of 9,200 super-executives, and to make it easier to fire people.

The splitting of the Commission is already in law, since Congress did not veto it. The rest requires approval, and it now is on its way through the House and Senate. This vehicle carries hazardous cargo.

Drumming up some support has been easy, because the images of the greedy bureaucrat and the lazy clerk are well estabilshed in the public mind. These slackers, be they few or many, have got to shape up or ship out. But does this mean we should accept a remedy that would cost the security of honest and industrious workers and open the way to a politically dominated service? The American people have a right to a civil service that can do its work undisturbed by political campaigns or partisan manipulation.

No one alleges that Jimmy Carter lusts after power. But his reforms would enable any future political dictator to reach down through the levels and take the whole organization captive. Members of the Senior Executive Service would work close to the administration. In turn 72,500 intermediate managers, the GS–13s, 14s and 15s, bereft of automatic raises, would depend largely on SES review for their rewards. And the lower grades, finding appeal more difficult than at present, would have to please the middle managers in whatever shades of political control the managers transmit.

Safeguards are prescribed, indeed. If a lower-echelon employe believed he had been fired through a "prohibited practice," he could take his plea to the Merit Systems Protection Board (appointed by the President), where the handling of his case would be determined to an extent by the special counsel (appointed by the President). There he would have trouble proving, for instance, that a charge of being obstructive or unproductive or hard to work with resulted from a rejection of political pressure. He could appeal further to one or another federal court, where the cost might well be prohibitive.

Members of the House Civil Service Committee moved the burden of proof in appeals from the employe back to the management—an improvement, but not enough to overcome the deficiencies of the proposed system. They knocked out the administration's bid to hire from among the first seven applicants instead of the first three as now, a proposed shift that would have oddly belied the drive for efficiency—but would have made it easier to take care of a politically preferable job seeker.

As for the amendment in the House to weaken the Hatch Act, that's poison.

Finally, the committee adopted Representative Gladys Spellman's amendment to confine the Senior Executive Service to a two-year tryout. Two years might indicate whether the system would work administratively, but could not begin to test creeping corruption.

We agree that civil service must be reformed. As pointed out by Representative Quayle of Indiana, the federal bureaucracy has grown to consume 22 percent of the gross national product. Its numbers have ballooned by 462 percent in the last 48 years, while the population has increased only 71 percent. Anyone who has worked close to this monstrous bureaucracy has seen individuals who loaf the day out, or whole units with nothing to do.

There has got to be a way to stop the outrageous waste, but the current plan is not the answer. It is risky beyond repair. Congress should send the President's task force back to the drawing board.●

## THE LAW OF THE SEA CONFERENCE AND DEEP SEABED MINING LEGISLATION

### HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. GILMAN. Mr. Speaker, as a congressional adviser to the U.S. Delegation to the Law of the Sea Conference, I recently attended the Conference's current resumed seventh session in New York at the United Nations.

This resumed session commenced on August 21, 1978 and is scheduled to conclude on September 15, 1978. During this period the delegations from 150 nations are endeavoring to secure an equitable and comprehensive sea law treaty.

While progress on key issues had been made when the Conference convened in Geneva this past spring, several major topics continue to prove contentious. One such issue is deep seabed mining: the management and recovery of resources found on the sea floor and subsoil thereof, and the coordination of such activities undertaken by an international organization and individual states.

During the current session in New York, on August 28, 1978, both Ambassador Satya N. Nandan of Fiji, chairman of the group of 77, a group of 119 developing countries at the conference, and Ambassador Elliot Richardson, head of the U.S. delegation to the Conference, discussed deep seabed mining within the context of unilateral legislation pertaining to this activity being considered by individual States. The House, on July 26, 1978, passed such legislation, H.R. 3350, while the Senate has not as yet acted on this bill.

So that my colleagues may benefit from the observations of Ambassador Nandan and Ambassador Richardson on the relationship between such legislation and the Conference's efforts to conclude an agreement on seabed mining, I insert the remarks of both Ambassador Nandan and Ambassador Richardson at this point in the RECORD:

STATEMENT BY AMBASSADOR SATYA N. NANDAN

Mr. President, as the Chairman of the Group of 77, a group of 119 developing countries at this Conference, I would like to refer to a matter which though apparently extraneous to the Conference must be of grave concern for all who wish to see this Conference successfully concluded. The matter I wish to refer to is the move for unilateral

legislation relating to the exploitation of the resources of the deep seabed, being enacted or contemplated in several industrialized countries.

Such a move, coming at a time when this Conference has virtually concluded 90 percent of its difficult and intricate work for a global treaty affecting the ocean space as a whole, must be of concern to all who seek to regulate the future relations in the oceans in an orderly and peaceful manner through a universally agreed treaty. Those involved in these negotiations must know that this Conference has been making a steady progress towards a comprehensive treaty which will deal with a broad spectrum of international law of the sea from territorial jurisdiction of States to deep seabed mining beyond national jurisdiction. A task of such magnitude which involves a multitude of national interests and often conflicting national and international interests cannot be negotiated overnight. Nor can the negotiations for a multilateral treaty encompassing such a vast area of international law be compared with the relatively simpler processes of national legislations. If our progress appears to be slow it is to ensure that our agreements are universally respected and durable.

It is in this perspective that I wish to express here the view of the Group of 77 on the question of unilateral legislations affecting the resources in the area of seabed beyond national jurisdiction.

The Group considers such legislation as being contrary to the Declaration of Principles contained in General Assembly Resolution 2749 (XXV) and the declaration for a moratorium on seabed exploration and exploitation contained in General Assembly Resolution 2574 D (XXIV).

In the Declaration of Principles, the international community has solemnly proclaimed the deep seabed area as well as its resources as the Common Heritage of Mankind and as such it is not subject to appropriation or claim or exercise of sovereignty or sovereign rights. It has further declared that—

"All activities regarding the exploration and exploitation of the resources of the area and other related activities shall be governed by the international regime to be established."

The Moratorium Resolution is categorical in its declaration that pending the establishment of the international regime, States are bound to refrain from all activites of exploitation of the resources of the deep seabed and no claim to any part of it or its resources shall be recognized.

It is the position of the Group of 77 that such unilateral legislation relating to the resources beyond national jurisdiction have no validity in international law and activities conducted thereunder cannot be purported to acquire any legal status.

It is incomprehensible that at a time when the Conference is at an advanced stage in negotiating an internationally agreed regime for the exploration and exploitation of the resources of the deep seabed, States engaged in those negotiations should contemplate unilateral actions which would threaten to jeopardize the pursuit of the negotiations and indeed the successful conclusion of the Conference itself. These States must be aware of the consequences of their actions.

Mr. President, there can be no substitute to a universally agreed treaty for a rational and equitable development of the resources of the deep seabed area in the interest of the world community as a whole. Any other solution is not only selfish but short-sighted and may lead to irreparable consequences.

All of us have more important interests at stake at this Conference than only the manganese nodules and we should be careful not to jeopardize the overall agreement through hasty and short-sighted actions.

---

STATEMENT BY AMBASSADOR ELLIOT L. RICHARDSON

Mr. President:

I have listened with respect to the views expressed by the distinguished representative of Fiji on behalf of the Group of 77, and I do not wish to precipitate a lengthy debate on the subject of the deep seabed mining legislation. However, in my view and in the view of the other countries whose enterprises are now in the process of developing the means of recovering hard minerals from the deep seabed, the concept of the common heritage of mankind, which we supported in 1970 and to which we still subscribe, has never meant that these resources must remain unexploited in the absence of an internationally agreed seabeds regime. I would have thought this point would have been made clear by our concurrent opposition to the moratorium resolution, which was not adopted by consensus.

In our view, states and their nationals have the legal right to use the mineral resources of the deep seabed beyond national jurisdiction. This is a freedom of the high seas which has not been abridged either by any treaty or by customary international law. Although we are all engaged in the process of developing a treaty, this process has proved long and difficult, and its successful conclusion is not yet at hand.

I understand why the Group of 77 would prefer that we agree to defer any mining until an agreed treaty can be concluded, but I trust the Group will also understand why we cannot responsibly do that in face of the world's long-range need for the minerals and the more immediate need to proceed with the research and development that will in turn lead to the beginning of commercial mining. Far from jeopardizing the Conference, seabed mining legislation should facilitate the early conclusion of a generally acceptable Law of the Sea Treaty by dispelling any impression that the governments of the countries preparing to engage in such mining can be induced to acquiesce in an otherwise unacceptable treaty because that is the only way to obtain the minerals.

Mr. President, so far as the US is concerned, the goal of my Government remains the earliest possible conclusion of a generally acceptable Law of the Sea Treaty, and I believe the legislation now before the Congress to be entirely compatible with the principles on which the eventual treaty will be founded:

It recognizes that the resources of the seabed are the common heritage of mankind.

It requires that revenues be set aside for developing countries.

It requires stringent standards for the protection of the marine environment.

It does not assert any right of sovereignty or sovereign rights over seabed mine-sites.

It will be superseded whenever a law of the sea treaty takes effect with regard to the United States.

It does not declare or imply any intention that American seabed mining companies should remain outside the jurisdiction of an International Seabed Authority under such a treaty.

Finally, Mr. President, under the legislation that has just emerged from the Senate Committee on Foreign Relations, no permits for commercial recovery of hard mineral resources could in any case be issued for several years. This will allow ample time for our negotiations to conclude, thus assuring that seabed resources will be developed only under the international regime we are striving to achieve.

Thank you, Mr. President.●

## THE DESTRUCTION OF THE MLAWA JEWISH COMMUNITY

---

## HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. BLANCHARD. Mr. Speaker, as we all know, World War II was one of the most saddening periods of history for Jewish people around the world. The cruel atrocities committed upon the Jewish people will always remain an unforgettable part of history.

The Jewish people have endured this holocaust and have emerged still a strong and vibrant people. However, there remain many who may not be fully aware of what was actually taking place in countless Jewish villages across Germany and in other nations during World War II.

One such village was a small town called Mlawa. The injustices which took place in this Jewish community are a painful reminder of what was taking place in other Jewish communities across Europe. Mr. Allen A. Warsen, from Oak Park, Mich., is the founder and honorary president of the Jewish Historical Society of Michigan. He is also a book reviewer for the Detroit Jewish News and has reviewed a great deal of holocaust literature. He has translated and published a booklet entitled "The Destruction of the Mlawa Jewish Community," which describes the atrocities that the innocent citizens of Mlawa suffered through during World War II. Mr. Warsen has sent me a copy of this booklet, and I would like to share this account with my colleagues:

THE DESTRUCTION OF THE MLAWA JEWISH COMMUNITY

The town of Mlawa is situated at the former border of Prussia. There, where two cultures came together, generations of Jews were raised.

The enterprising Jews, whose commercial activities reached as far as Konigsberg, and whose life and existence resembled a ship on the great waterways of the world, at home, laid the foundations of Torah learning, and immersed themselves in the practice of Jewish traditions.

Even the ordinary Mlawa Jews, who all week long were busy earning a living, could not be surpassed in their devotion to Queen Sabbath and in the observance of Jewish religious precepts.

As I write these lines, a picture-album titled "The Build-up of the East," published in Munich in 1941, lies before me. In the section on Jews there are a few pictures of Jewish-Polish types. Surprisingly, these are photographs of Mlawa Jews: fathers and grandfathers whose eyes reflect great Jewish hearts.

In the printed text of the album, the perverted Germans promised "to take care of the Polish Jews," but failed to mention that they already "had taken care of them."

It is generally believed that in Mlawa, the Germans carried out the first "Aussiedlung" (evacuation) of Polish Jews. They committed this crime even before Treblinka and Maidanek were created.

Why? For what sins did the Mlawa Jews deserve to be banished from their homes? Was it because they brought enlightenment and knowledge wherever they came? Or was it for the moral force exerted by Joseph Opatoshu, Mlawa's great Jew? Or was it because the Jews developed in Mlawa a worldly

culture at a time the peasants there were still backward and primitive?

The Mlawa Jewish community belonged to the most cultured Jewish communities in Poland. Though small, it produced generations of intellectuals and creative men who strengthened culturally Jewish communities throughout the world.

It is noteworthy that Mlawa produced two great authors: Joseph Opatoshu and Yakir Warshawski. [It was also the birthplace of the world renowned Socialist Victor Alter, martyred with Henryk Ehrlich by the Russian terroristic Bolsheviks.]

This outstanding Jewish community the monstrous Germans destroyed shortly after their invasion of Mlawa.

On December 5th, 1940, the Germans with the assistance of Polish hooligans forcefully ejected from their homes three thousand three hundred Jews and drove them to Dzialdowo, a town near Mlawa.

In Dzialdowo, in a prepared concentration camp, the monsters tested on the kidnapped Jews techniques of torture and degradation that they later applied to all Polish Jews. They built bonfires to try the most efficient method of burning Jews. To accelerate their inhuman experiments, the monsters with whips and sticks rushed their victims into the burning flames and sadistically watched them roast.

While the burning of Jews was still in progress, other monsters murdered their victims by running them over with trucks.

In that manner the aged rabbi of the Mlawa Jewish community met his death. Before the sadists murdered him, they forced him to put on his "tallith" (prayer shawl) and "tepphillin" (phylacteries) and pray for Hitler's health. Afterwards, the criminals crushed him with a truck.

From Dzialdowo officers of the "superior race" came to the camp to display their superior bestial instincts. It is simply impossible to express in human language the refined tortures the sadists inflicted on their victims.

Incomprehensible and indescribable were the sufferings the women endured. They were forced naked with their breasts to roll in human feces. This was not an invention of primitive men, but of high ranking degenerate officers, junkers, and "noblemen of swinish Teutonic blood."

The same perverts forced Jewish girls to perform Lesbian acts and married men to rape married women.

The Walpurga Night lasted without interruption twenty four hours.

As a result of the tormenting experiences, eleven individuals lost their minds. Their madness satisfied the animal urges of the degenerate tormenters.

At night, the mentally ill were subdued by the Nazi prisoners. But one sick person freed himself and ran out of the camp. He was killed by an Arian truck.

Some of the most distressing scenes took place during mealtime. No one was allowed to have a plate or sardine container. The "food" was poured either into the lap of a garment or a shoe. The recipient was forced to run with the food to his assigned place. Otherwise, the savages forced him to spill his portion.

The Dzialdowo inferno lasted eleven days. From there the Nazi victims were transported in freight cars to the so called "Jewish reservation" in Mezritch (Miedzyrzec).

There hell began anew.

Israel Goldstein, a Jew from Ripin, hardened by the brutal treatment he had received, the deportations and experiences in Treblinka, had difficulty relating the horrors to which the Nazi victims were subjected while they were leaving the freight cars and marching to the synagog in Mezritch. The synagog, it should be pointed out, served as the "Jewish reservation."

Shortly after their arrival in Mezritch, a typhus epidemic broke out in the synagog, that claimed tens of victims daily. At night the lice-covered corpses were removed in sacks to prevent the epidemic from spreading. For the same reason, food was delivered to the victims of Nazi oppression through the synagog windows. However, the Black Death permeated through the synagog walls, and the curses and laments of the sick and doomed could be heard far and wide.

Yet, between death and hopelessness, someone composed a primitive song portraying the sufferings and humiliations of the Mlawa Jews.

Where did that man get the strength to create those rhymes and melody? Even God would not know! Since he, too, had abandoned the Mlawa Jews.

The song, Israel Goldstein informed me, became the hymn of suffering and hope of the tortured and sick. It rapidly reached the Mezritch ghetto where young and old sang it hundreds of times.

It is astonishing that in their darkest hours Mlawa Jews, including the sick, refused to despair. In the midst of their most horrifying and humiliating experiences, they did not lose hope that someday a new world would arise and "The time will come We will again be free."

(These are the concluding lines of the song.)

The Mlawa Jews who did not die in the "Jewish reservation" perished together with those of Mezritch in Treblinka. Also the Jews who remained in Mlawa as slave laborers either were exterminated there, or were gassed in the ovens of Chelmno and Oswiecim.

"I imagined," said Israel Goldstein, "if I returned to Mlawa, I'd find there an historic marker memorializing the slaughtered Jewish community. Hadn't the Jews lived there for generations? Hadn't they created there and made Mlawa into a town? Furthermore, hadn't the Poles inherited all Jewish possessions?

To my great sorrow, I encountered there a great tragedy. A shameful act was perpetrated by local Polish hooligans."

Remarkably, the handful of Mlawa Jewish Holocaust survivors returned to Mlawa to erect a monument in memory of the destroyed Jewish community. First, they exhumed the remains of the fallen martyrs. Then, they placed the remains in a common brotherly grave. Lastly, they erected on the grave a tombstone commemorating the destroyed community.

The gravestone remained intact a few weeks. Then one night a gang of murderous Poles crushed it to pieces.

"As I was holding fragments of the crushed gravestone in my hands," related Goldstein, "I felt as if I was holding broken bones of the Treblinka martyrs."

This hideous crime marked the end of the illustrous history of the Jewish Community of Mlawa. ●

## ROLLBACK MEDICARE DEDUCTIBLES AND COINSURANCE PAYMENTS

### HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. PEPPER. Mr. Speaker, there is a story that is told about a man who owned just one pair of boots. He could not afford to buy a pair of boots very often, but owning a pair of boots gave him what he needed. It saved him the embarassment of being seen in public without a pair of boots. When he walked to town, he put on the boots only after he reached the city limits. You see saving wear on those boots meant that he could keep up appearances, and keeping up appearances meant more to him than the protection of his feet.

In this country there are many older people on fixed meager incomes who understand very well why the man who owned just one pair of boots did not put them on until he could be seen in public. They are living their lives as though a denial of poverty were woven into the very fabric of their being. We are told that about 16 percent of those age 65 or over only have income below the threshold of poverty. Yet it is doubtful that half of those at or below the threshold of poverty either admit or feel that they are poor.

Much of what I say is more than just speculation. It is confirmed by what I have heard in hours and hours of testimony as chairman of the Committee on Aging. One of our witnesses, Daphne Krause of the Minneapolis Age & Opportunity Center, in telling us how older people skimp on medical services to keep up appearances, said:

As we do grow older, and if our health deteriorates, and we find that our limited income and resources cannot cover the costs above medicare for medical care we need, we delay getting medical help until our situation is serious, then we painfully draw on our precious savings, knowing they are irreplaceable. Under our "medi-supportive" concept (at the Minneapolis Age & Opportunity Center), which I will explain, we are serving over 8,000 people. We had become aware that many of our clients were not receiving needed medical care. The consequences were sickening, as you will hear. Many ended up in nursing homes too soon or died needlessly. Seniors will go without every time, rather than run up bills they can't pay.

The Abbott nurses and MAO counselors were screening 100 patients a day, having to make the agonizing choice between the sick and the sick, as to who would see a doctor. One client walked in with a handkerchief over a cancerous hole in the cheek; another with an aneurysm as big as a grapefruit. Another had a heart attack 5 days before and decided not to get help until they heard about us.

Ms. Krause is not talking about a time before the coming of medicare. The people she is talking about had medicare. They just could not afford medicare deductibles and coinsurance. As the cost of hospital services soar, the medicare hospital deductible has gone up too. In fact the formula under which the hospital deductible is raised each year is directly related to increases in the inpatient hospital per diem rate. Everyone knows that the rise in medical costs outpace most other consumer items. This means that the rise in the hospital deductible has been more than proportionate to the increase in wages and consumer items.

After being admitted to a hospital, a medicare insured must now pay $144 during the initial stages of hospitalization before medicare takes over. Medicare then pays the reasonable costs of hospitalization through the 60th day. After the 60th day, and up to the 91st day, the medicare insured is required to pay $36 of the cost incurred for each day of hospitalization. After the 90th the medicare insured may elect to draw upon the 60 day lifetime reserve. If this election is made, the medicare insured

must pay $72 of the cost of each day of hospitalization after the 90th day.

Under Part B of medicare—(Supplementary Medical Insurance Benefits)—which covers outpatient services, the insured must pay out of pocket the first $60 of medical items and services, after the $60 deductible has been satisfied, the insured is entitled to reimbursement for 80 percent of the reasonable charges for necessary medical services.

For those of us who are employed, and drawing good wages, these medicare deductibles and coinsurance payments would not be an obstacle to medical treatment. Consider, however, the circumstances of most medicare insureds. Other than their social security retirement benefits, they do not have much income, and for them these deductibles and coinsurance payments all too often mean doing without groceries in order to receive medical treatment.

To bring medicare deductibles and coinsurance payments within the reach of senior citizens again, I introduced a bill today which will, if enacted, lower to $20 the current hospital deductible of $144, rollback to $5 per day the hospitalization coinsurance payment of $36 per day that applies between the 61st and 90th days, and to $10 the daily hospitalization coinsurance payment of $72 per day that applies to the 60 day lifetime reserve.

Rather than taking the additional cost of the proposed amendments from payroll taxes, the bill proposes to pay the cost of lower deductibles and coinsurance payments from general revenues. This method of financing the amendments would avoid any increase in social security payroll taxes which have already been criticized for being too high and too regressive. Financing a part of the medical insurance trust funds from general revenues is not without precedent. About half of the cost of the supplementary medical insurance program is now paid from general revenues.

This country should be willing to commit itself to removing all impediments to providing medical necessities for those age 65 and over. Whenever I think of the testimony of witnesses who came before the Select Committee On Aging, and told us about older people who in quiet desperation were allowing life to slip away because medicare deductibles and coinsurance payments are too high, I know that a rollback in medicare deductibles and coinsurance payments can wait no longer.●

## HONORING ELIZABETH AGNES PIGOTT

### HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 6, 1978*

● Mr. PHILLIP BURTON. Mr. Speaker, on Friday, September 22, 1978, the American Irish Alliance of San Francisco will honor one of the truly good and generous women of San Francisco, Mrs. Elizabeth Agnes Pigott. Elizabeth Pigott's life of "good works" has earned for her a special place in the hearts of all who know her and have shared the warmth of her friendship.

Born Elizabeth Agnes O'Hara in Domahaire County Leitrum, Ireland, she immigrated to the United States in 1912. She spent 6 years in Rochester, N.Y., before settling in San Francisco in 1918.

It was in San Francisco that same year that she met and married Patrick James Pigott at St. Peter's Church. They lived at 23d and Kansas Streets in the, then predominantly Irish, Potrero district. In 1933, the Pigotts moved to 2865 Harrison Street, closer to St. Peter's Church where they were very active. The balance of the 57 years of married life which they shared was spent at Harrison Street until Patrick Pigott's death in 1975.

Elizabeth Pigott is a woman who is concerned for others and that concern prompted her to action. Upon her arrival in San Francisco, Elizabeth Pigott joined the Father Yorke Division of the Ancient Order of Hibernians and the Connaught Ladies Auxiliary. With these beginnings, she has developed a reputation of charitable work and espousal of worthy causes which has made her preeminent in San Francisco's American Irish community.

Her name and her Harrison Street address have become household words in St. Peter's Parish and in the Irish community. The basement of her home served as a meeting place for young Irish men and women new to this city. Many of today's San Francisco Irish families had their start with the meetings of these young people at dances held there. For the Harrison Street basement was the scene of many dances and fundraising activities which sponsored the work of Irish priests and nuns working in the foreign missions or which helped local families who were down on their luck or who had sickness in the family. The Harrison Street basement was a little bit of Ireland transplanted to the San Francisco Mission district and from it Elizabeth Pigott ministered to the needs of those about her.

The San Francisco Irish community can claim with great pride that Elizabeth Pigott is their "first lady." For indeed, she is a great and good lady. She is a tireless worker who radiated, by her cheerfulness and happy disposition, the jov of helping and being concerned for others.

The basement on Harrison Street is now quiet but it has been said by leaders in the Irish community that it was the forerunner of the United Irish Cultural Center where she will be honored.

Elizabeth Pigott is one of those rare good people who has enriched the lives of all with whom she had come in contact. I share these thoughts with my colleagues in the House to honor her, knowing full well that her greatest honor and satisfaction comes from knowing that she has lived the Biblical injunction to "feed the hungry, clothe the naked, visit the sick, and comfort the afflicted." ●

## SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committees scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, September 7, 1978, may be found in Daily Digest of today's RECORD.

### MEETINGS SCHEDULED

#### SEPTEMBER 8

9:00 a.m.
Energy and Natural Resources
Public Lands and Resources Subcommittee
To hold hearings on S. 876, to provide relief to the residents in the Vermejo Conservancy District, New Mexico, and on miscellaneous land conveyance bills.
3110 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 2970, proposed Truck Safety Act.
235 Russell Building

10:00 a.m.
Finance
To continue markup of H.R. 13511, to reduce income taxes.
2221 Dirksen Building

Joint Economic
Priorities and Economy in Government Subcommittee
To hold hearings on the economic and budgetary effects of the proposed shipbuilding claims settlements on shipbuilding and Navy procurement.
5302 Dirksen Building

Special on Aging
To resume oversight hearings on the implementation of P.L. 95-256, to increase from 65 to 70 years of age limit for retirement under the Age Discrimination in Employment Act.
5110 Dirksen Building

#### SEPTEMBER 11

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on the nomination of Nancy Hays Teeters, of Indiana, to be a Member of the Board of Governors of the Federal Reserve System.
5302 Dirksen Building

Finance
To continue markup of H.R. 13511, to reduce income taxes.
2221 Dirksen Building

#### SEPTEMBER 12

9:00 a.m.
Judiciary
Administrative Practice and Procedures Subcommittee
To hold hearings on S. 2011, proposed Regulatory Reduction and Congressional Control Act.
2228 Dirksen Building

9:30 a.m.
Energy and Natural Resources
Business meeting on pending calendar business.
3110 Dirksen Building

10:00 a.m.
Finance
To continue markup of H.R. 13511, to reduce income taxes.
2221 Dirksen Building

Foreign Relations
To hold a business meeting on pending calendar business.
4221 Dirksen Building

Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To hold hearings on S. 3284, to establish a minimum price preference for domestic goods, and to insure that the Federal Government does not purchase unfairly traded goods.
3302 Dirksen Building

11:00 a.m.
Veterans' Affairs
To hold hearings to receive legislative recommendations for FY 79 from representatives of the American Legion.
318 Russell Building

5:00 p.m.
Finance
Public Assistance Subcommittee
To hold hearings on S. 3470, proposed State and Local Welfare Reform and Fiscal Relief Act.
2221 Dirksen Building

SEPTEMBER 13

9:00 a.m.
Judiciary
Administrative Practice and Procedures Subcommittee
To continue hearings on S. 2011, proposed Regulatory Reduction and Congressional Control Act.
2228 Dirksen Building

9:30 a.m.
Energy and Natural Resources
Business meeting on pending calendar business.
3110 Dirksen Building

10:00 a.m.
Finance

# SENATE—*Thursday, September 7, 1978*

*(Legislative day of Wednesday, August 16, 1978)*

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by Hon. PATRICK J. LEAHY, a Senator from the State of Vermont.

## PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O Lord, our God, grant us clean hands and pure hearts to stand unblemished in Thy holy presence. Divest us of all that is mean and ugly and destructive. Invest us with that which is beautiful and good and true.

"Reclothe us in our rightful mind,
In purer lives Thy service find,
In deeper reverence, praise."

May we welcome this new day as a great adventure, with our spirit mastered by Thy spirit, that we may serve this Nation in a manner which sets forward Thy kingdom on Earth. Bless this Nation with wisdom and justice that it may be a blessing to the world.

We pray in the Great Redeemer's name. Amen.

## APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
*Washington, D.C., September 7, 1978.*

*To the Senate:*

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable PATRICK J. LEAHY, a Senator from the State of Vermont, to perform the duties of the Chair.

JAMES O. EASTLAND,
*President pro tempore.*

Mr. LEAHY thereupon assumed the chair as Acting President pro tempore.

## RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia is recognized.

## THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I be recognized following the expiration of time for the two leaders, and again following the expiration of routine morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. JACKSON. Will the Senator yield for a unanimous-consent request?

Mr. ROBERT C. BYRD. I yield.

## PRIVILEGE OF THE FLOOR—CONFERENCE REPORT ON H.R. 5289

Mr. JACKSON. Mr. President, I ask unanimous consent that the following members of our committee staff be granted the privileges of the floor in connection with the natural gas conference report on H.R. 5289; June Diamond, Dan Dreyfus, Mary Flanagan, Grenville Garside, Mike Harvey, and Betsy Moler.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ABOUREZK. Mr. President, may I add to that list the names of Bethany Weidner, Alvin Duskin, Kevin Murray, Mimi Mager, Irene Emsellem, and Glenn Feldman.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Chair, in his capacity as a Senator from the State of Vermont, will add the name of Sue Brannigan to be granted the privileges of the floor.

Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished acting minority leader.

Mr. HANSEN. Mr. President, I ask unanimous consent that there be added to the list of persons proposed by the distinguished Senator from Washington (Mr. JACKSON) the names of Danny Boggs, Fred Craft, Carol Sacchi, and Nolan McKean.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Has the Senator finished?

Mr. METZENBAUM. Will the Senator yield for another unanimous-consent request?

Mr. ROBERT C. BYRD. I yield.

Mr. METZENBAUM. Mr. President, I wish to add the additional names of Dan Grady, Barry Diernfeld, Rick Wilson, Rick Sloan, and Roy Meyers, that they be granted the privileges of the floor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I also ask unanimous consent that Howard Shuman of my staff be granted the privileges of the floor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I understand the Senator from Wisconsin would like to have some time.

Mr. PROXMIRE. I would like to have 3 minutes.

Mr. ROBERT C. BYRD. I yield such time as the Senator may require from my time.

## CAMBODIA: A CONTINUING REMINDER OF THE NEED FOR THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, it seems that every day we are confronted by new reports from Cambodia, each more shocking than the last. The Cambodian Government has attempted to cut that country off from the world, to keep under wraps their systematic decimation of the Cambodian people and their past.

But word has leaked out. And what has leaked out is, as I said before, utterly shocking.

In a report submitted 2 weeks ago by our Government to the United Nations, interviews with 22 refugees who fled from Cambodia into Thailand tell a gruesome tale. With a frightening lack of respect for life, the soldiers of the Khmer Rouge now resort to the death penalty at the slightest provocation. The most trivial offenses can cost a person their life. The refugees cited lateness to work as the most common offense warranting capital punishment. Complaints over food, work, or other conditions are also liable to this extreme measure.

Mr. President, what can we do? The U.S. Government has been forthright in bringing these atrocities to the attention of the world, but this has so far had little effect on conditions within Cambodia. Senator MCGOVERN has raised the question as to whether or not an international military force be formed to put an end to the disregard of human rights in Cambodia.

Mr. President, the situation in Cambodia must be remedied. The world must find the means to put an end to this bloodshed.

The situation in Cambodia, which can properly be called genocide, should remind the Senate of another matter that ought to be set right. The United Nations took action three decades ago to define and outlaw genocide. The treaty the U.N. proposed has awaited Senate ratification since 1949. In the meantime, 83 other nations have signed the treaty, including almost all of our allies.

The Genocide Convention will not stop genocide in Cambodia. Cambodia is not a party to the convention. But in the same way that the Geneva Conventions for the Treatment of Prisoners of War have improved the treatment of captured soldiers, the Genocide Convention can act as a deterrent to the sort of inhumanity we witness in Cambodia today.

However, for the Genocide Convention to have any effect, it must have the support of many nations, particularly the major powers. So long as the United States holds back its full support, the treaty has little chance of actually deterring genocide.

We must not wait for another massacre on the scale of Cambodia's before acting. Lets act now, to prevent and punish the crime of genocide.

## WOMEN IN COMBAT: PRO AND CON

Mr. PROXMIRE. Mr. President, in the pro-con forum of the September 1978 American Legion Magazine, Maj. Gen. John K. Singlaub and I debate the question, "Should women be used in military combat?"

On the "pro" side I argue that all soldiers should be assigned to duty based on ability, not gender. Women should serve wherever they are needed, according to their capabilities, just as men are assigned according to need and ability. And many women are capable of fulfilling combat duty, as experience and numerous Defense Department studies have shown.

General Singlaub, with his long experience in the service, feels that many women are incapable of carrying out the physical duties associated with combat and that men tend to be protective of women in dangerous situations, thus weakening combat effectiveness.

Mr. President, I ask unanimous consent that the "pro" and the "con" positions be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SHOULD WOMEN BE USED IN MILITARY COMBAT?

"YES"—BY SENATOR WILLIAM PROXMIRE

The two objections most often heard to using women in combat are 1) concern for the women's safety and 2) doubts that women can carry out combat duties.

Concern for women's safety, while well-intentioned, is misplaced. Women today are inner city police officers, skydivers, race car drivers and firefighters. If a qualified woman wants to volunteer for dangerous duty, she should be free to do so. It's her decision to make, not the government's, which makes far too many of our decisions for us. The establishment of the all-volunteer force makes military service today a matter of choice, and women are waiting in line to serve.

No one wants to send women into combat, but as one woman testified before my subcommittee, "I find it doubtful that mothers or fathers weep more for their daughters than for their sons."

Certain types of combat duty require a level of strength which many women may not possess, and those women should be deployed elsewhere, just like weak men. But if some women are strong enough and qualified in every other way, there is no reason to exclude them.

Women who now serve in combat-support positions have been trained in defensive combat techniques, for their units could well come under enemy attack. Offensive combat is but one step further. The Army now gives the same seven-week basic training to men and women, including grenade throwing and use of a variety of arms.

The performance of women in past wars proves that women can make a tremendous contribution to our war effort. Women's Air Force Service pilots have trained male pilots in strafing, bombing, tracking and anti-aircraft fire, and during WW II a Russian all-woman fighter unit shot down 38 German aircraft.

Interestingly, the General Accounting Office reports that women lose about one-half as much time from duty as men—including time taken for pregnancy.

The discrimination against women by our armed services is an affront to the American sense of fair play and the ideal of equal opportunity, which our government professes to follow. Until recently women were excluded from such "combat" jobs as missile launch crews in the Midwestern United States.

Combat duty is the traditional route upward in all military services, but women now in the service cannot follow that route. Limiting the woman's role is also unfair to the men, who must shoulder all unpleasant duty including very long stretches at sea. Moreover, it is only fair that women be called upon to defend the freedoms they enjoy as U.S. citizens.

We must spare no effort to maintain a strong, lean, efficient and well prepared fighting force. By closing many combat or combat-related positions to women, however, the armed services are weakening our defense effort by refusing to let qualified personnel serve where they are needed.

No less than the Commander of the Marine Training Base at Parris Island, SC has declared that, "there is no reason the female can't fight just like the male." I agree.

"NO"—BY MAJ. GEN. JOHN K. SINGLAUB, USA (RET.)

The primary mission of the United States Army is to preserve the peace by being instantly ready to engage in combat operations any place in the world. The ability to fight and win battles is too important to the security of this nation to permit the Army to be used as an instrument for sociological experimentation. Until such time as there is some evidence that women can withstand the extreme physical, mental and psychological stresses of battle, it is foolhardy, if not dangerous, to run the risk of reducing the combat capability of our Army by including women in units whose primary mission is to engage in actual combat operations.

This does not mean that there is no place for women in the Army. There are many jobs in the Army that can be performed better by women. The nation can ill afford to ignore or under-utilize the great reservoir of brainpower and skills represented in the women of our nation. There are, however, several important reasons why these highly motivated and patriotic female members of the Army should continue to be excluded from combat units.

First of all, the battlefield is a very physical place. The infantryman, cannoneer and tanker are routinely called upon during battle crises to demonstrate great feats of upper body strength to preserve lives and equipment. The tasks of digging for shelter, moving ammunition and changing tank tracks are shared by all members of the unit, including the clerks, cooks and mechanics. All require the muscle structure and exertion normally associated with a defensive tackle on the Denver Broncos' football team. Most physiologists agree that for the foreseeable future far more men than women will be capable of meeting the physical demands of these situations. With women in combat units, the male soldiers would be required to carry an increased share of these critical physical requirements, thereby limiting the units' responsiveness to crisis situations.

In my experience, women in combat have an adverse impact on the male soldiers in the area. Men tend to be protective of women.

During the tree-trimming crisis in Korea in August 1976, many good soldiers were so concerned about their soldier wives or girlfriends or their subordinate women that they left their duty stations to see to their welfare or evacuation to the rear areas. In fact, most of the women soldiers expressed the desire, if not the expectation, to be removed from the potential battle areas.

Another factor which suggests we should not permit our women soldiers to be used in combat is the image that this would project in the minds of our potential enemies.

At one time Russia and Israel used women in combat roles in their military forces, but both have now made it a matter of national policy that women will not be used in combat again. God forbid that we must go to war to learn the same lesson.

Mr. PROXMIRE. Mr. President, I thank the distinguished majority leader for so graciously yielding to me.

Mr. ROBERT C. BYRD. Mr. President, I reserve the remainder of my time.

## RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Under the previous order, the acting minority leader, the Senator from Wyoming, is recognized.

Mr. HANSEN. Mr. President, I do not believe I have any requests at this time. I thank the Chair.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from West Virginia is recognized.

## NATURAL GAS POLICY ACT CONFERENCE REPORT

UNANIMOUS-CONSENT REQUEST

Mr. ROBERT C. BYRD. Mr. President, I have asked for recognition at this time in order to propound a request of the Senate. It would be for the purpose of allowing debate to go forward on the natural gas conference report without any danger of a surprise motion to table that conference report being made, catching Senators on both sides of the aisle, Senators on both sides of the question, out of town. It would be for their protection.

It would also provide for a vote to occur up or down, with no tabling motion in order, on the proposed recommittal motion. I would suggest that the vote occur, say, next Wednesday, at a given hour.

This would alert every Senator on both sides of the aisle, every Senator on both sides of the question, as to the hour and the date when such vote would occur. It will be a critical vote and I am sure every Senator would like to be here and to be recorded. It would give ample time, in the meantime, to debate the issue. All Senators would be on notice. There would be no surprise motion to table. All Senators would be on notice as to the hour and the date for the vote on the motion to recommit.

Of course, I would like to have the agreement specify that if the recommittal motion were to fail, we would immediately vote up or down on the conference report, or vote after another day or so of debate on the conference report. I have discussed that with my colleagues and I have found that that would be objected to.

But there was some indication on the part of some Senators last evening that

they would be willing to enter into an agreement to go as far as providing that there be no surprise tabling motions on the conference report, providing that there be a vote up or down on the motion to recommit next Wednesday at a given hour. There may be someone here who would object to that.

Mr. METZENBAUM. Will the majority leader yield for a question?

Mr. ROBERT C. BYRD. Certainly. I have not propounded the request, but that lays the groundwork for the request I shall make.

Mr. METZENBAUM. Does the majority leader also intend to include in his request that there be an opportunity for a tabling motion with respect to the motion to recommit? Does that count in the discussion of the majority leader?

Mr. ROBERT C. BYRD. I would prefer to leave open the right of Senators to move to table. But I would be willing—it is perfectly agreeable to me to waive that right by unanimous consent of the Senate so that Senators would be guaranteed an up or down vote on the motion to recommit if, in turn, they would guarantee that there be no surprise votes on moves to table the conference report when many Senators might be out of town.

Mr. METZENBAUM. As I indicated to the distinguished majority leader last evening, I personally have no problems with that particular approach, but as I also indicated this morning, I find that there are others who do have a strong interest in this legislation which has been evidenced over a period of many years—far longer than I have been here, for that matter—and who do have a different point of view than I do. They certainly can address themselves to that subject.

Mr. ROBERT C. BYRD. Certainly.

Mr. President, I make the request and Senators may reserve the right to object.

Mr. ABOUREZK. Reserving the right to object.

Mr. HANSEN. Mr. President, will the distinguished majority leader repeat the request?

Mr. ROBERT C. BYRD. Yes.

Mr. President, I ask unanimous consent that when Mr. JACKSON calls up the conference report, a vote occur on a recommittal motion which will be made by Mr. METZENBAUM and others, such vote to occur, up or down, on the motion to recommit next Wednesday at 4 o'clock p.m.; that in the meantime, no motion to table the conference report or recommit the conference report be in order; and that the time between the calling up of the conference report and the vote at 4 o'clock on next Wednesday on the motion to recommit be equally divided between Mr. JACKSON and Mr. HANSEN.

Mr. ABOUREZK. Reserving the right to object.

Mr. THURMOND. Mr. President, reserving the right to object.

The ACTING PRESIDENT pro tempore. The Senator from South Dakota is recognized.

Mr. ABOUREZK. Mr. President, I am not desirous, nor am I in a position to agree to any unanimous-consent agreement with respect to time or time of voting on the natural gas conference report. I say to the distinguished majority leader that we are prepared, if they want to bring the conference report up now, we are happy to debate it. I think it is a very serious, very complicated matter that will require a thorough analysis by the Senate. There have been all kinds of backroom lobbying, we know that, on both sides. But there has been very little light shed on this issue. We were somewhat prevented from doing so during the conference meeting itself, from debating this issue or inquiring into it to find out the impact upon the public of this bill.

I think we are entitled to do that here, on the Senate floor, as I promised during the few times I was able to be recognized to speak on the issue during the conference meetings that I was invited to.

So, while we do not necessarily want to prevent a vote—incidentally, I might say that I spoke to the distinguished chairman of the Committee on Finance (Mr. LONG) this morning by telephone. He said that I was authorized to speak for him in making this particular objection, for the same reasons; and that if we bring it up, we might vote this afternoon, we might vote tomorrow. The vote might come quicker than the leader had anticipated. Therefore, I do not want to set a time agreement or agree to a time agreement on my own.

I, therefore, object to the request.

Mr. ROBERT C. BYRD. Mr. President, before the Senator objects, let me modify the request to provide for a vote, the vote on the recommittal motion up or down on next Wednesday, to be at 3 o'clock p.m. rather than 4 o'clock p.m.

Mr. ABOUREZK. I have the same objection.

Mr. METZENBAUM. Mr. President, I would have to object to that.

The ACTING PRESIDENT pro tempore. Objection is heard from the Senator from South Dakota.

Mr. METZENBAUM. The time is what I would object to. It would have to be later in the afternoon. Certain Senators have an election on Tuesday and would have difficulty getting back.

Mr. ROBERT C. BYRD. The Senator has a good point. The objection has been made, in any event.

Mr. President, I suggest that we now have a period for the transaction of routine morning business.

## ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business of not to exceed 10 minutes, with statements therein limited to 2 minutes each. Under the order entered this morning, the majority leader, the Senator from West Virginia, is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield my 2 minutes to the Senator from Wisconsin.

(The remarks of Mr. PROXMIRE at this point in connection with the introduction of a bill are printed later in today's RECORD.)

## CONCLUSION OF ROUTINE BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If there be none, morning business is closed.

## UNANIMOUS-CONSENT REQUEST

Mr. ROBERT C. BYRD. Mr. President, may I have the attention of the distinguished Senator from South Dakota?

Mr. ABOUREZK. Yes, Mr. President.

Mr. ROBERT C. BYRD. I wish to make one further proposal which would allow us to proceed with debate on the conference report. It would be simply this: That no motion to table the conference report or to recommit it be in order prior to next Wednesday at 4 o'clock p.m.

Mr. ABOUREZK. Yes; Mr. President. to object, Mr. President, it is virtually the same request that the leader made before, slightly modified. For the same reasons, I should have to enter an objection, so I object.

The ACTING PRESIDENT pro tempore. Objection is heard.

## ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I be recognized following the call of the quorum. The reason I do that is that I think I am going to call up something else, and I want to see what else there is that managers are ready to call up.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## NATURAL GAS POLICY ACT CONFERENCE REPORT

UNANIMOUS-CONSENT REQUEST

Mr. ROBERT C. BYRD. Mr. President, I am about to propound another unanimous-consent request.

Mr. President, I would like to see the Senate proceed with debating the conference report on natural gas. It would

certainly not be my plan to offer any cloture motion—if this agreement were to go into effect, it would not be my plan to offer any cloture motion at least until 4 or 5 days of debate have occurred.

It is merely to protect Senators against surprise motions to table the conference report that I make the request. They do not have to be protected against a recommittal motion, because that is a debatable motion.

There are Senators on both sides of the question who need to be protected. There are Senators on both sides of the aisle who need to be protected against a surprise, sudden motion to table the conference report, which is not debatable.

Therefore, in the interest of debating the conference report pro and con, educating Senators and the people as to what is in the conference report, what is involved in the issue, and so on, today and tomorrow, Monday and Tuesday, I ask unanimous consent that, if the conference report is called up, no motion to table the conference report be in order until after a motion to recommit the conference report has been voted on, up or down. This request, as all Senators will note, protects against a sudden tabling motion. And I include the request that this protection run until 6 p.m. next Wednesday.

Mr. ABOUREZK. Reserving the right to object, Mr. President, for the same reasons that I discussed earlier with the distinguished leader, I am very reluctant to give up any rights we have on the natural gas conference report. In my view, agreeing not to offer or not to allow a motion to table a conference report—this conference report, in particular—I think is the yielding of a substantial right on my part, which I do not wish to do at this time.

I will elaborate a little further. Those of us who are opposed to the natural gas conference report do not really have the ability to do the backroom arm twisting that the President and his people have done and are able to do. We find it essential to be able to debate this conference report out in the open, on the record, here in the Senate, and to preserve our rights. I, for one, cannot give up my rights.

For example, Senator LONG asked me to object to any agreements, on his behalf, this morning. He does not want to give up any of his rights. We are not trying to prevent a vote from taking place on the conference report. We are happy just to go along with the rules of the Senate, if we can, and do whatever is necessary. But we do not want to give up the right to make any motions we might be able to make on the conference report.

So, I object.

The ACTING PRESIDENT pro tempore. Objection is heard.

Mr. ROBERT C. BYRD. May I say, respectfully, to the distinguished Senator that my proposal would allow for debate, number one. That is why I would like very much for the Senate to accede to the request. It would allow for debate. The only right the Senators would be giving up would be the right to move to table the conference report without due notice to other Senators.

However, in giving up that right, I also would be giving up the right, as other Senators would, to move to table the motion to recommit, when made. So there is a balancing out of the waiving of rights.

Furthermore, there is an election next Tuesday, and a good many Senators on both sides of the aisle are involved in those elections. It was for the purpose of delaying any untoward happening until late Wednesday that we had the election in mind, so that Senators who need to be here to cast a vote would not be out of town.

I hope the Senator will think about it during the day. If he and those who are working with him in his cause could agree on a time and date and a way to protect against a sudden tabling motion, I would be very glad to hear from them, because I would like to have debate today and Friday of this week on this measure.

Mr. METZENBAUM. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. METZENBAUM. Mr. President, there is probably nobody in the Senate with whom I have worked more closely than my distinguished friend from South Dakota. I am not in total agreement in this matter. That does not mean we are not in total agreement——

Mr. ROBERT C. BYRD. Before the Senator from South Dakota leaves, I would like to change the time to Thursday, at 2 p.m.

Mr. ABOUREZK. I object, for the same reasons.

The ACTING PRESIDENT pro tempore. Objection is heard.

Mr. METZENBAUM. My feeling is—and I said this to the leader yesterday—that I was prepared to debate this matter as of today, bring it to a vote on Tuesday. As a matter of fact, I think I called and made that proposal. Later in the day, I indicated that it was necessary to check with some others who do have a strong interest in this legislation—the distinguished ranking member of the minority on the Energy Committee, my good friend from South Dakota, the chairman of the Finance Committee, and others.

I think the concern that has been expressed with reference to those who are back home campaigning and who cannot be present to vote, in the event there is a motion to table, is a valid concern. So I have indicated to the majority leader that I would be prepared to agree to the unanimous-consent request relative to making no motion to table until at least the motion to recommit has been disposed of, it being implied in the majority leader's request that the specific motion to recommit, about which he is speaking, is the one that the Senator from Wyoming, the Senator from South Dakota, the Senator from Oklahoma, and I intend to offer.

I say to the majority leader that I hope that this matter still can be brought up and debated.

I have indicated to my good friend from South Dakota my own views. I think he properly is speaking for the chairman of the Finance Committee, who has concern about this matter.

I suggest that we at least spend time, not immediately, but provide a period in order that further discussion might be had on the subject. I support this effort to move the matter forward. I think we have the votes, and I think we ought to go.

Mr. ROBERT C. BYRD. I thank the Senator. He has been most cooperative and considerate.

So, for the time being, and hoping that some agreement might yet be reached during the day, I ask unanimous consent that the Senate proceed to the consideration of——

Mr. BARTLETT. Mr. President, will the Senator yield for a very short comment?

Mr. ROBERT C. BYRD. I yield.

Mr. BARTLETT. I thank the distinguished Senator from West Virginia. My comment will be very brief.

I hope we can proceed to the consideration of the conference report. In my opinion, there will be the need for considerable time for debate, because there are at least three points of view to be expressed, and there probably are variations of those by individual Senators.

I think that in order to have a meaningful debate, in which all facets of the different points of view may be clearly outlined, it will take considerable time.

So I hope that the distinguished majority leader will find it possible to bring up this matter as soon as possible, and I and other Senators will be happy to work with him to bring that about.

Mr. ROBERT C. BYRD. I thank the distinguished Senator. I appreciate his sentiments.

I perhaps should state at this time that only 5 weeks remain after this week until Saturday, October 14, the date on which we hope to see Congress achieve a sine die adjournment. I, for one, do not want to return after the election, but it may be necessary, if we do not complete our work. So every day now counts, and the calendar is running, and I hope we all will keep that in mind, because we have to settle this issue, up or down.

We have spent 16 months in this Congress already on this matter, and Senators ought to have made up their minds at this time; or, after a reasonable period for debate, they will have made up their minds one way or the other.

I think we should vote on the matter, up or down, and let it be the will of the Senate, and then go on to other matters. Nothing is going to be served by overly prolonging this debate and a final decision on the conference report.

We still have the defense appropriation bill. We have the HEW appropriation bill. We have the foreign assistance appropriation bill. We have the tax cut bill. We have several expiring authorization measures.

With only 5 weeks to go after this week, Senators can see what we are up against, if we are to entertain even a reasonably fair hope of completing our work by October 14, so that we will not have to come back after the election. My experience has been that post-election sessions are not very productive. Tempers are frayed, and we tie ourselves in knots. We get into wrangles among ourselves and with the other body and create a bad impression back home—or at least worsen the impression that may be created if we do not act in a reasonable period of time on this energy measure.

So, for one, let me enter a plea and a prayer to the good Lord that somehow we will be able to work out this thing and get out of here on October 14 and a plea and a prayer to my colleagues that they give consideration to this also.

I know, Mr. President, that once the election comes there is not a Senator in here who is going to want to come back, not one.

The ACTING PRESIDENT pro tempore. The Chair concurs.

Mr. ROBERT C. BYRD. As of today, September 7, not too many Senators have really drawn target on that sure date that is coming, but when the time comes and we get down to the end of the road—I know in the meantime we do not want to come in on Saturdays and do not want to stay late, we want to get out on October 14 no later than for the election—they are not going to want to come back to the Senate until next year.

They are all going to want to stay away. So if we want to stay away then, now is the time to think about it.

Remember the fable about the grasshopper. The grasshopper spent all of the summer singing his tune, but then came the winter and he had not laid in any harvest for the winter.

The time is coming. The time is coming when after the election Senators will say: "I wish I didn't have to pack my bags and go back to Washington. I just wish we didn't have to go back."

All right. Let us think about that.

## JUDICIAL TENURE ACT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 957, S. 1423.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1423) to establish a Council on Judicial Tenure in the judicial branch of the Government, to establish a procedure in addition to impeachment for the retirement of disabled Justices and judges of the United States, and the removal of Justices and judges whose conduct is or has been inconsistent with the good behavior required by article III, section 1 of the Constitution.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary with an amendment in the nature of a substitute.

The ACTING PRESIDENT pro tempore. Under the previous order debate is limited to 6 hours equally divided between the Senator from Arizona (Mr. DECONCINI) and the Senator from South Carolina (Mr. THURMOND).

Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I express the hope that we will be able to cut this time down. I do not think it will take anything like the time that is set forth in the agreement. But until the managers, who have not been alerted to the sudden calling up of the bill, can get to the Chamber, I suggest the absence of a quorum and ask unanimous consent that the time be equally charged against both sides on the bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## UNIFORM BANKRUPTCY LAW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of calendar order No. 1026.

The ACTING PRESIDENT pro tempore. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (S. 2266) to establish a uniform law on the subject of bankruptcies.

There being no objection, the Senate proceeded to consider the bill to establish a uniform law on the subject of bankruptcies, which had been reported by the Committee on the Judiciary with an amendment in the nature of a substitute, and from the Committee on Finance with amendments to the substitute language.

The ACTING PRESIDENT pro tempore. The time on the bill is limited to 1 hour divided between the Senator from Arizona (Mr. DECONCINI) and the Senator from Wyoming (Mr. WALLOP).

Who yields time?

Mr. BAYH. Mr. President, I ask unanimous consent that Nels Ackerson, Marcia Atcheson, Kevin Faley, and Louise Milone of the staff of the Subcommittee on the Constitution, and Mike Klipper and Joe diGenova of Senator MATHIAS' staff be permitted access to the floor during the debates and voting on the Judicial Tenure Act and the Bankruptcy Act.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. HATCH. Mr. President, I thank the Senator. I ask unanimous consent that Mike Hunter and Tom Perry of my staff be granted the privileges of the floor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond 15 minutes with statements limited therein to 5 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Who yields time?

Mr. HATCH. I yield myself such time as I may need, and I ask unanimous consent that the time not be charged against the bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield to me?

Mr. HATCH. I am delighted to yield.

Mr. ROBERT C. BYRD. Mr. President, the Pastore rule requires that Senators speak only on the subject matter before the Senate for the first 3 hours after the pending business is laid down or the unfinished business is laid down. I thank the Senator for yielding, and I ask unanimous consent that his statement not show an interruption in the RECORD, but I ask the Chair not to entertain any requests while I am off the floor that Senators speak on other matters than the matter before the Senate until we can get the managers of this bill seated, so that they can do whatever they like.

The ACTING PRESIDENT pro tempore. The Chair appreciates the comment of the majority leader and will pass on the word to succeeding Presiding Officers.

Mr. HATCH. I just wanted to put these two speeches in the RECORD. I should have asked to waive the Pastore rule.

Mr. ROBERT C. BYRD. The Senator had not asked to waive the rule?

Mr. HATCH. I did not ask to waive the rule.

Mr. ROBERT C. BYRD. The Senator asked that the time not be charged against this measure, and I object to that.

Mr. HATCH. I understand.

Mr. ROBERT C. BYRD. Pardon me for interrupting; I wanted to protect the Senators who are managing this bill, because with that kind of request, a Senator could get the floor and go all day long—all day long—unless someone made a point of order based on the Pastore rule. And once the first 3 hours have gone, that kind of point of order cannot be made.

So I want to protect all Senators. I am

not concerned about the Senator from Utah ever doing something he is not allowed to do under the rules.

Mr. HATCH. I appreciate the distinguished majority leader's comment. Of course, I am going to put these two matters into the RECORD so we will have them there.

I ask unanimous consent that, with regard to my speech on Martin Anderson on welfare reform, it be printed in the RECORD following the bankruptcy bill we are considering today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## MARTIN ANDERSON ON WELFARE REFORM

Mr. HATCH. Mr. President, welfare has been a major concern of the people of this country for many years now. It has been declared a mess and reformed on more than one occasion. Yet many believe we have not achieved the goal of significantly reducing the number of poor people in the United States. Should we seek still another reform before we better understand the problem?

Martin Anderson, senior fellow at the Hoover Institution and author of a book entitled "Welfare," provides much insight into the welfare problems which we face. Indeed, his book provides invaluable information without which we can only expect to make further mistakes.

Anderson reveals many misconceptions upon which welfare reforms are advocated. The first and most basic misconception is the belief that the welfare system has failed to reduce the number of poor in this country. We think it has failed because we are misled by statistics gathered by the Bureau of the Census. But, if the total amount of income given to the poor is considered, it is enough to raise every officially poor family 30 percent above its poverty line. How then is it that the Bureau of the Census tells us that between 1974 and 1975 the increase in the number of poor was the largest since 1959? The only rational explanation of the situation is that the Bureau of the Census has grossly overstated the number of poor.

Martin Anderson reveals some facts which account for this overstatement. First to be questioned is the validity of the information gathered. People may not remember exactly how much their total income was for the past year. Some people may deliberately lie about their earnings, and there is no check on what people themselves report. The major bias, however, is not caused by the incomes reported, but by the incomes not reported. The incomes not taken into account are those services such as food stamps, medicaid, and housing. Thus, a substantial amount of money expended each year to relieve the poor is not counted as income for the poor.

Many experts have known about these statistical biases for years, but the people in Government, who create the welfare programs, do not take them into account. As the benefits of the welfare programs expand and as income thresholds for participants in the programs rise, more people are pulled into the programs. Yet the noncash benefits of the programs are not counted as income to the "poor." It would appear that the way the bureaucrats have it set up, the programs will continue to grow—a prospect that some politicians find appealing. After all, welfare dependencies are politically dependent.

The Congressional Budget Office's study on the amount of poverty in the United States in 1977 found 6.4 percent of the population poor while the Census Bureau reported 12 percent for the same year using the same poverty line. This wide discrepancy is explained by the fact that the Congressional Budget Office allowed for the under-reporting of income while the Census Bureau did not. The gap in estimates becomes even more understandable when one realizes that the $40 billion spent in noncash benefits for the poor were not counted as income in the Census Bureau's report, but were in the Congressional Budget Office's study.

Anderson directs our attention to an even more startling report on the amount of poverty by Morton Paglin, professor of economics and urban studies at Portland State University, in October of 1977. Paglin improved the measures of poverty by allocating benefits according to household size. According to these estimates only 3 percent of Americans were poor in 1975.

Although the amount of poverty as reported by the Census Bureau has remained nearly constant, thus denying the effectiveness of welfare programs, the reports done by the Congressional Budget Office and Morton Paglin show that the level of poverty has declined to very low levels, thus revealing the fact that the welfare programs have successfully raised the poor above the poverty line.

Now that two separate studies have been concluded with more reliable results contrary to those of the Census Bureau, why do the policymakers continue to create more welfare reforms which entail even more spending? Why do we continue to appropriate more money? The Census Bureau, in a manner typical of bureaucratic vanity and self-preservation, ignores the results of the Congressional Budget Office's study. In effect, more and more of the taxpayers' dollars are being given to the nonpoor, because the Census Bureau will not admit its mistakes.

Thus, a situation has evolved whereby billions of dollars—more money than World War II cost us—have been poured into welfare aid since 1964, until there are virtually no poor in this country. Some of the people who are, in the best of studies, counted as poverty stricken are, as Anderson says "in no sense poor." People may be unsure of their incomes or purposefully understating them. They may be living off undeclared assets or possess private incomes, but, considering the vast amount of money—$300 billion to be exact—that has been poured into welfare since 1964, it seems impossible that there could be many poor left in the United States.

These $300 billion were not given merely in the form of cash, they were divided between 90-odd social welfare programs. Most people qualify for two, if not more, of these programs. These $300 billion cannot be compared to earned income, because these $300 billion were tax free.

This is more than waste of money—it exposes a terrible misconception concerning the number of poor in our country, and this misconception has caused the lawmakers of this country to create programs which retard the progress of the poor. Because the policymakers have accepted the Census Bureau's inaccurate figures, they have created more and more programs which further reduce the incentive to work for lower income workers.

After reading Martin Anderson's book one becomes aware that people who prefer unemployment are not so much lazy as they are economically astute. The problem is the welfare trap, which the Government has created, that prevents people from earning a living significantly better than welfare provides.

Anderson points out that the effective tax rates on low earned incomes are very high. I think we would all agree that people work primarily for job satisfaction and for money. If a person does not gain satisfaction from his job, then he is apparently working mainly for the money. If his income is only slightly over the poverty level, he can practically maintain the same level by not working.

His incentive to work is based primarily on his need for income. If employment is his only source of income, then he will work. In our system, however, employment is not the only source of income. There are many others of which welfare is the largest for the least wealthy members of our society. A person cannot work and still enjoy the benefits of welfare. As soon as his income rises above the poverty level then his medicaid and food-stamp benefits are severely cut, if not removed altogether. He cannot significantly increase his income by working. Martin Anderson points out some examples found in a December 22, 1972, press release by the Joint Economic Committee's Subcommittee on Fiscal Policy.

> In New Jersey an unemployed man with a wife and two children receiving public assistance and food stamps would add only $100 to this net monthly income if he took a full time job paying $500 a month. In addition, he would lose eligibility for medicaid, which pays an average of $52 a month for medical bills of an AFDC family in New Jersey.

A person is unlikely to give up his leisure and work a 40-hour week at an unsatisfying job for only a $48 increase in net monthly income. Thus, the incentive to work has not only been destroyed, it has been reversed and an incentive not to work has been created. There is also a strong incentive to under-report income.

The people are caught in a trap created by the Government. The more income

they earn, the more probable that the Government will learn about this income. The more earned income the Government learns about the more it taxes and takes away benefits. The more it discourages work, the poorer the people become. The poorer the people become, the more they need welfare. The more they need welfare the more the Government gives them. It is all perfectly clear up until this point. Now comes the twist: The more the Government gives them the less the number of poor decreases. The Government has created a poverty wall which has entrapped the poorest members of our Nation into what Anderson terms "a new caste: The dependent Americans."

With this thought Anderson reveals that the Government is destroying more than the Nation's economy through its programs. It is destroying a basic American value—work. This destruction is apparent in the amount of money that is repeatedly poured into welfare and the growing welfare dependencies. Democracy is undermined if people are dependent on the Government for their incomes.

President Carter's plan to clean up our welfare system would increase the group of dependent Americans to nearly a third of the entire population. Why should the number of people on welfare, and the cost of welfare, increase so drastically when there are virtually no poor left in this country? Is our Government seeking to make a major part of the population dependent on Government handouts? Whether that is the Government's intention or not, that is exactly what Carter's plan would do if it were ever implemented.

When President Carter first assumed office he laid down 12 goals for this welfare program. One of these goals was that the cost would not increase. Then Secretary of HEW, Joseph A. Califano and Secretary of Labor, Ray Marshall sent him a memorandum telling him that without an increase in cost many of those receiving welfare benefits would be hurt. They wrote:

> The states are our natural allies in welfare reform—most members of congress would still prefer not to deal with the subject at all—and there is virtually no relief in this proposal for governors and mayors. In addition there will be problems in cutting benefits for the aged, the disabled, and the blind, and there will be disputes over our ability to put a significant number of the 3.4 million mothers on welfare to work.

In quoting from this memorandum, Martin Anderson reveals the real reason our welfare system is a mess. Secretary of Labor Marshall and Secretary of HEW Califano ignore the fact that some people now on welfare should not receive aid. Their true concern seems to rest with the plan's popularity with politicians, not its economic and social impact on our country.

There are so many myths surrounding our welfare program that the average American has no way of knowing what policy is good policy. They are under the false impression that reform is necessarily good. They do, however, know what they feel the results should be. The vast majority of Americans feel that the poor should be given aid, but they also believe that spending should be cut. Spending could be cut if those who are not really poor were removed from the welfare rolls, and if there was not such a strong disincentive to work one's way out of welfare dependency.

President Carter promised prompt welfare reform during his campaign. Upon entering office he realized how difficult it was going to be to fulfill his promise, but he managed to unveil his program for better jobs and income on August 6, 1977. Anderson, who was an adviser to both Presidents Nixon and Ford, maintains that Carter's plan was created by essentially the same nucleus of people who were responsible for Nixon's family assistance plan and the income supplementation plan presented to Ford.

The welfare bureaucrats' plans have followed the same vein since Nixon's family assistance plan. They have proposed to turn welfare into a guaranteed income program which would affect many more people and thus cost more money. Welfare dependencies are also political dependencies, and trading votes for handouts undermines democracy. These facts, however, are hidden behind the veneer of reform.

The CBO found that 22 million more Americans would be affected by Carter's program than are now. And these 22 million Americans are people whose incomes do not fall below the poverty line. Some 11.6 million of them are earning $10,000 to $25,000 incomes. These facts form a case in point. The Government is busy extending its welfare dependencies into the middle class.

President Carter's program cannot be introduced next year without changes. However, these changes will be made by the same people who have repeatedly created welfare programs for the nonpoor. Thus, the basic structure of this welfare reform, with all its flaws, would remain the same. Carter's welfare program would reduce the incentive to work for middle income earners and trap them also in economic and social immobility. What we need to do is to destroy the welfare trap. HEW is devoting a large part of our national budget to preventing people from working. Must we spend still more to prevent more people from working?

Instead, we should accurately estimate the number of poor and reject the statistics that the Census Bureau offers us, if they continue to disregard the biases in their estimates. We should eliminate the inefficiencies in the welfare system by tightening its programs, not expanding them.

When experts like Martin Anderson show us the facts, we should demonstrate that it is not politically impossible to recognize and rectify the real problems in our welfare system.

## THE VIETNAMESE COMMUNITY CENTER

Mr. HATCH. Mr. President, a little more than 3 years ago, millions of Americans' hearts were touched by the plight of thousands of South Vietnamese refugees who were determined to start a new life in the United States after their homeland had fallen under the control of the Communists. Right here in the metropolitan Washington area, one of the most worthwhile attempts to help our South Vietnamese friends keep in touch with their culture and traditions needs our help if it is going to survive, and that is why I am mentioning it today.

What I am referring to, Mr. President, is the Vietnamese Community Center which was opened last December on the first floor of the Page Elementary School in Arlington, Va. This center is a place where the approximately 15,000 Vietnamese in the Washington area can gather together and conserve their heritage by speaking the language, listening to the music, viewing the artwork, and preparing the food of their native country. The center, the first of its kind in the Washington area, also plans to develop a wide range of services designed to make the refugees' transition to life in the United States easier, ranging from free tax form preparation to translation services to help them in their search for employment.

The Vietnam Refugee Fund, Inc., a nonprofit, tax-exempt organization which receives its funds through donations and fundraising drives, was able to rent the building in which the center operates from the county school board, but its lease expires at the end of this June. According to Mr, Nguyen Ngoc Bich, the president of the Vietnam Refugee Fund, Inc., unless the Fund can obtain adequate private funding, the center may not be able to continue operating.

Mr. President, this center is clearly a fine example of what free individuals working together privately can accomplish. I hope that those who wish to help it continue its efforts will contact Mr. Bich of the Vietnam Refugee Fund, Inc. The address is:

Mr. Nguyen Ngoc Bich
6103 Amherst Avenue
Springfield, Va. 22150

I ask unanimous consent to have printed in the RECORD an article entitled "Center Focuses On Preservation of Vietnamese Culture," written by Seth W. Moskowitz, and published in the Washington Post of Thursday, December 29, 1977.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

### CENTER FOCUSES ON PRESERVATION OF VIETNAMESE CULTURE

(By Seth W. Moskowitz)

In an effort to preserve their cultural heritage in their new land, members of the Vietnamese community have opened a Vietnamese Community Center at the Page Elementary School in Arlington. It is the first such center in the Washington area.

The event last week drew close to 100 participants, most of them Vietnamese refugees who came to see exhibits by Vietnamese artists, listen to Vietnamese music and eat the food of their home country.

"Everybody hoped to have a Vietnamese Center," said Pham Ngoc Luy, the captain of the last ship to leave Saigon with 4,000 refugees aboard shortly after the city fell to the North Vietnamese.

"I think it's a good start. You have prob-

lems with the language; (it's) hard to find jobs. We expect to have a center for all where you can meet each other, you can help each other, and you can keep up the Vietnamese culture.

"This is a place not only where the Vietnamese language will be spoken and understood," Luy said, but also where the "beautiful traditions of the family, society and friendship . . . which have been formed for many thousand years" will be respected and kept alive.

A pamphlet was distributed, outlining some services the center hopes to provide:

A lending library of Vietnamese books and magazines to augment the reading room already in operation.

Spring recreation programs, featuring tennis, volleyball and basketball.

Translation services to help Vietnamese in job searches and other needs.

Free tax form preparation.

A Vietnamese food shop, provided there are no licensing problems.

Classes, exhibits, and social functions.

Nguyen Ngoc Bich, president of the Vietnam Refugee Fund, Inc., estimated that there are approximately 15,000 (about 10 per cent of the U.S. total) Vietnamese in the Washington metropolitan area. Most of these are refugees who arrived in the United States in the spring of 1975, when Saigon fell.

An estimated 7,000–8,000 Vietnamese are Northern Virginia residents, with the largest concentration living in Arlington.

Until now, the only gathering places for the Vietnamese in Northern Virginia have been the churches where they have been segregated by religion, said the Venerable Thich Giac Duc, president of the Buddhist Congregational Church of America.

He estimates that the area's Vietnamese population is 40 per cent Buddhist, 40 per cent Catholic, and 20 per cent Protestant.

"At last we can have a place to get together. Every religion can be together here," Duc said.

"I have no worries about the economic problems of the Vietnamese refugees," said 71-year-old Truong Cam Khai. "I am worried about the cultural problem.

"This center will be useful in two ways," said Khai, a former professor who left Vietnam in 1968. "It will provide an opportunity to teach the young about Vietnamese tradition and moral values, and it will be a place where the Vietnamese will have social activities among themselves. . . . Here there is nothing to divide the Vietnamese among themselves."

The center is allowed the use of the entire first floor of the school at 1501 N. Lincoln St. On this floor there are 15 classrooms, an auditorium, a cafeteria with a large kitchen, a library and some office space.

The Vietnam Refugee Fund is leasing the building from the county school board for $2,000 a month, money which the non-profit, tax-exempt organization receives through donations and fund-raising drives. The lease expires at the end of June, 1978.

Although the Vietnam Refugee Fund Inc. offered substantially less rent than the school board has asked, the fund was the only bidder who found the short term lease acceptable, Bich said.

When the lease expires, Bich said he doesn't know what will happen and doubts that the Refugee Fund will be able to retain use of the building. A school spokesmen said that the board plans to review the use of the building in March or April and will decide then how it will be used in the future.

Dr. Harold Chu, a professor of Japanese language and literature at Georgetown University, presented the center wtih a plaque from the Arlington Trinity Teacher Corps which says "with our heartfelt support and good wishes." Near the bottom of the plaque it says *chuc mung may man*, Vietnamese for *good luck*.

Mr. HATCH. Mr. President, I suggest the absence of a quorum.

Mr. ROBERT C. BYRD. Mr. President, will the Senator withhold that?

Mr. HATCH. Certainly.

Mr. ROBERT C. BYRD. I owe the Senator an apology, the Chair an apology, and all Senators an apology. I thought morning business had been closed. I had forgotten renewing morning business, and of course everything I said was without reason, rhyme, or substance, because we were in morning business. So I take it all back, every word of it.

Mr. HATCH. Mr. President, I know the Senator from West Virginia does a beautiful job of conducting the proceedings on this floor, and I have great respect for him. I fully understand, and apologize to the Senator. Let me state that I have not the slightest concern that he will ever have to worry about anything I do on this floor.

Mr. ROBERT C. BYRD. The Senator's apology is appreciated, but unnecessary.

The ACTING PRESIDENT pro tempore. The Chair appreciates the comment of the majority leader. The Chair was beginning to wonder whether it had been mistaken on the rule itself, and appreciates the clarification.

## CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is now closed.

## UNIFORM BANKRUPTCY LAW

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate now resumes the consideration of S. 2266. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, the Senator from Wyoming (Mr. WALLOP) is present. I understand he will be managing the bill on his side of the aisle.

I am quite sure it will be agreeable with Mr. DECONCINI if Mr. WALLOP wishes to proceed with his statement. The Senator might consider asking unanimous consent that his statement follow that of Mr. DECONCINI, inasmuch as Mr. DECONCINI is manager of the bill. If he will do that, I am sure there will be no problem, and the Senate could be making some progress.

Mr. WALLOP. Mr. President, in the interest of time, I will be happy to do that, and I so request. I ask unanimous consent that the statement I am about to make, follow, in the RECORD, the opening statement and remarks of the Senator from Arizona (Mr. DECONCINI).

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. WALLOP. Mr. President, I ask unanimous consent that the following members of the Judiciary Committee staff have the privilege of the floor throughout the discussion of both S. 1423 and S. 2266 and any votes thereon: Eric Holtman, Sally Rogers, Richard Velde, Pat Hoff; and that Harry Dixon and Robert Feidler have floor privileges during consideration of the bankruptcy bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I make a similar request for Nathan R. Zahn of the committee staff and Roy Myers of my staff, for both these two bills.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. WALLOP. Also, Mr. President, I make the same request for Mr. Tom Carter and Mr. Meredith Preston of Senator HAYAKAWA's staff.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. WALLOP. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be equally charged against both sides.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. PRESIDING OFFICER (Mr. SPARKMAN). Without objection, it is so ordered.

Mr. DECONCINI. I ask unanimous consent that Robert Feidler, Romano Romani, and Harry Dixon of the committee staff be granted the privilege of the floor during debate and votes on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, in 1970, Congress created the Commission on the Bankruptcy Laws of the United States to study and recommend changes in bankruptcy laws. The Commission became operational in June 1971 and filed its final report with Congress on July 30, 1973. Its report was in two parts. Part I contained the Commission's findings and recommendations.

Part II contained a draft of a bill to implement those recommendations. Senator QUENTIN BURDICK, chairman of the Subcommittee on Improvements in Judicial Machinery and a member of the Commission, and Senator Marlow Cook, a member of the Commission, introduced that bill in the 93d Congress as S. 4026. No action was taken on the bill during the 93d Congress.

In the 94th Congress, the Commission bill was again introduced by Senator BURDICK as S. 236. Senator BURDICK also introduced an alternative to the Commission bill that had been drafted by representatives of the National Conference of Bankruptcy Judges. The judge's bill, S. 235, differed in several major aspects from the Commission bill.

Hearings on both bills commenced in late February of 1975 and continued through November of 1975. All interested parties were invited to give testimony on the bills. The Subcommittee on Improvements in Judicial Machinery heard from several hundred interested parties and had nearly 80 witnesses personally testify over 24 days of hearings. The hearings covered all aspects of bankruptcy law. Testimony was heard on the structure of the new bankruptcy courts, the relationships of other laws to bankruptcies, tax aspects, consumer bankruptcies, business reorganizations, railroad reorganizations, and the effect and

interaction of the securities laws in bankruptcy cases.

Throughout the remainder of 1975 and all of 1976, the subcommittee continued to gather information and to begin work on a draft bill; however, no bill was reported to the full Judiciary Committee during the 94th Congress. Introduced in the House at this time were parallel bills to S. 235 and S. 236 entitled H.R. 31 and 32, and during the 94th Congress, the House also held extensive hearings on the bankruptcy reform bills. The House culminated its actions with the introduction early in the 95th Congress of H.R. 6, which was amended and reintroduced as H.R. 8200. That bill was passed by the House on February 1, 1978.

S. 2266, an analogous bill to H.R. 8200, was introduced by myself and Senator WALLOP on November 1, 1977. The Subcommittee on Improvements in Judicial Machinery conducted further hearings in late November and early December, receiving testimony from nearly 60 witnesses and again receiving several hundred written statements and comments with regard to the bill. Subcommittee amendments as a result of the hearings, statements, and comments were made to the bill over the next 5 months and these efforts culminated in the reporting by the subcommittee, on May 17, 1978, of a bill in the nature of a substitute. The report of the vote of the subcommittee was 3 in favor, none opposed, and 1 not voting.

The major purpose of this bill is the modernization of the bankruptcy laws. The substantive law of bankruptcy and the current bankruptcy system were designed in 1898, and underwent the last significant overhaul in 1938, nearly 40 years ago. Since that time, there have been vast changes in the law of debtor-creditor relations, including the widespread adoption of the Uniform Commercial Code in the early 1960's and the vast spread of consumer credit. There has been a steady growth in the number of bankruptcies, both consumer and the more complicated business reorganization cases, over the last 20 years, and this steady growth has led to great stresses and strains in the bankruptcy system. The bankruptcy referee has gradually taken over the prime responsibility for the operation of the system from the Federal district judges.

The hearings before the Subcommittee on Improvements in Judicial Machinery confirmed that revision was necessary, and the bill is the attempt to upgrade and modernize our bankruptcy courts and also the law which they must apply in the bankruptcy area.

S. 2266 was reported unanimously from the Committee on the Judiciary on July 12. Following that, the bill was sent on a sequential referral to the Committee on Finance where the tax amendments to the bill were also unanimously ordered to be reported on August 8. I believe the bill pending before the Senate reflects an evenhanded approach to bankruptcy reform and I remain hopeful that a satisfactory compromise can be arrived at on those issues where we differ from the House.

Mr. President, I take this opportunity to thank Senator WALLOP, the ranking member of the Judicial Improvements Subcommittee, for his participation and the assistance of his staff in the consideration of this bill. Without the bipartisan support this measure has received, and the lengthy and time exhausting work of the other members of the subcommittee, Senator ROBERT BYRD and Senator JOSEPH BIDEN, this measure would not be before us today.

In conclusion, I want to make clear that I share Senator WALLOP's concern about the final resolution of the railroad collective bargaining issue in S. 2266, but I am hopeful that, next year, hearings before Senator WILLIAMS' Human Resources Committee will provide a full airing of the matter and lead to reasoned legislation if such a need is shown. I shall direct the staff of the Judicial Improvements Subcommittee to continue to monitor developments in the area and to assist whenever appropriate.

Mr. WALLOP. Mr. President, I want to take this opportunity to recognize the great efforts that Senator DECONCINI and the staff of the Judicial Improvements Subcommittee have made in bringing this bill, S. 2266 to this point in its enactment. I personally appreciate the graciousness Senator DECONCINI has accorded me in presenting my views and those of the other minority Senators. This bill is the culmination of several years of hard work and extensive hearings. There has been widespread agreement of the need for bankruptcy reform but many different approaches have been suggested. It has been the task of the subcommittee to sift through these suggestions and weigh the merits of each. The bill as reported is the result of this long process. I think the bill has become finely turned by these efforts and that its enactment will provide broad based reforms that will more fairly allow debtors and creditors to meet and solve the problems of financial distress.

I am most pleased with the basic concept of this bill in regard to the structure of the new bankruptcy courts. The courts will be conducted by bankruptcy judges, not referees. The jurisdiction of the courts will be broad and pervasive. No longer will needless litigation in several courts be required to determine all the matters involved in a bankruptcy case. The distinction between plenary and summary jurisdiction will be abolished. The new judges will have 12-year terms, twice that of the present referees and will be functionally independent of the Federal district courts. The economy of initial appeals to the district courts will be preserved. The creation of these independent adjunct bankruptcy courts will be at a fraction of the cost of the alternative solution of new article III courts as recently passed by the House in the analogous bill, H.R. 8200.

The present system of private trustees will be retained with some added safeguards to upgrade the quality of trustees and insure that favoritism in appointment is prevented.

Many procedures will be streamlined for the administration of the bankruptcy cases. Cumbersome requirements such as the need for a so-called "act of bankruptcy" for an involuntary case will be deleted.

The current law allowing States to determine the property exemptions that debtors will have for their fresh start after bankrupcy will be retained. The provisions for priority payments of certain kinds of unsecured claims over general unsecured claims will be revised. The priority for wages will be modernized to reflect current wage and benefit agreements.

In liquidation cases the court will continue to preside at the first meeting of creditors. Special provisions will be made for the liquidation of stockbrokerage firms and the bankruptcy of commodity future brokers.

Among the most dramatic changes from current law are the new provisions for corporate reorganizations. Current chapters X, XI, and XII will be combined into a single chapter 11. In most instances the debtor will be able to remain in control and direction of the business during the reorganization period. In the average case, appointment of a trustee will only occur after a finding by the court of necessity. In the very large public company case where there is great public interest and the creditors, stockholders and interested parties may be located throughout the country, a trustee will automatically be appointed to supervise the proceedings. He will be able to retain the current management if he desires but will not be required to do so. A recent example, the Equity Funding case, has demonstrated the wisdom and benefit that the disinterested trustee can bring to these sorts of cases.

The problems of the recent Pine Gate case which has given lenders pause in making real estate loans will be solved by the addition of specific guidelines as to the manner in which real estate loans can be dealt with in reorganization cases and when and how lenders will be able to foreclose properties that are part of the debtor's estate.

The effective date of the bill will be October 1, 1979, and its provisions will apply only to cases commenced after that date.

These comments should not be construed to mean that I agree with all the provisions of the bill. I think on balance it should be passed, but I would like to mention two of my concerns. The Judiciary Committee did not accept the subcommittee's provision on reaffirmations, which would have permitted reaffirmations but allowed for a 30-day cooling off period for rescission. Reaffirmations will be prohibited under this bill. I think that is a mistake.

Similarly, a provision in the railroad reorganization subchapter that would have allowed the trustee to reject the work rules portion of a collective bargaining agreement was dropped by the Judiciary Committee. I understand that Senator WILLIAMS is committed to hold-

ing hearings on this question. I hope that the hearing process is not the end of the matter and that further action by the Human Resources Committee and the Senate will follow. The testimony that was heard by the subcommittee on this subject made it clear that antiquated work rules can often frustrate the reorganization process. This is a disservice to employees, the company, and the public alike.

Mr. President, I have been privileged to have had this opportunity to participate in the consideration of this bill and I now urge its passage.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the amendments in the nature of a substitute and the amendments reported from the Committee on Finance be adopted and treated as original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT 1818

(Purpose: To make technical and conforming changes to certain tax-related provisions)

Mr. DECONCINI. Mr. President, on behalf of the distinguished chairman of the Committee on Finance, I send to the desk a series of technical and typographical corrections to the bill.

The PRESIDING OFFICER. The amendments will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI, for Senator LONG) proposes unprinted amendment numbered 1818.

Mr. DECONCINI. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 315, line 19, insert the following immediately before the semicolon: ", including any suspensions of such period occurring on or after the date of the filing of the petition".

On page 315, line 25, insert a comma immediately after "law".

On page 336, line 4, strike out "118" and insert in lieu thereof "18".

On page 345, line 3, insert a comma immediately after "events".

On page 345, line 17, insert a comma immediately after "or".

On page 346, line 11, strike out "interests" and insert in lieu thereof "interest".

On page 351, line 9, strike out "an".

On page 353, line 14, strike out "permitted" and insert in lieu thereof "not restricted".

On page 353, line 14, strike out "tax".

On page 356, strike out lines 5 through 12, and insert in lieu thereof the following:

"(h) Notwithstanding any other provision of this section, the trustee may prosecute an appeal or review of an adjudication by a judicial or administrative".

On page 374, strike out line 7, and insert in lieu thereof the following: "(g), or 502 (h) of this title may be filed".

On page 375, strike out lines 8 and 9, and insert in lieu thereof the following:

"(b) Except as provided in subsections (f), (g), or (h) of this section, if such objection to a claim is".

On page 377, line 15, strike out "and" and insert in lieu thereof "or".

On page 377, strike out line 16, and insert in lieu thereof the following: "thereof was not sent to the trustee, on or before the last date for".

On page 386, line 16, insert a comma immediately after "to".

On page 387, line 7, strike out "a".

On page 387, strike out lines 21 through 25.

On page 388, strike out line 1.

On page 388, strike out line 2, and insert in lieu thereof the following:

"(3) When a determination by".

On page 391, line 13, insert a comma immediately after "or".

On page 391, line 14, insert a comma immediately after "remain".

On page 391, line 20, strike out "the".

On page 391, line 24, strike out "for a prompt audit of such liability".

On page 392, line 24, strike out "such" and insert in lieu thereof "the".

On page 392, line 24, strike out "under".

On page 393, line 1, strike out "paragraph (1)".

On page 397, line 9, strike out "adjustable" and insert in lieu thereof "adjusted".

On page 399, line 2, strike out "taxes" and insert in lieu thereof "tax".

On page 399, line 2, strike out the second comma and insert in lieu thereof a semicolon.

On page 399, line 8, insert immediately before "(iii)" an opening black bracket.

On page 399, line 12, insert a closing black bracket immediately after the semicolon.

On page 399, line 22, strike out "were" and insert in lieu thereof "was".

On page 399, line 25, strike out "taxes" and insert in lieu thereof "tax".

On page 403, line 16, insert "or his delegate" immediately after "Treasury".

On page 403, line 24, strike out "fine, penalty, or addition to tax" and insert in lieu thereof "penalty".

On page 406, line 24, strike out the beginning quotation marks.

On page 407, strike out lines 10 through 24.

On page 408, strike out lines 1 through 6.

On page 409, line 24, strike out "(5)" and insert in lieu thereof "(6)".

On page 410, line 1, insert "or" immediately after the semicolon.

On page 414, line 17, insert "any tax" immediately before the period.

On page 455, line 22, insert "expenses and" immediately before "claims".

On page 456, line 19, strike out "in".

On page 456, line 20, strike out "the same manner as" and insert in lieu thereof "by reference to".

On page 457, line 12, strike out "specified in" the first time it appears.

On page 457, line 12, insert a comma immediately after "order".

On page 539, line 12, insert an opening black bracket immediately before "(d)".

On page 539, line 15, insert a closing black bracket immediately after the period.

On page 543, line 24, strike out "was" and insert in lieu thereof "is".

On page 544, line 4, strike out "taxes" and insert in lieu thereof "tax is".

On page 544, line 19, strike out "[(4)(5)" and insert in lieu thereof "[(4)](5)".

On page 551, line 4, strike out "] (c)".

On page 551, line 14, strike out "] (d)".

On page 551, line 21, insert a closing black bracket immediately after the period.

On page 572, line 14, insert an opening black bracket immediately before "claims".

On page 572, line 15, insert a closing black bracket immediately after "and" and insert the following: "claims which are nondischargeable under section 523 of this title; and".

On page 574, line 4, insert immediately after the period the following new sentence: "Notwithstanding the preceding sentence, a governmental unit to which any tax is owing may accept provisions of the plan providing for payment of the tax over a period longer than four years.".

On page 577, between lines 6 and 7, insert the following:

"(d) Any tax liability provided for in the plan may be assessed against the debtor by the governmental unit, but any such assessment, if not previously made under otherwise applicable law, may not be made until after the plan is confirmed and may be made only within the limits of law otherwise applicable.".

On page 577, line 15, strike out "[or]" and insert in lieu thereof "or".

On page 577, line 17, strike out "; or" and insert in lieu thereof a period.

On page 577, strike out line 18.

On page 580, line 18, insert an opening black bracket immediately before "§ 1331.".

On page 580, strike out line 26.

On page 581, strike out lines 1 through 11.

On page 629, strike out lines 5 through 13 and insert in lieu thereof the following:

SEC. 318. (a) Subsection (b)(2) of section 47 of the Internal Revenue Code of 1954 (relating to certain dispositions, etc., of section 38 property) is amended by striking out "section 381(a)" and inserting in lieu thereof "section 371, 374, or 381(a)".

On page 629, beginning on line 14, strike out "Section 47(d) of the Internal Revenue Code of 1954 (as added by this Act) shall apply" and insert in lieu thereof "Paragraph (2) of section 47(b) of the Internal Revenue Code of 1954, as amended by this Act, shall apply".

On page 629, line 19, strike out "Section 47(d)" and insert in lieu therof "Paragraph (2) of section 47(b)".

On page 629, line 20, strike out "added" and insert in lieu thereof "amended".

On page 630, line 3, insert the following immediately after the dash: "For purposes of any tax to which subsection (a) applies—".

On page 630, line 6, insert "a" immediately after "to".

On page 633, strike out lines 3 through 8, and insert in lieu thereof the following:

(2) by amending subsection (b) to read as follows:

"(b) Claim Filed Despite Pendency of Tax Court Proceedings.—In the case of a tax imposed by subtitle A or B or chapter 41, 42, 43, or 44, claims for the deficiency in interest, additional amounts, and additions to the tax may be presented for adjudication to the court before which a receivership proceeding or a case under title II, United States Code, is pending, despite the pendency of proceedings for the redetermination of the deficiency in pursuance of a petition to the Tax Court; but no petition for any such redetermination shall be filed with the Tax Court after the appointment of the receiver.".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1819

Mr. DECONCINI. Mr. President, I send an amendment to the desk, offered by Senator KENNEDY, and ask for its consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI) for Mr. KENNEDY, proposes an unprinted amendment numbered 1819.

Mr. DECONCINI. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 312, line 12, strike the "." (period) and add the following: "except as otherwise provided in Section 766(b) and 770.".

On page 481, immediately following line 10, insert the following:

(15) "forward contract" means a contract requiring the seller to sell and the buyer to purchase a specified quantity of a commodity on a specified date or within a specified time in the future, which contract is effected otherwise than on a contract market or board of trade but which requires delivery of a commodity (or by-product or essentially similar commodity) which is traded on a contract market;

(16) "forward contract merchant" means a person who in the regular course of business purchases and sells forward contracts and who is a member or an affiliate of a member of a clearing organization;

On page 481, line 11, strike "(15)" and insert in lieu thereof "(17)".

On page 481, line 17, strike "(16)" and insert in lieu thereof "(18)".

On page 481, line 20, strike "(17)" and insert in lieu thereof "(19)".

On page 482, line 1, strike "(18)" and insert in lieu thereof "(20)".

On page 482, line 6; strike "(19)" and insert in lie uthereof "(21)".

On page 485, line 17, after "made by," insert "or to."

On page 485, line 18, after "organization," insert "or by or to a forward contract merchant,"

On page 490, line 3, after "broker" insert "or forward contract merchant".

On page 490, line 5, after "contract" insert "or forward contract,".

On page 490, line 6, after "contract" insert "or forward contract,".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. WALLOP. Mr. President, reserving the right to object, I shall not object, but I want to express certain minor reservations about his amendment by Senator KENNEDY. I do not think it does violence to the bill. It came as a little bit of a surprise to me this morning. I have checked it out, but I do want to express certain reservations about it as it moves slightly from the posture that the minority had wanted with regard to commodity brokers in general.

I do not object.

The amendment was agreed to.

UP AMENDMENT NO. 1820

Mr. DECONCINI. Mr. President, I send an amendment to the desk that is meant to correct an ambiguity in the committee report.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI) proposes an unprinted amendment numbered 1820.

Mr. DECONCINI. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 365, delete line 25 through line 3 on page 366 and insert in lieu thereof:

(4) Notwithstanding anything to the contrary contained in this section, the trustee may neither:

A. assume an executory contract to make a loan or deliver equipment to or issue a security of the debtor; nor,

B. prior to assuming an unexpired lease, require a lessor to provide services or supplies incidental to that lease agreement until such time as the trustee has assumed the unexpired lease, or in the alternative, provides the lessor in writing, with adequate assurances that the lessor will be compensated pursuant to the terms of the lease, for any services and supplies provided thereunder, during the transition period.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arizona.

The amendment was agreed to.

Mr. DECONCINI. Mr. President, if there are no further amendments, I ask for third reading of the bill.

Mr. WALLOP. Mr. President, Senator BARTLETT has been sent for. He has an amendment and is on his way over. Therefore, I suggest the absence of a quorum and ask unanimous consent that the time be equally divided. I think it will not be very long.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. WALLOP. How much time does the Senator want?

Mr. THURMOND. About 2 minutes.

Mr. WALLOP. Mr. President, I yield 2 minutes to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in support of the pending legislation, the Bankruptcy Reform Act of 1978. The major purpose of this bill is to reform and modernize the bankruptcy laws of this country.

The substantive bankruptcy law was first created in 1898 and underwent a major overhaul in 1938. Since that time there have been a number of changes in debtor-creditor relations, but the Congress has not acted to make these changes in the bankruptcy laws. S. 2266 seeks to update and reform this important area of law.

In 1970, Congress created the Commission on the Bankruptcy Laws of the United States to study and recommend changes in the bankruptcy laws. The Commission's final report, filed with the Congress on July 30, 1973, is the basis for the pending bill. The legislation has been subjected to extensive hearings in both the 94th and 95th Congress. Numerous witnesses testified on all aspects of the bankruptcy law, including the structure of the new bankruptcy courts, consumer bankruptcies, business reorganizations, railroad reorganizations, and the effect of the bankruptcy laws on the securities laws.

Mr. President, I would like to summarize the major provisions of this legislation. First, chapter 1 contains the general provisions which includes definitions, rules of construction and the basic procedural ground rules for the operation of the bankruptcy system.

Chapter 3 deals with voluntary bankruptcies where cases are commenced by the filing of a petition in the office of a bankruptcy judge. An involuntary case may be filed by three or more creditors having claims aggregating, at least, $5,000 or more. If there are fewer than 12 creditors, 1 creditor holding a claim of at least $5,000 may file.

The test for determining insolvency under this chapter is whether a debtor is generally unable to pay, or has failed to pay a major portion of his debts as such debts become due, or within 90 days before the filing of a petition a custodian has been appointed for the debtor's property. The inability or failure to pay debts is a change from current law which requires "balance sheet" insolvency.

The filing of a petition under this title automatically stays the enforcement of any act against the debtor to recover any claim owed by the debtor. The automatic stay seriously affects the rights of all the debtor's creditors, therefore, a number of limitations have been placed upon the continuance of the stay. The rights of creditors are protected where replacement liens or real property is involved. Moreover, the debtor may use cash collateral during a reorganization, but only after a hearing and finding by the court.

The rights of a trustee in bankruptcy are also protected and a trustee may reject executory contracts and unexpired leases which is now provided for in current law. The rights of a trustee to assume or reject executory contracts does not, however, include the right to assume a loan commitment.

Mr. President, chapter 5 provides procedures for all of the property of the debtor to be included in the bankruptcy proceeding. This also allows the trustee to more easily recover property that may have been transferred by the debtor. In addition, there is a new section requiring secured creditors to file claims, allowing an early evaluation to determine the secured and insecured portion of the claim.

The bill retains current law in the area of exempt property that a debtor may retain after bankruptcy for a fresh start. Thus, the bill takes the approach of current law which adopts the exemption law of the State in which the debtor is located. This method of providing for a fresh start for a debtor is, in my opinion, much better than the approach taken by the House which allows a debtor to choose between State law or Federal exemptions. Unfortunately, this method can lead to the retention of substantial amounts of property, resulting in instant affluence in the face of a bankruptcy proceeding. The fairer way is to allow a fresh start, but on a limited basis.

Mr. President, the bill also retains current law with regard to certain debts, such as those obtained under false pre-

tenses or actual fraud, to be excepted from discharge. In addition, in the area of preferences, the preference section is changed from current law to add a presumption that during the 90 days preceding bankruptcy the debtor will be presumed to have been insolvent. The preference period is reduced from 4 months to 90 days.

Mr. President, one major reform of this bill is the establishment of a new bankruptcy court as an adjunct of the U.S. District Court.

Each circuit court of appeals will appoint bankruptcy judges for its circuit. Compensation will be at the annual rate of $48,500, an income level believed by the committee to be commensurate with the duties of the office.

Qualifications for bankruptcy judges include bar membership in good standing for at least 5 years at the time of appointment and competence as determined by the judicial council of the circuit. Additional qualification standards may be prescribed by the Judicial Conference of the United States.

The appointment of bankruptcy judges by the district court as contributed significantly, first, to a real and apparent dependency on the part of the bankruptcy court and its judges upon the district courts which appoint and review the decisions of bankruptcy judges, and second, to the image of the bankruptcy court as the stepchild of the district court. This bill is designed to eliminate both the real and apparent dependency and subservience of the bankruptcy court, in part by vesting the power to appoint bankruptcy judges in the circuit courts of appeals, rather than in the district courts. The change is further warranted by the need to do away with the unseemly appellate practice whereby the district judge or judges who appoint the bankruptcy judge often rule on appeals from the orders of their own appointees.

There will be a 12-year term of office for bankruptcy judges appointed under new 28 United States Code, section 152. The present 6-year term is insufficient to attract the caliber of individual needed to perform the highly demanding and important functions of the office of bankruptcy judge. By doubling the term of office for future bankruptcy judges it is anticipated that a major goal of this reform legislation, the establishment of a functionally independent bankruptcy court, can be further advanced.

A bankruptcy judge whose term expires is permitted to continue to serve until a successor is appointed and qualifies.

The bill provides grounds upon which and prescribes the procedures by which the removal of a bankruptcy judge may be accomplished. In competence, misconduct, neglect of duty and disability, as determined by the judicial council of the circuit, are the sole grounds for removal. The bankruptcy judge is entitled to be heard on the charges against him.

The Senate bill, Mr. President, does not provide for the elevation of bankruptcy referees to the level of article III judges. I agree with that position, because I believe that the upgrading of bankruptcy referees is unwarranted since there are numerous protections, as well as increased retirement benefits for bankruptcy judges. The reforms of this bill more than compensate for the arguments that may be made to make bankruptcy referees article III judges.

Finally, Mr. President, this bill represents an immense amount of work by the members of the Subcommittee on Improvements in Judicial Machinery and the staff of that subcommittee. I especially want to commend Senator DECONCINI, the chairman of the subcommittee and Senator WALLOP, the ranking minority member. They did a fine job.

This legislation constitutes a monumental reform that is long overdue. The growth of consumer laws and the increased recognition by courts of the rights of consumers has underscored the need for a revision and modernization of our bankruptcy laws.

S. 2266 represents a careful redrafting of the bankruptcy laws of this country. It recognizes the relationship between State laws on bankruptcy on the one hand, and the need for a certain amount of uniformity at the Federal level on the other. The approach taken by this bill is, in my opinion, far superior to the version now being considered by the House.

Mr. President, as the ranking minority member of the Senate Judiciary Committee, I strongly support this legislation and urge its adoption.

The PRESIDING OFFICER. Who yields time?

Mr. WALLOP. Mr. President, is the Senator from Oklahoma ready to proceed with his amendment?

Mr. BARTLETT. I am ready to bring up the amendment.

The PRESIDING OFFICER. The Senator from Oklahoma.

UP AMENDMENT NO. 1821

(Purpose: To allow a bankrupt to rescind any revival or reaffirmation within 30 days of such action)

Mr. BARTLETT. Mr. President, I introduced an amendment yesterday and I have a slight modification which I send to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BARTLETT) for himself, Mr. THURMOND and Mr. HATCH, proposes an unprinted amendment numbered 1821:

On page 421, strike out lines 4–18 and insert in lieu thereof the following:

(b) A debt extinguished by discharge in a case under this title may be revived or reaffirmed by written instrument or be all or part of any bargain creating a new debt except, however, the debtor may rescind his revival or reaffirmation by written notice to all concerned creditors within 30 days of such revival or reaffirmation. Any judgment, whenever obtained, that a debtor is personally liable to pay a debt extinguished by discharge, and not revived or reaffirmed in accordance with this section, is null and void.

On page 421, line 19, strike "(d)" and insert in lieu thereof "(c)".

Mr. BARTLETT. Mr. President, my amendment to S. 2266 reinstates language in the bill that would enable voluntary reaffirmation or revival of debts subject to a rescission right of 30 days. It is identical to language in the bill as reported by the Subcommittee on Judicial Machinery on May 17, 1978, which was amended out of the bill by the full committee.

Although I believe the Judiciary Committee's effort was well intended, the effect of its amendment is to deprive consumers of a right they have always had, that is, of renewing a debt discharged in bankruptcy.

Without this right consumers will be denied the opportunity to protect a cosigner such as wife, a relative, or other family member from liability; or to protect collateral such as an automobile from repossession; or to honor a moral obligation. Even more importantly, the ban on reaffirmation in the committee bill can jeopardize a consumer's ability to save his home from foreclosure.

Rather than adopt an absolute ban on all reaffirmations, as S. 2266 purposes, my amendment provides a compromise adopted by the subcommittee which held hearings and studied the measure.

It is a simple, direct, approach which will protect the legitimate interests of consumers and creditors alike. It would allow, but not require, reaffirmation; it would permit a debtor 30 days to change his mind.

If abuse is a problem it can be limited without adopting an arbitrary prohibition on all reaffirmations. I submit the remedy proposed in S. 2266 exceeds any alleged abuse.

As a practical matter, thousands upon thousands of bankrupts reaffirm or revive debts with creditors each year for amounts totalling many millions of dollars. They do so voluntarily because they know it is to their advantage. I believe consumers should be able to retain that right. I also believe creditors should be able to recoup some of their losses. What is wrong with reaffirmation if it is voluntary?

Under my proposal, the debtor would have 30 days to reconsider his decision and cancel any reaffirmation. With this provision in the bill, any possible coercion or abuse by creditors is effectively avoided.

My amendment would afford the bankrupt more protection than current law and more real protection than the absolute ban now contained in S. 2266.

The record clearly shows that a major percentage of consumer bankruptcies are caused by a single, overwhelming debt such as a medical bill. Debtors may seek relief from such crushing medical expenses but wish to honor other obligations and retain their credit worthiness with those whom they have dealt with in the past—and with whom they wish to deal in the future. The committee bill

denies consumers the right to voluntarily and selectively reaffirm. It denies consumers the right to dispose of their future income as they see fit. There is no justification for this interference. It smacks of paternalism.

Additionally, I am concerned that the action of the Judiciary Committee prohibiting reaffirmations will create severe hardship for consumers in three distinct areas where it may be a benefit for them to renew their obligations. They may not do so because of the prohibitions of section 524 (b) and (c). These two subsections, read together with section 722, would permit property-related reaffirmations only in the event a bankrupt desires to redeem exempt tangible personal property subject to a nonpurchase money security interest. The power to reaffirm a debt only in this narrowly defined circumstance leaves the bankrupt helpless to protect other property which may be of substantial value, such as the following:

First. The bankrupt's home: The bankrupt will be unable to save his residence from foreclosure by the mortgagee. Since the bankrupt cannot revive his debt—section 524(b) makes any such effort "void"—the creditor must look to his security for payment through foreclosure. The bankrupt will not only lose his home, but in most cases any equity he might otherwise have protected through a homestead exemption. Likewise, the bankrupt's right to redeem—available under most State laws—would be lost for lack of power to execute a new obligation.

Second. Non-exempt personal property: Automobile and durable consumer goods of many kinds are usually acquired on credit, the seller retaining a purchase-money security interest in the auto or goods until payment in full is made. Under present law a bankrupt may often keep possession of such property by reaffirming his obligation with the seller. Under section 524 (b) and (c) and section 722 he would be powerless to reaffirm and the creditor would be obliged to repossess.

Third. All intangible property: The bankrupt may have pledged as security intangibles such as a credit union share, a certificate of deposit, stocks or bonds, contract rights or assignment of debt, life insurance policies et cetera. Again, pursuant to the strictures of section 524 (b) and (c) and section 722, he would be unable to prevent liquidation of such properties through an agreement to revive his discharged obligation.

The fresh start concept of the act will actually be thwarted in many cases by the ban on reaffirmations, resulting in substantial harm to consumers. The more flexible consumer-protective limitations on reaffirmation originally proposed and adopted by the subcommittee and now contained in my amendment will cure this disastrous defect in the bill.

I strongly urge the adoption of my amendment.

Mr. President, I reserve the remainder of my time.

Mr. THURMOND. Mr. President, will the distinguished Senator yield?

Mr. BARTLETT. I yield.

Mr. THURMOND. Mr. President, I commend the able Senator from Oklahoma. He and I are members of the Armed Services Committee, and he has done a fine job there. On all his committees, he has done a splendid job. We are proud of him, and I am glad to join him in this amendment. It is a sound amendment and should be adopted.

Mr. BARTLETT. I thank the distinguished Senator from South Carolina.

Mr. WALLOP. Mr. President, will the Senator yield?

Mr. BARTLETT. I yield.

Mr. WALLOP. Mr. President, I find myself in agreement, as I was during my opening remarks, with the posture the Senator has taken.

I ask those who are against this, what is wrong with offering a debtor flexibility as to a particular property or a particular debt?

It seems to me that it is inherently American to offer somebody a protected route to dignity. The 30-day cooling-off period, the opportunity for rescission, provides that protection and yet allows the debtor the option to restore personal confidence and dignity by reaffirmation if he chooses. I support the Senator.

Mr. BARTLETT. I thank the distinguished Senator from Wyoming.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 7 minutes remaining.

Mr. DECONCINI. Mr. President, Senator KENNEDY, the sponsor of the reaffirmation section as reported in the bill from the Judiciary Committee, is unavoidably absent today, but I would like to take this opportunity to defend and lend my support to the Kennedy proviso on reaffirmations.

Under the current Bankruptcy Act, the effect of a discharge has generally been governed by State law. Under most State laws, a discharge is an affirmative defense to any action on the debt discharged. It does not forbid collection of the debt, nor does it erase the debt. The moral obligation to repay the debt remains, and is valid consideration for a new promise to repay. Thus, unsuspecting debtors are led into binding reaffirmations, and the beneficial effects of a bankruptcy discharge are undone. The advantages sophisticated and experienced creditors have our unsophisticated debtors in this area were lessened by the 1970 amendments to the Bankruptcy Act, but some still remain. The unequal bargaining position of debtors and creditors, and the creditors' superior experience in bankruptcy matters still lead to reaffirmations too frequently. To the extent that reaffirmations are enforceable, the fresh start goal of the bankruptcy laws is impaired.

The bill makes void any agreement that contains a reaffirmation of a discharged debt, and prohibits a creditor from entering into such an agreement. The consumer finance industry strongly opposes the provision. It has argued that debtors frequently voluntarily repay debts, and that debtors should not be prohibited from repaying discharged debts, out of a sense of moral obligation or for other reasons. "Voluntary", however, is somewhat euphematic, and often has led to court action to enforce "voluntary" repayments. The bill recognizes the truly voluntary situation and permits legitimately voluntary repayments, but denies creditors court process to enforce a reaffirmation, other than under a nondischargeability or redemption agreement. H.R. 8200 guarantees that debtors may repay a portion or all of a discharged debt in a voluntary situation, without any fear of reaffirming the whole of the debt and being subject to the same court process that resort to the bankruptcy laws was designed to prevent.

This provision is a significant factor in making bankruptcy relief an effective remedy. It insures that a debtor will not come out of bankruptcy in the same situation as when he went in. It contributes to the debtor's fresh start. The provision prevents creditor experience in handling bankrupt debtors from overwhelming inexperienced debtors that are in a severely disadvantaged bargaining position after bankruptcy.

It was on vote of 10 to 2 that the Judiciary Committee accepted Senator KENNEDY's amendment, and I hope it will be sustained today.

Mr. BARTLETT. Mr. President, at stake here is the human dignity of an individual who does have large debts, does want to put them in order by taking advantage of the bankruptcy laws which have been available to a person in this situation for a long time. This is nothing new at all to a businessman, to a person who has some kind of financial activity and loses his job and has unusually large expenses, or whatever it may be. But he also wants to shout, loud and clear, that he wishes to reaffirm certain of these debts.

I think it is very important for an individual to have this right. I believe it is the most paramount and overriding issue involved with this amendment—that he must have the opportunity to say, if he wishes to say, that he wants to reaffirm certain of these debts. Then, if there is coercion, harassment, or some kind of pressure brought upon this individual, he has 30 days, a quiet period, in which he can think over his reaffirmation, and he can rescind it or alter it.

This provides the protection that the distinguished Senator from Arizona was talking about and that the distinguished Senator from Massachusetts (Mr. KENNEDY), who is absent, had in mind.

But this amendment is a compromise and it definitely provides protection for the individual from any kind of abuse or coercion. I think that it affords him the opportunity, if he wants, to say: "Yes, I reaffirm these debts." To deny an individual his right or deny him possibly the advantage of bankruptcy, which in many cases is the only way a person can go and work his way out and work his way up, I think is virtually almost a criminal act.

So I hope my colleagues will join with those of us who are sponsoring this in order to give every individual the op-

portunity to stand up and say, if he wants: "Yes, here is a debt or here are debts that I reaffirm."

I am happy to yield to the Senator from Utah.

Mr. HATCH. I thank the distinguished Senator from Oklahoma and I compliment him on his amendment here today.

As I have conferred with my constituents about S. 2266 I have heard a loud clamor about the reaffirmation provision that is presently in the bill. After carefully analyzing the portion of the bill relating to this issue as reported by the Judiciary Committee, I feel that the amendment offered by the Senator from Oklahoma is certainly justified.

I support the amendment, and I am pleased to join my colleagues as a cosponsor.

I am concerned that we in the Judiciary Committee perhaps acted a little hastily in changing the provisions of section 524 that have been proposed by the subcommittee after it held hearings and carefully drafted language based upon its findings. If seems only proper that we not eliminate the long accepted concept of reaffirmation.

I have no doubt in my mind that there has been minimal abuse of reaffirmation by over-zealous creditors. However, I do not think it appropriate to meet that problem by a ban of reaffirmation as we have in the bill now before us.

The amendment we are now considering restores the language suggested by the subcommittee and properly protects the right of reaffirmation as a means for the consumer to restore his credibility in a situation where he has found bankruptcy to be a necessary step.

I might add, as an attorney who represented many people who have had difficulties and have had problems with bankruptcy, I think many of these people would be deprived of a tremendous opportunity to be able to resolve some of the inner conflicts and emotional conflicts which occur when they go into bankruptcy if they do not have a right of reaffirmation.

So I urge my colleagues to join us in supporting this amendment of my good friend and colleague from Oklahoma.

Mr. BARTLETT. I thank my distinguished friend, the Senator from Utah. I appreciate his remarks and the remarks of the Senator from South Carolina (Mr. THURMOND), and the Senator also who offered this amendment in committee and supports it very strongly and has been very helpful to me, the Senator from Wyoming (Mr. WALLOP).

I am prepared to yield back the remainder of my time or if the Senator from Wyoming wishes additional time I yield.

Mr. WALLOP. Mr. President, the Senator from Wyoming has a unanimous-consent request.

Mr. President, I ask unanimous consent that Miss Beverly Charles, of Senator JAVITS' staff, and Ralph Oman, of Senator MATHIAS' staff, be accorded the privilege of the floor throughout the debate and votes on S. 2266 and S. 1423.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I ask unanimous consent that Mr. Michael Altier be accorded the privilege of the floor on both these bills.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARTLETT. Mr. President, I make a similar unanimous consent request that Tom Wasinger, of my staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARTLETT. Mr. President, I am prepared to yield back the remainder of my time.

Mr. DECONCINI. Mr. President, I am going to ask for a rollcall vote. I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is not at the present time a sufficient second.

Mr. BARTLETT. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WALLOP. Mr. President, I yield such time as I have remaining to the Senator from Maryland.

Mr. MATHIAS. Mr. President, I extend my congratulations to our distinguished colleagues, the able floor managers of this major and much-needed modernization of our bankruptcy laws, for their fine work.

I particularly compliment them on their understanding and fair approach to the complex subject contained in subchapter IV of chapter 7 which deals with commodity broker liquidations. The field of statutory commodity law is really quite new—the Commodity Futures Trading Commission was established only 4 years ago—and the law in this area is continually unfolding with new twists and wrinkles.

Our colleagues have taken this quite new area of commodities law and successfully interlaced it with the protections of this major bankruptcy revision. I believe that the thoughtful approach to the law contained in the Senate version of this bill should prevail on the conference—it is an approach that looks more fairly at the nature of commodity transactions while fully and equitably contemplating the problems of the bankrupt. It is my hope that our Senate colleagues will press for this superior version of this section of the bill in conference.

FORWARD CONTRACTING

The proposed amendments to the Bankruptcy Act contained in subchapter IV of chapter 7 of S. 2266 are concerned with commodity firms which are regulated by the Commodity Futures Trading Commission (CFTC) under the Commodity Exchange Act. The amendments do not deal with forward contract merchant firms, which at present are not regulated by the CFTC but which provide much of the backbone and underpinning to organized futures trading in the United States. Note, however, that section 20 of S. 2391, the CFTC reauthorization bill, would authorize the CFTC to monitor the forward contract markets.

Forward contract merchants are commercial trading firms which offer to commercial customers the ability to buy or sell commodities in the physicals market on a forward basis. For example, a precious metals merchant will sell, on a forward basis, silver to a photographic film manufacturer who requires actual delivery of a specified commodity on a future date; the film manufacturer would buy the metal from the forward contract merchant rather than use the facilities of a futures market to effect the forward purchase since the manufacturer requires a specified grade of the metal and requires delivery on a specified date and at a specified place. While futures contracts are quite effective for hedging market risks, they are not necessarily suitable for obtaining required delivery of a specified graded commodity.

In order for a forward contract merchant to provide a regular and efficient forward market, the forward contract merchant must make extensive use of the futures markets. In other words, when the precious metals merchant sells silver on a forward basis to the film manufacturer, the merchant invariably makes an offsetting purchase of the metal for delivery to the merchant at or about the same time.

Usually this offsetting purchase is made through the facilities of a futures exchange. The forward contract merchant does not take the market risk of the commodity which he sells forward; the merchant, however, is able to offer nonstandardized delivery of a nonstandardized product (which is required for industrial or commercial purposes) because the merchant firm can hedge its market risk by use of a standardized futures contract on a futures exchange. Such a hedged position is not speculative but in fact has a stabilizing force on the public markets.

Just as the commodity broker pays margin to the clearing organization to secure the broker's position, the customer of a forward contract merchant may pay margin to the merchant to secure its (the customer's) obligations. In effect, the margin money received from the forward contract merchant's customer is passed through to the clearinghouse as margin on the forward contract merchant's hedged positions in the futures market. Under the committee print of S. 2266 dated May 17, 1978, the payment of margin by the broker to the clearing organization is free from attack but the payment of margin in the physicals market by the film manufacturer is not necessarily protected and leaves a dangerous gap in the protection provided the clearing organization.

If, in the event of the bankruptcy of a sizable customer of a forward contract merchant, margin payments made to the forward contract merchant were required to be returned (or an order obtained restricting use of funds equal to such

margin payments), but the forward contract merchant was unable to retrieve the margin it paid to the clearing organization, the funds so returned must come from the forward contract merchant's own capital. By suffering a significant reduction or restriction of capital, the forward contract merchant would not be able to meet margin calls on its various futures positions on the exchange. This would result in the precipitous liquidation of substantial positions on the exchange. On this point, it is important to note that in many instances a forward contract merchant will hold a substantial position of the outstanding contracts on a futures market. The liquidation of those positions may drastically affect market price to the detriment of everyone else in the market.

Also, just as commodity brokers contract for the right to liquidate futures positions in the event of bankruptcy, forward contracts frequently contain such liquidation rights. Under the committee print contractual rights to liquidate futures positions cannot be stayed; similar protection should also be afforded the forward contract merchants, because the forward contract is inextricably linked with the futures market. Where the positons are sizable, the pressure on the forward contract merchant would jeopardize his entire position with the futures exchanges requiring immediate liquidation of massive futures positions.

In order to protect the clearing organization, it is suggested that forward contract merchants be treated in a fashion similar to commodity brokers with respect to section 766(b) (margin payments) and section 770 (contractual rights to liquidate contracts). Failure to extend those protections would mean that one side of a forward contract merchant's business would be protected (future business) but that the other side (the physical or cash business which, ironically, is the reason and justification for most futures trading) would be exposed. In the end, however, the futures side would be jeopardized by the merchant's capital drain in the event of a major customer failure.

The changes in the Bankruptcy Act suggested in this memorandum are compelled by logic as well as by economic realities. Forward contract merchants are an integral part of the commodities business; generally speaking, the physicals positions of a forward contract merchant are reflected by offsetting positions in the futures market.

The intricate connections between forward contract firms and the clearing organizations are such that a failure of a forward contract merchant could have serious repercussions to clearing organizations and the commodities community. The presently proposed revisions to the Bankruptcy Act should be modified to provide the additional protection suggested here.

The changes proposed are quite limited. They would apply only to forward contract merchants which are themselves clearing members or affiliates of clearing members, and "forward contracts" would be limited to commodities which are traded on future exchanges. These conditions are necessary to limit the proposal to those instances where bankruptcy or liquidation could affect the public futures market. The following textual suggestions are offered:

The following definitions should be added to Section 761:

Commodity forward contract means a contract requiring the seller to sell and the buyer to purchase a specified quantity of a commodity on a specified date or within a specified time in the future, which contract is effected otherwise than on a contract market or board of trade, but which requires delivery of a commodity (or by-product or essentially similar commodity) which is traded on a contract market.

Forward contract merchant means a person who in the regular course of business purchases and sells commodity forward contracts and who is a member or an affiliate of a member of a clearing organization.

Section 770. Contractual Rights to Liquidate or Transfer.—

Nothing in this title or state law shall operate to prevent, stay, or otherwise prohibit a commodity broker or a forward contract merchant from exercising a contractual right to liquidate or transfer a commodity contract or forward contract, or to cause the liquidation or transfer of a commodity contract or forward contract, nor shall any court issue any order preventing, staying, or otherwise prohibiting the exercise of such a contractual right. As used in this section, the term contractual right includes, but is not limited to, a right set forth in a rule, regulation, or bylaw of a clearing organization or contract market or in a resolution of the governing board thereof.

Section 766. Nonvoidable transfers.—

(b) margin payments made by or to a commodity broker, other than clearing organization, or by or to a forward contract merchant, unless (1) the payment was made on or within one year before the date of the filing of the petition; (2) the payor made the payment with actual intent to hinder, delay, or defraud any entity to which such payor was or became indebted on or after the date that such payment occurred; (3) the transferee knowingly participated in the payor's scheme to defraud; and (4) the recovery is from the transferee or a subsequent transferee who had actual knowledge at the time of that subsequent transfer of the payor's scheme to defraud.

Section 766(b) of S. 2266 should be amended to provide that customer margin payments made to a commodity broker will not be considered voidable preferences in a bankruptcy proceeding in the absence of fraud by a bankrupt customer and collusion on the part of his transferee broker.

S. 2266, as passed by the Senate Judiciary Committee, provides that margin payments made by a commodity broker (absent participation in a fraud) (section 766(b)) or by or to a clearing organization (section 766(c)) are free from attack as voidable transfers. However, no corresponding protection is provided with respect to margin payments to a commodity broker from the broker's customer. It is submitted that this omission may result in jeopardizing the overall protections sought to be provided in S. 2266 toward preserving the integrity of futures markets, their public participants, and the clearinghouse mechanism. In addition, it would indirectly undermine the commodiy broker regulatory pattern envisioned by the CFTC in its recently promulgated minimum financial requirements.

These problems can best be demonstrated by reviewing the structure and internal mechanisms of the futures markets which provide the orderly, uninterrupted flow of funds through the markets and operate effectively to protect their financial integrity.

A clearing organization deals only with its clearing members and is not in privity with the broker's customers; it looks only to its clearing members for margin. As a practical matter, however, when a margin call is made by the clearing organization to a clearing member, the broker will request its customer (which could be the actual trader or another commodity broker with an omnibus account) to post additional margins. This margin money flows from the ultimate customer, through the broker to the clearinghouse and finally, through another broker to the customer on the other side. This is an unbroken sequence of events which occurs daily on America's futures markets. The brokers involved have no beneficial interest in these moneys. Indeed, the Commodity Exchange Act and regulations of the CFTC require that if at any time the broker has collected more margin money than he is in turn obligated to pay to the clearing organization, this money must be segregated and kept separate from his own funds.

If the broker is unable to retrieve margin paid by it to the clearing organization but is required to return margin funds paid to it by its customers, the funds so returned must come from the broker's own capital. By suffering a reduction of capital, the broker may not be able to meet its other customer obligations to the clearing organization, thereby potentially precipitating liquidation of all the futures positions carried by the broker. As noted earlier, in the ordinary course of its business, the broker acts as a conduit of funds with respect to margin due on customers' positions. However, it must be understood that it often happens that the clearing member must advance funds to the clearing organization prior to its receipt of corresponding margin from its customers; this is one of the reasons why clearing organizations require a substantial net worth for membership. If the broker's capital was to become unavailable because of a customer failure, the broker's position at the clearing organization would be completely exposed and the clearing organization protected against the failure of the broker.

Moreover, over the past 2 years the CFTC has been revising its minimum financial requirements for brokerage firms so as to provide additional protection to the firms' customers. Those proposed rules are carefully drawn to take into account current customer futures positions, deficit customer accounts, outstanding debt of the brokerage firm, and other such factors to assure that the broker is financially sound and that customer positions are safe. However, those proposed rules do not and cannot take into account the possibility that previous

margin payments by a bankrupt customer might have to be returned by the broker as voidable transfers.

If this were to happen and the broker's capital depleted, the CFTC's carefully developed financial requirements would be for nought and the firms' customers would be subjected to the very hazards the CFTC was trying to avoid. (We have enclosed for your information a copy of the CFTC's proposed financial regulations for brokerage firms.)

Finally, there is little justification for permitting margin funds transferred by a commodity broker to its customer on profitable positions (as required by law) to be free from attack, but not funds paid by a customer to a broker. It is submitted that the entire chain of margin payments must be protected from attack as a voidable transfer.

In order to accomplish the suggestion made herein, the words "or to" should be added to section 766(b) as follows:

(b) Margin payments made by or to a commodity broker....

TECHNICAL CONFORMING AMENDMENT TO SECTION 103(d) OF S. 2266

A technical conforming amendment should be made to § 103(d) of S. 2266, as passed by the Senate Judiciary Committee, adding the phrase "except as specifically provided in section 766(b) and section 770 therein" to the end of that section immediately before the period. This change is necessary to conform section 103(d) to subchapter IV of title VII of the bill which relates to "Commodity Broker Liquidation, Transactions With Commodity Brokers, and Related Commodity Matters."

Mr. President, I ask unanimous consent that the Federal Register, April 10, 1978, entitled "Commodity Futures Trading Commission—Minimum Financial Requirements," be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMODITY FUTURES TRADING COMMISSION—MINIMUM FINANCIAL REQUIREMENTS

COMMODITY FUTURES TRADING COMMISSION

[17 CFR Part 1]

MINIMUM FINANCIAL REQUIREMENTS

Proposed Adoption and Monitoring

Agency: Commodity Futures Trading Commission.

Action: Proposed rulemaking.

Summary: The proposed rules would amend the minimum financial and related reporting requirements imposed upon futures commission merchants (FCM's) and would change the computational formula used to determine whether a futures commission merchant meets the minimum financial requirements; establish an early warning system designed principally to give notice of a futures commission merchant's financial deterioration; and require all self-regulatory organizations under the jurisdiction of the Commodity Futures Trading Commission to adopt minimum financial and reporting requirements with respect to their member futures commission merchants. The rules would permit the responsibility for monitoring and auditing any FCM which is a member of more than one self-regulatory organization to be delegated to a single self-regulatory organization. The proposed regulations are intended to accomplish the Commission's goal of industry self-regulation while ensuring adequate customer protection and the integrity of the futures market system, increasing regulatory efficiency, facilitating the reduction of the undue burden of multiple financial monitoring, auditing, and reporting imposed upon FCM's which are members of more than one self-regulatory organization, and facilitating the development of a registered futures association under Section 17 of the Commodity Exchange Act, as amended.

Dates: Comments on the proposed rule should be submitted by June 1, 1978.

Address: Send comments to Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581 Attention: Secretariat.

For further information contact:

John L. Manley, Chief Accountant, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581, 202-254-5218.

Supplemental information: The Commission proposed in four parts substantial revisions to its financial regulatory structure now applicable to FCM's and self-regulatory organizations. On October 6, 1976, the Commission proposed extensive revisions in the financial reporting requirements imposed upon FCM's under Commission regulations. 41 FR 45706 (October 15, 1976). On May 17, 1977, the Commission proposed substantial amendments to the minimum financial standards to which FCM's are subject under its regulation 1.17. 42 FR 27166 (May 26, 1977). On June 14, 1977, the Commission proposed an improved early warning system based upon the proposed amendments to its regulation 1.17. 42 FR 31740 (June 22, 1977). On July 27, 1977, the Commission proposed a regulation which would require each self-regulatory organization to adopt minimum financial and related reporting requirements with respect to its member FCM's and would permit the responsibility for monitoring and auditing the financial status of any FCM which is a member of more than one self-regulatory organization to be delegated to a single self-regulatory organization. 42 FR 39036 (August 1, 1977). In October, 1977, the Commission held public hearings on these proposals.[1]

In view of the extent and complexity of these proposed rules and in order to afford maximum opportunity for public comment with respect thereto the Commission is hereby republishing them, as amended, and inviting public comment for an additional sixty days.

THE NEED FOR CHANGE

The Commission's responsibility to protect the integrity of the marketplace and the funds of customers who use that marketplace necessarily encompasses a duty to monitor developments in the commodities futures industry to determine whether the Commission's current regulatory approach is adequate in light of recent and anticipated changes in the industry. The Commission believes that the rapid and substantial increase in the number of registrants, the volume of commodity business that such registrants are doing, and the increased volatility of the futures markets in recent years have combined to produce a situation in which the Commission must shift its regulatory approach from direct regulation, relying primarily on direct auditing, to oversight regulation. In order to establish a structure under which oversight regulation may function effectively, the Commission determined that substantial revisions were necessary in its current regulations. The Commision further believes that to maximize the effectiveness of independent public accountants in this regulatory structure it is necessary to establish uniform computational criteria to determine the FCM's compliance with the Commission's minimum financial regulations.

In reaching the conclusions that this shift in regulatory approach is necessary, the Commission carefully considered a number of recommendations, including the recommendations of the Commission's staff. The Report of the Comptroller General of the United States to Congress on Improvements Needed in Regulation of Commodity Futures Trading (the "GAO Report")[2] recommended that the exchanges be delegated the primary responsibility for audits of FCM's and that the Commission "require FCM's to engage independent public accountants to make the required audits and to furnish reports on the results of these audits to the appropriate exchanges and to the Commission."[3]

Similarly, the Commission's Advisory Committee on Commodity Futures Trading Professionals[4] recommended that the Commission "require that the year end financial statements submitted by FCM's be certified by independent public accountants."[5] In addition, the Commission's Advisory Committee on Definition and Regulation of Market Instruments[6] recommended that any financial reports required of persons dealing in commodity option transactions and leverage transactions in gold or silver be certified annually by an independent public accountant.[7]

The Commission believes that substantial revisions in the minimum financial regulations are necessary for reasons in addition to the need to change to an oversight role in the financial regulation of FCM's. At present the Commission, the Chicago Board of Trade (CBOT) and the Chicago Mercantile Exchange (CME) all have different requirements with respect to financial regulations and related reporting requirements of FCM's, and many FCM's are subject to more than one set of such requirements. In addition, over 50 FCM's, representing approximately fifty percent of all commodity customer business in the futures industry, are also registered with the Securities and Exchange Commission (SEC) as securities broker-dealers and are, therefore, subject to the minimum financial rules of that agency. As a result, many of these FCM's/broker-dealers are subject to as many as three different sets of financial regulations and corresponding audits to enforce these regulations. The Commission believes that these duplicative financial and related reporting requirements impose unnecessary burdens upon FCM's; therefore, it has proposed and is today republishing for comment, revised minimum financial regulations that would establish uniform computational criteria for use in the commodities futures industry.

[5] Report of Commodity Futures Trading Commission Advisory Committee on Commodity Futures Trading Professionals (August 5, 1976).

[6] 40 FR 50557 (October 30, 1975).

[7] Report of the Advisory Committee on the Definition and Regulation of Market Instruments to the Commodity Futures Trading Commission: Recommended Policies on Commodity Option Transactions (July 6, 1976); Report of Advisory Committee on Definition and Regulation of Market Instruments to the Commodity Futures Trading Commission: Recommended Policies on Futures, Forward and Leverage Contracts and Transactions (July 16, 1976).

Another reason for revising the financial regulations is that the Commission's minimum capital rule, which is a part of these regulations, has substantial deficiencies which must be corrected. A major deficiency in the current minimum capital rule is that the computational criteria permits FCM's to finance their operations almost exclusively with non-subordinated, long-term debt; thus, an FCM may actually be insolvent and still satisfy the Commission's present rule. Other deficiencies in the current capital rule include the safety factors on open futures contracts, the definition of propietary account, and the length of time unsecured deficits are allowed to be outstanding and still be included as current assets. The safety factors for high-dollar value, low volatility, open futures contracts provided in current regulation 1.17, are disproportionately high in terms of the risks involved in trading in such contracts when compared to the safety factors on more volatile, low-dollar value contracts. The definition of the term "proprietary" as it is used in the current minimum financial regulations results in unrealistic additional charges to capital of FCM's in relationship to the actual risk involved to these FCM's. Unsecured deficits may be outstanding up to thirty days and still be included as part of the firm's assets in calculating its capital position.

Finally, the Commission's present rules were not intended to, and do not, provide financial regulations with respect to domestic exchange-traded commodity options. It should be noted, however, that all references in the proposed financial regulations to Part 32 of the Commission's regulations (17 CFR Part 32) concerning commodity options relate to the proposed regulations contained in the October 17, 1977 Federal Register release (42 FR 55538) and those regulations have not been adopted. Therefore, it may be appropriate, in the event the Commission adopts the proposed financial regulations prior to taking action with respect to the proposed options regulations, to delay final action with respect to those financial regulations relating to such options until such time as the proposed options regulations are adopted.

MAJOR DIFFERENCES BETWEEN THE PRESENT PROPOSAL AND PRIOR PROPOSALS

*Safety factors.* The safety factor computations currently provided in regulations 1.17 (d) and (e) with respect to open commodity futures contracts are based upon the dollar values of such contracts. Therefore, as previously mentioned, the safety factors for high dollar-value, low volatility, open futures contracts are disproportionately high in terms of the risk involved in the trading of such contracts when compared to the safety factors on highly volatile, low dollar-value contracts. In order to relate the safety factors on a particular contract to the risk involved in trading in that contract, the Commission requested comment upon a proposal to adopt a new safety factor computation based upon the volatility rather than the dollar-value of each contract.[8] Specifically, the safety factor would have been based on a percentage of the standard fluctuation of the price of that contract.

While the commentators in general agreed that amendment of the Commission's regulations respecting the safety factor computation was a desirable step, there was strong opposition to the concept of a computation based upon the standard fluctuation concept because of its complexity and because it would be based upon historical data which could only indicate what safety factors might have been appropriate in the past. Many of these commentators believe the contract markets are in the best position to assess current market risks, and favor a safety factor computation based upon contract market margin requirements. The Commission believes that these arguments have merit and further believes that such margin requirements provide flexible indicia of the volatility of the futures contracts, as well as all other market conditions concerning such contracts. Therefore, the Commission is revising its earlier proposal and is proposing to compute the safety factors for customer positions based upon the amount by which any account is undermargined after a specific number of days are allowed for collection. The safety factor for proprietary positions will be a multiple of the margin requirement.

*Self-regulatory organization membership.* Several commentators criticized the proposals for not recognizing the advantages from the standpoint of regulation, surveillance and customer protection that accrue from an FCM's membership in a self-regulatory organization. Commentators cited such benefits as: (i) the frequency of audits of their member FCM's that self-regulatory organizations conduct or that they will be required to conduct in enforcing the proposed minimum financial regulations; (ii) the daily monitoring of clearing members' positions; (iii) audits of FCM's to determine compliance with margin requirements; and (iv) the speed and flexibility of a self-regulatory organization compared to a federal regulatory agency. The Commission also appreciates that members of self-regulatory organizations, in addition to the cost of their memberships, incur certain expenses in the form of membership fees or dues which, at least in part, are used to pay the costs of auditing, monitoring and other regulatory and surveillance programs of such organizations. Finally, the Commission recognizes that, historically, the losses of customers trading in futures contracts regulated under the Act, as a direct result of member firm failures have been minimal and this has been in past due to the willingness of other member firms to absorb such losses when the failing firm is a member of the same contract market. The Commission believes that these considerations in the context of a properly functioning self-regulatory organization provide a reasonable basis for distinguishing among categories of participants in the futures markets. Accordingly, the revised proposal would (i) establish higher minimum financial requirements and safety factors for non-contract market members than for members and (ii) recognize guarantee deposits and clearing corporation stock as assets in computing net capital.

In adopting any Commission rule or regulation, the Commission is required, pursuant to Section 15 of the Act,[9] to take into consideration the public interest to be protected by the antitrust laws and endeavor to take the least anticompetitive means of achieving the objectives, policies and purposes of the Act. Accordingly, the Commission specifically requests comments as to the possible competitive impacts of making or not making the distinction described above among categories of participants in the futures markets.

*Customer-proprietary definitions.* The proposed amendments to the financial regulations would not have amended the current definitions of "proprietary account" as defined in § 1.3(y) or "customer" as defined in § 1.3(k). Many commentators felt that the Commission's definition of "proprietary account" is overly broad for application to the minimum financial regulations and that within this context it should be narrowed to include only the firm, subsidiaries, affiliates and certain partner accounts. The Commission has carefully considered these comments and has determined to retain its current definition of "customer", while at the same time narrowing the definition of "proprietary" as it is used in the minimum financial regulations to include only the firm and general partner's account.[10] All those accounts which are neither "customer" nor "proprietary" including the accounts of parents, affiliates, stockholders, officers, limited partners, and employees currently included in the definition of "proprietary" (section 1.3(y)) would be considered "non-customer", and with one exception non-customers would be treated the same as customers in the minimum financial regulations. The one exception would be that less time would be allowed for these non-customers to meet margin calls before a firm must take a capital charge for an undermargined position.

*Minimum requirements.* The Commission's current regulations require adjusted working capital of $10,000.[11] The prior proposal would have required adjusted net capital of $25,000. Many commentators suggested that the minimum level should be much higher than that of the proposal (some as high as $250,000), and a few of the commentators suggested that the minimum should be lower than the proposed level of $25,000. The Commission has carefully considered each of these comments and has concluded that even though comprehensive computational criteria are provided in the minimum financial regulations, there are many unforeseen risks which cannot be measured properly in a capital rule. Therefore, the Commission proposes to increase the minimum adjusted net capital level required of an FCM to $50,000 for a member of a designated self-regulatory organization and $150,000 for an FCM which is not a member of a designated self-regulatory organization.

A discussion of certain of the comments received by the Commission in response to its four proposals and a section-by-section explanation of certain of the Commission's revisions to its proposal regulations is set forth below.

FINANCIAL REPORTING REQUIREMENTS

Two commentators stated that there is no reason to believe that an audit which accompanies an application for registration as an FCM can be completed within any shorter period than the time required to complete an annual examination; therefore, the commentators suggested that the time within which the certified financial statements that must accompany an application for registration should be consistent with the time allowed for the preparation of annual certified statements required to be filed by registrants, i.e., within sixty days of filing.[12] Another commentator recommended that when filing an FCM application, businesses which are already established be required to provide certified financial statements that are not more than 12 months old and more up-to-date unaudited financial statements. The Commission has taken these comments into consideration and amended proposed regulation 1.10(a)(2) to require an applicant for FCM registration to file with the application either (i) financial statements certified by an independent public accountant as of a date not more than 45 days prior to the date on which such report is filed; or (ii) unaudited financial statements as of a date not more than 45

[10] The changes in the definition of proprietary apply only as the term is used in regulation 1.17. The segregation and recordkeeping regulations of the Commission will remain unchanged as a result of this proposal.

[11] 17 CFR 1.17.

[12] The Commission initially provided a 45-day period. Proposed Rule 1.10, 41 FR 45711 (October 15, 1976).

days prior to the date on which such report is filed and financial statements certified by an independent public accountant as of the date not more than one year prior to the date on which such report is filed.

The Commission's October 15, 1976, proposal would have required that Form 1–FR be filed on a quarterly basis. Currently such reports are required to be filed semi-annually by the Commission. A number of commentators expressed the view there was no general need for quarterly rather than semi-annual reports, citing the increased costs to FCM's of more frequent reporting. The Commission believes that it must have timely information to monitor effectively the financial responsibility of FCM's, whose business is affected by rapid fluctuations in the futures markets. Moreover, the information which would be required in the new Form 1–FR is essentially that which would ordinarily be prepared in the normal course of business to facilitate management of the firm. The Commission understands that much of this information is being prepared monthly by most firms, although perhaps in a less formal manner than that required on the Form 1–FR. The Commission notes in this regard that over 50 FCM's are registered as broker-dealers with the Securities and Exchange Commission and are accordingly required to file quarterly reports with that agency. In addition, the Chicago Mercantile Exchange requires quarterly financial reports from most of its members, and the CME members together with the broker-dealers, comprise approximately 40 percent of the FCM community which are already filing quarterly financial statements. Thus, while the Commission recognizes that quarterly reporting requirement may increase costs for some FCM's the Commission does not believe it should significantly increase the costs to the industry as a whole. Also, the more frequent reporting will facilitate the Commission's shift from direct regulation through FCM audits to indirect regulation through a review of reports submitted by the FCM's and their independent public accountants. The possible increase in costs for some FCM's, appears to be justified in light of the advantages from a regulatory standpoint of more frequent reporting.

However, the Commission is concerned with the possible impact of quarterly reporting on small FCM's and those FCM's whose brokerage business is incidental to their other business operations. The Commission specifically requests comments on the quarterly reporting concept, including supporting data on increased costs to FCM's and any rationale for distinguishing among FCM's on this matter.

Eleven commentators argued that the thirty day time period allowed for filing quarterly reports was too short, with eight of these commentators specifically suggesting changing the quarterly filing time to forty-five days. Seventeen commentators expressed the view that the proposed sixty day time limit in which to file certified annual reports was too short. In light of these comments and the fact that more frequent financial reporting will be required, the Commission is proposing to revise regulation 1.10 (b) by extending the time period for quarterly and annual certified reports to forty-five days and ninety days, respectively.

One commentator suggested that if a registrant is a member of more than one self-regulatory organization and the proposed designation system is implemented an FCM's financial statements should be furnished only to the self-regulatory organization which is designated to monitor the financial condition of the FCM. The commentator further contends that distribution of these statements to all self-regulatory organizations of which the FCM was a member would give rise to unnecessary expense to be borne by the FCM. The Commission agrees with this comment and has changed the proposed regulations to require that the financial statements be submitted only to the designated self-regulatory organization, if any, and the Commission.

Under the current requirements, each Form 1–FR must contain a Statement of Financial Condition, a Statement of Capital Computation of the Minimum Capital Requirements Pursuant to Regulation 1.17, and a Schedule of Segregation Requirements and Funds on Deposit in Segregation. To these, the Commission proposed to add in the October 15, 1976 proposal, Statements of (i) Income (Loss), (ii) Changes in Financial Position (comparative Statements of Income (Loss), and Changes in Financial Positions for the corresponding period of the prior year), (iii) Changes in Ownership Equity, and (iv) Changes in Liabilities Subordinated to the Claims of General Creditors. Many commentators questioned the need for comparative financial statements and argued that the preparation and filing of such statements would entail needless costs to the FCM's. The Commission believes these comments have merit and has, therefore, eliminated the proposed requirement respecting comparative financial statements.

Other commentators asked the Commission to reconsider requiring most or all of the additional statements, especially in the quarterly reports, citing the additional expense and burdens to FCM's. The Commission has carefully considered these comments but believes, nonetheless, that the income statement provides information that is essential to enable the self-regulatory organizations and the Commission to evaluate the financial status of an FCM. Therefore, the Commission is retaining, subject to further comment, its proposal to require quarterly submission of an income statement to the Commission and Self-regulatory organizations. The Commission believes the Statements of Changes in Financial Condition, Changes in Ownership Equity, and Changes in Liabilities Subordinated to the Claims of General Creditors also provide important information but, based upon further consideration and in light of the comments received, has amended its previous proposal that these statements be required on a quarterly basis and is instead proposing to require that these statements be presented only in the annual certified statements submitted to the Commission and the self-regulatory organizations.

One commentator suggested that the oath or affirmation that is required of a corporation in accordance with section 1.10(d)(4) be only required to be signed by the chief executive officer or the chief financial officer, instead of both as was proposed. The Commission has detremined that one signature is adequate.

Section 1.10(f) as previously proposed, stated "An application for extension of time will be deemed denied unless the Commission, within ten days after receipt of the application, notifies the applicant or registrant of the grant of an extension." Eighteen commentators indicated that the Commission should notify the applicant or registrant in writing whether the extension request has been granted or denied. One commentator stated "since the FCM is taking good faith steps to comply with the rules, it is incumbent upon the Commission to respond, whether affirmatively or negatively sometime prior to the required filing date". The Commission has changed proposed regulation 1.10(f) in response to these comments by requiring that the application for extension of time be received by the Commission fifteen days before the filing deadline for the report. The Commission will respond to an application within 10 days after it is received. Proposed regulation 1.16(f) deals with extensions of time for filing audited reports, and it contains language similar to proposed regulation 1.10(f). Since the comments respecting proposed regulation 1.10 (f) would be equally applicable to § 1.16(f), it also has been amended to incorporate the changes made in § 1.10(f).

Several commentators argued that the Commission should give confidential treatment to Form 1–FR. The Commission believes, however, that proposed regulation 1.10 (g) is consistent with § 145.5(d)(1)(i) of the Commission regulations and the implementation of the Freedom of Information Act. Therefore, the Commission has not proposed that this paragraph be changed.

The previous proposals would have required that the annual certified Statement of Financial Condition, the Computation of Minimum Capital Requirements Pursuant to Section 1.17 and the opinion of the independent public accountant with appropriate footnote disclosures be sent to all of the registrant's customers with open contracts and credit balances. The Commission received approximately 20 comment letters which strongly opposed the sending of any financial information to customers. These commentators emphasized the right of FCM's to privacy. In view of the comments, the Commission now proposes to eliminate these requirements from its proposed financial regulations.

MAINTENANCE OF MINIMUM FINANCIAL REQUIREMENTS BY FCM'S

Several commentators felt that proposed regulation 1.12 would require continuous determination of adjusted net capital. These commentators believe that the early warning system should be triggered only when an FCM knows or should know that the trigger level is reached. The Commission never intended to require continuous determination of adjusted net capital; accordingly, the proposed regulation has been amended to make this clear.

One commentator questioned the requirement of paragraph (e) of proposed regulation 1.12, that "Reports to the Commission by a contract market of an FCM's failure to file a notice pursuant to § 1.12 should result solely from a contract market's normal surveillance." This commentator stated, "No additional burdens should be placed on the contract market by virtue of this new regulation." The Commission did not intend that this regulation impose additional burdens, and contract markets will be required to report only when they know or should have known of a violation of the early warning system.

QUALIFICATIONS AND REPORTS OF ACCOUNTANTS

Proposed regulation 1.16(b)(1) establishes the qualifications which accountants must meet to practice before the Commission. The Commission will recognize only certified public accountants who are duly registered and in good standing under the laws of their place of residence or principal office; and licensed public accountants who were duly licensed on or before December 31, 1970, and in good standing under the laws of their place of residence or principal office. The Commission received two comments on this paragraph. Both pointed out that the proposed regulations are in conformity with the position of the Comptroller General of the United States,[13] and one commentator commended the Commission on its forthright stand on the issue. The other commentator, however, objected to the Commission's adopting the Comptroller General's restriction as to which non-certified public accountants may be considered qualified for the purposes of practicing before the Commission. In view of the Comptroller General's stance, the Commission does not propose to amend its qualification standards.

Proposed regulation 1.16(b)(3) concerns

[13] Report of the Comptroller General of the United States to Congress on Improvements Needed in Regulation of Commodity Futures Trading (June 24, 1975).

the independence standards which accountants must meet to practice before the Commission. One group of commentators in a combined letter stated their belief that it would be inappropriate for the exchanges to be required to oversee the independence of accountants, and stated that the rule requiring independence of accountants in the securities industry is enforced directly by the Securities and Exchange Commission. The Commission wishes to make it clear, in response to this comment, that its regulations will govern the independence of accountants in connection with the audits of FCM's and does not intend to delegate this responsibility to the self-regulatory organizations.

Several commentators recommended that independent auditors should be required to issue supplemental reports describing material weaknesses in internal controls found to have existed since the date of their previous examination instead of including such a report as part of the independent accountant's report on the financial statements. Based on these comments, the Commission is proposing a new section 1.16(c)(5) which would require an independent accountant to issue a separate report on material inadequacies. The Commission is eliminating the requirement that the independent accountant state in his report on the financial statements whether a review was made of the procedures followed for safeguarding customer and firm assets in accordance with the provisions of the Act and the regulations. Several commentators felt that the language in proposed regulation 1.16(d) concerning material inadequacies was too broad and requested that it be narrowed. The Commission has responded to these comments by adding language to § 1.16(d)(2)(iv) limiting violations of the Commission's segregation, recordkeeping, or financial reporting regulations required to be reported to those that could reasonably be expected to result in the conditions prescribed in paragraphs (d)(2)(i), (ii) and (iii) of proposed regulation 1.16.

Regulation 1.16(e) as originally proposed would have required that an auditor who determines, in the course of an audit, that any material inadequacies exist in the internal controls of the FCM, must call such inadequacies to the attention of the FCM who must then inform the Commission and the designated self-regulatory organization of the inadequacies within twenty-four hours. Several commentators feared that twenty-four hours would not be long enough for compliance with this reqirement, and suggested that three business days would be more realistic. Proposed regulation 1.16(e) has been amended to allow three business days for notification.

MINIMUM FINANCIAL REQUIREMENTS

*General.* Several commentators suggested that broker-dealers who are already regulated by the SEC and who are also registered as FCM's should be exempt from the Commission's proposed minimum financial requirements. The Commission does not believe that it can grant such an exemption consistent with its responsibilities under the Commodity Exchange Act (the "Act"). By exempting this category of FCM's from its financial requirements the Commission believes that effective regulatory surveillance for financial responsibility would be precluded. In addition, should the Commission after granting such an exemption suspect that a firm is violating the SEC's requirements, it would be placed in the position of having to rely completely on that Agency to take the necessary action to insure that the firm was brought into compliance with its obligations under the Act, inasmuch as the Commission lacks the authority to enforce SEC regulations. The Commission believes that this situation could foster incongruous results which would be intolerable in light of its own obligations under the Act. As was indicated in the FEDERAL REGISTER notice which accompanied the proposed amendments to section 1.17[14] the Commission's staff and representatives of the SEC have initiated cooperative efforts in connection with their respective financial regulations. In part as a result of such efforts, the Commission is, for example, proposing several amendments to its regulations, including the incorporation by reference of the SEC's safety factors or "haircuts" on securities. In addition, the Commission recommends that the SEC amend its regulations to incorporate by reference the Commission's safety factors on futures. If this step is taken, it will provide the requisite uniformity to permit those FCM's which are also registered with the SEC as securities broker-dealers to comply with the Commission's financial reporting requirements by simply filing copies of the SEC's FOCUS Report[15] with the self-regulatory organizations and the Commission.

Two commentators stated they favored the utilization of a working capital concept rather than a net capital concept for the minimum financial regulations. In determining compliance with the minimum financial regulations a working capital concept would not take long term debt into consideration. The Commission believes, as it has stated previously,[16] that the working capital concept which allows an FCM to finance its business solely through the use of non-subordinated, long-term debt is a major shortcoming of the current financial regulations. The Commission believes that a futures commission merchant must have a permanent capital base for its operations. Any minimum financial regulation which permits an FCM to finance its operations as described above and thus actually be "insolvent" and still comply with those requirements is seriously deficient.

The Commission is aware of the concerns expressed within the industry that the subtraction of long-term debt from current assets in computing adjusted net capital would needlessly exclude a certain class of firms from registration as FCM's, to the detriment of the commodities futures industry. Such firms would be those whose primary business is other than the brokerage business and whose FCM business is merely incidental to their primary business activities. These firms typically make extensive use of long-term debt to finance their primary business activities, and many of their assets acquired through the use of long-term debt would not fall within the definition of "current assets" under proposed regulation 1.17. Therefore, such asset could not offset long-term debt in evaluating the financial status of such firms and this would make it impossible for them to comply with the Commission's proposed minimum financial requirements. The Commission does not believe these concerns are valid because proposed regulation 1.17 would permit an FCM to reduce its long-term liabilities in evaluating its financial status to the extent of the net book value of the plant, property and equipment which is used in the ordinary course of any trade or business for a reportable segment of the firm's business, other than in the commodity futures, commodity option, securities and securities option segments.

Two contract markets commented that it is important for a firm which is experiencing financial difficulties to be able to get any infusion of additional funds without restricting these additional funds to subordinating debt or equity capital. The Commission believes these comments have merit and is therefore adding language to proposed regulation 1.17 which would allow self-regulatory organizations and the Commission at their discretion, to temporarily suspend the subordination requirements of paragraph (h) of proposed regulation 1.17, and permit the substitution of long term debt for subordinated debt for up to 30 days. The temporary suspension of the requirements of proposed regulation 1.17(h) under proposed regulation 1.17(h)(4) may be granted with respect to a particular FCM only once during any twelve month period.[17]

Regulation 1.17(a)(4) as proposed required a registrant to comply with § 1.17 at all times and to be able to demonstrate such compliance to the satisfaction of the Commission and/or any self-regulatory organization of which the registrant is a member. A registrant which did not meet these requirements would immediately have to cease doing business (except trading for liquidating purposes only) as a futures commission merchant until such time as the registrant could demonstrate such compliance. Many commentators questioned the use of the phrase "at all times"; stating that this language would be impossible to comply with and requested clarification.

In part as a result of these comments, proposed paragraph 1.17(a)(4) has been revised and divided into two paragraphs, 1.17(a)(3) and 1.17(a)(4). Proposed regulation 1.17(a)(3) provides that no person applying for registration as a futures commission merchant shall be so registered unless such person affirmatively demonstrates to the satisfaction of the Commission that it complies with the financial requirements of this section 1.17. The paragraph further requires that each registrant be in compliance with proposed regulation 1.17 at all times and to be able to demonstrate such compliance to the satisfaction of the Commission and/or the designated self-regulatory organization at all times.

Proposed regulation 1.17(a)(4) requires a registrant which cannot demonstrate compliance with requirements of section 1.17 immediately to transfer all customer accounts and cease doing business (except transactions for liquidation purposes). However, if such registrant immediately demonstrates to the satisfaction of the Commission or the designated self-regulatory organization the ability to get into compliance, the Commission or the designated self-regulatory organization may allow the registrant up to 10 days in which to do so without having to transfer accounts and cease doing business. This paragraph is intended to provide a specific procedure in the event a registrant fails to comply with the requirement of proposed paragraph (a)(4), and is not intended to limit or preclude action by the Commission or the designated self-regulatory organization for violations of any of the provisions of section 1.17. Thus, for example, the Commission or the designated self-regulatory organization might deem it appropriate to take action against a registrant which has not been in compliance with the requirements of section 1.17 regardless of the fact that such registrant gets into compliance within 10 business days.

One commentator stated that the reference in the proposed regulations to Secu-

---

[14] 42 FR 27168 (May 26, 1977).

[15] Financial and Operational Combined Uniform Single Report Under the Securities Exchange Act of 1934.

[16] 42 FR 27167 (May 26, 1977).

[17] Paragraph (h) of proposed regulation 1.17 defines, in detail, satisfactory subordination agreements. The definition is the same as that employed by the SEC except for those FCM's electing to comply with the minimum capital requirements of proposed regulation 1.17(g), (for such FCM's certain specific provisions have been added which relate directly to the requirements to which they are subject) and the proposed amendment described above.

rities Exchange Act Rule 15c3–1 [18] (The SEC's "net capital rule") is inappropriate, because it would require an FCM, as a result of its securities transactions which do not necessitate registration with the SEC and which may, in fact, be inconsequential transactions vis-a-vis the FCM's total business, to be fully aware of every provision of the SEC's net capital rule. The Commission believes that its reference to the SEC's rule is necessary, because with respect to those matters which are peculiar to the securities industry the Commission should rely on the expertise of the SEC. Therefore, if the SEC's rule is relied upon without being incorporated by reference, each amendment of that rule would necessitate a corresponding amendment of the Commission's regulations and this would be an unnecessary duplication of effort. Moreover, FCM's which are not also registrants of the Securities and Exchange Commission will only have to be familiar with only those provisions of the SEC's net capital rule (*eg*, "haircut" regulation for securities) which apply to such FCM's.

*Current assets.* Regulation 1.17(c)(2(i) as prososed would have excluded from current assets any unsecured commodity futures or option accounts containing a ledger balance and open trades, the combination of which liquidate to a deficit or containing a debit ledger balance. However, the proposed regulation would have permitted such deficits or debit ledger balances which are the subject of calls for margin or other required deposits which are oustanding five business days or less to be included in current assets. Several commentators felt that the financial regulation should allow customers more time to respond to margin calls. Other commentators suggested that no unsecured deficits or customer ledger balances should be included in current assets. These commentators argued that the existence of unsecured deficits or debit ledger balances of customers constituted unwarranted risks to the firm. The Commission agrees with this latter argument and is, therefore, proposing to allow deficits or debit ledger balances only to the extent that they are subject of current calls for margins or other required deposits which are outstanding one business day or less.

Commentators had two major concerns with the Commission's proposed treatment of unsecured trade accounts receivable: (i) the proposed regulation was so narrow that it would eliminate all receivables which are not related to the sale or trading of commodities or commodities futures; and (ii) the time allowed for collection of such receivables were too short. In part in response to these comments, the Commission has amended proposed regulation 1.17(c)(2)(ii)(A) to characterize as current assets receivables resulting from the marketing of all inventories commonly associated with the business activities of the FCM and has extended the time (to seventy-five days from the date they arise) allowed for such receivables to be outstanding and still be included in current assets.

The proposed regulation concerning insurance claims which are allowed as current assets in computing an FCM's capital, received criticism from commentators who are engaged in other business activities besides the brokerage business. These commentators felt that the regulation would not permit a commodity firm to take into account its insurance claims such as a claim based upon losses related to the destruction of a grain elevator. The Commission is therefore proposing regulation 1.17(c)(2)(ii)(E) to provide that insurance claims which arise from a reportable segment of the FCM's business activities, other than the brokerage business, and which are not more than seventy-five days old from the date they are recorded as a receivable may be included in current assets.

Proposed § 1.17 would have excluded unrealized commissions from current assets and a number of commentators suggested that such commissions receivable are legitimate current assets. The Commission agrees; therefore, it has deleted the specific exclusion of unrealized commissions from current assets and proposes to allow the firms to include unrealized commissions as current assets to the extent that the account in respect of which such commissions are earned its properly margined.

Several commentators expressed concern that inventory items such as seeds, fertilizers, fuels and other farm supply products would be excluded as current assets under the proposed regulations. To make it clear that this was not the Commission's intention, a paragraph has been added to the proposed regulation which specifically allows inventories held for resale which are commonly associated with the business activity of the FCM to be included in current assets.

The disallowance of Board of Trade Clearing Corporation stock as an asset was criticized, since this stock can be used as margin. Commentators suggested that the disallowance of the Clearing Corporation's stock and other guarantee deposits at clearing corporations would put clearing members at a severe disadvantage vis-a-vis all other participants in the futures markets. In light of these comments and the Commission's decision to recognize the benefits of contract market membership, language has been added to the proposed regulation which specifically allows as current assets guarantee deposits with, and stock of, clearing organizations to the extent of their margin value.

*Secured transactions.* The previous proposal would not have amended the definitions of "secured" from the current regulations. One commentator pointed out that the Commission's definition of this term might have potentially devastating effect if applied to securities broker-dealers, because certain items which would not be considered secured under the definition could not be included in current assets. The commentator cited such items as securities which broker-dealers are failing to deliver; securities borrowed in order to effectuate delivery; and customer's bona fide cash positions containing open, unpaid purchases which have decreased in value. Paragraph (b)(1) of proposed regulation 1.17 states "where an asset or liability which is defined in Securities Exchange Act Rule 15c3–1 (17 CFR 240.15c3–1), the inclusion or exclusion of all or part of such assets or liabilities for the computation of adjusted net capital and aggregate indebtedness shall be in accordance with Securities and Exchange Commission rules, unless specifically stated otherwise in § 1.17". The intent of this provision is to treat transactions which relate solely to the securities industry the same under Commission regulations as such transactions would be treated under the SEC's rules. Since the examples described by the commentator relate to transactions which arise solely in the securities industry these items would not be excluded from current assets in computing net capital.

Another commentator questioned the applicability of the "secured" definition in view of the book entry system for U.S. Treasury bills. This comment led the Commission to amend its initial proposal (which required that the collateral which is used to secure the transaction be in the possession *and* control of the FCM) to require that the collateral be in the possession or control of the FCM. Control for the purposes of this section would include U.S. Treasury bills on a book entry system and other securities pledged to secure a loan which are in the possession of the party making such a loan.

*Liabilities.* The regulation as previously proposed would have excluded from liabilities in computing net capital, liabilities classified as long-term in accordance with generally accepted accounting principles to the extent of the net book value of plant, property, and equipment which is used in the processing, manufacture, storage or shipment of commodities, their products and by-products in a reportable segment of the applicant's or registrant's overall business activities, other than in the brokerage business. Several commentators suggested that the proposed language be broadened to allow long-term debt to be excluded from liabilities in computing net capital to the extent of the net book value of plant, property, and equipment which is used in any trade or business which is a reportable segment of the FCM's overall business activities other than the brokerage business. The Commission believes that this comment has merit and has amended its proposal accordingly.

*Safety factors:* Several commentators pointed out that the proposed five percent deduction on unsecured trade accounts receivable does not take into account any reserves established for uncollectable receivables. In view of this comment and the fact that the Commission is proposing to allow such receivables to be included as current assets for no longer than seventy-five days from the date that they arise, the Commission has decided to eliminate the five percent charge on these receivables.

Proposed regulation 1.17(c)(5)(ii) has been renumbered as paragraph (c)(5)(i), and the proposed ten percent charge on advances has, in view of the position taken by many commentators that a 10% "haircut" on such advances is inordinately high, been reduced to 5%.

Many commentators criticized the Commission's proposed capital charges on inventories, fixed price contracts, and forward contracts as being inordinately large in relation to the risks assumed. Two commentators suggested that the charges on these positions be based on the net "at risk" cash position. These commentators suggested that the Commission require all cash positions to be marked to their market value and require the safety factor to be based upon the net "at risk" position. The Commission believes that these comments have merit and is accordingly proposing to base the capital charges on all inventory, fixed price commitments and forward contracts upon the net position of the FCM. In addition, the Commission has changed the percentage charges which are applicable to these positions to conform with this new approach.

One commentator suggested that regulation 1.17(c)(5)(v) would permit non-broker-dealer/FCM's to use reduced capital charges applicable to security positions. Security positions of broker-dealers who elect to calculate their adjusted net capital pursuant to SEC Rule 15c3–1(f) are subject to reduced charges under that rule. However, the provisions of that rule have the effect of increasing certain deposit requirements for those broker-dealers. The commentator suggested that non-broker-dealers/FCM's are not subject to the increased deposit requirements and accordingly should not be permitted to take advantage of the reduced capital charges provided in the SEC's regulations. The proposed regulations would permit only securities brokers and dealers to utilize the reduced charges.

As previously discussed in this FEDERAL REGISTER release, the Commission is amending its proposal with respect to safety factors on commodity futures accounts and grantor commodity option accounts. The proposed safety factors, as revised, would be for customer and non-customer positions, based upon the amount by which any account is under-margined (after a specific number of days which would be allowed for collection) and for proprietary positions based upon a

[18] 17 CFR 240.15c3–1.

multiple of the contract market margin requirements. The proposed regulations require a capital charge for undermargined customer commodity futures accounts and grantor commodity options accounts to the extent of the total amount of cash required in each such account to meet the maintenance margin requirements of the board of trade on which the contract that is the subject of the margin requirement is traded, after application of calls for margin, or other required deposits, which are outstanding five business days or less until December 31, 1979, four business days or less until December 31, 1980, and three business days or less thereafter. For under-margined, non-customer and omnibus commodity futures and grantor commodity option accounts, the safety factor would be the amount of cash required in each such account to meet the maintenance margin requirements of the applicable board of trade on which the contract that is the subject of the margin is traded after application of calls for margin or other required deposits which are outstanding two business days or less.

The safety factors on open futures contracts and grantor commodity options held in proprietary accounts carried by the FCM which are not covered (as defined in regulation 1.17(j)) by a position held by the FCM or which are not the result of a "changer trade," shall be: (i) for the positions cleared by a clearing member of an exchange, the margin requirement of the clearing organization; (ii) for an FCM which is a member of any contract market or domestic commodity option exchange 150% of the greater of the maintenance margin requirement of the applicable board of trade or clearing organization; and (iii) for those FCM's who are not members of any contract market or domestic commodity option exchange 200% of the applicable maintenance margin requirement of the applicable board of trade or clearing organization whichever is greater.

Except for the charges respecting undermargined accounts described above, the Commission has deleted from the proposed financial regulations, the safety factors on customer open futures contracts and grantor commodity options.

The proposed regulations require an FCM who is the "taker" of a commodity option to charge the premium to expense and who is the "grantor" of a commodity option to recognize the premium as income in computing adjusted net capital. In addition, there would be a safety factor on commodity options carried long by the FCM which would be the same safety factor required if the FCM were a grantor of a commodity option, but the charge would not exceed the value attributed to such option by the FCM in computing its current assets.

*Aggregated Indebtedness.* Several commentators criticized the proposed definitions of "aggregate indebtedness" in the proposed regulations, because under its terms an FCM which obtains a loan secured by documents which are eligible for delivery to finance delivery of spot commodities would have been required to include that loan in its aggregate indebtedness if such loan were obtained on behalf of a customer. These commentators stated that when a customer's position is fully hedged, it is virtually certain that the receivable from the customer will be collected, and that the risks assumed by the FCM in these situations are so small that the regulation should not be drafted to require that the loans in respect of such positions be included in aggregate indebtedness. The Commission believes these comments have merit and is proposing regulation 1.17 (c)(6)(ii) which excludes from aggregate indebtedness, indebtedness arising in connection with advances to non-proprietary accounts when such indebtedness is adequately collateralized by spot commodities eligible for delivery on a contract market and when such spot commodities are fully hedged.

One commentator stated that the exclusions from aggregate indebtedness should not be limited to the credit balances in the accounts of general partners but should include all equities in accounts of general partners. It was not the intention of the Commission to limit the exclusion to cash credit balances, and the Commission has, therefore changed the wording of the proposed regulations to make this clear.

*Withdrawal of equity capital.* Proposed regulation 1.17(e) prohibits certain withdrawals of equity capital, advances, or loans to certain associated persons if, after giving effect to such withdrawals, advances, or loans and to certain debt payments payable during the following six months, adjusted net capital of the FCM would fall below certain minimum requirements. This provision would apply regardless of whether the FCM is currently obligated to permit such withdrawals, advances, or loans. One commentator stated that an exemption from such commitments to take account of current contractual obligations should be incorporated into the regulation, because he believed that if the proposed regulation were adopted, it would affect the ability of FCM's to meet current contractual obligations. The commentator further stated that if the withdrawals, advances, or loans cause an FCM's adjusted net capital to fall below the minimum required levels, all the other provisions in the rule, including the early warning system under proposed regulation 1.12, will remain applicable. The Commission does not believe such situations as the commentator describes will result from the new regulations, but to assure that these and other situations are dealt with effectively, the Commission has added specific language to paragraph (e) of proposed regulation 1.17 which states the Commission may grant relief from this paragraph if the Commission deems such relief to be in the public interest or for the protection of nonproprietary accounts.

*Alternative capital requirement.* The Commission proposed an alternative to its minimum financial requirement. Specifically the alternative requires a futures commission merchant to maintain adjusted net capital equal to or in excess of the greater of $150,000 ($50,000 for a member of a designated self-regulatory organization) or 4 percent of the funds required to be segregated pursuant to the Act and the regulations thereunder plus, for FCM's which are also securities brokers or dealers, 4 percent of aggregate debit items computed in accordance with the formula for determination of reserve requirements contained in the SEC's Rule 15c-3a (17 CFR 240.15c3-3a).[19]

Several FCM/broker-dealers objected to the proposed addition to their net capital requirements. The Commission believes the SEC's alternative capital requirement does not provide adequate protection for commodity customers of FCM/broker-dealers, especially those whose commodities business is large compared to their securities business. Therefore, the Commission has decided not to change the requirements set forth above. The Commission believes that this proposed alternative requirement would provide adequate protection for the commodity customers of an FCM because of its inter-relationship with the FCM's segregation requirements. Several other commentators agreed with the Commission's proposed approach.

[19] Rule 15c3-3a currently provides that a broker-dealer which has elected to operate pursuant to that agency's alternative minimum net capital requirement must maintain adjusted net capital equal to or in excess of $100,000 or 4 percent of aggregate debit items computed in accordance with the formula for determination of reserve requirements for brokers and dealers (Exhibit A to SEC Rule 15c3-3a, 17 CFR 240.15c3-3a).

COVER

The Commission amended § 1.3(z) of its regulations effective October 1, 1977. (42 FR 72748). The amendment generally broadened the scope of the definition of bona fide hedging transactions or positions to include current commercial risk-shifting practices in the markets regulated by the Commission. The intended effect of the amendment is to increase commercial utilization of the futures markets for the purposes of hedging by allowing additional exemptions from the Commission's limits on positions and daily trading, and by recognizing a broader range of risk-shifting uses of those markets.

On August 19, 1977, the Commission proposed an amendment to § 1.17 pertaining to minimum financial requirements.[20] This amendment would have changed § 1.17, which currently refers to the definition of bona fide hedging, so that it would include only those provisions of the revised bona fide hedging definition which are substantially the same as those in the previous definition.[21] The purpose and effect of the proposed amendment was to correct an unintentional change in the minimum financial requirements which was brought about by the adoption of the new definition of bona fide hedging.

The proposed amendment to § 1.17 was to become effective on October 1, 1977, simultaneously with the revision of the bona fide hedging definition. In proposing the amendment to § 1.17, the Commission stated that it was necessary that the effective dates of the two amendments coincide in order to avoid "ambiguity or uncertainty in the method by which futures commission merchants are to continue to comply with § 1.17 * * *." However, as a result of the comments which the Commission received and of its own review of the interrelationship between minimum financial requirements and the definition of bona fide hedging, the Commission determined not to adopt the proposed amendment to § 1.17, pending further consideration of the related issues.

The Commission now believes it necessary to develop a separate hedging definition which will be termed "cover", to govern the treatment of risk-shifting devices under the Commission's minimum financial requirements.

The Commission's minimum financial requirements are for the protection of commodity futures and commodity option customer funds and the integrity of the marketplace, and it follows that a central consideration with respect to the appropriate treatment of a proprietary transaction or position is whether the transaction or position operates immediately and continuously to shift risks incidental to commercial operations. Therefore, the Commission believes that conceptually, the definition of cover should not substantially differ from that of bona fide hedging. However, in reexamining the interrelationship between the minimum financial requirements and the bona fide hedging definition, the Commission has identified several difficulties which necessarily would have resulted from a reference to the bona fide hedging definition in the minimum financial requirements, and which the Commission believes are resolved by the development of an alternative concept.

First, the bona fide hedging definition is primarily intended to exempt certain futures transactions from the Commission's speculative limits As a result, the definition is limited in application to "transactions or positions in a contract for future delivery on [a] contract market," and it principally deals with the classification of those transactions or positions in markets where the Commission has speculative limits. Thus, risk-shifting devices not involving such lim-

[20] 42 FR 42767 (August 24, 1977).

[21] *Id.*

its may be excluded from the definition regardless of their characteristics relative to the minimum financial requirements.

Second, the definition of bona fide hedging is not designed to, and does not, take into account the risk of capital impairment which a particular transaction or position might entail. For example, transactions which are risk-shifting in character may be considered bona fide hedging even though they are entered into for the purposes of offsetting fluctuations in the value of assets which are not owned and identified at the time of entering the transactions. In such cases, adverse market movements may seriously jeopardize capital during the interval between the execution of the risk-shifting transactions and the acquisition of the asset they are to hedge. Inasmuch as the purpose of minimum financial requirements is the protection of commodity futures and commodity option customers, such risks cannot be ignored in determining the treatment that a particular transaction should receive for the purposes of the minimum financial requirements.

Finally, the bona fide hedging definition includes many provisions which relate to the maintenance of orderly markets and which should have no effect on the treatment of a transaction of position under the minimum financial requirements.

Accordingly, the Commission believes that the definition of "cover" should take into account transactions or positions whose purpose and effect are the immediate and continuous shifting of risks incidental to commercial operations and which do not entail a significant risk of capital impairment, regardless of whether the transactions involve the purchase or sale of a futures contract.

Therefore, the Commission is proposing a definition of "cover" which: (i) Includes all contracts for future delivery and commodity options, (ii) excludes anticipatory hedging; and (iii) eliminates the provisions of the bona fide hedging definition which relate solely to the maintenance of orderly markets. In addition, the Commission will consider whether transactions and positions other than those enumerated in paragraph (j)(2) of proposed regulation 1.17 are within its definition of cover, upon specific request. These transactions or positions must at a minimum meet the general definition contained in paragraph (j)(1) of proposed regulation 1.17.

MONTHLY COMPUTATIONS OF ADJUSTED NET CAPITAL

As previously proposed, regulation 1.18 required formal computations of adjusted net capital as of the close of business each month. Such computations would have been required to be completed within ten business days. Sixteen commentators questioned the need for monthly computations and the majority of these writers and another twelve commentators objected to the ten day time frame within which the computation would be required to be completed. Since the Commission believes it is imperative that an early warning system be established in the commodities futures industry and it further believes that the monthly computations provide the basis for the early warning system proposed in §1.12, the Commission does not propose to amend the monthly requirement. The Commission, in response to the comments, proposes to extend to thirty days the time within which the computation would be required to be completed.

THE REQUIREMENT OF SELF-REGULATORY OVERSIGHT

Regulation 1.52 requires that all self-regulatory organizations adopt minimum financial requirements with uniform computational criteria and permits the delegation of responsibility for monitoring the financial status of FCM's to a single self-regulatory organization. Two commentators questioned the Commission's legal authority to compel self-regulatory organizations to adopt minimum financial and related reporting requirements for FCM's. However, the Commission believes its authority is clear, pursuant to sections 4c, 4f, 4g, 5a, 8a, and 17 of the Act[22] to require self-regulatory organizations to adopt specific minimum financial regulations and further believes that this requirement is in keeping with the self-regulatory concept which is plainly envisioned by the Act.

One contract market stated that additional time would be needed for the industry and the exchanges to hire and train the necessary personnel to insure compliance with the new financial regulations. This commentator stated that it would be extremely difficult, if not impossible, on short notice to hire and train the necessary personnel. Another commentator felt strongly the exchanges should not be required to adopt and enforce any financial requirements until the feasibility and legal status of the National Futures Association is determined or until a new joint compliance program can be implemented for the exchanges. The Commission believes sufficient notice has been given to the self-regulatory organizations to hire, and train adequate personnel to cope with these new regulations. In the October 15, 1976 FEDERAL REGISTER release announcing the proposed revisions of financial reporting requirements for FCM's the Commission stated that:

"[I]t is Commission policy to encourage contract market self-regulation. In this regard, the Commission anticipates requiring all contract markets to adopt and to enforce uniform minimum financial and related reporting requirements. Such requirements will be subject to the same active oversight regulation as the other rule enforcement programs of the contract markets. However, because of the common interest of the contract markets in the financial integrity of their member FCM's and because of the uniform applicability of the minimum financial and related reporting requirements envisioned by the Commission, it may be advantageous for contract markets to engage in a joint enforcement or audit program to monitor compliance with such uniform minimum financial and related reporting requirements. Such a joint program or an alternative program through a National Futures Association, as provided for in Title III of the Commodity Futures Trading Commission Act of 1974, 7 U.S.C. 21, could meet the anticipated Commission requirements. 41 FR 45706."

This language was repeated in the FEDERAL REGISTER release which proposed regulation 1.52 42 FR 39036. The Commission stated further in that FEDERAL REGISTER release that "it is the responsibility of the contract markets, as quasi-public institutions, to insure the financial integrity of their member FCM's thereby insuring the integrity of the marketplace itself, as well as protecting the funds of customers who use that marketplace. This belief is in keeping with the self-regulatory responsibility of the commodity futures industry envisioned by the Commodity Exchange Act, as amended 7 U.S.C. 1–22 (Supp. V. 1975)." The Commission therefore, believes that the industry has been given ample notice of its intention to adopt the proposed financial regulations and that the self-regulatory organizations' auditing programs should be fully implemented no later than December 25, 1978.

The previously proposed regulations permitted the self-regulatory organizations to develop their own plans for the delegation of oversight responsibilities for FCM's which are members of more than one self-regulatory organization to a single contract market or other self-regulatory organization. The Commission believes that this approach will reduce the costs to the self-regulatory organizations and avoid unnecessary burdens upon FCM's and that these factors provide significant incentive for the self-regulatory organizations to reach an agreement on plans for delegation of oversight responsibility. Some commentators believe that it is essential to eliminate the undue burden of multiple self-regulatory organizations monitoring of the same FCM and believe the only way to guarantee such elimination is for the Commission to make the required delegation in the event that the self-regulatory organizations do not do so within a specified time period. In view of this comment and the comments of the previous paragraphs, the Commission is amending proposed regulation 1.52 by adding paragraph (k) which would give the Commission authority, after a reasonable amount of time has elapsed, to make such a delegation if the self-regulatory organizations do not.

In consideration of the foregoing, the Commission hereby proposes to amend 17 CFR Part 1 as follows:

1. By amending § 1.3 to include new paragraphs (ee) and (ff) to read as follows:

§ 1.3 Definitions.

* * * * *

(ee) "Self-regulatory organization." This term means a contract market (as defined in § 1.3(h)), a domestic commodity option exchange (as defined in § 32.1), or a registered futures association under section 17 of the Act.

(ff) "Designated self-regulatory organization." This term means a self-regulatory organization of which a futures commission merchant is a member or, if the futures commission merchant is a member of more than one-self-regulatory organization and such futures commission merchant is the subject of an approved plan under § 1.52, then a self-regulatory organization delegated the responsibility by such a plan for monitoring and auditing such futures commission merchant for compliance with the minimum financial and related reporting requirements of the self-regulatory organizations of which the futures commission merchant is a member, and for receiving the financial reports necessitated by such minimum financial and related reporting requirements from such futures commission merchant.

2. By revising § 1.10 to read as follows:

§ 1.10 Application for registration and financial reports of Futures Commission Merchants.

(a) *Application for registration.* (1) Application for registration as a futures commission merchant shall be filed on Form 7–R in accordance with the instructions contained therein. The initial application for registration shall be accompanied by a Form 8–R executed and filed by each sole proprietor and by each natural person who is a general partner, officer, director, or branch office manager of the applicant, or performs similar functions, or is any other controlling person of the applicant; except that an accompanying Form 8–R need not be filed by any individual who is registered as a floor broker or an associated person or has applied for registration as a floor broker or an associated person and such application has not been withdrawn or denied. Any natural person (other than a floor broker or associated person) who subsequently becomes a general partner, officer, director or branch office manager of the registrant or performs similar functions, or becomes any other controlling person of the registrant, shall promptly execute and file a Form 8–R. Each Form 8–R shall be filed in accordance with the instructions contained therein. Individuals who were previously required to submit biographical information on Form 94 or who have filed a Form 8–R as required by this section shall file a current Form 8–R, upon request by the Commission.

[22] 7 U.S.C. 6c, 6f, 6g, 7a, 12a and 21.

(2) Except as provided in paragraph (a)(3) of this section, each person who files an application for registration as a futures commission merchant, and who is not so registered at the time of filing, must, concurrently with the filing of such application file either: (i) A Form 1–FR certified by an independent public accountant in accordance with § 1.16 as of a date not more than 45 days prior to the date on which such report is filed; or, (ii) a Form 1–FR as of a date not more than 45 days prior to the date in which such report is filed and a Form 1–FR certified by an independent public accountant in accordance with § 1.16 as of a date not more than one year prior to the date on which such report is filed. Each such person must include with such financial report a statement describing the source of his current assets and representing that his capital has been contributed for the purpose of operating his business and will continue to be used for such purpose.

(3) The provisions of paragraph (a)(2) of this section do not apply to any person succeeding to and continuing the business of another futures commission merchant. Each such person who files an application for registration as a futures commission merchant who is not so registered at the time of such filing must file a Form 1–FR as of the first month-end following the date on which his registration is approved. Such report must be filed with the Commission and the designated self-regulatory organization, if any, not more than 45 days after the date for which the report is made.

(b) *Filing of financial reports.* (1) Except as provided in paragraph (b)(3) of this section, each person registered as a futures commission merchant must file a Form 1–FR for each fiscal quarter of each fiscal year unless the registrant elects pursuant to paragraph (e)(2) of this section to file a Form 1–FR for each calendar quarter of each calendar year. Each Form 1–FR must be filed no later than 45 days after the date for which the report is made: *Provided, however,* That any Form 1–FR which must be certified by an independent public accountant pursuant to paragraph (b)(2) of this section must be filed no later than 90 days after the close of each registrant's fiscal year. This paragraph (b)(1) will be applicable to all fiscal quarters beginning after (the effective date of this section) but in no event more than 90 days after (such effective date).

(2) The Form 1–FR filed pursuant to paragraph (b)(1) of this section as of the close of the registrant's fiscal year must be certified by an independent public acountant in accordance with § 1.16. A registrant who has elected to file its Forms 1–FR for each calendar quarter of each calendar year pursuant to paragraph (e)(2) of this section, must nonetheless file a Form 1–FR as of the close of such registrant's fiscal year.

(3) The provisions of paragraphs (b)(1) and (b)(2) of this section shall not apply to any person registered as a futures commission merchant who is a member of a designated self-regulatory organization and conforms to minimum financial standards and related reporting requirements set by such designated self-regulatory organization in its bylaws, rules, regulations or resolutions and approved after (the effective date of these regulations) by the Commission pursuant to section 4f(2) of the Act: *Provided, however,* That each such registrant shall promptly file with the Commission a true and exact copy of each financial report which it files with such designated self-regulatory organization.

(4) Upon receiving written notice from any representative of the Commission or any self-regulatory organization of which it is a member, an applicant or registrant must, monthly or at such times as specified, furnish the Commission and the self-regulatory organization, if any, requesting such information with a Form 1–FR and/or such other financial information as requested by the representative of the Commission or the self-regulatory organization. Each such Form 1–FR or such other information must be furnished within the time period specified in the written notice.

(c) *Where to file reports.* The reports provided for in this § 1.10 will be considered filed when received by the regional office of the Commission where the applicant or registrant has its principal place of business and by the designated self-regulatory organization, if any; *Provided, however,* That information required of an applicant or registrant pursuant to paragraph (b)(4) of this section need be furnished only to the Commission and the self-regulatory organization requesting such information.

(d) *Contents of financial reports.* (1) Each Form 1–FR filed pursuant to this § 1.10 which is not required to be certified by an independent public accountant must be completed in accordance with the instructions to the form and contain: (i) a Statement of Financial Condition as of the date for which the report is made; (ii) a Statement of Income (Loss) for the period between the date of the most recent Statement of Financial Condition filed with the Commission (or the beginning of the fiscal quarter immediately following the effective date of this rule) but in no event more than 90 days after (such effective date) and the date for which the report is made; (iii) a Statement of the Computation of the Minimum Capital Requirements Pursuant to § 1.17 and a Schedule of Segregation Requirements and Funds on Deposit in Segregation, as of the date for which the report is made; and (iv) in addition to the information expressly required, such further material information as may be necessary to make the required statements and schedules not misleading.

(2) Each Form 1–FR filed pursuant to this § 1.10 which is required to be certified by an independent public accountant must be completed in accordance with the instructions to the form and contain: (i) a State of Financial Condition as of the date for which the report is made; (ii) Statements of Income (Loss), Changes in Financial Position, Changes in Ownership Equity, and Changes in Liabilities Subordinated to Claims of General Creditors, for the period between the date of the most recent certified Statement of Financial Condition filed with the Commission (or the beginning of the fiscal quarter immediately following (the effective date of this rule) but in no event more than 90 days after (such effective date) and the date for which the report is made, *Provided,* That for an applicant filing pursuant to paragraph (a)(2) of this section the period must be the year ending as of the date of the Statement of Financial Condition; (iii) a Statement of the Computation of the Minimum Capital Requirements Pursuant to § 1.17 and a Schedule of Segregation Requirements and Funds on Deposit in Segregation, as of the date for which the report is made; (iv) appropriate footnote disclosures; and (v) in addition to the information expressly required, such further material information as may be necessary to make the required statements not misleading.

(3) The statements required by paragraphs (d)(2)(i) and (d)(2)(ii) of this section may be presented in accordance with generally accepted accounting principles in the certified reports filed as of the close of the registrant's fiscal year pursuant to paragraph (b)(2) of this section or accompanying the application for registration pursuant to paragraph (a)(2) of this section, rather than in the format specifically prescribed by these regulations: *Provided,* The Statement of Financial Condition is presented in a format as consistent as possible with the Form 1–FR and a reconciliation is provided reconciling such Statement of Financial Condition to the Statement of the Computation of the Minimum Capital Requirements Pursuant to § 1.17. Such reconciliation must be certified by an independent public accountant in accordance with § 1.16.

(4) Attached to each form 1–FR filed pursuant to this § 1.0 must be an oath or affirmation that to the best knowledge and belief of the individual making such oath or affirmation the information contained in the Form 1–FR is true and correct. If the applicant or registrant is a sole proprietorship, then the oath or affirmation must be made by the proprietor; if a partnership, by a general partner; or if a corporation, by the chief executive officer or chief financial officer.

(e) *Election of fiscal year* (1) Any applicant or registrant wishing to establish a fiscal year other than the calendar year may do so by notifying the Commission and the designated self-regulatory organization, if any, of its election of such fiscal year in writing concurrently with the filing of the Form 1–FR pursuant to paragraph (a)(2) of this section or within 90 days of (the effective date of this section), but in no event may such fiscal year end more than one year from the date of the Form 1–FR filed pursuant to paragraph (a)(2) of this section or more than one year from (the effective date of this regulation). An applicant or registrant which does not so notify the Commission and the designated self-regulatory organization, if any, will be deemed to have elected the calendar year as its fiscal year. A registrant must continue to use its elected fiscal year, calendar or otherwise, unless a change in such fiscal year is approved upon written application to the principal office of the Commission in Washington, D.C., and written notice of such change is given to the designated self-regulatory organization, if any.

(2) Any applicant or registrant may elect to file its Form 1–FR for each calendar quarter in lieu of each fiscal quarter by notifying the Commission and the designated self-regulatory organization, if any, of its election, in writing, concurrently with the filing of the Form 1–FR pursuant to paragraph (a)(2) of this section or within 90 days after (the effective date of this section). Any registrant wishing to change such election or to make such election other than concurrently with the filing of the Form 1–FR pursuant to paragraph (a)(2) of this section or within 90 days of (the effective date of this section) may do so only if such change or election is approved by the Commission upon written application to the principal office of the Commission in Washington, D.C., and written notice of such change is given to the designated self-regulatory organization, if any.

(f) *Extension of time form filing reports.* In the event any applicant or registrant finds that it cannot file its report for any period within the time specified in paragraphs (b)(1), or (b)(4) of this section or paragraph (b) of § 1.12 without substantial undue hardship, it may file with the principal office of the Commission in Washington, D.C., an application for an extension of time to a specified date which may not be more than 90 days after the date as of which the financial statements were to have been filed. The application must state the reasons for the requested extension and must contain an agreement to file the report on or before the specified date. The application must be received by the Commission fifteen days before the time specified in paragraphs (b)(1), or (b)(4) of this section or paragraph (b) of § 1.12 for filing the report. Notice of such application must be given to the designated self-regulatory organization, if any, concurrently with the filing of such application with the Commission. An application for extension of time will be responded to by the Commission, within ten days after receipt of the application. (See § 116(f) for exten-

sion of the time for filing certified financial statements.)

(g) *Confidentiality of reports.* All of the Forms 1-FR filed pursuant to this section will be public; provided, however, that if the Statement of Financial Condition, the Computation of the Minimum Capital Requirements Pursuant to § 1.17, and the Schedule of Segregation Requirements and Funds on Deposit in Segregation are bound separately from the other financial statements, footnotes disclosures and schedules of Form 1-FR, trade secrets and certain other commercial or financial information on such other statements and schedules will be deemed privileged or confidential. All information on such other statements and schedules will, however, be available for official use by any official or employee of the United States or any state, by any self-regulatory organization of which the person filing such report is a member, and by any other person to whom the Commission believes disclosure of such information is in the public interest. Nothing in this paragraph (g) will limit the authority of any self-regulatory organization to request or receive any information relative to its members' financial condition. The independent accountant's opinion filed pursuant to this § 1.10 will be deemed public information.

3. By adopting a new § 1.12 to read as follows:

§ 1.12 Maintenance of minimum financial requirements by futures commission merchants.

(a) Each person registered as a futures commission merchant, or who files an application for registration as a futures commission merchant, who knows or should have known that its adjusted net capital at any time is less than the minimum required by § 1.17 or by the capital rule of any self-regulatory organization to which such person is subject, if any, must:

(1) Give telegraphic notice as set forth in paragraph (f) of this section that such applicant's or registrant's adjusted net capital is less than is required by section 1.17 or by such other capital rule, identifying the applicable capital rule. This notice must be given within 24 hours after such applicant or registrant knows or should have known that its adjusted net capital is less than required by any of the aforesaid rules to which such applicant or registrant is subject; and

(2) Within 24 hours after giving such notice file a Statement of Financial Condition, a Statement of the Computation of the Minimum Capital Requirements Pursuant to § 1.17 (computed in accordance with the applicable capital rules), and a Schedule of Segregation Requirements and Funds on Deposit in Segregation, all as of the date such violation occurs.

(b) Each person registered as a futures commission merchant, or who files an application for registration as a futures commission merchant, who knows or should have known that its adjusted net capital at any time is less than (i) the greater of 120 percent of the appropriate minimum dollar amount required by § 1.17 or 8⅓ percent of aggregate indebtedness or (ii) if the applicant or registrant is operating pursuant to § 1.17(g), the greater of 120 percent of the appropriate minimum dollar amount required by § 1.17(g) or 6% of the funds required to be segregated pursuant to section 4(d)(2) of the Act and these regulations, plus, for securities brokers or dealers, 6 percent of aggregate debit items computed in accordance with the Formula for Determination of Reserve Requirements (§ 240.15c3-3a of this title); such applicant or registrant must file written notice to that effect as set forth in paragraph (f) of this section within five (5) business days of such event. Such applicant or registrant must also file a Form 1-FR or such other financial statement designated by the Commission and/or the designated self-regulatory organization, if any, as of the close of business for the month during which such event takes place and as of the close of business for each month thereafter until three (3) successive months have elapsed during which the applicant's or registrant's adjusted net capital is at all times equal to or in excess of the minimums set forth in this paragraph (b) which are applicable to such applicant or registrant. Each financial statement required by this paragraph (b) must be filed within 30 calendar days after the end of the month for which such report is being made.

(c) If an applicant or registrant at any time fails to make or keep current the books and records required by these regulations, such applicant or registrant must, on the same day such event occurs, give telegraphic notice of such fact, specifying the books and records which have not been made or which are not current, and within 5 business days after giving such notice file a written report stating what steps have been made and are being taken to correct the situation.

(d) Whenever any applicant or registrant discovers or is notified by an independent public accountant, pursuant to § 1.16(e)(2) of these regulations, of the existence of any material inadequacy, as specified in §1.16 (d)(2) of these regulations, such applicant or registrant must give telegraphic notice of such material inadequacy within three business days, and within five business days after giving such notice file a written report stating what steps have been and are being taken to correct the material inadequacy.

(e) Whenever any self-regulatory organization learns that a member registrant has failed to file a notice or written report as required by this §1.12, such self-regulatory organization must immediately report such failure as provided in paragraph (f) of this section.

(f) Every notice and written report required to be given or filed by this section must be filed with the regional office of the Commission for the region in which the applicant or registrant has its principal place of business, with the designated self-regulatory organization, if any, and with the Securities and Exchange Commission, if such applicant or registrant is a securities broker or dealer. In addition, every notice required to be given by this section must also be filed with the principal office of the Commission in Washington, D.C. Each Statement of Financial Condition, each Statement of the Computation of the Minimal Capital Requirements Pursuant to §1.17, and each Schedule of Segregation Requirements and Funds on Deposit in Segregation required by this section must be filed in accordance with the provisions of § 1.10(d) of these regulations, unless otherwise indicated.

4. By adding a new § 1.16 as follows:

§ 1.16 Qualifications and reports of accountants.

(a) *Definitions.*—(1) *Accountant's report.* The term "accountant's report," when used in regard to financial statements, means a document in which an independent licensed or certified public accountant indicates the scope of the audit (or examination) which he has made and sets forth his opinion regarding the financial statements taken as a whole or an assertion to the fact that an overall opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefore must be stated.

(2) *Audit or Examination.* The terms "audit" and "examination," when used in regard to financial statements, mean an examination of the statements by an accountant in accordance with generally accepted auditing standards for the purposes of expressing an opinion thereon.

(3) *Certified.* The term "certified," when used in regard to financial statements, means audited and reported upon with an opinion expressed by an independent certified public accountant or independent licensed public accountant.

(b) *Qualifications of accounts.* (1) The Commission will recognize any person as a certified public accountant who is duly registered and in good standing as such under the laws of the place of his residence or principal office. The Commission will recognize any person as a licensed public accountant who was duly licensed on or before December 31, 1970, and is in good standing as such under the laws of the place of his residence or principal office.

(2) The Commission will not recognize any certified public accountant or licensed public accountant as independent who is not in fact independent. For example, an accountant will not be considered independent with respect to any applicant or registrant or any parent, subsidiary, or other affiliate of such applicant or registrant (i) in which, during the period of his professional engagement to examine the financial statements being reported on or at the date of his report, he or his firm or a member thereof had, or was committed to acquire, any direct financial interest or any material indirect financial interest, or (ii) with which, during the period of his professional engagement to examine the financial statements being reported on, at the date of his report or during the period covered by the financial statements, he or his firm or a member thereof was connected as a promoter, underwriter, voting trustee, director, officer, or employee, except that a firm will be deemed independent with respect to an applicant or registrant and its affiliates if a former employee or officer of such applicant or registrant or any such affiliate is employed by the firm and such individual has completely disassociated himself from the applicant or registrant and its affiliates and does not participate in auditing financial statements of the applicant or registrant or its affiliates covering any period of his employment by the applicant or registrant of its affiliates. An accountant will not be considered independent if he or his firm or a member thereof performs manual or automated bookkeeping services or assumes responsibility for maintenance of the accounting records, including accounting classification decisions, of such applicant or registrant or any of its affiliates. For the purposes of this section 1.16(b), the term "member" means all partners in the firm and all professional employees participating in the audit or located in the office of the firm participating in a significant portion of the audit.

(3) In determining whether an accountant may in fact not be independent with respect to a particular applicant or registrant, the Commission will give appropriate consideration to all relevant circumstances, including evidence bearing on all relationships between the accountant and that applicant or registrant or any affiliate thereof, and will not confine itself to the relationship existing in connection with the filing of reports with the Commission.

(c) *Accountant's reports.*—(1) *Technical requirements.* The accountant's report (i) must be dated, (ii) must be signed manually, (iii) must indicate the city and state where issued and (iv) must identify without detailed enumeration the financial statements covered by the report.

(2) *Representations as to the audit.* The accountant's report (i) must state whether the audit was made in accordance with generally accepted auditing standards, and (ii) must designate any auditing procedures deemed necessary by the accountant under the circumstances of the particular case which have been omitted and the reasons for their omission. However, nothing in this paragraph (c)(2) shall be construed to imply authority for the omission of any procedure which independent accounts would ordinar-

ily employ in the course of an audit made for the purposes of expressing the opinion required by paragraph (c)(3) of this section.

(3) *Opinion to be expressed.* The accountant's report must state clearly: (i) the opinion of the accountant with respect to the financial statements covered by the report and the accounting principles and practices reflected therein and (ii) the opinion of the accountant as to the consistency of the application of the accounting principles, or as to any changes in such principles which have material effect on the financial statements.

(4) *Exceptions.* Any matters to which the accountant takes exception must be clearly identified, the exceptions thereto specifically and clearly stated, and to the extent practicable, the effect of each such exception on related financial statements given.

(5) *Accountant's report on material inadequacies.* A registrant must file concurrently with the annual audit report a supplemental report by the accountant describing any material inadequacies found to exist or found to have existed since the date of the previous audit. An applicant must file concurrently with the audit report a supplemental report by the accountant describing any material inadequacies found to exist as of the date of the Form 1–FR being filed. The supplemental report must indicate any corrective action taken or proposed by the applicant or registrant in regard thereto. If the audit did not disclose any material inadequacies, the supplemental report must so state.

(d) *Audit objectives.* (1) The audit must be made in accordance with generally accepted auditing standards and must include a review of the accounting system, the internal accounting control, and the procedures for safeguarding customer and firm assets in accordance with the provisions of the Act and the regulations thereunder, including appropriate tests thereof, since the prior examination date. The audit must include all procedures necessary under the circumstances to enable the independent licensed or certified public accountant to express an opinion on the financial statements and schedules. The scope of the audit and review of the accounting system, the internal controls, and procedures for safeguarding customer and firm assets must be sufficient to provide reasonable assurance that any material inadequacies existing at the date of the examination in (i) the accounting system, (ii) the internal accounting controls, and (iii) the procedures for safeguarding customer and firm assets (including the segregation requirements of section 4d(2) of the Act and these regulations) will be discovered. Additionally, as specified objectives the audit must include reviews of the practices and procedures followed by the registrant in making (i) periodic computations of the minimum financial requirements pursuant to section 1.17 and (ii) daily computations of the segregation requirements of section 4d (2) of the Act and these regulations.

(2) A material inadequacy in the accounting system, the internal accounting controls, the procedures for safeguarding customer and firm assets, and the practices and procedures referred to in paragraph (d)(1) of this section which is to be reported in accordance with paragraph (e)(2) of this section includes any conditions which contributed substantially to or, if appropriate corrective action is not taken, could reasonably be expected to:

(i) Inhibit an applicant or registrant from promptly completing transactions or promptly discharging his responsibilities to customers or other creditors;

(ii) Result in material financial loss;

(iii) Result in material misstatement of the applicant's or registrant's financial statements; or

(iv) Result in violations of the Commission's segregation, recordkeeping or financial reporting requirements to the extent that could reasonably be expected to result in the conditions described in paragraphs (d)(2)(i),(ii), or (iii) of this section.

(e) *Extent and timing of audit procedures.* (1) The extent and timing of audit procedures are matters for the independent public accountant to determine on the basis of his review and evaluation of existing internal controls and other audit procedures performed in accordance with generally accepted auditing standards and the audit objectives set forth in paragraph (d) of this section. In determining the extent of testing, consideration must be given to the materiality of an area and to the possible effect on the financial statements and schedules of a material misstatement in a related account.

(2) If during the course of an audit or interim work, the independent public accountant determines that any material inadequacies exist in the accounting system, in the internal accounting control, in the procedures for safeguarding customer or firm assets, or as otherwise defined in paragraph (d) of this section, he must call it to the attention of the applicant or registrant, who has the responsibility to inform the Commission and the designated self-regulatory organization, if any, of such inadequacies in accordance with paragraph (d) of § 1.12. The applicant or registrant must also furnish the accountant with a copy of said notice to the Commission within three business days. If the accountant fails to receive such notice from the applicant or registrant within three business days, or if he disagrees with the statements contained in the notice of the applicant or registrant, the accountant must inform the Commission and the designated self-regulatory organization, if any, by reporting the material inadequacy within three business days thereafter. Such report from the accountant must, if the applicant or registrant failed to file a notice, describe the material inadequacies found to exist. If the applicant or registrant filed a notice, the accountant must file a report detailing the aspects, if any, of the applicant's or registrant's notice with which the accountant does not agree.

(f) *Extension of time for filing audited reports.* (1) In the event any applicant or registrant finds that it cannot file its certified financial statements for any year within the time specified in section 1.10 without substantial undue hardship, it may file with the principal office of the Commission in Washington, D.C., an application for extension of time to a specified date and not more than 90 days after the date as of which the certified financial statements were to have organization, if any. The application must be sent to the designated self-regulatory organization, if any. The application must be made by the applicant or registrant and must: (i) state the reasons for the requested extension; (ii) indicate that the inability to make a timely filing is due to circumstances beyond the control of the applicant or registrant, if such is the case, and describe briefly the nature of such circumstances; (iii) be accompanied by the latest available formal computation of his adjusted net capital and minimum financial requirements computed in accordance with section 1.17; (iv) be accompanied by the latest available computation of required segregation and by a computation of the amount of money, securities, and property segregated on behalf of customers as of the date of the latest available computation; (v) contain an agreement to file the report on or before the date specified by the applicant or registrant in the application; (vi) be received by the principal office of the Commission in Washington, D.C., and by the designated self-regulatory organization, if any, fifteen days prior to the date on which the report is due; and (vii) be accompanied by a letter from the independent public accountant answering the following questions:

A. What specifically are the reasons for the extension request?

B. On the basis of that part of your audit to date, do you have any indication that may cause you to consider commenting on any material inadequacies in the accounting system, internal accounting controls or procedures for safeguarding customer or firm assets?

C. Do you have any indication from the part of your audit completed to date that would lead you to believe that the firm was or is not meeting the minimum capital requirements specified in section 1.17 or the segregation requirements of section 4d(2) of the Act and these regulations, or has any significant financial or recordkeeping problems?

(2) An application for extension of time will be responded to by the Commission within ten days of the receipt of the application.

(3) On the written request of any designated self-regulatory organization, or an applicant or registrant, or on its own motion, the Commission may grant an extension of time or an exemption from any of the certified financial reporting requirements of this chapter either unconditionally or on specified terms and conditions.

(g) *Replacement of accountant.* (1) In the event (i) the independent public accountant who was previously engaged as the principal accountant to audit an applicant's or registrant's financial statements resigns (or indicates he declines to stand for re-election after the completion of the current audit) or is dismissed as the applicant's or registrant's principal accountant, (ii) another independent accountant is engaged as principal accountant, or (iii) an independent accountant on whom the principal accountant expresses reliance in his report regarding a subsidiary resigns (or formally indicates he declines to stand for re-election after completion of the current audit) or is dismissed or another independent public accountant is engaged to audit that subsidiary, the applicant or registrant shall file written notice of such occurrence with the Commission at its principal office in Washington, D.C., and with the designated self-regulatory organization, if any, not more than 15 days after such occurrence.

(2) Such notice must state (i) the date of such resignation (or declination to stand for re-election, dismissal or engagement) and (ii) whether, in connection with the audits of the two most recent fiscal years and any subsequent interim period preceding such resignation, dismissal or engagement there were any disagreements with the former accountant on any matter of accounting principles or practices, financial statements disclosure, auditing scope or procedures, or compliance with the applicable rules of the Commission, which, if not resolved to the satisfaction of the former accountant, would have caused him to make reference in connection with his report to the subject matter of the disagreements (if so, describe such disagreements). The disagreements required to be reported in this paragraph (g)(2) include both those resolved to the former accountant's satisfaction and those not resolved to the former accountant's satisfaction. Disagreements contemplated by this paragraph (g)(2) are those which occur at the decision making level, i.e., between personnel of the registrant responsible for presentation of its financial statement and personnel of the accounting

firm responsible for rendering its report. The notice must also state whether the accountant's report on the financial statements for any of the past two years contained an adverse opinion or a disclaimer of opinion or was qualified as to uncertainties, audit scope, or accounting principles (if so, describe the nature of each such adverse opinion, disclaimer of opinion, or qualification). The applicant or registrant must also request the former accountant to furnish the applicant or registrant with a letter addressed to the Commission stating whether he agrees with the statements contained in the notice of the applicant or registrant and, if not, stating the respects in which he does not agree. Each copy of the notice and accountant's letter must be manually signed by the sole proprietor or a general partner or a duly authorized corporate officer of the applicant or registrant, as appropriate, and by the accountant.

(3) If (i) within the 24 months prior to the date of the most recent audited financial statement, a notice has been filed pursuant to paragraph (g)(1) of this section reporting a change of accountants, (ii) included in such filing there is a reported disagreement on any matters of accounting principles or practices, financial statements disclosure, auditing scope, or noncompliance with the applicable rules of the Commission, (iii) during the fiscal year in which the change in accountants took place or during the subsequent fiscal year, there have been any transactions or events similar to those which involved a reported disagreement, and (iv) such transactions or events are material and were accounted for or disclosed in a manner different from that which the former accountant apparently would have concluded was required, the existence and nature of the disagreements and also the effect on the financial statements must be stated in a written notice to the Commission at its principal office in Washington, D.C., and the designated self-regulatory organization, if any, if the method which the former accountant apparently would have concluded was required had been followed. These disclosures need not be made if the method asserted by the former accountant ceases to be generally accepted because of authoritative standards or interpretations subsequently issued. The notice required by this paragraph (g)(3) must be filed by the applicant or registrant concurrently with the financial statements to which it pertains.

5. By amending § 1.17 to read as follows:

§ 1.17 Minimum financial requirements—futures commission merchants.

(a)(1) Except as provided in paragraph (a)(2) of this section, each person registered as a futures commission merchant must maintain adjusted net capital equal to or in excess of (i) the greater of $150,000 ($50,000 for a member of a designated self-regulatory organization) or 6⅔ percent of aggregate indebtedness, or, (ii) in the case of a registrant electing to operate pursuant to paragraph (g) of this section, the greater of $150,000 ($50,000 for a member of a designated self-regulatory organization) or 4 percent of the funds required to be segregated pursuant to the Act and these regulations plus, for Securities Brokers and Dealers, 4 percent of aggregate debit items computed in accordance with the Formula for Determination of Reserve Requirements (Exhibit A to Rule 15c3-3, 17 CFR 240.15c3-3a).

(2) The requirements of paragraph (a)(1) of this section shall not be applicable if the registrant is a member of a designated self-regulatory organization and conforms to minimum financial standards and related reporting requirements set by such designated self-regulatory organization in its by-laws, rules, regulations or resolutions approved by the Commission pursuant to section 4f(2) of the Act after (the effective date of this regulation).

(3) No person applying for registration as a futures commission merchant shall be so registered unless such person affirmatively demonstrates to the satisfaction of the Commission that it complies with the financial requirements of this section 1.17. Each registrant must be in compliance with this section 1.17 at all times and must be able to demonstrate such compliance to the satisfaction of the Commission and/or the designated self-regulatory organization.

(4) A registrant who is not in compliance with this section 1.17 or unable to demonstrate compliance with this section 1.17 as required by paragraph (a)(3) above, must transfer all customer accounts and immediately cease doing business as a futures commission merchant until such time as the registrant is able to demonstrate such compliance. *Provided, however,* That the registrant may trade for liquidation purposes only unless otherwise directed by the Commission and/or the designated self-regulatory organization. *Provided, further,* That if such registrant immediately demonstrates to the satisfaction of the Commission or the designated self-regulatory organization the ability to get into compliance, the Commission or the designated self-regulatory organization may allow such registrant up to a maximum of 10 business days in which to do so without having to transfer accounts and cease doing business as required above. Nothing in this paragraph (a)(4) shall be construed as preventing the Commission or the designated self-regulatory organization from taking action against a registrant for non-compliance with any of the provisions of this section.

(b) For the purposes of this section: (1) Where the applicant or registrant has an asset or liability which is defined in Securities and Exchange Commission rule § 240.-15c3-1 of this title, the inclusion or exclusion of all or part of such asset or liability for the computation of adjusted net capital and aggregate indebtedness shall be in accordance with § 240.15c3-1 of this title, unless specifically stated otherwise in this section.

(2) "Customer" means customer (as defined in § 1.3(k)) and option customer (as defined in § 32.1(d)).

(3) "Proprietary account" means a commodity futures or options account carried on the books of the applicant or registrant for the applicant or registrant itself, or for general partners.

(4) "Non-customer account" means a commodity futures or option account carried on the books of the applicant or registrant which is not included in the definition of customer (as defined in § 1.17(b)(2)) or proprietary account (as defined in § 1.17 (b)(3)).

(5) "Commodity option", "options customer", "premium", "striking price", "domestic commodity option exchange", and "domestic option customer funds" have the same meaning as in part 32 of these regulations.

(c) Definitions: For the purposes of this section:

(1) "Net capital" means the amount by which current assets exceed liabilities. In determining "net capital";

(i) Unrealized profits shall be added and unrealized losses shall be added and unrealized losses shall be deducted in the accounts of the applicant or registrant, including unrealized profits and losses on fixed price commitments and forward contracts;

(ii) All long and all short positions in listed security options shall be marked to their market value and all long and all short securities and commodities positions shall be marked to their market value;

(iii) The value attributed to any nontransferable commodity option shall be the difference between the option's striking price and the market value for the actual commodity or futures contract which is the subject of the option. In the case of a call commodity option, if the market value for the actual commodity or futures contract which is the subject of the option is less than the striking price of the option, it shall be given no value. In the case of a put commodity option, if the market value for the actual commodity or futures contract, which is the subject of the option is more than the striking price of the option, it shall be given no value; and

(iv) The value attributed to any unlisted security option shall be the difference between the option's exercise value or striking value and the market value of the underlying security. In the case of an unlisted call, if the market value of the underlying security is less than the exercise value or striking value of such call, it shall be given no value; and, in the case of an unlisted put, if the market value of the underlying security is more than the exercise value or striking value of the unlisted put, it shall be given no value.

(2) The term "current assets" means cash and other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold during the next 12 months. "Current assets" shall:

(i) Exclude any unsecured commodity futures or option account containing a ledger balance and open trades, the combination of which liquidates to a deficit or containing a debit ledger balance only, provided however, deficits or debit ledger balances in unsecured customers', non-customers' and proprietary accounts, which are the subject of calls for margin or other required deposits which are outstanding one business day or less, may be included in current assets;

(ii) Exclude all unsecured receivables, advances and loans except for:

(A) Receivables resulting from the marketing of inventories commonly associated with the business activities of the applicant or registrant and advances on fixed price purchase commitments; Provided, such receivables or advances are outstanding no longer than seventy-five (75) days from the date that they arise;

(B) Interest receivable, floor brokerage receivable, commissions receivable from other brokers or dealers (other than syndicate profits), mutual fund concessions receivable and management fees receivable from registered investment companies and commodity pools, provided such receivables are outstanding no longer than thirty (30) days from the date they arise; and dividends receivable outstanding no longer than thirty (30) days from the payable date;

(C) Receivables from "clearing organizations," option clearing organizations, foreign clearing organizations, and securities clearing organizations;

(D) Receivables from registered futures commission merchants or brokers, resulting from commodity futures or option transactions, except those specifically excluded under paragraph (c)(2)(i) of this section;

(E) Insurance claims which arise from a reportable segment of the applicant's or registrant's overall business activities, as defined in generally accepted accounting principles, other than in the commodity futures, commodity option, security, and security option segments of the applicant's or registrant's business activities which are not outstanding more than seventy-five (75) days after the date they are recorded as a receivable.

(F) All other insurance claims not subject to paragraph (c)(2)(ii)(E) of this section, which are not older than seven (7) business days from the date the loss giving rise to the claim is discovered; insurance claims which are not older than twenty (20) business days from the date the loss giving

rise to the claim is discovered and which are covered by an opinion of outside counsel that the claim is valid and is covered by insurance policies presently in effect; insurance claims which are older than twenty (20) business days from the date the loss giving rise to the claim is discovered and which are covered by an opinion of outside counsel that the claim is valid and is covered by insurance policies presently in effect and which have been acknowledged in writing by the insurance carrier as due and payable, provided such claims are not outstanding longer than twenty (20) business days from the date they are so acknowledged by the carrier;

(iii) Exclude all prepaid expenses and deferred charges;

(iv) Exclude all inventories except for:

(A) Readily marketable spot commodities; or spot commodities which "adequately collateralize" indebtedness under pargaraph (c)(7) of this section;

(B) Securities which are considered "readily marketable" (as defined in 17 CFR 240.15c3-1(c)(11)) or which "adequately collateralize" indebtedness under paragraph (c)(7) of this section;

(C) Work in process and finished goods at market value which result from the processing of commodities;

(D) Raw materials at market value which will be combined with spot commodities to produce a finished processed commodity; and

(E) Inventories held for resale commonly associated with the business activities of the applicant or registrant;

(v) Include fixed assets and assets which otherwise would be considered non-current to the extent of any indebtedness excluded in accordance with paragraph (c)(6)(v) of this section, provided such liabilities are not excluded from liabilities in the computation of net capital under paragraph (c)(4)(v) of this section;

(vi) Exclude all assets doubtful of collection or realization less any reserves established therefore;

(vii) Include, in the case of future income tax benefits arising as a result of unrealized losses, the amount of such benefits not exceeding the amount of income tax liabilities accrued on the books and records of the applicant or registrant, but only to the extent such benefits could have been applied to reduce accrued tax liabilities on the date of the capital computation, had the related unrealized losses been realized on that date;

(viii) Include guarantee deposits with and to the extent of margin value, stock in clearing organizations;

(ix) Exclude exchange memberships.

(3) A loan or advance or any other form of receivable shall not be considered "secured" for the purposes of paragraph (c)(2) of this section unless the following conditions exist:

(i) The receivable is secured by readily marketable collateral which is otherwise unencumbered and which can be readily converted into cash equal to or in excess of that part of the receivable which is shown in the applicant's or registrant's records as secured; and

(ii) (A) The readily marketable collateral is in the possession or control of the applicant or registrant; or

(B) The applicant or registrant has a legally enforceable, written security agreement, signed by the debtor, and has a perfected security interest in the readily marketable collateral within the meaning of the laws of the state in which the readily marketable collateral is located.

(4) The term "liabilities" means the total money liabilities of an applicant or registrant arising in connection with any transaction whatsoever, including economic obligations of an applicant or registrant that are recognized and measured in conformity with generally accepted accounting principles. "Liabilities" also include certain deferred credits that are no obligations but that are recognized and measured in conformity with generally accepted accounting principles. For the purposes of computing "net capital", the term "liabilities":

(i) Excludes liabilities of an applicant or registrant which are subordinated to the claims of all general creditors of the applicant or registrant pursuant to a satisfactory subordination agreement, as defined in paragraph (h) of this section;

(ii) Excludes the amount of money, securities, and property due to commodity futures or option customers which is held in segregated accounts in compliance with the requirements of the Act and these regulations: *Provided, however,* That such exclusion may be taken only if such money, securities, and property held in segregated accounts have been excluded from current assets in computing net capital;

(iii) Includes, in the case of an applicant or registrant who is a sole proprietor, the excess of liabilities which have not been incurred in the course of business as a futures commission merchant over assets not used in the business;

(iv) Excludes the lesser of any deferred income tax liability related to the items in (A), (B), and (C) below, or the sum of (A), (B), and (C) below:

(A) The aggregate amount resulting from applying to the amount of the deductions computed in accordance with paragraph (c)(5) or paragraph (g) of this section, the appropriate Federal and State tax rate(s) applicable to any unrealized gain on the asset on which the deduction was computed;

(B) Any deferred tax liability related to income accrued which is directly related to an asset otherwise deducted pursuant to this section;

(C) Any deferred tax liability related to unrealized appreciation in value of any asset(s) which has been otherwise excluded from current assets in accordance with the provisions of this section; and

(v) Excludes liabilities which would be classified as long term in accordance with generally accepted accounting principles to the extent of the net book value of plant, property, and equipment which is used in the ordinary course of any trade or business of the applicant or registrant which is a reportable segment of the applicant's or registrant's overall business activities, as defined in generally accepted accounting principles, other than in the commodity futures, commodity option, security, and security option segments of the applicant's or registrant's business activities; *Provided:* That, such plant, property, and equipment is not included in current assets pursuant to paragraph (c)(2)(v) of this section, and *Provided further:* That, the exclusion provided for in this paragraph (c)(4)(v) does not apply when computing aggregate indebtedness pursuant to paragraph (c)(6) of this section.

(5) The term "adjusted net capital" means net capital less:

(i) The amount by which any advances paid by the applicant or registrant on cash commodity contracts and used in computing net capital exceeds 95 percent of the market value of the commodities covered by such contracts;

(ii) In the case of all inventory, fixed price commitments and forward contracts the applicable percentage of the net position specified below:

(A) Inventory which is covered by commodity futures or options—5 percent of the market value.

(B) Inventory which is not covered—20 percent of the market value.

(C) Fixed price commitments (open purchases and sales) and forward contracts which are covered by commodity futures or options.—10 percent of the market value.

(D) Fixed price commitments (open purchases and sales) and forward contracts which are not covered by commodity futures or options—20 percent of the market value.

(iii) (Reserved).

(iv) (Reserved).

(v) In the case of securities and obligations used by the applicant or registrant in computing net capital, and in the case of securities in segregation pursuant to section 4d(2) of the Act and these regulations which were not deposited by customers, the percentages specified in 17 CFR 240.15c3-1(c)(2)(vi) ("Securities Haircuts") and 100 percent of the value of "Non-Marketable Securities" as specified in 17 CFR 240.15c3-1(c)(2)(vii), or where appropriate, for Securities Brokers or Dealers the pecentages specified in 17 CFR 240.15c3-1(f);

(vi) In the case of securities options used by the applicant or registrant in computing net capital, the deductions specified in 17 CFR 240.15c3-1 Appendix A, after effecting certain adjustments to net capital for listed and unlisted options as set forth in such Appendix;

(vii) In the case of an applicant or registrant who has open contractual commitments, as hereinafter defined, the deductions specified in 17 CFR 240.15c3-1(c)(2)(viii);

(viii) For undermargined customer commodity futures and grantor commodity option accounts, the amount of funds required in each such account to meet maintenance margin requirements of the applicable board of trade or if there are no such maintenance margin requirements, clearing organization margin requirements applicable to such positions after application of calls for margin, or other required deposits which are outstanding five business days or less until December 31, 1979, four business days or less until December 31, 1980, and three business days or less thereafter. If there are no such maintenance margin requirements or clearing organization margin requirements on such accounts, then the amount of funds required to provide margin equal to the amount necessary after application of calls for margin, or other required deposits outstanding five days or less until December 31, 1979, four days or less until December 31, 1980, and three days or less thereafter to restore original margin when the initial margin has been depleted by 50 percent or more. Provided, to the extent a deficit is excluded from current assets in accordance with paragraph (c)(2)(i) if this section such amount shall not also be deducted under this paragraph (c)(5)(viii);

(ix) For undermargined non-customer and omnibus commodity futures and grantor commodity option accounts, the amount of funds required in each such account to meet maintenance margin requirements of the applicable board of trade or if there are no such maintenance margin requirements clearing organization margin requirements applicable to such positions after application of calls for margin, or other required deposits which are outstanding two business days or less. If there are not such maintenance margin requirements or clearing organization margin requirements, then the amount of funds required to provide margin equal to the amount necessary after application of calls for margin, or other required deposits outstanding two days or less to restore original margin when the initial margin has been deleted by 50 percent or more. Provided, to the extent a deficit is excluded from current assets in accordance with paragraph (c)(2)(i) if this section such amount shall not also be deducted under this paragraph (c)(5)(ix);

(x) In the case of open futures contracts and grantor commodity options held in proprietary accounts carried by the applicant or registrant which are not covered by a position held by the applicant or registrant or which are not the result of a "changer trade" made in accordance with the rules of a contract market the safety factor shall be:

(A) For an applicant or registrant which is a clearing member of a contract market or domestic commodity option exchange for the positions cleared by such member on such contract market or domestic commodity option exchange, the applicable margin requirement of the applicable clearing organization;

(B) For an applicant or registrant which is a member of a contract market or domestic commodity option exchange 150 percent of the applicable maintenance margin requirement of the applicable board of trade or clearing organization whichever is greater;

(C) For all other applicants or registrants, 200 percent of the applicable maintenance margin requirement of the applicable board of trade or clearing organization whichever is greater, or

(D) For open contracts and commodity options for which there is no applicable maintenance margin requirements, 200 percent of the applicable initial margin requirement.

Provided, the equity in any such proprietary account shall reduce the deduction required by this paragraph (c)(5)(x) if such equity is not otherwise includable in adjusted net capital;

(xi) In the case of an applicant or registrant which is a taker of a commodity option, the safety factor shall be the amount of any commodity option premium which has been used to increase adjusted net capital and in the case of an applicant or registrant which is a grantor of a commodity option, the safety factor may be reduced by the amount of any commodity option premium which has not been previously recognized as income; and

(xii) In the case of a commodity option which is carried long by the applicant or registrant as a taker of a commodity option which has value and such value is used to increase adjusted net capital, the same safety factor as if the applicant or registrant were the grantor of such option in accordance with paragraph (c)(5)(x) of this section, but in no event shall the safety factor be greater than the value attributed to such option.

(xiii) Five percent of all unsecured receivables includable under paragraph (c)(2)(ii)(D) of this section used by the applicant or registrant in computing "net capital" and which are not receivable from (A) a registered futures commission merchant, or (B) a broker or dealer which is registered as such with the Securities and Exchange Commission.

(xiv) For Securities Brokers and Dealers, all other deductions specified in § 240.15c3–1.

(6) The term "aggregate indebtedness" means "liabilities" as defined in paragraph (c)(4) of this section excluding:

(i) Indebtedness adequately collateralized by spot commodities which are carried long by the applicant or registrant and indebtedness adequately collateralized by securities which are carried long by the applicant or registrant and which have not been sold, or by securities which collateralize a secured demand note pursuant to paragraph (h) of this section;

(ii) Indebtedness arising in connection with an advance to a non-proprietary account when such indebtedness is adequately collateralized by spot commodities eligible for delivery on a contract market and when such spot commodities are fully hedged;

(iii) Advances received by the applicant or registrant against bills of lading issued in connection with the shipment of commodities sold by the applicant or registrant;

(iv) Equity balances in the accounts of general partners;

(v) Long-term debt adequately collateralized by assets acquired for use in the ordinary course of the trade or business of an applicant or registrant but no other long-term debt adequately collateralized by assets of the applicant or registrant shall be excluded unless the sole recourse of the creditor for nonpayment of such liability is to such asset;

(vi) Liabilities which are effectively subordinated to the claims of creditors (but which are not subject to a satisfactory subordination agreement as defined in paragraph (h) of this section) by other than customers of the applicant or registrant prior to such subordination, and such subordinations by customers as may be approved by the applicable designated self-regulatory organization or if the applicant or registrant is not a member of a designated self-regulatory organization, then the Commission; and

(vii) Deferred tax liabilities, not already excluded in paragraph (c)(4)(iv) of the section.

(7) "Liabilities" are "adequately collateralized" when, pursuant to a legally enforceably written instrument, such liabilities are secured by identified assets that are otherwise unencumbered and the market value of which exceed the amount of such liabilities.

(8) The term "contractual commitments" shall include underwriting, when issued, when distributed and delayed delivery contracts; the writing or endorsement of security puts and calls and combinations thereof; and commitments in foreign currencies; but shall not include uncleared regular way purchases and sales of securities. As series of contracts of purchase or sale of the same security, conditioned, if at all, only upon issuance, may be treated as an individual commitment.

(d) No applicant or registrant shall permit the total of outstanding principal amounts of its satisfactory subordination agreements (other than such agreements which qualify under this paragraph (d) as equity capital) to exceed 70 percent of its debt-equity total, as hereinafter defined, for a period in excess of 90 days or for such longer period which the Commission may, upon application of the applicant or registrant, grant in the public interest or for the protection of investors. In the case of a corporation, the debt-equity total shall be the sum of its outstanding principal amounts of satisfactory subordination agreements, par or stated value of capital stock, paid in capital in excess of par, retained earnings, unrealized profit and loss and other capital accounts. In the case of a partnership, the debt-equity total shall be the sum of its outstanding principal amounts of satisfactory subordination agreements, capital accounts of partners (exclusive of such partners' commodity and securities accounts) subject to the provisions of paragraph (e) of this section, and unrealized profit and loss. In the case of a sole proprietorship, the debt-equity total shall include the sum of its outstanding principal amounts of satisfactory subordination agreements, capital accounts of the sole proprietorship and unrealized profit and loss. Provided, however, that a satisfactory subordination agreement entered into by a partner or stockholder which has an initial term of at least three years and has a remaining term of not less than 12 months shall be considered equity for the purposes of this paragraph (d) if; (1) it does not have any of the provisions for accelerated maturity provided for by paragraphs (h)(2)(ix)(A), (h)(2)(x)(A), or (h)(2)(x)(B) of this section, and is maintained as capital subject to the provisions restricting the withdrawal thereof required by paragraph (e) of this section, or (2) the partnership agreement provides that capital contributed pursuant to a satisfactory subordination agreement as defined in paragraph (h) of this section shall in all respects be partnership capital subject to the provisions restricting the withdrawal thereof required by paragraph (e) of this section.

(e) No equity capital of the applicant or registrant or a subsidiary's or affiliate's equity capital consolidated pursuant to paragraph (f) of this section, whether in the form of capital contributions by partners (excluding amounts in the commodities and securities accounts of partners and balances in limited partners' capital accounts in excess of their stated capital contributions), par or stated value of capital stock, paid-in capital in excess of par or stated value, retained earnings or other capital accounts, may be withdrawn by action of a stockholder or partner or by redemption or repurchase of shares of stock by any of the consolidated entities or through the payment of dividends or any similar distribution, nor may any unsecured advance or loan be made to a stockholder, partner, sole proprietor, or employee if, after giving effect thereto and to any other such withdrawals, advances, or loans and any payments of payment obligations (as defined in paragraph (h) of this section) under satisfactory subordination agreements and any payments of liabilities excluded pursuant to paragraph (c)(4)(v) of this section which are scheduled to occur within six months following such withdrawal, advance or loan, either adjusted net capital or any of the consolidated entities would be less than 10 percent of aggregate indebtedness or its adjusted net capital would fall to equal 120 per centum of the appropriate minimum dollar amount required or would be less than 7 percent of the amount required to be segregated pursuant to the Act and these regulations plus for Securities Brokers or Dealers, 7 percent of the aggregate debit items computed pursuant to 17 CFR 240.15c3–3, or in the case of any applicant or registrant included within such consolidation, if the total outstanding principal amounts of satisfactory subordination agreements of the applicant or registrant (other than such agreements which qualify as equity under paragraph (d) of this section) would exceed 70 percent of the debt-equity total as defined in paragraph (d). Provided, that this provision shall not preclude an applicant or registrant from making required tax payments or preclude the payment to partners of reasonable compensation. The Commission may, upon application of the applicant or registrant, grant relief from this paragraph (e) if the Commission deems it to be in the public interest or for the protection of non-proprietary accounts.

(f)(1) Every applicant or registrant, in computing its net capital and aggregate indebtedness pursuant to this section must, subject to the provisions of paragraph (f)(2) and (f)(4) of this section, consolidate in a single computation assets and liabilities of any subsidiary or affiliate for which it guarantees, endorses, or assumes directly or indirectly the obligations or indirectly the obligations or liabilities. The assets and liabilities or a subsidiary of affiliate whose liabilities and obligations have not been guaranteed, endorsed, or assumed directly or indirectly by the applicant or registrant may also be so consolidated if an opinion of counsel is obtained as provided for in paragraph (f)(2) of this section.

(2)(i) If the consolidation, provided for in paragraph (f)(1) of this section, of any such subsidiary or affiliate results in the increase of the applicant's or registrant's adjusted net capital and/or increases the applicant's or registrant's percentage of adjusted net capital to aggregate indebtedness or increases the applicant's or registrant's adjusted net capital and/or decreases the minimum adjusted net capital requirement called for by paragraph (g)(1) of this section and an opinion of counsel called for in paragraph (f)(2)(ii) of this section has not been obtained, such benefits shall not be recognized in the applicant's or registrant's computation required by this section.

(ii) Except as provided for in paragraph

(f)(2)(i) of this section, consolidation shall be permitted with respect to any subsidiaries or affiliates which are majority owned and controlled by the applicant or registrant and for which the applicant or registrant can demonstrate to the satisfaction of the Commission, and the designated self-regulatory organization, if any, by an opinion of counsel that the net asset values, or the portion thereof related to the parent's ownership interest in the subsidiary of affiliate, may be caused by the applicant or registrant or an appointed trustee to be distributed to the applicant or registrant within 30 calendar days. Such opinion must also set forth the actions necessary to cause such a distribution to be made, identify the parties having the authority to take such actions, identify and describe the rights of other parties or classes of parties, including but not limited to customers, general creditors, subordinated lenders, minority shareholders, employees, litigants, and governmental or regulatory authorities, who may delay or prevent such a distribution and such other assurances as the Commission or the designated self-regulatory organization by rule or interpretation may require. Such opinion must be current and periodically renewed in connection with the applicant's or registrant's annual audit pursuant to section 1.10 upon any material change in circumstances.

(3) In preparing a consolidated computation of adjusted net capital and/or aggregate indebtedness pursuant to this section, the following minimum and non-exclusive requirements shall be observed:

(i) Consolidated adjusted net capital shall be reduced by the estimated amount of any tax reasonably anticipated to be incurred upon distribution of the assets of the subsidiary or affiliate.

(ii) Liabilities of a consolidated subsidiary or affiliate which are subordinated to the claims of present and future creditors pursuant to a satisfactory subordination agreement shall be deducted from consolidated adjusted net capital unless such subordination extends also the claims of present or future creditors of the parent applicant or registrant and all consolidated subsidiaries.

(iii) Subordinated liabilities of a consolidated subsidiary or affiliate which are consolidated in accordance with paragraph (f)(3)(ii) of this section may not be prepaid, repaid, or accelerated if any of the entities included in such consolidation would otherwise be unable to comply with the provisions of paragraph (h) of this section.

(iv) Each applicant or registrant included within the consolidation shall at all times be in compliance with the adjusted net capital requirement to which it is subject.

(4) No applicant or registrant shall guarantee, endorse, or assume directly or indirectly any obligation or liability of a subsidiary or affiliate unless the obligation or liability is reflected in the computation of adjusted net capital and/or aggregate indebtedness pursuant to this section except as provided in paragraph (f)(2)(i) of this section.

(g) A registrant may elect not to be subject to the limitations of paragraph (a) of this section respecting aggregate indebtedness as defined in paragraph (c)(6) of this section. *Provided*, That in order to qualify to operate under this paragraph (g), such registrant must at all times maintain adjusted net capital equal to the greater of $150,000 ($50,000 for a member of a designated self-regulatory organization) or 4 percent of the funds required to be segregated by the Act and these regulations plus for Securities Brokers or Dealers, 4 percent of the aggregate debit items computed in accordance with the Formula for Determination of Reserve Requirements (Exhibit A to Rule 15c3-3, 17 CFR 240.15c3-3a) and shall notify the designated self-regulatory organization, if any, and the Regional Office of the Commission in which the registrant has its principal place of business, in writing of its election to operate under this provision. Once a registrant has determined to operate pursuant to the provisions of this paragraph (g), he must continue to do so unless a change in such election is approved upon application to the Commission.

(1) A broker or dealer electing to operate pursuant to this paragraph (g) shall be subject to 17 CFR 240.15c3-1(f) in lieu of paragraph (c)(5)(v) of this section.

(2) A broker or dealer who is registered as such with the Securities and Exchange Commission and who is exempt from the provisions of 17 CFR 240.15c3-3 pursuant to paragraph (k)(1) or (k)(2)(i) of that section may not elect to use the alternative contained in this paragraph (g).

(h) The term satisfactory subordination agreement (hereinafter "subordination agreement") means an agreement which contains the minimum and non-exclusive requirements hereinafter set forth.

(1) Certain definitions for purposes of this section: (i) A subordination agreement may be either a subordinated loan agreement or a secured demand note agreement.

(ii) The term "subordinated loan agreement" means the agreement or agreements evidencing or governing a subordinated borrowing of cash.

(iii) The term "collateral value" of any securities pledged to secure a secured demand note means the market value of such securities after giving effect to the percentage deductions specified in paragraph (c) of this section.

(iv) The term "payment obligation" means the obligation of an applicant or registrant in respect to any subordination agreement: (A) to repay cash loaned to the applicant or registrant pursuant to a subordinated loan agreement; or (B) to return a secured demand note contributed to the applicant or registrant or to reduce the unpaid principal amount thereof and to return cash or securities pledged as collateral to secure the secured demand note; and (C) "payment" shall mean the performance by an applicant or registrant of a payment obligation.

(v)(A) The term "secured demand note agreement" means an agreement (including the related secured demand note) evidencing or governing the contribution of a secured demand note to an applicant or registrant and the pledge of securities and/or cash with the applicant or registrant as collateral to secure payment of such secured demand note. The secured demand note agreement may provide that neither the lender, his heirs, executors, administrators, or assigns shall be personally liable on such note nad that in the event of default the applicant or registrant shall look for payment of such note solely to the collateral then pledged to secure the same.

(B) The secured demand note shall be a promissory note executed by the lender and shall be payable on the demand of the applicant or registrant to which it is contributed; *Provided, however*, That the making of such demand may be conditioned upon the occurrence of any of certain events which are acceptable to the designated self-regulatory organization and the Commission.

(C) If such note is not paid upon presentment and demand as provided for therein, the applicant or registrant shall have the right to liquidate all or any part of the securities then pledged as collateral to secure payment of the same and to apply the net proceeds of such liquidation, together with any cash then included in the collateral, in payment of such note. Subject to the prior rights of the applicant or registrant as pledgee, the lender, as defined herein, may retain ownership of the collateral and have the benefit of any increases and bear the risks of any decreases in the value of the collateral and may retain the right to vote securities contained within the collateral and any right to income therefrom or distributions thereon, except the applicant or registrant shall have the right to receive and hold as pledgee all dividends payable in securities and all partial and complete liquidating dividends.

(D) Subject to the prior rights of the applicant or registrant as pledgee, the lender may have the right to direct the sale of any securities included in the collateral, to direct the purchase of securities with any cash included therein, to withdraw excess collateral or to substitute cash or other securities as collateral *Provided*, That the net proceeds of any such sale and the cash so substituted and the securities so purchased or substituted are held by the applicant or registrant as pledgee, and are included within the collateral to secure payment of the secured demand note, and *Provided further*, That no such transaction shall be permitted if, after giving effect thereto, the sum of the amount of any cash, plus the collateral value of the securities, then pledged as collateral to secure the secured demand note would be less than the unpaid principal amount of the secured demand note.

(E) Upon payment by the lender, as distinguished from a reduction by the lender which is provided for in paragraph (h)(2)(vi)(C) of this section or reduction by the applicant or registrant as provided for in paragraph (h)(2)(vii) of this section, of all or any part of the unpaid principal amount of the secured demand note, the applicant or registrant shall issue to the lender a subordinated loan agreement in the amount of such payment (or in the case of an applicant or registrant that is a partnership, credit a capital account of the lender), or issue preferred or common stock of the applicant or registrant in the amount of such payment, or any combination of the foregoing, as provided for in the secured demand note agreement.

(F) The term "lender" means the person who lends cash to an applicant or registrant pursuant to a subordinated loan agreement and the person who contributes a secured demand note to an applicant or registrant pursuant to a secured demand note agreement.

(2) Minimum requirements for subordination agreements: (i) Subject to paragraph (h)(1) of this section, a subordination agreement shall mean a written agreement between the applicant or registrant and the lender, which: (A) has a minimum term of one year, except for temporary subordination agreements provided for in paragraph (h)(3)(v) of this section, and

(B) Is a valid and binding obligation enforceable in accordance with its terms (subject as to enforcement to applicable bankruptcy, insolvency, reorganization, moratorium and other similar laws) against the applicant or registrant and the lender and their respective heirs, executors, administrators, successors and assigns.

(ii) *Specific amount.* All subordination agreements shall be for a specific dollar amount which shall not be reduced for the duration of the agreement except by installments as specifically provided for therein and except as otherwise provided in this paragraph (h)(2) of this section.

(iii) *Effective subordination.* The subordination agreement shall effectively subordinate any right of the lender to receive any payment with respect thereto, together with accrued interest or compensation, to the prior payment or provision for payment in full of all claims of all present and future creditors of the applicant or registrant arising out of any matter occurring prior to the date on which the related payment obligation matures, except for claims which are the subject of subordination agreements which rank on the same priority as or junior to the

claim of the lender under such subordination agreements.

(iv) *Proceeds of subordinated loan agreements.* The subordinated loan agreement shall provide that the cash proceeds thereof shall be used and dealt with by the applicant or registrant as part of its capital and shall be subject to the risks of the business.

(v) *Certain rights of the borrower.* The subordination agreement shall provide that the applicant or registrant shall have the right to: (A) Deposit any cash proceeds of a subordinated loan agreement and any cash pledged as collateral to secure a secured demand note in an account or accounts in its own name in any bank or trust company;

(B) Pledge, repledge, hypothecate and rehypothecate, any or all of the securities pledged as collateral to secure a secured demand note, without notice, separately or in common with other securities or property for the purpose of securing any indebtdeness of the applicant or registrant; and

(C) Lend to itself or others any or all of the securities and cash pledged as collateral to secure a secured demand note.

(vi) *Collateral for secured demand notes.* Only cash and securities which are fully paid for and which may be publicly offered or sold without registration under the Securities Act of 1933, and the offer, sale and transfer of which are not otherwise restricted, may be pledged as collateral to secure a secured demand note. The secured demand note agreement shall provide that if at any time the sum of the amount of any cash, plus the collateral value of any securities, then pledged as collateral to secure the secured demand note is less than the unpaid principal amount of the secured demand note, the applicant or registrant must immediately transmit written notice to that effect to the lender, the designated self-regulatory organization, if applicable, and the Commission. The secured demand note agreement shall also require that following such transmittal:

(A) The lender, prior to noon of the business day next succeeding the transmittal of such notice, may pledge as collateral additional cash or securities sufficient, after giving effect to such pledge, to bring the sum of the amount of any cash plus the collateral value of any securities, then pledged as collateral to secure the secured demand note, up to an amount not less than the unpaid principal amount of the secured demand note; and

(B) Unless additional cash or securities are pledged by the lender as provided in (A) above, the applicant or registrant at noon on the business day next succeeding the transmittal of notice to the lender must commence sale, for the account of the lender, of such of the securities then pledged as collateral to secure the secured demand note and apply so much of the net proceeds thereof, together with such of the cash then pledged as collateral to secure the secured demand note as may be necessary to eliminate the unpaid principal amount of the secured demand note: *Provided, however,* That the unpaid principal amount of the secured demand note need not be reduced below the sum of the amount of any remaining cash, plus the collateral value of the remaining securities, then pledged as collateral to secure the secured demand note. The applicant or registrant may not purchase for its own account any securities subject to such a sale; and

(C) The secured demand note agreement may also provide that, in lieu of the procedures specified in the provisions required by (B) above, the lender with the prior written consent of the applicant or registrant and the designated self-regulatory organization or if the applicant or registrant is not a member of a designated self-regulatory organization, then the Commission, may reduce the unpaid principal amount of the secured demand note, *Provided,* That after giving effect to such reduction the adjusted net capital of the applicant or registrant would not be less than 10 percent of aggregate indebtedness or in the case of an applicant or registrant operating pursuant to paragraph (g) of this section, adjusted net capital would not be less than 7 percent of the funds required to be segregated pursuant to the Act and these regulations plus for Securities Brokers or Dealers, 7 percent of the aggregate debit items computed in accordance with 17 CFR 240.15c3-3a. *Provided, further,* That no single secured demand note shall be permitted to be reduced by more than 15 percent of its original principal amount and after such reduction no excess collateral may be withdrawn. No designated self-regulatory organization shall consent to reduction of the principal amount of a secured demand note if, after giving effect to such reduction, adjusted net capital would be less than 120 percent of the appropriate minimum dollar amount required by this section.

(vii) *Permissive prepayments.* An applicant or registrant at its option but not at the option of the lender, may, if the subordination agreeemnt so provides, make a payment of all or any portion of the payment obligation thereunder prior to the scheduled maturity date of such payment obligation (hereinafter referred to as a "prepayment"), but in no event may any prepayment be made before the expiration of one year from the date such subordination agreement became effective; *Provided, however,* That the foregoing restriction shall not apply to temporary subordination agreements which comply with the provisions of subparagraph (h)(3)(v) of this section. No prepayment shall be made, if, after giving effect thereto (and to all payments of payment obligations under any other subordinated agreements then outstanding the maturity or accelerated maturities of which are scheduled to fall due within six months after the date such prepayment is to occur pursuant to this provision or on or prior to the date on which the payment obligation in respect to such prepayment is scheduled to mature disregarding this provision, whichever date is earlier) without reference to any projected profit or loss of the applicant or registrant, either the adjusted net capital of the applicant or registrant is less than 10 percent of its aggregate indebtedness or in the case of an applicant or registrant operating pursuant to paragraph (g) of this section, its adjusted net capital is less than 7 percent of the funds required to be segregated pursuant to the Act and these regulations plus for Securities Brokers or Dealers, 7 percent of the aggregate debit items computed in accordance with 17 CFR 240.15c3-3a or its adjusted net capital is less than 120% of the appropriate minimum dollar amount required by this section. Notwithstanding the above, no prepayment shall occur without the prior written approval of the designated self-regulatory organization and the Commission.

(viii) *Suspended repayment.* (A) The payment obligation of the applicant or registrant in respect of any subordination agreement shall be suspended and shall not mature if, after giving effect to payment of such payment obligation (and to all payments of payment obligations of the applicant or registrant under any other subordination agreement(s) then outstanding which are scheduled to mature on or before such payment obligation) either the adjusted net capital of the applicant or registrant would be less than 8⅓ percent of aggregate indebtedness or in the case of an applicant or registrant operating pursuant to paragraph (g) of this section, adjusted net capital would be less than 6 percent of the funds required to be segregated pursuant to the Act and these regulations plus for Securities Brokers or Dealers, 6 percent of the aggregate debit items computed in accordance with 17 CFR 240.15c3-3a or its adjusted net capital would be less than 120 percent of the minimum dollar amount required by this section; *Provided,* That the subordination agreement may provide that if the payment obligation of the applicant or registrant thereunder does not mature and is suspended as a result of the requirement of this paragraph (h)(2)(viii) of this section for a period of not less than six months the applicant or registrant shall thereupon commence the rapid and orderly liquidation of its business, but the right of the lender to receive payment, together with accrued interest or compensation, shall remain subordinate as required by the provisions of this section.

(B) Whenever a subordination agreement provides that an applicant or registrant shall commence a rapid and orderly liquidation, as permitted in paragraph (h)(2)(viii)(A), the date on which the liquidation commences shall be the maturity date for each subordination agreement of the applicant or registrant then outstanding, but the rights of the respective lenders to receive payment, together with accrued interest or compensation, shall remain subordinate as required by the provisions of this section.

(ix) *Accelerated maturity.* Obligation to repay to remain subordinate:

(A) Subject to the provisions of paragraph (h)(2)(viii) of this section, a subordination agreement may provide that the lender may, upon prior written notice to the applicant or registrant and the designated self-regulatory organization or if applicant or registrant is not a member of a designated self-regulatory organization, then the Commission, given not earlier than six months after the effective date of such subordination agreement, accelerate the date on which the payment obligation of the borrower, together with accrued interest or compensation, is scheduled to mature to a date not earlier than six months after giving of such notice, but the right of the lender to receive payment, together with accrued interest or compensation, shall remain subordinate as required by the provisions of this paragraph (h)(2) or this section.

(B) Notwithstanding the provisions of paragraph (h)(2)(viii) of this section, the payment obligation of the applicant or registrant with respect to a subordination agreement, together with accrued interest and compensation, shall mature in the event of any receivership, insolvency, liquidation pursuant to the Securities Investor Protection Act of 1970 or otherwise, bankruptcy, assignment for the benefit of creditors, reorganization whether or not pursuant to the bankruptcy laws, or any other marshalling of the assets and liabilities of the applicant or registrant but the right of the lender to receive payment, together with accrued interest or compensation, shall remain subordinate as required by the provisions of paragraph (h)(2) of this section.

(x) *Accelerated maturity of subordination agreements on event of default and event of acceleration.* Obligation to repay to remain subordinate:

(A) A subordination agreement may provide that the lender may upon prior written notice to the applicant or registrant and the designated self-regulatory organization or if the applicant or registrant is not a member of a designated self-regulatory organization, the Commission, of the occurrence of any event of acceleration (as hereinafter defined) given no sooner than six months after the effective date of such subordination agreement, accelerate the date on which the payment obligation of the applicant or registrant, together with accrued interest or compensation, is scheduled to mature, to the last business day of a calendar month which is not less than six months after notice of acceleration is received by the applicant or registrant and

the designated self-regulatory organization, or if the applicant or registrant is not a member of a designated self-regulatory organization, then the Commission. Any subordination agreement containing such events of acceleration may also provide, that if upon such accelerated maturity date the payment obligation of the applicant or registrant is suspended as required by paragraph (h)(2)(viii) of this section and liquidation of the applicant or registrant has not commenced on or prior to such accelerated maturity date then notwithstanding paragraph (h)(2)(viii) of this section the payment obligation of the applicant or registrant with respect to such subordination agreement shall mature on the day immediately following such accelerated maturity date and in any such event the payment obligations of the applicant or registrant with respect to all other subordination agreements then outstanding shall also mature at the same time but the rights of the respective lenders to receive payment, together with accrued interest or compensation, shall remain subordinate as required by the provisions of paragraph (h)(2) of this section. Events of acceleration which may be included in a subordination agreement complying with this paragraph (h)(2)(x) of this section shall be limited to:

(1) Failure to pay interest or any installment of principal on a subordination agreement as scheduled;

(2) Failure to pay when due other money obligations of a specified material amount;

(3) Discovery that any material, specified representation or warranty of the applicant or registrant which is included in the subordination agreement and on which the subordination agreement was based or continued was inaccurate in a material respect at the time made; (4) Any specified and clearly measurable event which is included in the subordination agreement and which the lender and the applicant or registrant agree, (a) is a significant indication that the financial position of the applicant or registrant has changed materially and adversely from agreed upon specified norms; or (b) could materially and adversely affect the ability of the applicant or registrant to conduct its business as conducted on the date the subordination agreement was made; or (c) is a significant change in the senior management of the applicant or registrant or in the general business conducted by the applicant or registrant from that which obtained on the date the subordination agreement became effective;

(5) Any continued failure to perform agreed convenants included in the subordination agreement relating to the conduct of the business of the applicant or registrant or relating to the maintenance and reporting of its financial position; and

(B) Notwithstanding the provisions of paragraph (h)(2)(viii) of this section, a subordination agreement may provide that, if liquidation of the business of the applicant or registrant had not already commenced, the payment obligation of the applicant or registrant shall mature, together with accrued interest or compensation, upon the occurrence of an event of default (as hereinafter defined). Such agreement may also provide that, if liquidation of the business of the applicant or registrant has not already commenced, the rapid and orderly liquidation of the business of the applicant or registrant shall then commence upon the happening of an event of default. Any subordination agreement which so provides for maturity of the payment obligation upon the occurrence of an event of default shall also provide that the date on which such event of default occurs shall, if liquidation of the applicant or registrant has not already commenced, be the date on which the payment obligation of the applicant or registrant with respect to all other subordination agreements then outstanding shall mature but the rights of the respective lenders to receive payment, together with accrued interest or compensation, shall remain subordinate as required by the provisions of paragraph (h)(2) of this section. Events of default which may be included in a subordination agreement shall be limited to:

(1) The making of an application by the Securities Investor Protection Corporation for a decree adjudicating that customers of the applicant or registrant are in need of protection under the Securities Investor Protection Act of 1970 and the failure of the applicant or registrant to obtain the dismissal of such application within 30 days;

(2) Failure to meet the minimum capital requirements of the designated self-regulatory organization, or of the Commission, throughout a period of 15 consecutive business days, commencing on the day the borrower first determines and notifies the designated self-regulatory organization, if any, of which he is a member and the Commission; or any self-regulatory organization or the Commission first determines and notifies the applicant or registrant of such fact;

(3) The Commission shall revoke the registration of the applicant or registrant;

(4) The self-regulatory organization shall suspend (and not reinstate within 10 days) or revoke the applicant or registrant's status as a member thereof;

(5) Any receivership, insolvency, liquidation pursuant to the Securities Investor Protection Act of 1970 or otherwise, bankruptcy, assignment for the benefit of creditors, reorganization whether or not pursuant to bankruptcy laws, or any other marshalling of the assets and liabilities of the applicant or registrant. A subordination agreement which contains any of the provisions permitted by this subparagraph (2)(x) shall not contain the provision otherwise permitted by paragraph (h)(2)(ix)(A) of this section.

(3) *Miscellaneous provisions.*—(i) *Prohibited cancellation.* The subordination agreement shall not be subject to cancellation by either party; no payment shall be made with respect thereto and the agreement shall not be terminated, rescinded or modified by mutual consent or otherwise if the effect thereof would be inconsistent with the requirements of paragraph (h) of this section.

(ii) *Notice of maturity or accelerated maturity.* Every applicant or registrant shall immediately notify the designated self-regulatory organization and the Commission if, after giving effect to all payments of payment obligations under subordination agreements then outstanding which are then due or mature within the following six months without reference to any projected profit or loss of the applicant or registrant, either the aggregate indebtedness of the applicant or its adjusted net capital or its adjusted net capital would be less than 120 percent of the minimum dollar amount required by § 1.17 or in the case of an applicant or registrant who is operating pursuant to paragraph (g) of § 1.17, its adjusted net capital would be less than 6 percent of the funds required to be segregated pursuant to the Act and these regulations plus for Securities Brokers or Dealers, 6 percent of the aggregate debit items computed in accordance with 17 CFR 240.15c3–3a.

(iii) *Certain legends.* If all the provisions of a satisfactory subordination agreement do not appear in a single instrument then the debenture of other evidence of indebtedness shall bear on its face an appropriate legend stating that it is issued subject to the provisions of a satisfactory subordination agreement which shall be adequately referred to and incorporated by reference.

(iv) *Legal title to securities.* All securities pledged as collateral to secure a secured demand note must be in bearer form, or registered in the name of the applicant or registrant or the name of its nominee or custodian.

(v) *Temporary subordinations.* For the purpose of enabling an applicant or registrant to participate as an underwriter of securities or other extraordinary activities in compliance with the adjusted net capital requirements of this section, an applicant or registrant shall be permitted, on no more than three occasions in any 12-month period to enter into a subordination agreement on a temporary basis which has a stated term of no more than 45 days from the date of the subordination agreement became effective. *Provided*, That this temporary relief shall not apply to any applicant or registrant if either the adjusted net capital of the applicant or registrant is less than 10 percent of its aggregate indebtedness or in the case of an applicant or registrant operating pursuant to paragraph (g) of this section, adjusted net capital is less than 7 percent of the funds required to be segregated pursuant to the Act and these regulations plus for Securities Brokers or Dealers, 7 percent of the aggregate debit items computed in accordance with 17 CFR 240.15c3–3a or its adjusted capital is less than 120 percent of the appropriate minimum dollar amount required by this section, or the amount of its then outstanding subordination agreements exceeds the limits specified in paragraph (d) of this section. Such temporary subordination agreement shall be subject to all the other provisions of this section.

(iv) *Filing.* Two copies of any proposed subordination agreement (including nonconforming subordination agreements) shall be filed with the Commission at least ten days prior to the proposed execution date of the agreement or at such other time as the Commision for good cause shall accept such filing. Copies of the proposed agrement shall be filed with the designated self-regulatory organization, if any, of which the applicant or registrant is a member in such quantities and at such time as the designated self-regulatory organization may require. The applicant or registrant shall also file with said parties a statement setting forth the name and address of the lender, the business relationship of the lender to the applicant or registrant and whether the applicant or registrant carried funds or securities for the lender at or about the time the proposed agreement was so filed. All agreements shall be examined at the Commission and the designated self-regulatory organization with whom such agreements are required to be filed prior to their becoming effective. No proposed agreement shall be a satisfactory subordination agreement for the purposes of this section unless and until the Commission has found the agreement acceptable and such agreement has become effective in the form found acceptable.

(vii) *Subordination agreements in effect prior to adoption*—Any subordination agreement which has been entered into prior to (date of adoption) and which has been deemed to be satisfactorily subordinated pursuant to this section heretofore in effect or the adjusted net capital rules of a self-regulatory organization shall continue to be deemed a satisfactory subordination agreement until the maturity of such agreement. Provided, that no renewal of an agreement which provides for automatic or optional renewal by the applicant or registrant or lender shall be deemed to be a satisfactory subordination agreement unless such renewed agreement meets the requirements of this section, within six months of (the effective date of this section). *Provided further*, That all subordination agreements must meet the requirements of this rule within five years of (date of adoption).

(4) A designated self-regulatory organiza-

tion and the Commision may allow debt with a maturity date of one year or more to be treated as meeting the provisions of this paragraph (h) provided:

(i) Such exemption shall only be given when the registrant's adjusted net capital is less than the minimum required by this § 1.17 or by the capital rule of the designated self-regulatory organization to which such registrant is subject;

(ii) Such exemption shall be for a period of thirty days or such lesser period as the designated self-regulatory organization and the Commission may determine;

(iii) Such exemption shall not be allowed more than once in any twelve month period; and

(iv) At all times during such exemption the registrant shall make a good faith effort to comply with the provisions of this § 1.17 or the capital rule of the designated self-regulatory organization to which such registrant is subject exclusive of any benefits derived from this paragraph (h)(4).

(i) [Reserved]

(j) For the purposes of this section "cover" is defined as follows:

(1) *General definition.* Cover shall mean transactions or positions in a contract for future delivery on a board of trade or a commodity option where such transactions or positions normally represent a substitute for transactions to be made or positions to be taken at a later time in a physical marketing channel, and where they are economically appropriate to the reduction of risks in the conduct and management of a commercial enterprise, and where they arise from:

(i) The potential change in the value of assets which a person owns, produces, manufactures, processes, or merchandises or anticipates owning, producing, manufacturing, processing, or merchandising.

(ii) The potential change in the value of liabilities which a person owes or anticipates incurring, or

(iii) The potential change in the value of services which a person provides, purchases or anticipates providing or purchasing. Notwithstanding the foregoing, no transactions or positions shall be classsified as cover for the purposes of this section unless their purpose is to offset price risks incidental to commercial cash or spot operations and such positions are established and liquidated in accordance with sound commercial practices and unless the provisions of paragraphs (j)(2) and (3) of this section have been satisfied.

(2) *Enumerated Cover Transactions.* The definition of covered transactions and positions in paragraph (j)(1) of this section includes, but is not limited to, the following specific transactions and positions:

(i) Ownership or fixed-price purchase of any commodity which does not exceed in quantity the sales of the same commodity for future delivery on a board of trade or the purchase of a put commodity option of the same commodity for which the market value for the actual commodity or futures contract which is the subject of the option is less than the striking price of the option.

(ii) Fixed-price sale of any commodity which does not exceed in quantity the purchase of the same commodity for future delivery on a board of trade or the purchase of a call commodity option of the same commodity for which the market value for the actual commodity or futures contract which is the subject of such option is more than the striking price of the option; and

(iii) Ownership or fixed price contracts of a commodity described in paragraphs (j)(2)(i) and (j)(2)(ii) of this section may also be covered other than by the same quantity of the same cash commodity, provided that the fluctuations in value of the position for future delivery or commodity option are substantially related to the fluctuations in value of the actual cash position.

(3) *Non-Enumerated cases.* Upon specific request, the Commission may recognize transactions and positions other than those enumerated in paragraph (j)(2) of this section as cover in amounts and under the terms and conditions as it may specify. Any applicant or registrant who wishes to avail himself of the provisions of this paragraph (j)(3) must apply to the Commission in writing at its principal office in Washington, D.C. giving full details of the transaction including detailed information which will demonstrate that the transaction is economically appropriate to the reduction of risk exposure attendant to the conduct and management of a commercial enterprise.

6. By revising § 1.18 (b) and (c) to read as follows:

§ 1.18 Records for and relating to financial reporting and monthly computation.

* * * * *

(b) Each applicant or registrant must make and keep as a record in accordance with § 1.31, formal computations of his adjusted net capital and of its minimum financial requirements pursuant to § 1.17 as of the close of business each month. Such computations must be completed and made available for inspection by any representative of the Commission or designated self-regulatory organization, if any, within 30 days after the date for which the computations are made, commencing the first month end after the date the application for registration is filed or the first month end after (the effective date of this section).

(c) [Revoked]

7. By adding a new § 1.52, reading as follows:

§ 1.52 Self-regulatory organization adoption and surveillance of minimum financial requirements.

(a) Each self-regulatory organization must adopt minimum financial and related reporting requirements for all its member futures commission merchants by December 25, 1978. Such requirements must be the same as, or more stringent than, those contained in §§ 1.10 and 1.17 of this part, and the definition of adjusted net capital must be the same as that prescribed in § 1.17(c) of this part.

(b) Any two or more self-regulatory organizations may file with the Commission a plan for delegating to a designated self-regulatory organization, for any futures commission merchant which is a member of more than one such self-regulatory organization, the responsibility of:

(1) Monitoring and auditing for compliance with the minimum financial and related reporting requirements adopted by such self-regulatory organizations in accordance with paragraph (a) of this section; and

(2) Receiving the financial reports necessitated by such minimum financial and related reporting requirements.

Such a plan may also delegate the responsibility of examining the books and records kept by such future commission merchant relating to its business of dealing in: (A) Commodity futures and cash commodities, insofar as such business relates to its dealing on contract markets, as required by § 1.51(a)(3); or (B) commodity options and physical commodities, insofar as such business relates to its dealing on domestic commodity option exchanges, as required by § 32.5(g)(4).

(c) Any plan filed under this § 1.52 may contain provisions for the allocation of expenses reasonably incurred by the designated self-regulatory organization among the self-regulatory organizations participating in such a plan.

(d) A plan's designated self-regulatory organization must report to that plan's other self-regulatory organizations any violation of such other self-regulatory organizations' rules and regulations for which the responsibility to monitor, audit or examine has been delegated to such designated self-regulatory organization under this § 1.52.

(e) The self-regulatory organizations may, among themselves, establish programs to provide access to any necessary financial or related information.

(f) After appropriate notice and opportunity for comment, the Commission may, by written notice, approve such a plan, or any part of the plan, if it finds that the plan, or any part thereof: Is necessary or appropriate to serve the public interest; is for the protection and in the interest of customers; reduces multiple monitoring and auditing for compliance with the minimum financial rules of the self-regulatory organizations submitting the plan for any futures commission merchant which is a member of more than one self-regulatory organization; reduces multiple reporting of the financial information necessitated by such minimum financial and related reporting requirements by any futures commission merchant which is a member of more than one self-regulatory organization; fosters cooperation and coordination among the contract markets; and does not hinder the development of a registered futures association under section 17 of the Act.

(g)(1) Upon the approval of a plan or part thereof under § 1.52(f), a self-regulatory organization which is included in such a plan shall be considered to have met its affirmative action responsibilities under § 1.51 to the extent that such responsibilities have been delegated to a designated self-regulatory organization.

(2) After the Commission has approved a plan or part thereof under § 1.52(f), a self-regulatory organization relieved of responsibility must notify each of its members which is subject to such a plan: (A) Of the limited nature of its responsibility for such a member's compliance with its minimum financial and related reporting requirements; and (B) of the identity of the designated self-regulatory organization which has been delegated responsibility for such a member.

(h) The Commission may at any time, after appropriate notice and opportunity for hearing, withdraw its approval of any plan or part thereof established under this § 1.52, if such plan or part thereof ceases to adequately effectuate the purposes of section 4f(2) of the act or of this § 1.52.

(i)(1) If a futures commission merchant holding membership in a self-regulatory organization ceases to be a member in good standing of that self-regulatory organization, such futures commission merchant must, on the same day that event takes place, give telegraphic notice of that event to the principal office of the Commission in Washington, D.C.

(2) Whenever a futures commission merchant holding membership in a self-regulatory organization ceases to be a member in good standing of that self-regulatory organization, such self-regulatory organization must, on the same day that event takes place, give telegraphic notice of that event to the principal office of the Commission in Washington, D.C., send a copy of that notification to such futures commission merchant, and notify such futures commission merchant of its responsibilities under paragraph (i)(1) of this section.

(j) Nothing in this § 1.52 shall preclude the Commission from examining any futures commission merchant for compliance with the minimum financial and related reporting requirements to which such futures commission merchant is subject.

(k) In the event a plan is not filed and/or approved for each futures commission merchant which is a member of more than one self-regulatory organization, the Commission may design and, after notice and opportunity for comment, approve a plan for those futures commission merchants which are not the subject of an approved plan (under para-

graph (f) of this section) delegating to a designated self-regulatory organization the responsibilities described in paragraph (b) of this section.

(7 U.S.C. 6c, 6f, 6g, 7a, 12a and 17.)

Issued in Washington, D.C., on April 5, 1978, by the Commission.

WILLIAM T. BAGLEY,
*Chairman,*
*Commodity Futures Trading Commission.*

[FR Doc 78-9400 Filed 4-7-78; 8:45 am]

Mr. DECONCINI. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the Senator from Massachusetts (Mr. KENNEDY).

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT OF SENATOR EDWARD M. KENNEDY ON THE AMENDMENT TO THE BANKRUPTCY BILL TO ALLOW REAFFIRMATION OF LAWFULLY DISCHARGED DEBTS

The over-600 page bill on each of our desks today is the result of years of efforts to modernize, reform, and make uniform our federal bankruptcy laws. The Senator from New Mexico (Mr. DeConnini) and the Senator from Wyoming (Mr. Wallop) are to be commended for the tremendous amount of time and energy they have put into this undertaking.

The result is an important and impressive piece of legislation. In addition to its attention to the procedures and institutions upon which a fair and effective bankruptcy system must be founded, this bill also attempts to make bankruptcy a more effective remedy for the consumer debtor. The basic principle embodied in the bill is that once a person has gone through bankruptcy, he or she should be given a truly fresh start. But, Mr. President, that is precisely the principle most offended by the amendment to section 524 to allow general reaffirmation of discharged debts.

The efforts by lending firms to reinstate their power to have new life breathed into discharged debts are, to me, unconscionable. The arguments for this amendment are simply devoid of merit. The practice of seeking reaffirmation permits unscrupulous and powerful lenders to force persons to reaffirm lawfully discharged debts through job pressure, deceit, and the temptation of an offer of further credit. It should be of no importance to careful, ethical businesses.

The primary justification for allowing bankruptcy discharges of debt is the fresh start it provides to persons who have become so burdened with debt that they are unable to function energetically and effectively in society. Reaffirmations are totally at war with this objective.

Some lenders have argued that reaffirmations are needed to make it easier for bankrupts to get further credit. The weakness of this position should be obvious. In the first place, permitting finance companies to condition the extension of further credit on the reaffirmation of a debt invites an outrageous evasion of state usury laws. In many instances, the lender will actually obtain what comes to interest in excess of 100% when both the costs of reaffirming the legally discharged debt plus the legal interest rate are considered. Do we really want to encourage individuals who have just put the public and other creditors to the expense of bankruptcy proceeding to assume that sort of obligation?

Secondly, I do not think we should encourage people who have just been through bankruptcy to begin immediately seeking credit with finance companies. We must assume that the inability to resist or to manage debt obligations was the cause of the initial bankruptcy in a large number of cases.

Finally, establishing new credit on the basis of a reaffirmation to one lender obviously puts the discharged bankrupt in a far worse position to assume and satisfy obligations to other businesses.

Generally, creditors work with each other and the debtor by deferring collection attempts and settling claims for less than their full value to help the debtor avoid bankruptcy. The creditors do this, of course, in their own interest because they want to avoid losing their entire claim in bankruptcy. Obviously, however, a firm which has hopes of recovering money through manipulation of reaffirmations has a far less incentive to assist and cooperate with the other creditors. We can safely assume that such lenders are more likely to pursue their individual claim aggressively without regard to whether that effort will eventually cause a declaration of bankruptcy.

Despite absurd claims to the contrary by some lenders, S. 2266, as now amended, would not deny debtors the right to satisfy their conscience by paying off discharged debts. There is nothing in the bill to prohibit a debtor from voluntarily making payments if he chooses or feels a moral obligation to do so.

In my view this issue is non-ideological and non-partisan. It arises only because of the efforts of a small group of creditors to maintain a legal sanction of their efforts to evade the intent of the bankruptcy laws.

I thus strongly oppose any attempt to delete my amendment to section 524.

Mr. BARTLETT. Mr. President, do I have any time remaining?

The PRESIDING OFFICER. The Senator has 2 minutes remaining.

Mr. BARTLETT. Mr. President, will the distinguished Senator from Maryland advise whether he needs additional time?

Mr. MATHIAS. I thank the Senator very much and I appreciate it, but I do not need additional time.

Mr. DECONCINI. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. DECONCINI. Mr. President, I yield back the remainder of my time on the amendment.

Mr. BARTLETT. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Oklahoma.

On this question, the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

(Mr. METZENBAUM assumed the chair.)

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mr. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Delaware (Mr. BIDEN), the Senator from North Dakota (Mr. BURDICK), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

I further announce that the Senator from Massachusetts (Mr. KENNEDY) is absent on official business.

I also announce that the Senator from Rhode Island (Mr. PELL) is absent because of illness.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH) and the Senator from Rhode Island (Mr. PELL) would each vote "yea."

Mr. CURTIS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Massachusetts (Mr. BROOKE), the Senator from New Jersey (Mr. CASE), the Senator from Rhode Island (Mr. CHAFEE), the Senator from New Mexico (Mr. DOMENICI), the Senator from Oregon (Mr. HATFIELD), the Senator from North Carolina (Mr. HELMS), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. MCCLURE), the Senator from Kansas (Mr. PEARSON), the Senator from Illinois (Mr. PERCY), the Senator from Vermont (Mr. STAFFORD), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

The result was announced—yeas 51, nays 20, as follows:

[Rollcall Vote No. 373 Leg.]

YEAS—51

| | | |
|---|---|---|
| Bartlett | Hansen | Riegle |
| Bellmon | Hatch | Roth |
| Bumpers | Hayakawa | Sarbanes |
| Byrd, Harry F., Jr. | Heinz | Sasser |
| | Hollings | Schmitt |
| Byrd, Robert C. | Huddleston | Schweiker |
| Cannon | Inouye | Scott |
| Chiles | Jackson | Sparkman |
| Church | Leahy | Stennis |
| Curtis | Lugar | Stone |
| DeConcini | Magnuson | Talmadge |
| Dole | Mathias | Thurmond |
| Ford | Matsunaga | Wallop |
| Garn | Melcher | Weicker |
| Glenn | Morgan | Young |
| Goldwater | Moynihan | Zorinsky |
| Gravel | Nunn | |
| Griffin | Packwood | |

NAYS—20

| | | |
|---|---|---|
| Bayh | Eagleton | Metzenbaum |
| Bentsen | Hart | Muskie |
| Clark | Hathaway | Nelson |
| Cranston | Hodges | Proxmire |
| Culver | Javits | Ribicoff |
| Danforth | Long | Williams |
| Durkin | McGovern | |

NOT VOTING—29

| | | |
|---|---|---|
| Abourezk | Haskell | McIntyre |
| Allen | Hatfield, Mark O. | Pearson |
| Anderson | | Pell |
| Baker | Hatfield, Paul G. | Percy |
| Biden | | Randolph |
| Brooke | Helms | Stafford |
| Burdick | Humphrey | Stevens |
| Case | Johnston | Stevenson |
| Chafee | Kennedy | Tower |
| Domenici | Laxalt | |
| Eastland | McClure | |

So the amendment (UP No. 1821) was agreed to.

Mr. BARTLETT. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HANSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. LONG. Mr. President, S. 2266 pro-

vides the first overall revision of the bankruptcy laws since 1938, in light of major changes in debtor-creditor relations during this period. The bill was reported by the Finance Committee on August 10, 1978.

S. 2266 was referred to the Finance Committee for its consideration and recommendations concerning several tax-related sections of the bill. These provisions deal with such subjects as defining the tax claims against the debtor's estate which are entitled to priority and nondischargeability, determining the tax liabilities of a debtor in bankruptcy, and clarifying the jurisdiction of different courts to rule on tax issues. The bill reported by the Finance Committee includes the results of its consideration of these matters, as well as additional technical and conforming amendments.

S. 2266 does not contain amendments to the Internal Revenue Code dealing with substantive tax issues arising in bankruptcy. A separate bill is now pending in the House, H.R. 9973, containing amendments designed to conform the tax rules to the bankruptcy changes we are considering today. H.R. 9973 was introduced on November 3, 1977, by members of the House Judiciary Committee and was referred to the Committee on Ways and Means, which held a hearing on the bill on February 22, 1978. We anticipate that Congress will act on these substantive tax issues early next year. Since the general effective date for S. 2266 is October 1, 1979, we have sufficient time to make the necessary code amendments so that all the new rules will become effective at the same time.

Mr. President, the Departments of the Treasury and of Justice have no objections to S. 2266, as amended by the Finance Committee. I urge its passage.●

Mr. STENNIS. Mr. President, will the Senator from Arizona, for an emergency matter, yield me 5 minutes?

Mr. DECONCINI. Mr. President, I am more than happy to yield 5 minutes to the Senator from Mississippi.

## S. 3486—DEPARTMENT OF DEFENSE AUTHORIZATIONS, 1979

Mr. STENNIS. Mr. President, I appreciate the Senator's yielding to me. This is on an extraneous matter. Mr. President, may I have the attention of the Chair?

The PRESIDING OFFICER. The Senate will be in order.

Mr. STENNIS. Mr. President, if I may announce to the Senate, the House of Representatives has just voted on the veto of the military authorization bill which, as Senators know, is the basis for the appropriation bill for the Department of Defense. By a vote of 191 for overriding to 206 against overriding, the veto was sustained. This means that this is the end for that bill; it is null and void, and a new start must be made.

I ask unanimous consent, Mr. President, at this time and out of order, to introduce a bill authorizing the military program for fiscal year 1979. The bill as now drafted will be the bill that has just been vetoed, with the nuclear carrier taken out. I will have a short statement here of explanation. Do I have the unanimous consent to introduce the bill out of order?

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. STENNIS. I thank the Chair.

Mr. President, in view of what has happened, we must now move forward with providing for the common defense. The new fiscal year begins October 1, only 3 full weeks away. We must not delay this authorization bill or the subsequent defense appropriation bill, and thereby force reliance on a continuing resolution for an extended period. That will certainly not benefit the country or any group in it.

I strongly favor the idea of simply taking the nuclear carrier out of the previously agreed to conference report and passing a new bill without further change. Of course, our committee will call on the administration and give them a chance to make recommendations, but I trust that they will limit their requests to actual emergency matters. I will confer, of course, with the members of the full committee. We simply should not hold up authorization and appropriation bills for fiscal year 1979 any longer. Therefore, this is the reason that I have introduced in the Senate today a new fiscal year 1979 defense authorization bill, which, as I have said, is simply the conference report as vetoed, less the nuclear carrier.

Mr. President, it has been generally agreed that the bill that was passed was a balanced bill, that it contained necessary items, largely, and few, if any, unnecessary items. I have no resentment, but we must get to work and pass a bill. The appropriations bill is just suspended in midair, neither fish nor fowl, so far as the authorizations are concerned.

I appreciate this unanimous consent being granted. We can move right along on this bill.

I see the majority leader is here, and I will be glad to yield to him.

Mr. ROBERT C. BYRD. Mr. President, I wish to express my appreciation to the Senator from Mississippi, the chairman of the Armed Services Committee, for the approach he is taking in this matter. He strongly supported the nuclear carrier, and in view of the fact that that seems to have been the main bone of contention that created the veto, and in view of the fact that the House has sustained the veto, I think the distinguished chairman is being very realistic in a number of ways.

First of all, he is introducing a bill promptly. That bill leaves out the carrier, which was the problem. Also, he is suggesting, as I understand it, that we move quickly to act on the bill, not go into all the background, going from the bottom up, starting all over again. I am glad that he takes that viewpoint, because if the Senate is to complete its work and not come back after the election, I would say that mid-October is about the best we can do. That only leaves 5 weeks after this week. That does not give time to go back and thresh out all of the things which have already been very meticulously looked at by the chairman and his committee, and keeping in mind that an appropriations bill does come behind this authorization bill. So we do have to act with deliberate speed here.

The chairman is taking this approach. I commend him for it, and I support him in it.

Mr. STENNIS. I thank the leadership.

I have limited time. I see the Senator from Colorado seeking recognition. I yield 1 minute.

Mr. DECONCINI. I yield 2 minutes to the Senator from Colorado.

Mr. HART. Mr. President, I also commend the chairman for his action and underscore the words of the majority leader. Unfortunately, the Senate does not have the final authority in this matter and must agree with the House on any bill which we pass. The House has already served notice on us in the Senate and in the White House that it may work a good deal of havoc on the bill that we are talking about here. The bill that the President vetoed had a very carefully constructed compromise which addressed and solved the carrier problem once and for all. By vetoing this bill I am afraid the President has committed all of us to a very, very difficult situation. As admirable as the chairman's efforts might be, they may not be met with favor in the House.

I intend to approach our colleagues on the Armed Services Committee with a proposed compromise which I believe will be acceptable to the administration and the House of Representatives. I hope our colleagues in the Senate will pay some attention to this compromise which attempts to accommodate everybody's point of view, although it will not be ideal, probably, to any of the parties.

I am afraid the chairman's efforts will meet with some very difficult times in the House of Representatives.

Mr. STENNIS. I thank the Senator. We have to work out our matters here the best we can. We always meet with the House in the right frame of mind, I believe, and are able to get adjustments to bring back a bill.

Time is of the essence here. I believe we must recognize our goal and our mission. We will have differences, of course, which we hope we can straighten out.

I am disappointed that the President's veto of the Department of Defense fiscal year 1979 authorization bill was not overridden, because I believe it was a sound and balanced bill. The bill contains many new initiatives for each of the military services. All of the items in this bill were gone over carefully for months by the Congress, as well as the executive branch, and all of the items except for the nuclear carrier represent a broad agreement and consensus as to the many, many aspects of our defense program which are contained in this bill.

We must now move forward with providing for the common defense. The new fiscal year begins October 1—only 3 full weeks away. We must not delay this authorization bill or the subsequent defense appropriations bill and thereby force reliance on a continuing resolution for an

extended period. That will not benefit the country or any group in it.

I strongly favor the idea of simply taking the nuclear carrier out of the previously agreed to conference report and passing a new bill without further change. I will, of course, call on the administration and give them a chance to make recommendations, but I trust they will limit their request to actual, urgent emergency matters. I shall confer, of course, with all the members of the full committee. We simply should not hold up the authorization and appropriation bills for fiscal year 1979 any longer.

Therefore, I am introducing in the Senate today a new fiscal year 1979 defense authorization bill which is simply the conference report as passed by the House and Senate with the nuclear carrier taken out. I believe the real choice we have is to follow this simple approach rather than attempt to rewrite this entire, massive bill which may take months, delay the appropriation bill further, and require extensive reliance on unsatisfactory continuing resolutions.

## BANKRUPTCY REFORM ACT OF 1978

The Senate continued with the consideration of the bill.

Mr. DECONCINI. Mr. President, I know of no further amendments.

Mr. WALLOP. Mr. President, I know of no further amendments on the minority side.

Mr. DECONCINI. Mr. President, I ask for a third reading.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H.R. 8200 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The second assistant legislative clerk read as follows:

A bill (H.R. 8200) to establish a uniform law on the subject of bankruptcies.

The PRESIDING OFFICER. Without objection, the Senate will proceed immediately to the consideration of the bill.

Mr. DECONCINI. Mr. President, I ask that all after the enacting clause of H.R. 8200 be stricken and that the text of S. 2266, as amended, be inserted in lieu thereof.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arizona.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 8200), as amended, was passed.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. WALLOP. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make clerical and technical corrections in the engrossment of the Senate amendments to H.R. 8200.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the Senate insist upon its amendments and request a conference with the House and that the appointment of conferees be deferred at the pleasure of the Chair.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. DECONCINI. Mr. President, I would like to take a moment to thank the staff of the Senate subcommittee, Romano Romani and Bob Feidler, for their export work and reaffirm my thanks and appreciation to my colleague (Mr. WALLOP) and Harry Dixon of his staff. I would also like to thank Senator LONG and the Committee on Finance for their expeditious handling of the sequential referral of S. 2266. My thanks also to the staff of the Joint Tax Committee, particularly Dick Bacon and Jim Billinger, for their advice on tax aspects of the bill.

Mr. WALLOP. Mr. President, I would also like to add my thanks and admiration particularly to Romano Romani and Bob Feidler, of Senator DECONCINI'S staff; to Harry Dixon, whose work as a consultant to the minority was invaluable to everybody in constructing this bill and, of course, to Pat Hoff, of my own staff, whose help has been most rewarding.

I thank the distinguished Senator from Arizona for all of the courtesies extended to me.

Mr. DECONCINI. Mr. President, I ask unanimous consent that S. 2266 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

## JUDICIAL TENURE ACT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order 957, which was called up earlier this morning but which was set aside.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1423) to establish a Council on Judicial Tenure in the judicial branch of the Government, to establish a procedure in addition to impeachment for the retirement of disabled Justices and judges of the United States, and the removal of Justices and judges whose conduct is or has been inconsistent with the good behavior required by article III, section 1 of the Constitution.

The Senate resumed the consideration of the bill.

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI. Mr. President, I yield myself the necessary time.

Mr. President, it is with great pleasure that I initiate discussion of S. 1423, as amended, the proposed Judicial Tenure Act. The bill was introduced on April 29, 1977, by my distinguished colleague from Georgia (Senator SAM NUNN). However, legislation of this type is not new to the Senate. Similar bills were introduced in the 90th and 91st Congresses by Senator Joseph Tydings. Senator NUNN renewed these efforts in the 93rd and 94th Congresses. Since 1965, the Subcommittee on Improvements in Judiciary Machinery has heard from 50 witnesses in approximately 20 days of extensive hearings. Seldom has any proposal received such lengthy and focused attention.

The past decade of struggle for this much-needed improvement in our judicial system culminated this year, as the Senate Judiciary Committee reported S. 1423 with virtually no dissent. I believe time has molded this legislation into a procedure for monitoring the Federal judiciary which is both more practical than existing impeachment powers, and fully supported by the Constitution.

Mr. President, I want to take this opportunity to thank Senators ABOUREZK, KENNEDY, THURMOND, AND WALLOP for their participation and the assistance of their staff in the consideration of this bill. Without the bi-partisan support this measure has received, this proposal would not be before us today.

This bill is demanded by a public who is increasingly skeptical of our political institutions. All branches of Government must account for their actions, but it is especially critical that our Nation's courts be beyond any doubt. Although most Americans have a high regard for the overall integrity of the Federal judiciary, the publicity surrounding the activities of a few U.S. judges has provided ample opportunity for such doubt to arise. We owe constituents an accessible means of protesting judicial conduct that is inconsistent with the behavior required by the Constitution. Conversely, we owe Federal judges an alternative to the stigma attached to impeachment proceedings, in those cases where aberrant behavior is the innocent product of a poor mental or physical condition.

Historically, Congress has been reluctant to use the drastic measure of impeachment. Only eight Federal judges and one Supreme Court Justice have been impeached by the House of Representatives. Of those, only four judges were convicted by the Senate and removed from office. The last conviction took place in 1936. One reason for this reluctance is the fact that impeachment is a complex, slow, and cumbersome process that absorbs an incredible amount of time in both Houses of Congress. For example, Senate impeachment trials have continued for as long as 6 weeks. The average trial lasts 16 days. For many years, lawmakers have been unable to divert their time and attention from legislative work that grows with each session, and the impeachment process has fallen into disuse. Because it is not used, impeachment has ceased to be

a real deterrent to misconduct on the bench.

These developments come at a time when the total number of Federal judges is increasing rapidly. Present law authorizes 525 active judges and justices. However, a significant number of judges have taken senior status while continuing to serve in a judicial capacity. Thus, approximately 660 judges now serve in the judicial system. In addition, there is pending legislation in this Congress to create 152 additional circuit and district judges. The Federal Judicial Center predicts a need for 1,000 district judges and 250 circuit judges by 1990. Clearly, we face a judicial body that will soon be twice its present size. The impeachment process is inadequate now; future reliance upon it as the only viable procedure for inquiry into alleged misconduct is unrealistic.

Under the proposal, any person could file a complaint alleging judicial misconduct or a permanent mental or physical disability. The filed complaint, if not found to be frivolous, would be transmitted to a committee in each circuit or each of the special national courts. Upon completion of its preliminary investigation, the committee will prepare a recommendation to a newly created Commission which is known as the Judicial Conduct and Disability Commission. Depending on the nature of the recommendations, the Commission will either dismiss the case, or, upon its investigation, file a report with a newly created Court on Judicial Conduct and Disability.

The Court on Judicial Conduct and Disability will hold a hearing which conforms to specified due process requirements and either order the removal, censure, involuntary retirement, or dismissal of the case. Due to the uniqueness of the Supreme Court, the Court on Judicial Conduct and Disability can either prepare a report to the House of Representatives recommending that the Justice be impeached or censured or dismiss the case. I believe these proposed procedures will allow a growing judicial branch to better cope with increasing demands of the future.

Nonetheless, questions have arisen regarding the constitutionality of this legislation. Most of the doubts have arisen from the view that impeachment is the only method of investigating and remedying judicial conduct that is expressly authorized under the Constitution. The argument is based on a very literal reading of the Constitution and claims support from the Federalist Papers, as well as the well-established principle of the independence of the judiciary. In analyzing the constitutional arguments, both for and against the bill, however, I have come to the conclusion that the language of the Constitution ultimately lends support to this proposal. The need for the Judicial Tenure Act is reflected in the framer's sanction that Federal judges "shall hold their offices during good behavior." This is the only explicit reference to any standard of conduct expected of Federal judges. I believe the words "good behavior" were not intended to mean simply the absence of impeachable conduct. The "good behavior" requirement describes a condition which must prevail if a judge is to retain his office. Unless a truly viable mechanism exists for removing judges who have not committed an impeachable offense, but have, nevertheless, substantially departed from good behavior, a significant gap exists between the impeachment power as presently exercised and the constitutional prescription for judicial conduct. I believe the framers knew what they wanted and said it. This legislation is in full accord with that view.

In order to insure that we not only implement the apparent wishes of the framers, but also do not impinge upon judicial independence or any other constitutional imperative, such as separation of powers, the Judicial Tenure Act provides that the Federal judiciary itself will be responsible for examining and acting upon filed complaints. Of course, impeachment should remain as an available alternative. However, a reasonable reading of the Constitution does not lead to the conclusion that impeachment is the only means of removing a Federal judge. We should not require that a judge commit "high crimes or misdemeanors" before he or she will be subject to a removal procedure. A Federal judge occupies too important a position of public trust to allow "bad behavior" to go unnoticed. In my view, "high crimes and misdemeanors" represent one special category of "bad behavior." The "good behavior" standard is the criterion by which judges must finally be evaluated.

The doctrine of separation of powers implies the plenary power of each branch of Government to implement its own functions. Only where the Constitution specifically provides otherwise is there an exception to the general principle. Inherent in this doctrine is the power of each branch to remove unfit members of that branch. I recognize that the opponents of this view suggest that if the framers had wished to give each branch power over its members, they would have said so.

The theme of judicial independence really comes in two forms. One is the matter of judicial independence from interference from the other two branches. The other, however, is a broader question, and seems to be the one raised by most laymen, including a recent New York Times editorial.

Independence in the traditional sense is a corporate concept that involves the judiciary as a branch and its relations with the other branches. Prof. Raoul Berger has noted that:

> All remarks in the several conventions that bear on judicial independence, as far as I could find, referred to freedom from legislative and executive encroachments. No one suggested that judges must be immune from traditional judicial conduct.

I might add that Professor Berger supports the legislation and finds nothing in it antithetical to any provision of the Constitution.

Our legislation clearly preserves judicial independence in this traditional sense. Because the mechanism we have created lies entirely within the judicial branch itself, there is no reasonable way to argue that it weakens the corporate independence of the judiciary vis-a-vis the legislative or executive branches.

In all fairness, however, I believe that our critics are more concerned with a far broader question—that is, the independence of an individual judge from any pressure whatsoever, be it from his or her peers or anyone else. They argue that judicial independence can only be preserved by condoning all sorts of activities that may bring the bench into disrepute, and tell us that this license and ultimate irresponsibility is the price we must pay to maintain independence. This is a viewpoint that I heartily reject as inconsistent not only with the Constitution, but with the prevailing values of our society.

The only way in which this argument can be made against the Judicial Tenure Act is to assert that the independence of individual judges will be threatened by other judges. In our bill, judges sit in judgment of other judges in much the same way as they do in the appeals process. Of course, in a proceeding under our act, the final outcome can be removal from office, not merely reversal. However, such a decision can only be reached if it is demonstrated by "clear and convincing" evidence that a judge committed a major breach of "good behavior." Ultimately, any action taken against a judge by our Court on Judicial Conduct and Disability is reviewable by the Supreme Court. Throughout the procedure, the greatest care is taken to insure that, even under the "worst case" scenario, there is no chance for abuse. We provide in the act, for example, that "complaints relating to the merits of any decision or procedural ruling of a judge are outside the jurisdiction of the Commission."

Logically, the only fears that these critics could have is that brother judges might wish to influence one of their number who espouses views contrary to their own. How this might be accomplished in the context of the bill is unclear. First, complaints are lodged by individual citizens. Second, they undergo a careful screening process to insure that they fall within the scope of the legislation. A decision must be made to pursue the matter before the Court on Judicial Conduct and Disability by the Commission set up for that purpose and composed of judges representing the eleven circuits and three national courts.

The Court on Judicial Conduct and Disability, also composed of judges, can remove a judge if the complaint is deemed valid in a proceeding where the accused judge is represented by counsel. We were particularly sensitive at every juncture to create a bill that would be above criticism. For example, we specifically did not give the judicial council of each circuit a broader role because of the possibility that we might be criticized for allowing judges who work reasonably closely with one another to adjudicate each other's behavior.

all respects enhance the Federal Judicial Tenure Act, and I believe it will in all respects enhance the Federal judiciary and make a positive contribution

to the quality of American justice. I am convinced that there is a need for this legislation, and that it is long, long overdue. I have examined all the possible constitutional arguments and am totally convinced—as are the judicial conference, the ABA, the Justice Department, the American Judicature Society, and many individual judges and lawyers throughout the country—that this legislation is totally within the letter and spirit of the Constitution.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I yield myself such time as I may require.

Mr. President, the bill which we consider today—establishing a procedure in addition to impeachment for involuntary retirement, removal, and censure of members of the Federal judiciary—is a most important one. Since the founding of our country and the drafting of its Constitution, the impeachment process has been the sole means utilized to remove those judges whose conduct was deemed to be inconsistent with constitutional requirements. Several scholars, writing in the first 50 years after ratification of the Constitution, expressed their belief that impeachment was the only method for removal of Federal judges. Many commentators today are of that same opinion.

The continued use of impeachment as a sole means of removing Federal judges, however, presents greater practical difficulties today than in 1789. Impeachment is a cumbersome, time-consuming process. The removal of even a single district court judge could conceivably tie up both Houses of Congress for a significant period of time. Attorney General Bell, in his testimony before the Subcommittee on Improvements in Judicial Machinery on September 14, 1977, stated that:

> Not every judge who perhaps should be impeached can be impeached . . . Congress does not have that much time.

As a result of its cumbersome nature, impeachment does not act as a real deterrent to misconduct on the bench. These time considerations will loom still larger in future years as the legislative load of Congress increases and the number of Federal judges also climbs upward.

Historically, impeachment has been an infrequently utilized process. Eight judges have been impeached and tried, with the resulting convictions of four—the last conviction occurring in 1936. The potential need for legislation such as S. 1423 is demonstrated by the problems and controversy surrounding Judges Chandler and Ritter and the attempted impeachment of Justice Douglas.

Public confidence in the Federal judiciary would be enhanced by a disciplinary system such as that created by S. 1423 which provides standards for evaluating judicial performance and procedures for enforcing them. S. 1423 also provides for public participation in the disciplinary process by allowing anyone to file a complaint with the Commission. This provides a simple mechanism for citizens to express their grievances concerning Federal judges and justices. Any complaints which relate to the merits of a decision or procedural ruling of a judge or justice are, however, beyond the scope of this legislation.

Also beyond the scope of S. 1423 are complaints concerning a condition or any conduct of a judge which is not connected with his office or which does not prejudice the administration of justice by bringing the judicial office into disrepute. S. 1423 provides for a small permanent Commission staff to receive and initially screen all complaints. The experience of the States with similar systems indicates that a large majority of complaints will probably be dismissed at this point in the process. Therefore, members of the Federal judiciary will not be inundated by complaints which pertain to the merits of their decisions and thus are outside the scope of S. 1423.

The vast majority of States, including my own State of South Carolina, have established similar disciplinary systems. New York did so in 1947. The California system, which has served as a model for many other States, was established in 1960. The overwhelming support of such legislation by the States indicates both the practical need for it and, in view of the length of time that some systems have been in operation, the feasibility of it.

The constitutionality of removing Federal judges by means other than impeachment is the most important issue raised by this legislation. Article II, section 4, provides that the President, Vice President, and all "civil officers" shall be removed from office "on Impeachment For, and Conviction of Treason, Bribery, or Other High Crimes or Misdemeanors." Opponents argue that, by virtue of the maxim "expressio cerius exclusion alterius," the Constitution prohibits any other means of removal. The language of article II, section 4, has not, however, been interpreted as exclusive in other contexts.

The first Congress determined that the President had the power to remove "civil officers" within the executive branch. The impracticality of dealing with the misconduct of any of hundreds of civil officers by the impeachment procedure could not be ignored. Also, the Supreme Court held in 1897 that the President could remove a U.S. attorney despite the impeachment clause of article II. If impeachment is not the exclusive means for removing certain civil officers, it would seem illogical to maintain that it is the exclusive means for removing Federal judges. Finally, if the framers had intended impeachment to be the exclusive means, they could easily have so provided.

Perhaps the crux of the argument supporting the constitutionality of S. 1423 is that the language of impeachment is contained in the executive article. Article III, the judicial article, includes no language regarding impeachment or any other means of removal for that matter. It simply provides that "Judges, both of Supreme and Inferior Courts, shall hold their offices during good Behavior." The grounds for impeachment set forth in article II and the good behavior standard prescribed by article III are apparently two distinct standards. At common law, impeachment was a criminal proceeding conducted in Parliament on charges of "treason, high crimes and misdemeanors."

Moreover, this language was regarded as having a technical limited meaning encompassing only very serious offenses. "Good behavior" also had a particular meaning of common law. This type of tenure in office is commonly associated with the Act of Settlement (1700) which granted judges tenure for so long as they conducted themselves well. Thus, "good behavior" was regarded as the broader of the two standards—encompassing a wider range of misbehavior than that included within the terms "Treason, Bribery, and Other High Crimes and Misdemeanors."

Furthermore, removal of officers having "good behavior" tenure was accomplished by a judicial, rather than by a legislative proceeding. The common law writ of scire facias was used to initiate a civil proceeding for the forfeiture of the office in which termination was declared by the judiciary.

Arguably, when the framers utilized a term of art such as "good behavior" without indicating that they were using it in a novel fashion, they assumed that similar procedures to those at common law would be used to remove those judges who violated the "good behavior" standard. The present legislation provides for a means of removal analogous to the common law system for removing violators of the good behavior standard in that S. 1423 establishes a disciplinary system within the judicial branch itself. I believe that S. 1423, in providing a procedure to judicial enforcement of the good behavior standard, is a proper exercise of the "necessary and proper" clause (article I, section 8) of the Constitution.

Mr. President, S. 1423 would afford a fair, efficient alternative to the more cumbersome process of impeachment. This legislation has been endorsed by the Judicial Conference of the United States, the American Bar Association, the Department of Justice, the American Judicature Society, the National Association of Attorneys General, Attorney General Griffin Bell, and other legal scholars and Federal jurists.

I would like to thank Senator DECONCINI, chairman of the Subcommittee on Improvements in Judicial Machinery, and his staff for the fine work which they have done on this legislation. I would also like to offer my appreciation to Senator WALLOP, ranking minority member of the subcommittee, for the commendable job he has done in managing this legislation for the minority. Finally, I ask that my distinguished colleagues support this needed legislation of which I am a cosponsor.

Mr. BAYH addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Who yields time?

Mr. BAYH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAYH. Who is in charge of the time on this side of the issue?

The PRESIDING OFFICER. The Senator from Arizona.

Mr. DECONCINI. Mr. President, I do not know how much time the Senator from Maryland has.

Mr. MATHIAS. I do not have any time.

Mr. DECONCINI. The Senator has no time.

I yield whatever time the Senator wants.

Mr. BAYH. That is fine.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAYH. I ask for clarification. What is the time allocation?

The PRESIDING OFFICER. Six hours on the bill, and 1 hour on amendments in the first degree.

Mr. BAYH. I accept the gracious offer of my distinguished friend from Arizona.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. NUNN. Will the Senator yield at some point? I would like to make a statement.

Mr. BAYH. I yield to the Senator from Georgia. I did not see he was prepared.

Mr. NUNN. It is not necessary now. The Senator can go right ahead.

Mr. BAYH. I would just as soon wait. I have a couple more notes to make.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, first of all, I want to thank the chairman of the Subcommittee on Improvements in Judicial Machinery (Mr. DECONCINI) for his yeomanlike efforts in refining this legislation, which I introduced several years ago, and guiding it through the Judiciary Committee.

I also want to commend Senator WALLOP for his great help and assistance as the ranking minority member, as well as Senator THURMOND, who is the ranking minority member of the full committee.

Without the work of Senator DECONCINI, Senator WALLOP, and Senator THURMOND, and also the able assistant of Senator DECONCINI, Mr. Mike Altier, we would not be debating this bill today.

Mr. President, I am extremely pleased that the Senate is today considering what I believe is a very significant judicial reform—the Judicial Tenure Act. At the outset, I would like to take this opportunity to thank the chairman of the Subcommittee on Improvements in Judicial Machinery, Senator DECONCINI, for his yeomanlike efforts in refining this legislation and in guiding it through the Judiciary Committee. Without the work of Senator DECONCINI and his able assistant, Mike Altier, we would not be debating this bill today.

The concept embodied in this bill is not a new one. Serious congressional hearings have been conducted on the subject since the 1930's and a principle similar to that contained in S. 1423 has been before the Senate for over 10 years. While the Judicial Tenure Act does not represent an entirely new concept, it does represent a concept whose time has come.

S. 1423 would establish a procedure, within the Federal judiciary, to investigate allegations that a Federal judge is not conforming to the constitutional standard of good behavior or that a judge is suffering from a permanent mental or physical disability that seriously interferes with the performance of his official duties. This legislation, which has become known as the Judicial Tenure Act, provides for the removal, censure or involuntary retirement of a Federal judge in the event that allegations of that kind prove to be meritorious. I introduced the Judicial Tenure Act in the 93d Congress as S. 4153 and in the 94th Congress as S. 1110 and the legislation which we are discussing today, with a few constructive alterations, is substantially the same as those bills.

Many lessons should be learned from the recent experiences of the Watergate era. We were reminded that power can intoxicate its holders, and be abused by the highest governmental officials in this Nation. We all must recognize the unfortunate fact that public confidence in Government has been eroded over the past few years for many reasons, and it will continue to decline unless affirmative steps are taken, in each branch of Government, to stimulate renewed trust in public officials and institutions.

The daily news reports are replete with accounts of the new disclosure requirements being imposed on Presidential appointees and of the implementation of Members of Congress. It is imperative that all governmental officials act to restore and maintain the public trust. I believe very strongly that in no branch of government is the public confidence and respect more vital than in the Federal judiciary.

It would be exceedingly shortsighted to focus reform efforts on insuring that members of the executive and legislative branches of our Federal Government conform to legal, moral and ethical standards of the highest order and, at the same time, to ignore the conduct and capabilities of members of the branch of Government which possesses the authority to interpret, delay, and discontinue the actions of the other two. As now Attorney General Griffin Bell stated during hearings on S. 1110,

> We are living in a time when our public institutions are under examination and the courts are not exempt. A citizen should be afforded a clear method for complaining against the courts.

Our appointed Federal judges enjoy a high degree of independence; they are not required to answer periodically to the electorate, as are the President and Members of Congress. Although the need for a substantial degree of judicial independence is clear, experience has vividly demonstrated that no one person, or group of people, can be assumed perfect and therefore left completely unchecked. Despite the overall competence and integrity of members of the Federal judiciary, an occasional judge does misbehave or become physically or mentally disabled and yet continues to exercise the authority of his office. This problem has motivated my study of the subject of judicial tenure and discipline and my introduction of this legislation.

Historically, the sole procedure which has been employed to remove a Federal judge who has misbehaved (or is disabled), for one reason or another, has been the impeachment power which is housed in articles I and II of the Constitution. A few selected statutory provisions, which generally provide administrative authority with regard to the operation of the Federal judiciary, have also been suggested as potential sources of additional disciplinary authority.

When America's Founding Fathers, in addition to requiring impeachment for the President and Vice President, provided for the impeachment of "civil officers," a term which has been interpreted to include Federal judges, they envisioned a nation comprised of 13 States with a Federal judiciary and a Congress of commensurate size and responsibility. During the course of the recently completed second session of the 94th Congress, in excess of 870 measures were passed by the U.S. Congress and 700 rollcall votes were cast in the Senate. It is unreasonable, to say the least, to assume that the House and Senate could or should lay aside all legislative business for weeks or months in order to impeach and try an obscure, yet misbehaving judge. Present law authorizes 525 Federal judges with an additional 168 retired or senior judges, a number infinitely larger than originally authorized. As you well know, Mr. President, a substantial increase in this authorization will be enacted in the near future.

The analogy of impeachment to a heavy piece of artillery, which was made by Lord Bryce, is eminently appropriate. The impeachment procedure is cumbersome and ponderous and is only practical in the most serious and flagrant cases of abuse. As a result, indiscretions which should be addressed are regularly ignored. Commonsense requires that a balance be struck between the necessity for institution of impeachment proceedings and the resultant interruption in the important legislative process. There must be a logical relationship between the importance and power of the respondent and the time required by the House to impeach and the Senate to conduct the trial.

History has borne out Thomas Jefferson's characterization of impeachment as an "impractical thing" and a "mere scarecrow." Over the course of our 200 years as a nation, only 54 judges and 1 Justice have been officially investigated. Of these only eight judges and one Justice have been successfully impeached by the House, resulting in the conviction and removal of a mere four judges in two centuries. The last impeachment and conviction occurred in 1936. While I am among the first to appreciate the overall quality of the Federal bench, it seems unreasonable to assert that only four Federal judges in our history have misbehaved or been disabled. On the contrary, the record is filled with substantial allegations levied against judges who continued to serve on the Federal bench.

The facts clearly demonstrate that impeachment has not been utilized to insure compliance with the constitutional standard of "good behavior" imposed on the Federal judiciary by article III. Moreover, except in the most flagrant

and publicized cases, it is questionable whether impeachment is an appropriate means through which to decide the merits of such serious allegations. Examination of the fifth amendment and its due process safeguards raises some interesting questions regarding the propriety, if not the constitutional sufficiency, of a trial where, as former Congressman Hatton Sumners described the scene, "at one time only three Senators (jurors) were present and for 3 weeks we presented evidence to what was practically an empty Chamber."

A point of view which is too often ignored is that of the accused judge. There is no question that society's rights must be protected, but is impeachment, with its attendant public humiliation and loss of pension, a proper remedy to address the problem of a senile or disabled judge who has served well but fails to recognize that the time to step down has arrived?

I believe that a thorough analysis of the impeachment procedure leads one to the inevitable conclusion that, in practical as well as legal terms, impeachment has not insured and cannot effectively insure judicial compliance with the constitutional "good behavior" standard. Woodrow Wilson stated this premise most succinctly as follows:

> Judging by our past experiences, impeachment may be said to be little more than an empty menace.

The fact that repeated efforts have been made by scholars, jurists, and legislators to develop a reasonable alternative to impeachment can be viewed as substantial evidence, in and of itself, that a need for improved judicial accountability has existed throughout our history. The dissatisfaction of Congress with the efficacy of impeachment has been evidenced by legislative efforts originating as early as 1791 when the first constitutional amendment on the subject was proposed. Nine more such amendments were offered between 1807 and 1812 as a result of the impeachment of Justice Chase, and several bills were introduced in the period 1936 to 1950 following the Ritter impeachment. A few statutory provisions have been enacted which have been credited with possessing varying amounts of disciplinary authority.

In particular, these statutory enactments involve the creation of the Judicial Conference of the United States in 1922 and the Administrative Office Act of 1939. Various responsibilities and duties were assigned to several entities by these statutes and the exact amount of disciplinary authority which is available under these laws has been the subject of considerable debate. It is clear that the judicial councils of each circuit, the Administrative Office of the Courts, and the Judicial Conference have been authorized to deal with the administrative details of the Federal court system.

The question remains, however, whether or not any of the statutory language authorizes the disciplining or removal, in fact or in effect, of a judge subject to the jurisdiction of the council or other entity. The courts have avoided directly addressing the question and the only consensus on the issue is that, at the least, whatever disciplinary authority may exist needs legislative clarification.

The logical and unavoidable conclusion at this point is that congressional inaction on the subject of judicial tenure and discipline has resulted in one of the three branches of our Federal Government being virtually unaccountable to anyone, even itself.

As I mentioned earlier, during the early 1800's several constitutional amendments on the subject of judicial discipline and tenure were proposed. It is in the years subsequent to the last impeachment in 1936, however, that this subject has been most clearly and carefully scrutinized.

In the late 1930's two bills were introduced in Congress on the matter of providing an alternative disciplinary and removal procedure. S. 4527, introduced by Senator William McAdoo, proposed the establishment of a special court composed of Federal judges which would have jurisdiction over all Federal judiciary misbehavior cases, except those involving Justices of the Supreme Court. The prosecutorial role was filled by the Department of Justice and the decision could be appealed to the Supreme Court. H.R. 2271 was introduced by the chairman of the House Judiciary Committee, Hatton Summers, and provided that the House of Representatives, by way of resolution addressed to the Chief Justice of the United States, could initiate a hearing into the behavior of an accused district judge. Prosecution was to be conducted by Representatives from the House and appeal to the Supreme Court was provided. Both bills restricted the remedy to removal.

Serious legislative efforts in this regard were somewhat dormant from this period until former Senator Joseph Tydings, of Maryland, introduced the Judicial Reform Act in 1969. S. 1506 represented a novel approach to the subject because its procedures were totally confined within the Federal judiciary. A Commission on Judicial Disabilities and Tenure, composed of five Federal judges, was to act as a factfinding body with regard to any allegations of misbehavior. The Commission had the authority to dismiss a spurious complaint, or, in the event the evidence so warranted, to recommend removal of the accused judge to the Judicial Conference of the United States where a trial-like procedure would be conducted. A removal order from the Judicial Conference could be appealed to the Supreme Court.

The Judicial Tenure Act which I first introduced as S. 4153 in October of 1974 and reintroduced as S. 1110 in March 1975, and as S. 1423 in April 1977, although varying substantially in substance, is patterned in principle after the Judicial Reform Act.

In the spring of 1976, hearings were conducted on the Judicial Tenure Act before the Senate Judiciary Committee's Subcommittee on Improvements in Judicial Machinery. Hearings were again conducted in September of 1977. Several changes have been made in the legislation since its original introduction in order to reflect the constructive suggestions made by witnesses in these hearings, as well as to insure its constitutionality.

The purpose of the Judicial Tenure Act is to provide a mechanism within the judicial branch itself to enforce the "good behavior" standard which is imposed on the Federal judiciary by article III, section I, of the Constitution. A procedure to investigate allegations that Federal judges have failed to exercise "good behavior," or charges that a judge is suffering from permanent physical or mental disability that seriously interferes with the performance of his duties is proposed to be established within the Federal judiciary. Each portion of this proposal has been subjected to scrutiny since the 1930's and language has been incorporated to perfect deficiency was identified. I believe that the Judicial Tenure Act represents comprehensive and reasoned approach which, if enacted, would address many of the insufficiencies in judicial discipline which I have described.

I have examined this issue in some depth and I am convinced along with numerous bona fide constitutional scholars and prominent individuals in the legal community, that the approach adopted by this legislation is entirely consistent with the U.S. Constitution. It is important to keep in mind that the Judicial Tenure Act is proposed as a means in addition to, not in place of impeachment.

Constitutional questions have been continuously raised by those who oppose creation of a procedure which would allow meaningful implementation of the "good behavior" standard. My intention is certainly not to cut off constructive discourse on the subject; however, the time has come to recognize the practicalities of this issue and to examine it in a broad perspective with reason and logic. Opponents rely upon the assertion that impeachment is the solitary means of removal permissible under the Constitution. I believe that it is productive to examine exactly what the Constitution says on this issue—and what it does not say.

The Constitution does say in article I, that the Houses of Congress shall have the sole powers of impeachment and trial of all civil officers. It does not say, however, that Congress shall have the sole power of removal of these officers. As a matter of fact, it was determined early in our Nation's history, that lesser executive branch officials could be removed by order of the President. The Supreme Court ruled in 1897 that the President had the authority to remove a U.S. attorney despite the fact that the impeachment clause provides for the removal of civil officers. How can it reasonably be argued that impeachment is exclusive with regard to some "civil officers," such as judges, and not exclusive with regard to others? Moreover, if the framers had intended impeachment to be the sole method of removal, it would have been a simple matter to employ specific language to that effect.

It is interesting to note that the extreme remedy of impeachment is pro-

vided for in article I, the legislative article, and article II, the executive article. No mention of this procedure is made in article III, the judicial article. In view of the fact that the debate by the framers on the subject of impeachment focused almost totally on the President and that the term "civil officers" was included almost as an afterthought, one could easily assume that the framers intended to further address the subject of tenure of Federal judges in the appropriate place, article III.

Our Federal system of government is predicated upon the doctrine of separation of powers. The interrelating system of checks and balances was devised by a group of men concerned by abuses produced through the dominance of one branch of government, the English monarchy, over the remaining two branches. They took great care to provide elaborate safeguards to insure against history repeating itself in the American Government by formalizing the separation of powers doctrine. I believe that impeachment of Federal judges was authorized, not as an exclusive means of disciplining the judiciary, but rather as one of the limited checks by one branch of government on another. Impeachment was not intended to preclude the judiciary from disciplining itself; rather it was intended as a carefully circumscribed exception to the doctrine of separation of powers to be used in extreme cases of abuse or as a safeguard against judicial branch inaction.

If we accept the principle that impeachment of Federal judges is a limited authority granted to the legislative branch as part of the system of checks and balances it seems logical that the framers must have contemplated a disciplinary mechanism that would be available for less than extreme cases of abuse and in the normal course of maintaining the integrity and efficiency of the judiciary branch. This mechanism was contemplated and it was logically placed in article III of the Constitution.

Prof. Raoul Berger, the noted constitutional scholar, who testified on behalf of this legislation during the 94th Congress, has compiled a detailed analysis of the history and precedent on which the "good behavior" clause is based. In his testimony before the Subcommittee on Improvements in Judicial Machinery, Professor Berger documented the technical legal distinction between impeachment and "good behavior" tenure.

His analysis generates the unavoidable conclusion that the grounds for impeachment and the "good behavior" requirement are two distinct standards of conduct and that "good behavior" is a much more stringent standard than a prohibition against bribery, treason or other high crimes and misdemeanors. (That is, not all forms of bad behavior constitute impeachable offenses.) Professor Berger pointed out that impeachment, at common law, was a criminal proceeding brought by the House of Commons in the House of Lords on charges of "treason, bribery, high crimes and misdemeanors." Berger further documented the fact that the terms "high crimes and misdemeanors" had a limited technical meaning which referred serious offenses and did not encompass all forms of misbehavior.

As the House Judiciary Committee wrote in their report on the grounds for impeachment, during the Nixon impeachment deliberations:

> High crimes and misdemeanors has traditionally been considered a term of art . . . The Supreme Court has held that such terms must be construed, not according to modern usage, but according to what the Framers meant when they adopted them.

Although the framers departed from the English model in separating the impeachment proceeding from a criminal proceeding, they intentionally retained the limited technical grounds of "high crimes and misdemeanors." Furthermore, there is no indication that the framers intended the impeachment provisions to be a complete recitation of the causes justifying removal from office.

In contrast to impeachment, removal for breach of "good behavior" was a judicial, not legislative, proceeding. Good behavior tenure was originated in the Act of Settlement in 1700 in an effort to isolate the judiciary from the arbitrary whims of the monarch. Professor Berger points out that the words "good behavior" in all commissions and grants, public and private, imparted an office or estate for the life of the grantee terminable only by his death or breach of good behavior.

This termination was declared by the judiciary in a civil proceeding for forfeiture of the office which was initiated by a writ of scire facias. Its sole objective was to remove the existing officer with no penalties or disqualifications involved. When the framers employed "good behavior," a common law term of ascertainable meaning, with no indication that it was being used in a novel fashion, they must have assumed the inclusion of similar procedures for its implementation. Such an assumption is supported by Madison's explanation to the Virginia Ratification Convention that "where a technical word was used all the incidents belonging to it necessarily attended."

A "gap" between the two standards, "good behavior" and the grounds for impeachment, must therefore exist. To assume otherwise would be to claim that the grounds for impeachment and "good behavior" tenure are the same and thereby render the "good behavior" clause meaningless. The longstanding constitutional principle that no clause in the Constitution is intended to be without effect will not permit this result. Therefore an alternative method to impeachment to accomplish the removal of Federal judges must have been contemplated by the framers to provide for the removal for misbehavior of disability less serious than an impeachable offense but in derogation of the "good behavior" standard. The substance of what constitutes "misbehavior" may be open to interpretation but it is completely clear that procedurally, "good behavior" was a term involving the judicial process.

In light of the evidence, it certainly cannot be logically maintained that the Framers would have rejected a process of judicial removal other than impeachment. It seems apparent that the term "good behavior" was employed with the eminently logical intention of providing a disciplinary means, within the judiciary branch itself, in addition to the power authorized to the legislative branch through impeachment. Simple logic indicates that if an office is conferred during "good behavior" it is relinquished upon bad behavior and some means of enforcing that end must be available.

Some commentators assert that the enactment of legislation of the nature of the Judicial Tenure Act would dramatically dilute the independence of our Federal judiciary. Arguments of this kind are superficial and misleading. Judicial independence, a principle which we all agree is a precondition to an effective system of justice, has historically referred, not to the independence of judges from one another but rather to the independence of the judiciary as an institution from other branches of government.

The intention of the framers was to avoid the experiences of the British which saw the judiciary totally dominated by the King. Professor Berger noted that,

> All the remarks in the several conventions that bear on judicial independence, so far as I could find, referred to freedom from legislative and executive encroachments. No one suggested that judges must be immune from traditional judicial control.

The assertion that a disciplinary mechanism, totally restricted within the judiciary, infringes on judicial independence simply does not make sense.

The time has come to recognize the practicalities of the issue and to examine it in a broad perspective with reason and commonsense. It is clear that impeachment, in practical terms, is not an effective disciplinary mechanism. It is clear that the existing statutory authority is ambiguous and insufficient in this regard. It is clear that substantial authority exists indicating that the procedure proposed by the Judicial Tenure Act is constitutional. No less jurists than Justice Rehnquist, Justice Burger, and Justice Blackum have expressed the opinion that the principle represented by the Judicial Tenure Act is constitutional. Attorney General Bell has stated, with regard to the Judicial Act:

> I am not troubled over the constitutionality of the proposed legislation.

The Judicial Tenure Act has been endorsed, in total or in principle, by the Judicial Conference of the United States, the American Bar Association, the American Judicature Society, and the American Association of Attorneys General. It is clear that Congress possesses the authority to enact legislation in this regard. This authority was described in detail by Professor Berger as follows:

> Since the judicial power to declare a forfeiture on breach of a condition subsequent existed at the adoption of the Constitution, and since a dispute whether the condition was breached constitute a "case or contro-

versy," it falls within the judicial power. Consequently, legislation that would set up a special court within the judiciary branch to adjudicate disputes whether a judge breached the "good behavior" condition would merely entail a grant of fresh subject matter jurisdiction . . . such a grant would constitute action to supplement the "judicial power" under the "necessary and proper" clause or under the power of Congress to regulate the jurisdiction of the interior courts.

Professor Berger's testimony I think is the outstanding constitutional analysis of this particular measure going back in history, and I ask unanimous consent that Professor Bergers' testimony dated February 26, 1976, before the Subcommittee on Improvements in Judicial Machinery of the Judiciary Committee be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

STATEMENT OF RAOUL BERGER BEFORE THE SENATE SUBCOMMITTEE ON IMPROVEMENTS IN JUDICIAL MACHINERY

I thank you for your invitation to express my views on the Nunn Bill, S. 1110. In 1970, I studied the problem of removal of judges by judges in depth and published the results in the Yale Law Journal. It was that study that excited my interest in the questions presented by impeachment.*

You are to be congratulated for taking up a problem that has perennially troubled the Congress. Hatton Sumners, veteran chairman of the House Judiciary Committee, who participated in two impeachments, commented some 40 years ago that the House was reluctant to take the time of the Senate to try a "crooked judge" because it would distract the Senate from "all the other great business of a great nation and make them sit there for days and days." Back in 1936, Senator William McAdoo stated after the impeachment of Judge Halsted Ritter that the difficulties of impeachment made it a "practical certainty that in a large majority of cases misconduct will never be visited with impeachment," "a standing invitation for judges to abuse their authority with impunity." Few students would disagree. The procedure formulated in the Nunn Bill would relieve Congress of this burden; it would not encroach on the powers of the judiciary but would assist it in performing its own housecleaning.

I

At the outset we need to clarify a number of doctrinal matters and to disabuse ourselves of the notion, voiced by no less a personage than then Congressman Gerald Ford, that the impeachment process can be employed to remove an officer for breach of "good behavior." Impeachment and removal for breach of "good behavior" have altogether different roots; both are common law terms which had an established meaning. It has often been held that when the Framers employed common law terms like habeas corpus, bribery, they adopted the English meaning and practices associated therewith.

At common law impeachment was a criminal proceeding brought by the House of Commons before the House of Lords on charges of "treason, bribery, or other high crimes and misdemeanors" which could result in removal from office and very severe penalties. Impeachment must be regarded as a breach in the separation of powers; it enables the Senate by a two-thirds vote after a formal trial to remove an offending officer. The sole power of Congress to remove a civil officer, it needs to be emphasized, is by impeachment for "treason, bribery, and other high crimes and misdemeanors."

This is underscored by the denial of the power to remove on an Address of both Houses to the President, a power exercised by Parliament and the king, embodied in a number of state constitutions, but deliberately withheld by the federal Constitution. Although the Framers departed from the English model in separating the removal proceeding from a criminal proceeding, they intentionally retained the "limited, technical" meaning of "high crimes and misdemeanors" at common law and although removal for "maladministration" was made a ground for impeachment by some state constitutions, that ground was rejected by the Framers.

Consequently I would differ from Congressman Gerald Ford's view that "high crimes and misdemeanors" means whatever the House and Senate choose them to mean. That view was not followed, I rejoice to say, by the House Judiciary Committee in the impeachment investigation of President Richard Nixon. It would have been a sorry spectacle to throw him to the wolves.

I have stressed these facts to underline that impeachment for "high crimes and misdemeanors" has a limited compass which does not comprehend all misbehavior.

In contrast to impeachment, removal for breach of "good behavior" was not a legislative, but a judicial, proceeding. "Good behavior" tenure, to use familiar legal terms, was an estate on condition subsequent which was forfeited on nonperformance of the condition. It was terminated by a breach of "good behavior," and the termination was declared in a civil proceeding for forfeiture of the office. Its sole object was to remove the misbehaving officer; there were no penalties, no disqualification to hold office in the future.

The Framers patterned the "good behavior" tenure of judges on the then English practice; it was proposed in the Convention at the very outset and was embodied in Article III, Section 1, the Judiciary Article. The provision for impeachment, on the other hand, was placed in the Executive Article, Article III, Section 1, for the simple reason that virtually all of the discussion of impeachment was centered on the President.

Only at the last minute were the words "all civil officers" added, without any discussion whatever of the removal of judges of the inferior courts. One commentator has suggested, therefore, that there may be some question whether the Executive Article was intended to apply to them.

"Good behavior" had its own criteria which may roughly be stated as the faithful and diligent conduct of an office; it might be breached by abuse of office, neglect of duty, nonattendance and the like. You may ask, does not neglect of duty likewise constitute an impeachable offense?

But the nonattendance instanced by Coke as a breach of "good behavior" is far removed from impeachable neglect such as that of an admiral to safeguard the seas or of a Commissioner of the Navy adequately to prepare against a Dutch invasion. "High crimes and misdemeanors" and breach of "good behavior" are like two intersecting circles; there is an enclave where they are coterminous. But while all "high crimes and misdemeanors" might constitute a breach of "good behavior," not all breaches of "good behavior" amount to "high crimes and misdemeanors," as is underscored by the Framers' rejection of "maladministration" as a ground for impeachment.

Congress therefore might be content to leave removal of judges to the judiciary in any case and keep its own impeachment power in reserve in the event that the judiciary failed to remove a serious offender. This was precisely the role envisioned by the First Congress when it recognized the President's power to remove subordinates and stated that if he failed to remove a derelict officer, Congress had the supplementary power to do so.

For Article II, Section 3 does not make impeachment mandatory; it leaves it in the discretion of Congress.

When an office held "during good behavior" is terminated by the officer's misbehavior, there must be an "incident" power "to carry the law into execution," Lord Mansfield held many years ago, if "good behavior" is not to be an impotent formula. English law provided a proceeding to forfeit the office by a writ of scire facias.

Because almost all judicial appointments prior to the Act of Settlement in 1700 were held at the pleasure of the king, there were no cases of removal of judges by scire facias. But the remedy was known, and in two cases prominent, Sir John Walter and John Archer, who had been given "good behavior" tenure, resisted removal by the king except after a trial on scire facias. Chief Justice Holt, Lord Chancellor Erskine, and Sir William Holdsworth recognized the applicability of scire facias to removal of a judge.

Indeed it is captious ribbon-matching to demand a precise case of forfeiture of judicial office when scire facias was available for fortfeiture of office held "during good behavior." The law proceeds by analogy; if scire facias lies for removal of an officer, it may also be employed for removal of a judge.

At worst, no more is involved than extension of a known remedy to judges in order to effectuate the Framers' design that judicial tensure terminate on misbehavior. When they employed the terms "during good behavior" they knew that the tenure terminated on misbehavior and was subject to forfeiture. All that is required is to spell out the mechanics for the forfeiture.

Observe that I do not rely on the Congressional power of impeachment, which is limited, but on the "necessary and proper" clause to provide a remedy for effectuation of the Framers' intention. Congress may and has fashioned new remedies, if scire facias for judges may be regarded as new. Enabling legislation may also be regarded as an additional grant to the courts of subject matter jurisdiction—forfeitures of judicial office, if it be assumed that the existing forfeiture jurisdiction is inadequate.

May I remind you that the existence of an exact precedent is not the test of "Judicial power"; all that is required is a "case or controversy," and that is satisfied when a charge of misbehavior is controverted. Mark too that all that is sought by the Nunn Bill is to supplement existing "Judicial power" as Congress has so often done in the past.

II

The arguments against removal by the Judiciary are three; (1) impeachment was made the exclusive removal process; (2) judges were given absolute independence; and (3) "good behavior" tenure affords judges special insulation.

(1) By Article I, Section 2, the House is given "the sole power of impeachment," and by Article I, Section 3, the Senate is granted "the sole power to try all impeachments." This means that no other body can bring or try impeachments; it does not purport to bar other methods or removal by the other branches. It is argued, however, under the maxim expressio unius exclusio alterius that the provision for impeachment bars all other methods of removal.

That is not an inexorable rule; it is employed where other evidence is lacking to ascertain the intention of the draftsmen, not to thwart it. First, the maxim would in part nullify the provision limiting tenure to "during good behavior," for as I have indicated, impeachment for "high crimes and

*My statement is drawn from that study, published in revised form in chapters 4 and 5 of my Book, "Impeachment: The Constitutional Problems."

misdemeanors" reaches only the more serious forms of misbehavior.

Forfeiture of office for misbehavior was an incident of the tenure, and Hamilton refused to regard the maxim as conclusive where it would curtail an existing power. Second, the First Congress, immediately on the heels of the Federal Convention, recognized that the President had an independent power to remove "civil officers" in the Executive branch, testimony that it did not deem the impeachment provision to be exclusive.

Third, Hamilton made an exception for insanity, for which no "formal or express provision was made." Fourth, the Act of 1970 provided for disqualification from office after a criminal trial and conviction of a judge for bribery. Since the impeachment provision contains an express disqualification phrase, this again testifies that the First Congress, the pre-eminent interpreter of the Constitution, did not deem the impeachment provisions to be exclusive.

In the words of Chief Justice Marshall, the implication of expressio unius may serve where it "promotes, not where it defeats the intention." It needs more than a maxim to overthrow the intention to terminate judicial tenure on breach of "good behavior."

(2) A second argument, first advanced by Justices Black and Douglas, is that judges enjoy "absolute" independence. Constitutional history affords no warrant for the claim. "The independence of each power," said James Wilson, "consists in this," it "should be free from the remotest influence" of each of the other two powers. But further than this, the independency of each power ought not to extend. In other words, the judiciary was to be free from encroachments by the legislative and executive branches, no more.

Judges of inferior courts had been subject to attachment by King's Bench for misconduct and oppression, and there is no evidence that this attribute of judicial power was to be curtailed. Jefferson wrote in 1816 that judges were removable "by their own body."

The very fact that judicial tenure was conditioned on good behavior alone indicates that it was not to be "absolute," i.e. unlimited. To my mind the Black-Douglas repugnance to judicial removal is passing strange. The recent Nixon proceedings once more demonstrated how hard it is to banish partisanship from impeachment proceedings. Political passions are far more likely to animate Congress than a court.

With all due respect, I would rather be tried by men trained to sit in judgment, by a court rather than by Congress. Are we to entrust to a court the trial of a man's life and lose confidence when it is a judge's right to remain in office that is to be tried?

(3) It is also argued that the "during good behavior" phrase affords judges special protection except by impeachment. As we have seen, that provision antedated the impeachment provision, which revolved almost entirely around the President. While "good behavior" was designed to protect judicial tenure, that tenure was expressly conditioned on "good behavior."

In employing the term the Framers were aware that the tenure was terminated by breach of "good behavior." They exhibited no intention of continuing a misbehaving judge in office. To insulate him from misbehavior would in part abort the "good behavior" provision. There is no evidence that the Framers meant to insulate a misbehaving judge from removal if he was not reachable by impeachment.

A canon of construction requires that if possible every portion of the Constitution must be given effect. To confine removal to impeachment is to deny effect to the words "during good behavior," for it did not require those words to authorize removal for "high crimes and misdemeanors," to which impeachment alone extends. "Good behavior," I submit, must be regarded not only as a shield for the protection of a judge but as a sword in the hands of his fellow-judges if he violates its demands.

A word about the criteria of good behavior employed in Section 372(b) of the bill (p. 14). Removal for mental or physical disability seems to me well within the requirement of the common law.

An officer who is disabled physically or mentally cannot "diligently conduct" his office. Hamilton, you recall, stated that insanity was an essential ground of disqualification, and to my mind senility or physical incapacity stand on the same ground. "Habitual intemperance" likewise interferes with the "diligent conduct" of an office, and in my opinion it also constitutes a breach of "good behavior." The first federal impeachment, that of Judge Pickering, was for insanity and habitual drunkenness; removal for "misbehavior" is more readily justified.

The caution with which you have approached the definition of lapses from "good behavior" is commendable. As a common law term embodied in the Constitution, "good behavior" is jurisdictional, that is, the power to remove is for such misbehavior as was regarded as a ground at common law. To profit from experience, I would suggest adding removal for corrupt or criminal conduct in office and for abuse of judicial power. It may be that there are also other grounds, for example demonstrated incompetence or ignorance, but these can wait on further experience with the suggested removal process.

In sum, it is open to Congress, and I consider it highly desirable, to enact legislation under its "necessary and proper" power which would give effect to the common law attributes of "good behavior" and confirm and facilitate judicial removal of judges for "misbehavior." At worst, the constitutionality of removal by judges may be open to question, but the last word on such doubts is for the Supreme Court. I would remind you of what Jefferson stated:

"It is not for those who are only to act in a preliminary form to let their own doubts preclude the judgment of the court of ultimate decision."

Enactment of the Nunn Bill will open the door to the Court's examination and determination of the issue.

Mr. NUNN. Mr. President, we could consume days discussing esoteric constitutional theories relating to this bill. It is clear that a substantial degree of expert opinion supports the conclusion that the bill is in fact constitutional. To delay this necessary reform simply to facilitate further academic debate is not only an inappropriate assumption of the responsibility of the judiciary but it is also a disservice to those who would like to see our system of justice improved. Therefore, I am hopeful that my colleague will support passage of S. 1423.

I might say in closing, Mr. President, I know there are those who do not favor this legislation. I know they have come to their conclusions after a great deal of thought and lengthy deliberations. I certainly respect their opinion.

I particularly want to express my appreciation to the Senator from Indiana for his cooperation in seeing that this measure was brought before the Senate. He has not agreed with me on all the principles I have stated here today, but he has cooperated in every way to see that the measure could be brought before the Senate this year. He has in no way held up the legislation, and I am grateful to the Senator from Indiana for his usual courtesies which I certainly appreciate in this case.

Mr. President, I again thank Senator DECONCINI, Senator WALLOP, and Senator THURMOND for their splendid cooperation in moving this bill through the Judiciary Committee as rapidly as possible.

I also thank Senator MATHIAS, from Maryland, for his cooperation and courtesy in allowing this bill to be brought to the full consideration of the Senate today.

Mr. BAYH addressed the Chair.

The PRESIDING OFFICER. (Mr. FORD). The Senator from Indiana is recognized.

Mr. BAYH. Mr. President, I ask the Senator from South Carolina to yield—I understand he has the time in opposition—such time as the Senator from Indiana may need in discussing this particular measure.

Mr. THURMOND. How much time does the Senator want?

Mr. BAYH. Frankly I do not know. I think this is a very serious matter, and I wish not to be proscribed.

Mr. THURMOND. Mr. President, I yield 1 hour to the Senator and will yield additional time if he needs additional time after that.

Mr. BAYH. I think that 1 hour will be adequate.

The PRESIDING OFFICER. Did the Senator say 1 hour?

Mr. THURMOND. One hour. If he needs additional time, we will try to accommodate him.

The PRESIDING OFFICER. The Senator from Indiana has 1 hour and is recognized for 1 hour.

Mr. BAYH. Mr. President, I appreciate the thoughtful remarks of our distinguished colleague, my friend from Georgia. I appreciate the position that he has espoused, and I understand the intensity and sincerity of his position on this issue.

It is not a new position. It is a matter of concern which he has expressed over a long period of time, and I salute him for his perseverance.

Also, I direct myself to the statement that has been given to us by our distinguished colleague, the floor manager of this bill, the subcommittee chairman, our friend and colleague from Arizona, Mr. DECONCINI, who chairs the subcommittee which considered this bill.

I have the greatest affection for him as a fellow member of the Judiciary Committee, and it is a difficult position to be in to be on the opposite side of an issue that he has studied thoroughly and that I have studied thoroughly but reached different conclusions.

I also appreciate the remarks that were made by the Senator from South Carolina, our distinguished ranking minority member of the Judiciary Committee.

But, Mr. President, I concur in what my colleagues have previously said about the problem which exists relative to some judges who are not performing as we would have them perform. I am deeply distressed that the remedy we choose is one which has a great possibility for mischief.

At the time this measure was before

the Judiciary Committee the Senator from Indiana was the only one who expressed opposition. The distinguished Senator from Maryland (Mr. MATHIAS), who was absent on official business at that time, also was equally concerned, and both of us found ourselves in a rather uncomfortable position where we are sort of like voices in the wilderness on this issue.

But it is an important issue and, for that reason, I have asked time to consider it at length so that some of the nuances involved which were not immediately apparent upon casual study of this might be more apparent as the Senate prepares to consider it.

In my judgment, there are two reasons for opposing this legislation: First, there can be little doubt that it exceeds the constitutional authority of both the Congress and the judiciary; and, second, it establishes procedures and sanctions which threaten the independence and character of the Federal judiciary.

I think we are all concerned about the independence of the Federal judiciary. The concern has been expressed by those who propose this as a solution to the problem. But I would like to point out in the strongest terms that I think we have not given enough attention to this matter of maintaining that sacred building block of our freedoms, the independence of the Federal judiciary. We must have judges who have the courage to stand up and say, "This is what the Constitution provides." They cannot be run out of office by a majority of the Congress, they cannot be run out of office by a majority of the judiciary, nor can they be removed by a plebiscite. They can stand until they are subject to the impeachment process, and it is that kind of independence that I want to maintain.

I take a little different view of the severity of this problem than do those who are supporting this legislation. I have no disagreement with the motivation behind this bill. We are all convinced that we need a wise, conscientious, and responsible judiciary. We concur in the necessity of having the ability to remove judges who have seriously betrayed both their oaths to uphold the Constitution and the laws of the United States and their duty to assure the administration of justice with which they are entrusted.

I also concur with the majority in viewing the growth of the Federal judiciary as a mixed blessing, a blessing which I hope we are soon able to realize because we need the additional judges. But it is a mixed blessing in that it provides citizens with means to address their grievances with some degree of dispatch but, at the same time, worries us by its very size and numbers. No longer is the Federal judiciary the select handful of jurists which existed at the beginning of our life as a Nation. By sheer commonsense and the laws of chance we are wary that there will be more bad apples in the lot.

However, I am concerned that with S. 1423, we are moving precipitately toward undefined goals without a clear and consistent view of the grounds which would be sufficient to remove Federal judges.

What judges are we willing to go to such radical means to get rid of? The slothful, the criminal, the unpopular? This bill gives no clear standard of acceptable or unacceptable behavior. Rather I fear with this bill we are creating new machinery of dubious constitutionality to achieve what might well be accomplished by less drastic means well within constitutional grounds: Better, more thorough, selection methods; strengthened interjudicial circuit discipline, and refined preimpeachment procedures by which impeachment could become an effective mechanism when deemed to be necessary.

In short, it seems to me there are other more effective, easily constitutional, means to deal with the very real problem which, I think, most of us here today recognize as existing.

The majority take the position that since the constitutionality of S. 1423 is a question which can ultimately only be decided by the Supreme Court, Congress should not hesitate to pass a law and let the Court make its decisions. Let us take a look at that, if I may say to my colleagues. Certainly the Congress has passed legislation knowing it posed serious constitutional issues. The Voting Rights Act is as good an example as any I can think of, and I supported that enthusiastically as landmark legislation.

However, there is a great difference between legislation which is arguably unconstitutional and that which is very probably unconstitutional. A proposed law which poses serious constitutional issues demands the most careful scrutiny by the legislative branch. If it is very probably unconstitutional it should not be passed. Certainly the constitutional problems with S. 1423 are sufficiently serious to warrant closer examination of the policy questions which are raised.

Without trying to prejudge in advance what the Supreme Court might be prepared to do, I find the arguments for the constitutionality of S. 1423 to be very troubling. We are relatively late in the session, and we do not know whether our brothers and sisters in the House are going to act on this, and I hope they do not. But if, indeed, this matter is brought back again to the Senate, I would hope that because of the serious questions raised that we could give it more thorough consideration.

Without being unnecessarily critical, the only evidence of any study of this at the hearing stage that I can find is contained in the hearing manual which I now have in my hand on the Judicial Tenure Act. It is a relatively short hearing as hearings go.

A year earlier there was a hearing of about a similar volume as far as testimony is concerned. I also have here, I suggest to my colleagues who might care to note, that our former colleague from North Carolina, Senator Ervin, held much more extensive hearings in opposition to this particular proposal back in 1970, and that we really have not had the kind of comprehensive attention to this problem which, I hope, we would give to it in the future.

I do not want to be overly critical because at first blush this matter would appear to be a relatively simple one. Now that certain rather complicated and rather complex questions have been raised and now that we have finally gotten a report from the judicial branch of this Government, which was not contained at the time the measure was considered in the Judiciary Committee, I think we can take into consideration their opinion.

I would also like to point out that subsequent to the hearings on which testimony was taken—I would like to point out there was nobody at the hearings who was opposed to this particular legislation—but even after that there were significant changes made in the content of the bill toward which there has been no hearing directed at all. So, hopefully in the future, we can have a chance, as busy as we all are, to get a broader mix of opinion on this measure before we proceed further.

Let me look at the relevant constitutional issues very briefly and try to summarize them.

Article II of the Constitution expressly provides that all civil officers shall be removed from office by impeachment. Article I states that the Congress shall have the sole power of impeachment. The proponents of this legislation argue that another means of removal exists within the Constitution in the "good behavior" clause of article III, section 1, and they maintain that for 190 years this alternative removal mechanism has been available whenever the Constitution wanted to employ it, but it simply has not been used.

The majority brush over the fact that throughout the country's history the idea that good behavior—the "good behavior" clause, as being intended to provide a way to get rid of Federal judges was not proposed. Even contemporaries of the framers, who felt strongly that it was a mistake to confine removal of judges to the impeachment process, never suggested that article III provided such an alternative. Historical precedents, case law, statutory construction, all sustained the traditional view that the Constitution provided only one means for removing a judge, and that is the impeachment process.

The standards for impeachment under article II, as we all know, are treason, bribery, or other high crimes and misdemeanors.

The proponents of S. 1423 grant that Congress has the exclusive power of removal for commission of the serious misconduct which is impeachable. They contend that a judge whose behavior falls in the gap between "good behavior" and "high crimes and other misdemeanors" is subject to removal by other judges through machinery set up within the judicial branch itself. In other words, a higher standard of conduct is imposed on judges than other civil officers. A different way of removal is provided for judges than for other officials.

I am prepared to deal with the rather significant distinction between the removal of a district attorney, which has been referred to two or three times here, and the removal of a judge, which is the difference in executive branch appoint-

ment. It has been made clear that the district attorney really serves at the pleasure of the President, whether it is Marston or somebody else. Historically, I do not know of any district attorneys who have been given life tenure, which seems to make a rather clear distinction between a district attorney's removal and this proposal for removal of a Federal judge.

To sustain this argument, it seems necessary that three assumptions withstand scrutiny: First, that the Constitution allows the creation of an alternative removal mechanism.

Is impeachment the only mechanism, or does the Constitution provide for an alternative mechanism? The second necessary assumption is that the "good behavior" clause requires a higher standard of conduct in the judiciary than would be imposed by impeachment; and third, that S. 1423's removal standards—"conduct which is or has been inconsistent with the good behavior required by article III"—does not impinge on the exclusive congressional power of removal by impeachment.

Let us look further at what we are talking about here. The proposition that article III's good behavior clause provided an alternate means of removal of judges was first offered in a law review article by Burke Shartel in 1930, and has recently been argued by Prof. Raoul Berger in his work on impeachment.

I ask my colleagues to look back through history, and find out where the seed of this idea was first planted. Has there been an overwhelming landslide proportion of judicial precedents and writings in support of this proposition? I respectfully suggest that there has not. The embryo was planted in 1930, and more recently has been argued by Prof. Raoul Berger in his work on impeachment.

On the other hand, the overwhelming authority in the United States has been consistent, that impeachment was the sole means of removal of Federal judges because of the language of articles I and II that the House and Senate are granted the "sole power" to impeach and convict office holders. Any argument to the contrary must meet the heavy burden created by this express constitutional provision. The majority places its argument primarily on the slender shoulders of the precedent in English common law of the obscure writ of scire facias, an argument derived from Berger and Shartel.

In other words, where did this whole business of a different standard, the good behavior standard, originally come from?

If you look back at where it all started, we are told it started back in the English common law, which was taken by our Founding Fathers and considered when they wrote the Constitution and talked about holding office for good behavior, and that is why judges are subject to a different standard than anybody else.

The Founding Fathers, the proponents say, must have intended an alternative means of removal of judges within the judicial branch itself since scire facias proceedings were available at common law.

Let us look at this, I suggest to my colleagues. The proposition has been closely analyzed by many constitutional authorities and found to be wanting. I invite any of my colleagues who care to look into the matter to look at the "Report on the Removal of Federal Judges Other Than by Impeachment," the work done by the New York City Bar Association, to see how slender if not totally absent a thread this proposition provides to support such a contention.

The theory of scire facias, as the majority report explains, was that a grant of office imparted an office or estate for the life of the grantee terminable by his death or a breach of good behavior.

That is where it all came from. That is what Mr. Berger maintains the common law thrust was. You got the grant of authority for life, or subject to breach of good behavior.

The judiciary was empowered to issue a writ of scire facias to initiate a civil proceeding for the termination or forfeiture of the office. The object of the writ was to remove the officer without penalty. A close examination of the writ does not sustain the conclusion drawn by those who present this proposed legislation to us.

First of all, most authorities cite a lack of historical evidence that the framers of the Constitution even had knowledge of the generally discarded writ of scire facias, which had admittedly never been used to remove a judge. Scire facias was never included in any Revolutionary State constitution, nor was it considered at the Constitutional Convention.

There was no mention at all to give anyone even the scintilla of an idea that our Founding Fathers considered the "good behavior" of scire facias, as it was used in the context of our Constitution.

It is admitted by all the scholars that there is no record of the writ having ever been used to attack a letter patent—granting "good behavior tenure"—in a colonial court.

In other words, this good behavior remedy was not used by our Founding Fathers in any of their colonial courts.

Further, the positions subject to removal by the writ were only of minor court officials, not full-fledged judges. Officials so removed included such obscure officers as filazers, remembrances of the Exchequer, cord recorders, postmen, and auditors.

Now, some of you may ask, what in the world were those offices? That is the same question I asked, and it is almost impossible to find out what some of them were and what they did, because they were so obscure. Yet that was the caliber of office to which this writ was directed, on which this ground for removal, the breach of good behavior, was based.

Further, if we look at the precedents for this, no judge was ever removed by scire facias in England, even though the writ technically survived until 1947. It was not applied in England. The writ was not abolished in America until 1938. By the majority's interpretation, any Federal judge could have removed another judge up until that time under the theory of scire facias simply by concluding that his brother or sister judge in effect breached a condition of his appointment by engaging in something that was not "good behavior." Not one judge has been so removed. Moreover, it is interesting to speculate what would have happened if a Federal judge had ever tried to employ this particular remedy of writ of removal on another Federal judge.

The undocumented precedent of scire facias is far too slender a reed to support such a radical change of practice that could effectively destroy the constitutionally mandated life tenure of Federal judges and give other judges broad new removal powers.

Other evidence argues against the constitutionality of any other means than impeachment for removal of judges.

I would like to call the attention of my colleagues to this, because it seems to me to be very persuasive that the only way to remove a judge is through impeachment. Early drafts of the Constitution gave impeachment powers to the Supreme Court; after long debate, it was decided that the best and most impartial tribunal would be the Senate, not members of the judicial branch.

Is there any better signal of what our Founding Fathers meant on how judges should be removed, when one of the early documents said, "Let the judges remove themselves," and the final document said, "No, we trust that to the Congress, not to the judiciary?"

Further, there is overwhelming evidence that the framers themselves considered impeachment the sole means of removal. If you look and see what Hamilton said in Federalist No. 79, he expressly said so. Jefferson held that opinion. Marshall, Story, and Kent concurred. The eminent constitutional scholar of this day and age, who has been a tremendous help to our subcommittee, Prof. Philip Kurland, has cited as emphatically as he can, "It is pellucidly clear that the intention of the framers was to make impeachment the sole means of removal."

Proponents argue that other branches of government under the Constitution have alternate means of early removal besides impeachment inherent within their own branch.

And it is true, they do, but I suggest with all respect to my distinguished colleagues that distinctions can clearly be drawn between those rights of removal and the way judges are to be treated under the Constitution.

An exception is expressly provided within the Constitution for the legislative branch, article I, section 5. The Supreme Court decided that the President can remove certain Federal officials performing executive duties within the executive branch for the reason that he appointed them. The same obviously cannot be said for the judiciary. The Court further held in Humphrey's case that the President is restricted in removing such officials as Commissioners of the FTC because this responsibility is a quasi-legis-

lative, quasi-judicial role requiring independence from other officials or departments of government in order to function properly.

If the Court has said that about the unconstitutionality of a removal of an FTC Commissioner, who is a quasi-legislative, quasi-judicial officer, what is the Court apt to say about the removal of a judge, where there can be no question of his judicial nature. Let me say this reasoning would hold in respect to the independence of the judge subject to the censure of the judiciary, as well as of the legislature.

It is also worth drawing an analogy to the 25th amendment, which was drafted to continue the consistency of our constitutional pattern. The 25th amendment provides that a President can only be removed for inability to perform his duties upon the judgment of the Congress, not the determination of his own Cabinet. Disagreement between a judge and his fellow judges over his judicial inabilities should likewise be resolved by the House and the Senate through impeachment and not by giving certain judges power over the removal of other judges. The Constitution is clear that judges are protected from members of their own branch as well as the legislative and executive branches.

As the principal author of the 25th amendment, I remember very well the debate on this particular point, when we were debating it right here on the Senate floor. We wanted to be very careful that you could not provide an end run to constitutional protections, that you could not make it possible for a handful of cabinet officials to railroad a President. or make it possible for a majority of Congress to remove a President for inability. The only way you could get rid of him by impeachment was by a two-thirds majority.

I invite my colleagues to look at the basis for that judgment back to the Andrew Johnson impeachment trial. Is there any doubt that had there been a lesser standard for disability for impeachment, Andrew Johnson would have been removed from office on the grounds of inability.

Mr. NUNN. Will the Senator from Indiana yield on that point?

Mr. BAYH. Yes.

Mr. NUNN. I understand what the Senator is saying, but the President has never been subjected to a good behavior clause. It seems to me that that point has nothing to do with the theory on which this bill is based, because there is a good behavior clause in the U.S. Constitution as pertaining to judges. If that good behavior clause is to have any meaning, then it has to be something different from the impeachment clause. The Andrew Johnson case had nothing to do with good behavior.

Mr. BAYH. That is right. I was only using that as an example of the danger if we lower the standard or the test which must be met before we remove an officer. I tried to emphasize the importance of maintaining impeachment as the only way of doing that either for a President or a judge.

The Senator from Georgia raises a good point which I intend to address in just a moment.

In other words, I think it is very legitimate that he and the Senator from South Carolina and the Senator from Arizona think good behavior has a purpose for being in the Constitution. I concur. But I would invite a close examination to what appears to be a logical explanation on the part of the Senator from Indiana, which reaches a different conclusion than that which others have reached.

Since it is conceded by proponents of this legislation that Congress has the sole and exclusive power of removal for the commission of impeachable offenses in order for S. 1423 to be constitutional, it is necessary that it prove that the good behavior clause provides a higher standard of conduct, a different standard of conduct, a different way of treating judges than that required by impeachment.

I frankly do not believe that that proposition can be sustained.

Proponents assert the language of article III of the Constitution, which says that judges shall hold their offices during good behavior, was intended by the writers to establish the fact that judges who did not conform to good behavior should not be able to continue to hold office.

I think that is the proposition on which the Senator from Georgia very strongly argues his case.

These assertions, I suggest with all respect, again go back to the opinions of Professors Shartel and Berger.

You certainly cannot find any case law, you cannot find any precedent in history, to sustain that proposition as being a basis for this decision being made by our constitutional fathers. On the contrary, the great weight of historical research done by other constitutional experts argues that tenure during good behavior was intended to differentiate from tenure at the King's pleasure. It was rebellion against tenure during the King's pleasure which had led to the law in England in 1701.

Mr. President, I think this is a critical question. It was one raised by the Senator from Georgia. It is one that the Senator from Arizona and others have used as a basis for their sincere belief that the Constitution, by saying a judge shall serve for good behavior, in essence meant to establish a different standard of conduct by the use of that term than was used in the impeachment clause, so that thus you could use a different means for removing judges than impeachment.

The only way we can really come to grips with what is meant in that Constitution, it seems to me, is to look at what was happening at that time. What were our Founding Fathers angry about? Why did they bleed and die? Why did they overthrow the King?

When we look at one of the major reasons, it was that the King could, indeed, appoint judges at his pleasure. As I pointed out, one of the major reasons for the Revolution was to remove the right of the King to appoint judges at his pleasure. That led to the Act of Settlement in England in 1701 and it was the monarch's arbitrary power over their judges which led the colonists to include it in their list of grievances against the King in the Declaration of Independence.

I invite attention to what our Founding Fathers said in the Declaration of Independence. I quote, talking about the King, grievances against the King:

> He has made judges dependent on his own will alone, for the tenure of their offices, and the amount and payment of their salaries.

So, when Thomas Jefferson put together that great document, this was one of the grievances, the fact that the King controlled the judges. In other words, to the Founding Fathers, a good behavior grant of tenure meant that the executive was restricted in its powers of removal, not that it was a separate standard of conduct.

In other words, the choice available to our Founding Fathers at the time was the ability to serve as long as a judge was on good behavior as interpreted under the impeachment clause. That was one option which they chose. The other option was the one which they fought a Revolutionary War to get rid of. That was the right of the King to appoint judges and remove them at his pleasure.

Further, although, in our history, we have never definitively established a standard for impeachment, it is generally agreed that it is not so high as an indictable offense and, indeed, many scholars maintain that under 18th century common law, "misdemeanors" was syonymous with "misbehavior." Certainly, our record of impeachments would hold that interpretation.

In other words, are we creating a different standard to get at judges who are not performing than is already there under the use of the term "misdemeanors" in the impeachment clause of the Constitution?

If you look at the records of impeachment of judges that we have actually had, look at the facts again, you find that this is not true. I ask the Senators to look at the impeachment proceedings, back in 1804, of Judge John Pickering. He was impeached and convicted on several charges, including drunkenness and blasphemy. It sounds to me like that is misbehavior.

Judge George English was impeached and subsequently resigned on counts including conduct bringing the administration of justice into contempt and disgrace. I do not know how to define that other than misbehavior.

In 1936, the Congress convicted Judge Halsted Ritter on misbehavior. In other words, these acts which constitute misbehavior have been part and parcel of the proceedings that have traditionally been used in this body to remove judges that are not serving faithfully.

Mr. NUNN. Will the Senator yield on that for a minute?

Mr. BAYH. I am glad to yield.

Mr. NUNN. I am listening very intently to the Senator's argument. I believe he is making a very good historical presentation of his point of view, though I do not agree with him. I am a little puzzled, because the Dear Colleague letter sent out by the Senator from Indiana

and the Senator from Maryland, basically, seems to contradict the argument the Senator was just making about historically, good behavior having been interpreted along with impeachable offense to include things like drunkenness and so forth.

In this dear colleague letter it states:

S. 1423 would provide for a system whereby Congress would be creating a relatively easy mechanism by which it might rid itself of judges who have been guilty of "bad behavior" falling below the level of impeachable behavior. For the serious misconduct arising to the strictest standards of high crimes and misdemeanors, that is, indictable offenses, the cumbersome mechanism of impeachment remains.

The Senator is citing example after example of where the impeachment process went beyond indictable offenses and included things like drunkenness. In this letter, it is very strongly indicated that the Senator is of the view that only indictable offenses come under the impeachment clause.

I know this is a very hazy area. Historically, the position has been taken by Congress that the impeachment clause takes in a broad concept of other offenses, rather than just indictable offenses.

Mr. BAYH. The point I have been trying to make here from a policy standpoint, as well as a constitutional standpoint, and I am concerned about both, is that the legislation establishes, under the good behavior clause a remedy that is not existing under the impeachment clause. That is, are we really creating a different kind of remedy? When we look at how impeachments have been governed and what standards have been used to impeach judges, we see very clearly that standards which fall, and specifically, in the Ritter case, are charged in the impeachment indictment as lack of good behavior or misbehavior, those are part and parcel of the impeachment proceedings under the impeachment clause of the Constitution.

Mr. NUNN. Then this sentence would not be correct:

For the serious misconduct arising to the strictest standards of high crimes and misdemeanors, that is, indictable offenses, the cumbersome mechanism of impeachment remains.

Mr. BAYH, No, that is true. The sentence does not say only serious crimes are subject to impeachment.

The sentence says that for serious crimes, one must go the route of impeachment.

Mr. NUNN. That is the point I would like to get to. I should like the Senator from Arizona to correct me if I am in any way wrong. As the author of this bill and having followed it for a long time, it has been my strong view and remains my strong view that good behavior basically encompasses more than high crimes and misdemeanors; but it also encompasses high crimes and misdemeanors. In other words, a high crime or misdemeanor is bad behavior. There are things that are not high crimes and misdemeanors that are bad behavior, but all high crimes and misdemeanors, in the opinion of the Senator from Georgia, would be violations of good behavior standards and, therefore, would be bad behavior.

If the Senator from Arizona disagrees with me, I would like him to say so. It would be my interpretation of this good behavior clause and the legislation we are passing here that this judicial commission and the judicial court would have the authority to remove or to discipline, including censure, a judge who was found by them to have breached the good behavior clause, yes; but, also, a judge would be deemed to have breached the good behavior clause if he had committed an impeachable offense. So good behavior includes all of the above, so to speak.

Mr. BAYH. The Senator worries me—I cannot disagree with what he is saying about what we are doing here, but his interpretation worries me when he says an impeachable offense. You can still use this bill to remove a judge for what he considers to be an impeachable offense.

Mr. NUNN. That is exactly right.

Mr. BAYH. In other words, the whole business of requiring two-thirds of the U.S. Senate in the impeachment process, to have any impact at all on judges, is null and void. The logical sequence of that——

Mr. NUNN. It is a supplement. It could be used. Congress could still impeach a judge.

Mr. BAYH. But why should Congress impeach a judge when it is so much easier to do it by a majority of judges?

Mr. NUNN. The Senator has just made the argument for this bill. It has been a long time since Congress even found it necessary to involve itself in this process. I believe the last time was 1936. How would the Senator from Indiana have us deal with senile judges today? How would the Senator from Indiana have us deal with judges who have a drinking problem today? How would the Senator from Indiana have us deal with judges that are mentally incompetent when that condition does not breach the high crimes and misdemeanors standard?

Mr. BAYH. I suggest to the Senator that if he looks carefully at what has happened here, in the Pickering case, the question of insanity was raised as a defense.

All these things are not new. I pointed out, we removed a judge who was drunken. Another because he swore.

Well, maybe it is a bad thing for a judge to drink and swear, I will not argue that, but we have impeached judges that way. That is the way we have removed them. We have removed them for behavior by impeachment.

Mr. NUNN. I am not disagreeing——

Mr. BAYH. I will answer the question. I have not, and it is a good question, because we do have a problem when we have a judge not performing up to standards.

There have been occasions, not frequent, but occasions when we have judges, who, with the passage of time find their capacity is diminished, and how do we deal with that?

I suggest that the Judicial Conference has a mechanism of dealing with that now that is far short of this measure, which I feel flaunts the Constitution.

If I were to suggest, if it is necessary, after we have had more thorough study of this it is necessary, perhaps it is, to find a way to make the impeachment process more meaningful as far as judges are concerned, then it would seem to me we ought to have this particular panel which has every right, and the judicial conference, of course, has the authority, to police the dispensation of justice and to watch what is happening.

They usually do a pretty good job. It is certainly within the constitutional fabric that we could give them authority to make this kind of determination, that Judge Brown or Judge Jones is not performing his duty, and recommend to the Congress that he or she be impeached.

We could put in there that this would automatically come to the attention of and automatically be a subject of business for the Senate and the House Judiciary Committee, so we would really force Congress to get off the dime and deal with it that way, which I think could be handled under the Constitution.

Mr. NUNN. I just say to my friend from Indiana, as I said in my opening statement, these are close questions. People of great constitutional background do disagree on these subjects.

I do not know that we can resolve these issues today and I am not trying to convince my colleague from Indiana today. But I do think one or the other of the Senator's arguments has to be dropped, because they are inconsistent.

On the one hand, the Senator says we do not need a good behavior enforcement mechanism like we propose here today, because good behavior, basically, has been interpreted in past cases by the Congress as being about the same thing as an impeachable offense, and Pickering was cited in that regard. That is one of the Senator's arguments.

I will not get off on that, because the Senator is probably historically correct on that. But, on the other hand, the letter by the Senator from Indiana and the Senator from Maryland basically says:

We would also like to point out a clearly anamolous result which would flow from the enactment of S. 1423 and which we believe argues strongly against its enactment. S. 1423 would provide for a system whereby Congress would be creating a relatively easy mechanism by which it might rid itself of judges who have been guilty of "bad behavior" falling below the level of impeachable behavior. For the serious misconduct arising to the strictest standards of high crimes and misdemeanors, that is, indictable offenses, the cumbersome mechanism of impeachment remains. Ironically, S. 1423 would create a system for relatively easy removal of judges for failing to behave properly, but removal of criminals from the bench would be much harder.

All I say to the Senator from Indiana is that one of the two arguments has got to be, from an intellectual point of view, dropped because if the Senator is correct on his historical interpretation of impeachment as it has been applied by Congress, this means the Senator believes historically that impeachment is broad enough to encompass bad behavior.

Mr. BAYH. Yes.

Mr. NUNN. But, on the other hand, if that is true, the second point made here that we are creating a mechanism which would be twofold, one purpose would be

to address high crimes committed by a judge, through impeachment; the other standard, good behavior, would be much easier to enforce by new mechanism proposed in S. 1423. I am saying one or the other of those arguments is wrong, because it is inconsistent.

I do not know whether the Senator follows what I am saying.

Mr. BAYH. I follow what my friend from Georgia says. I would be the last to say I have not on occasion been inconsistent.

I hope I can explain to him that, although he may not agree with my logic, and I do not want to speak for my friend from Maryland, but I assume he concurs in what we are trying to do here, we are really arguing two points.

The first question, as he mentioned a moment ago, on the basis of policy and constitutionality, I think we have to look at both of those. Either we are providing a new remedy under good behavior, or, one, there is no reason to do it; or two, it is going to be unconstitutional because it is already there in that clause.

I would like to point out, historically in this body we have impeached judges for that, that fell in the good behavior category. That is argument one.

Mr. NUNN. I understand that argument. I think historically there is justification for that argument.

Mr. BAYH. Now, let me get back to the purpose for that paragraph in the letter, the alleged anomaly we are referring to.

Generally, in our system of jurisprudence, and there is something, I think, about the gut feeling of equity we have as citizens of this country, that if we look at the equity of the situation it ought to be easier to remove a judge if the crime were serious and not so easy if the crime was not obvious or was not serious, and by this bill, we reverse this.

If this bill is enacted, the Senator is saying, if a person commits just petty larceny, it is going to be relatively easy to get rid of that person. But if it is a serious crime that ought to be obvious and apparent to everyone and the culprit removed quickly and easily, we cannot do that. We have to go the long, tortuous route, to use the Senator's words, and I think the accurate reflection of history, the tortuous route of impeachment.

The Senator may be on a different ground than the majority of the Judiciary Committee. I do not want to put words in their mouths. But, as the Senator from Georgia reflected a while ago, this particular vehicle, this law, if it is enacted, could be used, really, for all sorts of indictments.

Mr. NUNN. Good behavior, under this bill would authorize the removal or censure of people not only for bad behavior, but also for impeachable offenses. This would be an alternative.

I would like to have the Senator from Arizona and the Senator from South Carolina comment on that. That is my very clear interpretation of this bill.

Mr. BAYH. There is one paragraph here, if one reads the majority report on page 7, we point out the emphasis there.

I yield to my friend from Arizona to respond to that question.

Mr. DECONCINI. The Senator is correct.

The good behavior standard would include impeachable offenses, and the court could make determinations regarding impeachable offenses.

Mr. BAYH. I should like to read this paragraph from the majority report. It says:

> A "gap" between the two standards "good behavior" and the grounds for impeachment must therefore exist. To assume otherwise would be to claim that the grounds for impeachment and "good behavior" tenure are the same and thereby render the "good behavior" clauses meaningless. The long-standing constitutional principle that no clause in the Constitution is intended to be without effect will not permit this result. Therefore, an alternative method of impeachment to accomplish the removal of Federal judges must have been contemplated by the framers to provide for the removal for misbehavior or disability that was in violation of the "good behavior" standard but was less serious than an impeachable offense.

Are we changing the rules here?

Mr. DECONCINI. Obviously, an impeachable offense falls within article I, section 3, and article II, section 4 of the Constitution. But good behavior is a broader standard. It specifically is referred to in article III, section 1. This legislation fills the gap between the standards of impeachable offense and good behavior.

Mr. BAYH. I was under the impression, according to the report and everything we discussed in the committee, that this was designed to fill a gap, a gap which the Senator from Arizona feels does not exist and the Senator from Georgia feels does not exist.

Mr. NUNN. I think there is a gap. I believe the Senator from Indiana is not interpreting correctly what I am trying to say.

Let me quote succinctly Professor Berger's testimony in this matter:

> "High crimes and misdemeanors" and breach of "good behavior" are like two intersecting circles; there is an enclave where they are coterminous. But while all "high crimes and misdemeanors" might constitute a breach of "good behavior," not all breaches of "good behavior" amount to "high crimes and misdemeanors" * * *

The Senator from Indiana has been arguing that "high crimes and misdemeanors" historically has been interpreted as encompassing also all the elements of bad behavior. The Senator from Georgia has not disagreed with that historical interpretation because there are inconsistencies in this.

The House Judiciary Committee, though, in setting impeachable offenses so far as the President was concerned, did not interpret it that broadly. They drew a narrow interpretation which would be almost an indictable offense. So there are different precedents here.

What I am saying is that this legislation, as I interpret it, would give this Commission the authority to enforce the good behavior standard; and high crimes and misdemeanors, in all the cases I can think of, would constitute bad behavior. There may be some cases in which misdemeanors would not. It depends on how you define the word "misdemeanor"—whether it is a high misdemeanor or a parking ticket or something of that nature.

The reverse is not true, in my opinion—that is, all good behavior breaches are not high crimes and misdemeanors.

What I am saying to the Senator from Indiana is that when he interprets this paragraph, where the Senator says we are setting up two sets of standards, one for impeachable offenses, which is very difficult, the impeachment route, and the other is good behavior, which this Commission would deal with, the Senator is incorrect in that interpretation of this legislation. The power given to the Commission is much broader than that. If they found an impeachable offense, they could determine that is bad behavior, and they would be entitled to take the remedies prescribed in this legislation.

That may mean the Senator is more opposed to it than originally, so I am not trying to influence the Senator. All I am saying is that paragraph 2 of the Senator's letter is not a correct interpretation of this bill, and I believe that everybody who is connected with this bill on the pro side would agree that that is a misinterpretation of the bill.

Mr. BAYH. The Senator was only relying on the report of the majority, which is the best document I have seen supporting the reasoning behind this legislation.

Unless we are prepared here, as a body, to accept the constitutional premise that by statute, by mere law, you can negate the provisions of the Constitution so far as the impeachment clause is concerned, I do not know how in the world any of us can believe that by passing a statute under the good behavior clause, to remove a judge by good behavior, we also can include indictable offenses under the impeachment clause. If that is not clearly unconstitutional, I do not know what is.

Mr. NUNN. Does the Senator mean that he believes that an indictable offense is not bad weather? Is that what the Senator is trying to argue? Is he saying that if a judge commits murder and could be indicted for that murder, that does not constitute bad behavior?

Mr. BAYH. That certainly is bad behavior.

Mr. NUNN. That is what we are saying. We are in agreement. That is an impeachable offense. It is also bad behavior.

Mr. BAYH. Yes. But if you are to say it is an impeachable offense and you are going to let it be decided by a handful of judges, you are making a mockery of the impeachment proceedings of the Constitution of the United States, which says that you cannot remove officials that way.

Mr. NUNN. The Senator from Indiana is saying that he interprets this legislation as basically giving the judges and this Commission only the right to deal with matters that are nonimpeachable offenses.

Mr. BAYH. That is right.

Mr. NUNN. The Senator is totally incorrect in his interpretation of this legislation. We are on totally different

wavelengths about this legislation, because that is not the correct interpretation of it.

The House Judiciary Committee studied impeachment for months. Every impeachment proceeding has resulted in difficulty in defining what a "misdemeanor" is.

If the Senator from Indiana has interpreted this legislation that narrowly, that it deals only with things that are not necessarily impeachable offenses, then I say that the interpretation of the Senator from Georgia and the interpretation of the Senator from Indiana are different.

Mr. DECONCINI. This legislation is authorizing the judiciary to implement the good behavior clause, while still maintaining the separation of powers. The Constitution does not prohibit this. The bill fills the gap that the Senator refers to on page 7, the gap the Senator from Georgia has attempted to explain.

I will not try to convince the Senator from Indiana to withdraw his opposition to this. I understand his philosophical and his constitutional approach. His arguments are well thought out. But I believe the good behavior clause can be implemented, and that is what the majority of the Judiciary Committee believed when it reported this bill.

Mr. NUNN. There are two points here, and we should try to separate them.

One is the question of the severity of the offense, whether it is a breach of good behavior or an impeachable offense or it is in that gray area between.

The other question the Senator from Arizona has pointed out—the question of who removes. As I read the Constitution of the United States and the history of it, the question of who removes a judge was much more important to the framers of the Constitution than the precise offense for which the judge could be removed.

I think the argument of the Senator from Indiana has dealt mainly with the substance of the particular offense, but the framers of the Constitution were dealing mainly with the question of who could remove a judge by setting forth limited ways a judge could be removed by the executive branch and the legislative branch. They basically are saying in this impeachable offense category that a great deal of care must be taken in separating the three branches of Government.

So we are dealing with two questions here. One is the substance of the offense, whether it is a good behavior breach or whether it is an impeachable offense—high crimes and misdemeanors. That is one question.

The other question is, what branch of Government can do the removing? Of course, both those questions are important, but the question of who can do the removing is really the basis of this legislation.

The PRESIDING OFFICER. The time of the Senator from Indiana has expired.

Mr. BAYH. May I have another 30 minutes?

Mr. THURMOND. I yield 30 minutes to the Senator.

Mr. BAYH. I apologize for taking so long. I think this is the kind of debate that is very enlightening. It probes our innermost thinking.

Mr. MATHIAS. Mr. President, will the Senator yield at this point, so that I can ask a question of the manager of the bill?

Mr. BAYH. I yield.

Mr. MATHIAS. It seems to me sort of ridiculous that we bring a bill to the floor and have this kind of disagreement about how it works. I am wondering how many witnesses were called in opposition to the bill and whether this point was explored by any of the witnesses in opposition.

Mr. DECONCINI. I do not have a breakdown of how many witnesses appeared in opposition to this proposal. Fifty witnesses were called during the history of this legislation, and there were 20 days of hearings.

Mr. MATHIAS. This year?

Mr. DECONCINI. This year we held 1 day of hearings.

Mr. MATHIAS. Were there any witnesses in opposition?

Mr. DECONCINI. None appeared, but several were invited. They were district judges.

Mr. MATHIAS. How about our former colleague, Sam Ervin, for example, who was so immersed in this subject? Was he invited?

Mr. DECONCINI. No; I believe he was tied up with the ERA. He had testified in prior hearings and his testimony has been recited and considered.

Mr. MATHIAS. I think the record has to be deficient if there was not a single witness in opposition who was called.

Mr. NUNN. Frankly, I say to the Senator from Maryland, the number of people in opposition has gone down substantially over a period of time. We have the Judicial Conference of the United States endorsing this general concept. We have the American Bar Association. We have the Department of Justice, and we have the American Judicature Society. I say the number of opponents is diminishing. There are people who continue to argue the constitutional grounds. There is no doubt about that.

Mr. MATHIAS. Dr. Kurland, I do not think has changed his views. He is available. He has been a consultant to the Judiciary Committee, as for one example.

Mr. NUNN. Of course, this legislation has been around for a long number of years, and there is a whole record replete with people who are opposed to the legislation. No one is contending there are not people who think this legislation is not constitutional.

The main point I am making to the Senator from Indiana is that the Framers of the Constitution of the United States were concerned about the separation of powers. That was the main concern.

This bill addresses that concern. There is nothing in here that expands the power of the legislative branch or the executive branch to remove a judge. It is a question of the judicial branch being able to implement the good behavior standard.

I think certainly the separation of powers question is the essence of the constitutional premise on which this is based.

Mr. BAYH. If I just might point out for the record, I think we should say that the Judicial Conference's endorsement of this was with reservations about the constitutionality of it, and the report was sent forward from the Judiciary Committee before the study of the position of the Federal judges of the country was before us. I do not fault the subcommittee chairman for that because they were late. We just received it 2 weeks ago. But we find 76 percent of the Federal judges expressing extreme concerns about this, and I want to put some of their concerns in the RECORD because one might say, "Well, you would expect the Federal judges not to want to have someone investigated."

Frankly I feel that if we look at some of the reasoning contained in this letter we will see it is based on a much stronger constitutional and policy question than one of self-preservation.

Mr. NUNN. As I understand it, the reservation on the constitutionality of this legislation as expressed by the Judicial Conference was on the point of including the Supreme Court. As the original legislation was presented it would have included the Supreme Court. As the legislation has evolved from the Judiciary Committee it basically leaves the question of removal of Supreme Court Justices up to Congress after a recommendation pursuant to the process. The Judicial Conference basically endorsed the concept of this legislation.

Mr. DECONCINI. Mr. President, will the Senator from Indiana yield for a moment?

Mr. BAYH. I yield.

Mr. DECONCINI. Senator BAYH states in his analysis that 74 Federal judges responded to the Judicial Conference questionnaire. That is slightly over 10 percent of the total number of Federal judges, including senior status judges. I do not think this number is a significant basis for a decision on the Judicial Conference after they met and approved the resolution.

Mr. BAYH. I respectfully say to my friend from Arizona they were given less than a month to respond.

Mr. DECONCINI. Are Federal judges so busy they cannot respond to a question as simple as that presented here?

Mr. BAYH. I suggest if the Senator will look at a matter of some 20 days to respond to something like this that is hardly time. If he is going to talk about the time being a reason, should he not consider the fact that three-fourths of them did respond who were against it? Then it seems to me the Senator has to look at the time given to them to respond.

Mr. DECONCINI. If there were an overwhelming amount of opposition among the Federal judges I think far greater than 10 percent or 11 percent of them would have responded to the questionnaire.

Mr. BAYH. It is going to be interesting to see what not only the Federal judges but constitutional scholars have to say after they have a chance to look

at this dialog here which, it seems to me, makes a shambles of the impeachment clause as far as judges are concerned.

Mr. NUNN. I might say to the Senator from Indiana on that point everyone who read this bill would have to come to the conclusion that under the good behavior standard basically an impeachable offense is bad behavior. I do not think anyone would conclude otherwise, and the Senator agrees with that also. The Senator has just said that he interprets an impeachable offense as being bad behavior. If that is the interpretation and this bill is giving the judiciary itself the power to enforce the good behavior standard, no one could have come to the conclusion that good behavior as defined in this bill did not include impeachable offenses.

Mr. BAYH. The Senator does consider, I assume, the impeachment clause of the Constitution does apply to judges as well as other branches of the Government, does it not?

Mr. NUNN. The impeachment clause of the Constitution, the Senator is correct, does. It has been interpreted to apply as well to other branches. But the Senator himself has made an argument that is so inconsistent that I cannot reconcile it. The Senator is saying in answer to my question that he believes a judge who commits an impeachable offense has also committed bad behavior or breached the good behavior standard and yet the Senator is also saying he is surprised by the fact this legislation, which has been set forth for years does not include impeachable offenses. People will be surprised to find that conclusion in the record.

Mr. BAYH. I will suggest that anyone who reads this document right here, that came out of the committee and went across the country saying what it does will see that it says that it is to fill a gap.

Mr. NUNN. It is to fill a gap, a huge gap.

Mr. BAYH. So we have a clear distinction here, if you have a judge out here who accepts bribes for deciding on a case or does something that is very clearly a major felony, for example, murders the foreman of a jury in righteous indignation when the jury brings in the wrong decision, something that may sound ridiculous but something that is obvious, it seems to me, to be a major crime, is the Senator suggesting that that should be handled under the impeachment clause or could it be handled by this?

Mr. NUNN. It could be handled——

Mr. DECONCINI. Mr. President, if the Senator will yield. That could be handled by the impeachment clause. If it were not handled by the impeachment clause, it could be handled by this procedure.

Mr. BAYH. I understand where the Senator is on this. But it seems to me that does great damage to what our Founding Fathers really meant.

I have tried to show—and I am not suggesting that any of my immediate friends here involved in this debate are going to be persuaded by this—is if you look at what is said in the Declaration of Independence, if you look at one of the major reasons we revolted against the King, it was to change the way judges were to be appointed and to do away with the at-the-pleasure-of-the-King method of appointing them and instead to exchange that for a good behavior appointment. That is a matter of style in the Constitution and as to the removal process, the only place you deal with removal any place, with exception made for the legislative branch, is in the impeachment clause which applies to everyone.

So it seems to me that good behavior did not, with all respect to my friends, suggest that this go out here and implement another way of doing it, but this was to point out that the King could no longer appoint a judge at his pleasure but rather it should be under the "good behavior" clause, leaving aside the impeachment clause.

Mr. NUNN. May I say to the Senator——

Mr. BAYH. Let me just add one other point, if I might.

Mr. NUNN. All right.

Mr. BAYH. I do not know how much additional proof we need for what our Founding Fathers meant. We can, of course, change that by amending the Constitution. We tried to do a little of that, and my friend from Georgia knows that is not too easy. But we can change that. But if we look at what our Founding Fathers meant one of the first drafts of the Constitution was to give judges the right to remove judges.

Mr. DECONCINI. Mr. President, will the Senator yield?

Mr. BAYH. Yes.

Mr. DECONCINI. There is nothing in the Constitution that specifically says one branch of the Government cannot discipline itself within its own branch. This is what this legislation proposes as a means of implementing the "good behavior" clause, leaving aside the impeachment clause for the moment.

Mr. BAYH. I think we have to look at what "good behavior" means. The Senator is making an Empire State Building out of two words. What does "good behavior" really mean? What did it mean when the Founding Fathers put it in there? Did they really mean to give leeway under the terminology of "good behavior" to judges to remove judges? The Senator from Arizona says that is what they meant. But when they were deciding that matter in the Constitutional Convention, and when the issue was put plainly before them and a draft of the Constitution gave judges the right to remove judges, the Founding Fathers considered it, and said they did not want any part of it, and included impeachment in the hands of the Congress of the United States, not in the hands of the judges.

Mr. DECONCINI. Nevertheless, the framers did not include a prohibition of such a disciplinary mechanism in the Constitution.

Mr. BAYH. Why should they?

Mr. DECONCINI. If it was their intention that the judicial branch should not be able to exercise some measure of self-discipline, I would think they would have said so. They did not.

Mr. BAYH. Does it specifically say in the Constitution what the President should not do as far as disciplining members of the executive branch is concerned?

Mr. NUNN. The Senator has a great point there, too. The King and the President could remove members of the executive branch. That does not violate the separation of powers.

Mr. BAYH. Because he appointed them. Judges are not appointed by judges.

Mr. NUNN. The Senator just made that as a statement. The Constitution does not say anything about that. The Constitution does not say anything about that, but we all know that the President can remove someone in the executive branch without that person being impeached. That is the same thing we are trying to accomplish here for the judicial branch of Government.

I might say the term "good behavior" goes back to the common law which was used in connection with judges forfeiting their office on a condition subsequent, forfeiting their office by not comporting with good behavior, and being removable, by not maintaining good behavior, by the judiciary itself.

I might say to the Senator there is nothing in this legislation that would give the executive branch of this Government, that being the President, the right to do anything it cannot do today.

Mr. BAYH. As I said earlier, and I will not repeat that language, if the Senator is going to base the use of "good behavior" in this legislation on that common law precedent, then I would like to have a list of judges who were removed from office under the common law on that basis, because I have not been able to find any. I have not been able to find a single judge removed on that basis.

Mr. NUNN. This would have to go back to the English common law.

Mr. BAYH. That is right. In English common law the "good behavior" writ, scire facias writ, was directed at the lower echelon, recorders, bailiffs, and this kind of thing.

Mr. NUNN. I say to the Senator from Indiana perhaps there were not any judges because the King was doing all the removing. The judiciary itself had very little time to do the removing because the King was doing the removing, and that is why the Founding Fathers did not want the President of the United States and the executive branch to be able to remove judges.

Mr. BAYH. It seems to me if the Senator is going to use a common law writ to support language in the Constitution, as we interpret it here in 1978, he ought to at least be able to give me an example of a judge or two who were removed back during the common law or during that period of time in which much of the law in the United States was common law.

I mean if you look at all of the colonial courts, if you look at all of the judicial decisions and the judges, then you cannot find any of them removed on this antequated writ. I just cannot. I have looked, and I hope the Senator will look, and maybe he will find one.

Mr. NUNN. What is the Senator's point? Let us assume there were none removed. So what? The writ was there.

It was a right. It was a legal procedure. It was known to the framers of the Constitution of the United States, and it was embodied in the words "good behavior". So the question of whether the power was ever used or not is not relevant to the question of whether or not it was there. It is not relevant to the question of whether the framers of the Constitution of the United States had that in mind when they put the words "good behavior" in.

If you follow the Senator from Indiana's argument to its logical conclusion, the Senator from Indiana is saying that the framers had nothing in mind when they put that in.

Mr. BAYH. That is not what the Senator from Indiana said. I said in the context of the Constitution, what Jefferson and what early scholars and early judges said, "good behavior" was meant to be an appointment for life not subject to removal at the pleasure of the King, which was the way things were done before the Declaration of Independence. That is what "good behavior" means.

Mr. NUNN. Why was it put in there if the appointment was for life?

If you are appointed for life, provided you have good behavior, then what happens if you have bad behavior under that argument?

Mr. BAYH. Then you are impeached under the same impeachment clause which is considered elsewhere. If the Founding Fathers meant to give judges the right to do something absent good behavior, why did they not put it in there at the time they were defining the rights under the judicial system of the United States?

Mr. NUNN. Normal constitutional interpretation is that words in the Constitution do have meaning, and the Senator is saying that the words "good behavior" are completely superfluous because they have no meaning in addition to the impeachment clause.

Mr. BAYH. I will say to my friend that is a couple or three times where although we may disagree, that is not what the Senator is saying. I am saying it did have meaning and it was not used to try to distinguish between the way the King was doing it, appointing judges at his pleasure, and the way the colonists wanted it done on good behavior, life tenure subject only to the impeachment powers which were very carefully enunciated. I mean, that was a very critical matter considered by our Founding Fathers, because they were tired of people being cut, hung, and dried by the King. If you dared to incur the displeasure of the King, you ended up with your head on a chopping block someplace.

Mr. NUNN. The Senator is not saying this legislation will do that.

Mr. BAYH. Not quite. No, I am not saying that.

Mr. NUNN. The Senator is not thinking of a case where the executive branch can do anything under this legislation that they cannot do now?

Mr. BAYH. The Senator is again getting back to why our Founding Fathers used "good behavior." All I can say to my friend from Georgia is look at what was happening at the time. The King was appointing, the King was removing. I mean the King had arbitrary power, so that is why they used the words "good behavior." They distinguished between that, and went to great care in enunciating with great particularity how you removed officers, not only judges but Congressmen and Senators and the President himself, because they were sensitive of the fact that the arbitrary power of the King underlay all the grievances that led to the Revolution, and it is unbelievable to me that being as sensitive as they were about that unlimited, unfettered power of the King, that they would not have included any removal power for judges that they considered to be applicable only to judges. They put this all in the Constitution under the impeachment clause.

Mr. NUNN. Why did they put "good behavior" in the judicial article if it was a limitation on the executive branch?

Mr. BAYH. Well, as I said before, to distinguish the good behavior, life tenure appointment from the appointment at the pleasure of the King.

Mr. NUNN. You do not have to put "good behavior" in the Constitution in order to give life tenure. "Good behavior" is a limitation on life tenure. "Good behavior" is not a reinforcement of life tenure, it is a limitation on life tenure.

Mr. BAYH. It would have been totally inconsistent within the confines of the Constitution to say in one article you had life tenure, you could not be out of there until you died, and in another article you could be impeached. "Good behavior" were words of art to imply you could serve for life as long as you had good behavior, the cessation of which was to be determined under the impeachment clause.

Mr. NUNN. Why did they not say "serve for life unless removed under the provisions of article II?"

Mr. BAYH. I guess they were——

Mr. NUNN. That would have been so much clearer.

Mr. BAYH. I guess they were expecting us——

Mr. NUNN. To give us something to debate.

Mr. BAYH (continuing). To have a clearer view of what they were doing than you and I are now able to have.

Let me ask my friend from Georgia is he at all concerned or is his logic troubled at all if we are trying to—you and I really could not put our hands on a Bible and say for sure we know what our Founding Fathers meant——

Mr. NUNN. I agree with the Senator.

Mr. BAYH. We are trying to find out what they meant, so we try to look at certain actions they undertook. One of the things which has been very persuasive to me in determining what the Founding Fathers really meant by "good behavior" and what they really meant as far as how judges should be removed is to see how they looked at the words of the Constitution or the various drafts presented to them. One of the early drafts permitted judges to be removed by judges.

It said it right out there in so many words. They struck that. They struck it out, so that the only language applicable to removing judges or impeaching officials is contained in the impeachment clause, where they give Congress the right.

Mr. NUNN. Of course, Thomas Jefferson wrote in 1816 that judges were removable by their own body. And of course Thomas Jefferson had a lot to do with the Constitution.

But if the Senator will yield, I think we can argue a long time about what the Founding Fathers meant by good behavior, and I am not going to convince the Senator from Indiana, and he is not going to convince me, today anyway. I think only the Supreme Court of the United States can make this final determination.

The problem is that we have no practical way of dealing with judges who may be senile, who may be drunkards. We have no way of dealing with those kinds of people on the bench. We well may look at the matter, from our lofty position up here, and say, "Why should the Congress of the United States take up its time with some obscure judge in Georgia or Indiana or California?"

But to the people who have to deal with him, that judge is more powerful in certain matters than even the President of the United States. We are talking about leaving people in office for a lifetime virtually untouched by Congress. The Senator from Indiana, I know, would agree that we are not going to take the time of the U.S. Senate and the House of Representatives to impeach a judge for being drunk on the bench. We have 200 years of precedent, and about 40 years in the last four decades, where there have been many instances of abuse of judicial power by people who were either drunkards, senile, or for other reasons disqualified, and the Congress of the United States has not done one single thing. The question really is whether we are going to deal with this issue or be caught up in a constitutional argument that none of us can solve.

Only the Supreme Court of the United States can tell us, in the final analysis, what good behavior means. Only the Supreme Court of the United States can tell us, in the final analysis, what the Founding Fathers may have meant. I may not agree with their conclusion and the Senator from Indiana may not agree with it, but they are the ones who are going to have to tell us.

In the meantime, do we stand around another 40 years and do absolutely nothing about a very grave abuse of the constitutional processes of our country? There is no remedy; there is no practical remedy for a judge who is not capable of being on the bench. Who is going to sit in judgment on a judge who is 83 years old, or 78 years old, and senile? Are we going to drag him up here and impeach him before the House of Representatives, and try him in the U.S. Senate? Everybody knows we are not going to do that. It has not been done in 40 years, and it will not be done in the next 40 years. Every day that goes by, it is less likely that we will employ the impeachment clause of the U.S. Constitution regarding judges.

I respect and appreciate the views of

the Senator from Indiana, and I will say to the Senator it is a close question. I cannot say to my colleagues that I am absolutely certain that this is a constitutional bill. I cannot say that truthfully, and I do not believe the Senator from Indiana can say he is absolutely convinced that it is unconstitutional.

As I say, I appreciate the Senator's views. I know of no one in the Senate in recent years who has studied the Constitution more thoroughly than the Senator from Indiana.

But the question is, are we going on and on and on with the abuse of power that can vitally affect the lives of the people of this country?

I think the vast majority of Federal judges are absolutely honest and above reproach, and of sound mind. Most of them are sober, and have views which reflect favorably on the Federal Government. But when you get a Federal judge, appointed for a lifetime, who has a mental problem or a physical disability that prevents him from performing his duties, and he is appointed for a lifetime, and the Congress of the United States can do nothing about it, it is a terrible disillusionment for the people of this country.

I do not think the Senate of the United States is today going to decide the constitutionality of this issue. What we will decide is whether the Senate of the United States is going on record as at least trying to seek a solution to a problem which has existed for many years, but is getting worse and worse.

I thank my colleague from Indiana for his statement and his time.

Mr. BAYH. Mr. President, I appreciate the courtesy and the real dedication of the Senator from Georgia in trying to resolve this problem. As I said earlier, it is a real problem. It is real, I guess, more in its isolation, because, as the Senator points out, there are not many judges who do not have exemplary standards of conduct. You may disagree with how they decide an issue, just as we disagree with other Members of this body. Most of them are doing their job, so the number of people involved is not very great.

But in that particular instance, inasmuch as that Federal judge is indeed the king, the man who has life and death power over others at a particular moment, it is important for us to deal with it.

The question for us to decide is, is this the way? We would like for it to be the way, but does the Constitution permit us to do it this way?

I do not like to be out here on the frontier like the Lone Ranger, a lonesome voice. Many are concerned about this issue, but there are not very many of us who have tried to alert the Senate to the possible constitutional question and the possible policy question.

I would just like to ask my friend from Georgia—I do not know what is going to happen to this legislation. I would doubt, the timing being what it is, that it is going to pass, which would mean that if it does not, and I know the Senator hopes it does, having tenaciously pursued it, but if it does not, then we have a chance to reflect and see if there is not another way that perhaps is on stronger constitutional grounds and does not involve some of the real policy concerns that really trouble the Senator from Indiana.

It has been said, and indeed rightly so, by my friend from Georgia, the Senator from Arizona, and the Senator from South Carolina, that impeachment is a time-consuming process. It is a troublesome process, and it is one that the Senate is not going to involve itself in over something so minuscule or obscure as the removal of a Federal court judge who ought to be removed. We all agree, whether for bad behavior or lack of good behavior, or for high crimes and misdemeanors, that this is a serious step, an important step, to be taken if the circumstances merit it, but not a step to be taken lightly.

I know, from listening to my colleagues from Arizona and Georgia discuss this matter, that they do not anticipate this as a step to be taken lightly. I think we concur on that point.

I would much prefer, and I will say in more detail why I am concerned from a policy standpoint in just a moment, but the Senator asked what alternatives I propose, and I have one, to which I am not wedded, but which I feel would emphasize the importance of dealing more expeditiously with this question.

We cannot say that the impeachment process has not been used on Federal judges, because it has. It has not been used frequently. Perhaps it should not be used frequently. We have just had an example, with all respect to the spirit of the gentleman in question, that illustrated there should have been a way to see that the people of that given part of our country were given better service by the Federal judiciary.

I think the best approach to the matter is to consider beefing up the enforcement powers of the Judicial Council, and giving them some marching orders that "under these circumstances you shall act."

I have no objection—I am not wedded to it, but I have no objection—to the composition of this panel, either that kind of a structured panel or another kind of panel, being given marching orders. The law would mandate that given certain circumstances, they would hold hearings, they would see that the judge is given due process, and then they would recommend to the Congress of the United States that certain action be taken, and then we would mandate that we in Congress got off the seats of our pants and did something about it.

We would mandate that this matter go immediately to the Judiciary Committees of the House and the Senate, and within $x$ number of days they were to hold hearings and have a report forthcoming.

Mr. NUNN. Will the Senator yield?

Mr. BAYH. Yes.

Mr. NUNN. I would say that would be much better than what we have today. But on the same case that the Senator just mentioned, and I will not go into details on that, there was not a single member of the House Judiciary Committee who had not been alerted at all to what was going on in that part of the country, who was not acquainted with those facts. There was no need to have a commission go out and find facts and lay them on the table. There was no fact-finding need there. It was a question of inability to act.

We know the House Judiciary Committee, for instance, would be tied up as soon as they take up the criminal procedure code for literally months and months and months. They were tied up for a period of time during the Nixon impeachment question for months and months and months.

Even if a commission reported that there was a judge who had a chronic problem, drinking or some other problem, and laid the report right on the doorstep of the House Judiciary Committee and put it there for days afterwards, I do not think anybody will contend that the House Judiciary Committee would interrupt the criminal procedure code or any other issue of great urgency to the whole country, and take up this impeachment.

I do not believe anybody would contend that the Senate this year, with the Panama Canal debate, the labor reform debate, the forthcoming natural gas debate, the debate on the forthcoming tax package would interrupt the procedures which affect not only this country but the world and have a trial of a judge from some State deemed by the House of Representatives or by a judicial panel as being unfit for the bench.

It is just not in the world of reality. It is not going to happen. In the case of the Supreme Court, I think that would be a little different. I believe the committee has come to an approach here which is not only judicious but also has a lot of commonsense. I like it better than the approach I originally drafted. I think the Congress would deal with a Supreme Court judge in those cases, but I do not think it will ever happen with a district judge.

What I am saying is that, though I can understand the Senator's constitutional approach, the Senator's remedy would virtually leave us where we are today. We might be moving 1 inch or 1 foot, but we would not be moving a yard.

Mr. BAYH. Let me say to my friend from Georgia it is rather clear that some members of the House Judiciary Committee were aware of the problem which existed out West. Perhaps some of us in this body were aware of it. It is also clear that members of the Judicial Conference were more painfully aware than we were. But there was no procedure which mandated that certain action be taken.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BAYH. Will the Senator yield additional time?

Mr. THURMOND. I yield 2 additional minutes.

Mr. BAYH. I am sorry to have taken so long. I do want to hear from my fellow colleagues on this.

The PRESIDING OFFICER. How much time has been extended to the Senator?

Mr. THURMOND. How much time remains on each side?

Mr. NUNN. If it will help, I will pledge not to interrupt the Senator any longer. I have taken a lot of his time.

The PRESIDING OFFICER. The Senator from Arizona has 149 minutes remaining and the Senator from South Carolina has 76 minutes remaining.

Mr. THURMOND. The distinguished Senator from Maryland needs 1 hour so I cannot yield too much more to the distinguished Senator from Indiana. Can he finish in 10 minutes?

Mr. BAYH. Much of the time of the Senator from Indiana has been involved in——

Mr. DECONCINI. If the Senator will yield, I will yield 30 minutes.

Mr. BAYH. I hope not to take another 30 minutes. I did not mean to take the last 30 minutes.

Mr. NUNN. I promise not to interrupt the Senator further.

Mr. BAYH. No, I believe this is all in the interruption category. We are both trying to pursue the same goal, though we are following different vehicles. We have similar concerns but we feel they apply a little differently.

This is a serious matter. Although the matter is not as expeditiously taken care of under the proposal I have just made on an informal basis with my friend from Georgia as would be the case under the proposal which he is pursuing, I think it could be handled that way. This is not the first time we have put time limits on Congress to act and time limits on the President to act. If this matter is serious enough that we are going to remove a sitting Federal judge, it seems to me it is serious enough to say, "You are going to make this decision yes or no." Let me not deal further on that alternative because there might be a better one. Let me deal just quickly, in summing up, with the concerns that I have about this particular proposal from a policy standpoint.

I recognize that it is not necessarily a popular position to get oneself on the side of defending a recalcitrant Federal judge, someone who may not only be drunk, unfaithful, and disorderly, but may have voted on the wrong side of a whole slew of very sensitive, emotional issues. He may be a very unpopular character.

I want to say that I hope nobody on either side of this issue looks at good behavior as it is used in the Constitution and interprets that with a little asterisk down at the bottom of the page that this also means "unpopular"; that if you are on the wrong side of the busing question or the wrong side of an abortion question or the wrong side of a prayer in school question, the wrong side of carrying a sign against the U.S. Senate question or the President of the United States question, "You are not up to the standard of good behavior so we are just going to sort of get rid of you and put a judge in there who will decide these cases the way they ought to be decided." That is what concerns the Senator from Indiana.

We are told that for the Congress to go through the impeachment process is time consuming. It is. We are told that Congress is not going to inconvenience itself, that it is too busy to worry about the future of an obscure Federal judge or, more importantly, the judicial district which is the jurisdiction of that Federal judge and the hundreds of thousands, the millions, of people who must look to that Federal judge for justice.

That may be true, I say to my colleagues. Maybe we are too busy. Maybe that is too insignificant a role for Congress to undertake. But if it is, it is an indictment of the Congress of the United States. If we are not willing to examine the way a judge is conducting his business once he is in office, then we ought to forfeit our right to advise and consent to affirm the appointment of that judge in the first place.

Congress is not too busy for an obscure Federal judge nomination to come before it, and there have been times when obscure Federal judges have been turned down because Congress has been indignant and has felt that those judges did not meet the standard they should meet under the Constitution.

Congress exercised its authority under the Constitution to advise and consent under Article II, where we are all very much aware of the authority, the responsibility, we have. The good behavior clause, the distinction between that and the appointment at the will of the King, all of this was designed by our Founding Fathers to give the representatives of the people in the Congress of the United States a voice in determining who Federal judges are and who they should not be; how they are appointed, when they are appointed, and when they are removed.

The people's representatives were involved in this very important decision of who was going to hold the life-and-death powers of the people of this country under the Federal judiciary.

Is this too obscure an issue? I invite my colleagues to go down through some of the issues that "we" have spent time on. We are worried about poppy seeds right now; the disposition of poppy seeds is on the calendar of this Congress. I sat here and voted on chicken feathers. The list is long of things that only involve a handful of people in this country, yet Congress takes time to consider. If we can consider those matters, it seems to me we should not be too busy to discuss and decide and dispose of the matter of a Federal judge who is not doing his job right.

I remind my colleagues, and I doubt if there are really very many of us who need more than a very quick reminder and I do not want to be presumptuous in doing so, that at this stage of a legislative session, when we are trying to explain to our wives or our constituents why we are not going to be able to join them at dinner at night because we are going to be working on the floor of the Senate, and we know we have so much work here that we do not know whether we are going to take care of it all, it is awfully easy to equate things under a yardstick of efficiency; what is the quickest way to get something done? That is only a normal tendency, but I suggest that to apply that yardstick to the Constitution of the United States is a very dangerous rule. The very democracy that was structured under that Constitution has in it a number of protections that go to protect individual citizens and to create a very inefficient way of doing things. One of the prices of individual liberty is some inconvenience and some inefficiency. If you want to see an efficient government, you ought to see how it is being done in Nicaragua right now.

They dispense justice pretty quickly down there and they get it done just like that. I do not think we want justice dispensed that way in this country.

I am not suggesting that the passage of this legislation is going to do that at all. I am suggesting that when the time comes that the Congress of the United States can look for a way to circumvent its responsibility of testing judges, of advising and consenting to their appointment and in having a voice in their removal, when the time comes that, for the sake of convenience, we bring in some time and motion study fellow to say how we are going to judge what our constitutional responsibilities are, it is going to be a dark day for our country in a broad variety of ways.

As I said a moment ago, it is not necessarily a popular position to espouse, to be standing here, taking the time of my colleagues, risking the wrath of people in my constituency and elsewhere who may not be concerned about the independence of the Federal judiciary, who may be angry at a judge because he has ruled one way or the other. But I want to suggest to you that to our Founding Fathers, and you can look at the history from the standpoint of the Revolution until this time, it is abundantly clear why it was important to guarantee the independence of the judicial system of this country.

I want a Federal judge who feels he has the capacity to stand up and say "no" on an issue and not worry about how his fellow judges are going to look on him.

I do not want a panel of judges, who may be concerned that one of their own is a source of some embarrassment—maybe he drinks too much; maybe he stays out too late; maybe, God forbid, he wears a beard, and thus has evidenced instability—and that he ought to be taken off the Federal court.

Maybe he decided on the wrong side of the issues that confront judges day in and day out. Maybe his judgment of the Constitution is different from that of a majority of his peers. I say, in concluding, the test of a good judge is not that he is a judge who can win a popularity contest. We purposely do not want judges to be elected, because they have to make some tough decisions and the Constitution of the United States, the Bill of Rights of this country, should not be subjected to a majority vote. It should not be subjected to a majority vote of Congress; that takes two-thirds to change it. It should not be subjected to a majority vote of the people; and it certainly should not be subjected to a majority vote of a panel of judges, none of whom is responsible to a constituency

that can remove them by popular vote themselves.

Mr. President, at this point I would like to place my entire dissenting views to the Judiciary Committee report on S. 1423 into the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ADDITIONAL VIEWS OF SENATOR BIRCH BAYH ON S. 1423, AS AMENDED, THE JUDICIAL TENURE BILL

Although I appreciate the considerations which have led the majority of the members of the Judiciary Committee to approve S. 1423, I cannot agree with their decision. Because this bill is in my opinion one of the most drastic and far-reaching pieces of legislation on which the committee will exercise its judgment, I feel it is important to express my concerns.

There are two reasons for my dissent on this legislation: first there can be very little doubt that it exceeds the constitutional authority of both the Congress and the Judiciary; and second, it establishes procedures and sanctions which threaten the independence and character of the federal judiciary.

I have no disagreement with the motivation behind this bill. We are all convinced of the need for a wise, conscientious and responsible judiciary. We concur in the necessity of having the ability to remove judges who have seriously betrayed both their oaths to uphold the constitution and laws of the United States and their duty to assure the administration of justice with which they are entrusted.

I also concur with the majority in viewing the growth of the federal judiciary as a mixed blessing, in that it provides citizens with the means to address their grievances with some degree of dispatch, but at the same time worries us by its very size and numbers. No longer is the federal bench the select handful of jurists which existed at the beginning of our life as a nation. By sheer common sense and the laws of chance we are wary that there will be more bad apples in the lot. However, I am concerned that with S. 1423 we are moving precipitously toward undefined goals, without a clear and consistent view of the grounds which should be sufficient to remove federal judges. What judges are we really willing to go to such radical means to be rid of? The slothful, the criminal, the unpopular? This bill gives no clear standard of acceptable or unacceptable behavior. Further, I fear that with this bill we are crating new machinery, of dubious constitutionality, to achieve what might well be accomplished by less drastic means well within constitutional bounds: better, more thorough selection methods, strengthened inter-judicial circuit discipline, and refined pre-impeachment procedures by which impeachment could become an effective mechanism when deemed to be necessary.

S. 1423 IS UNCONSTITUTIONAL

The majority report takes the position that since the constitutionality of S. 1423 is a question which can ultimately only be decided by the Supreme Court, Congress should not hesitate to pass the law and let the Court make its decision. Certainly, the Congress has passed legislation knowing that it posed serious constitutional issues. The Voting Rights Act is as good an example as any. However, there is a great difference between legislation which is arguably unconstitutional and that which is very probably unconstitutional. A proposed law which poses serious constitutional issues demands the most careful scrutiny by the legislative branch. If it is very probably unconstitutional, it should not be passed. Certainly the constitutional problems with S. 1423 are sufficiently serious to warrant close examination of the policy questions which are raised. With no prescience of what a decision by the Supreme Court might be, I find the arguments for the constitutionality of S. 1423 to be very troubling.

THE GOOD BEHAVIOR CLAUSE IS NOT A CONSTITUTIONAL BASIS FOR THE REMOVAL OF FEDERAL JUDGES

To summarize the relevant constitutional issues briefly, Article II of the Constitution expressly provides that all civil officers shall be removed from office by impeachment; Article I states that the Congress shall have the sole power of impeachment. The majority believes, however, that another means of removal exists within the Constitution in the good behavior clause of Article III, § 1, and maintains that for 190 years this alternate removal mechanism has been available whenever the Congress wanted to employ it, but has simply never been used. The majority brushes over the fact that throughout the country's history, the idea that the "good behavior" clause was intended to provide a way to get rid of federal judges was not proposed. Even contemporaries of the Framers who felt strongly that it was a mistake to confine removal of judges to the impeachment process never suggested that article III provided such an alternative. Historical precedent, caselaw, and statutory construction all sustain the traditional view that the Constitution provides only one means for removing a judge, the impeachment process.

The standard for impeachment under article II is treason, bribery, or other high crimes and misdemeanors. The proponents of S. 1423 grant that Congress has the exclusive power of removal for commission of the serious misconduct which is impeachable. They contend that a judge whose behavior falls in the gap between "good behavior" and "high crimes and other misdemeanors" is subject to removal by other judges through machinery set up within the judicial branch itself. In other words, a higher standard of conduct is imposed on judges than other civil officers.

To sustain this argument, it seems necessary that three assumptions withstand scrutiny: first, that the Constitution allows the creation of an alternative removal mechanism; second, that the "good behavior" clause requires a higher standard of conduct in the judiciary than would be imposed by impeachment; and third, that S. 1423's removal standards ("conduct which is or has been inconsistent with the good behavior required by article III") does not impinge on the exclusive congressional power of removal by impeachment.

IMPEACHMENT IS THE SOLE MEANS OF REMOVAL OF JUDGES

The proposition that Article III's good behavior clause provided an alternate means of removal of judges was first offered in a law review article by Burke Shartel in 1930, and has recently been argued by Professor Raoul Berger in his work on impeachment. Authority in the United States has been consistent, however, that impeachment was the sole means of removal of federal judges because of the language of Articles I and II that the House and Senate are granted the "sole power" to impeach and convict office holders. Any argument to the contrary must meet the heavy burden created by this express constitutional provision. The majority places its argument primarily on the slender shoulders of the precedent in English common law of the obscure writ of *scire facias*, an argument derived from Berger and Shartel.

The Founding Fathers, the proponents say, must have intended an alternative means of removal of judges within the judicial branch itself since *scire facias* proceedings were available at common law. This proposition has been closely analyzed by many constitutional authorities and found to be wanting. Their work is summarized in "The Report on The Removal of Federal Judges Other Than By Impeachment by the New York Bar Association."

The theory of *scire facias*, as the majority report explains, was that a grant of office imparted an office or estate for the life of the grantee terminable by his death or a breach of good behavior. The judiciary was empowered to issue a writ of *scire facias* to initiate a civil proceeding for the termination or forfeiture of the office. The object of the writ was to remove the officer without penalty. A close examination of the writ does not sustain the conclusion drawn by the majority.

First of all, most authorities cite a lack of historical evidence that the framers of the Constitution even had knowledge of the generally discarded write of *scire facias*, which had admittedly never been used to remove a judge. *Scire facias* was never included in any Revolutionary state constitution, nor was it considered at the Constitutional Convention.

It is admitted by all the scholars that there is no record of the writ having ever been used to attack a letter patent (granting "good behavior tenure") in a Colonial court. Further, the positions subject to removal by the writ were only of minor court officials, not fullfledged judges. Officials so removed included such obscure officers as filazers, remembrancers of the Exchequer, cord recorders, postmen and auditors. No judge was ever removed by *scire facias* in England, even though the writ technically survived until 1947. The writ was not abolished in America until 1938. By the majority's interpretation, any federal judge could have removed another judge up until that time under the theory of *scire facias* simply by concluding that his brother or sister judge in effect breached a condition of his appointment by engaging in something that was not "good behavior." Not one judge has been so removed. Moreover, it is interesting to speculate what would have happened if a federal judge had ever tried to employ *scire facias* on another.

The undocumented precedent of *scire facias* is far too slender a reed to support such a radical change of practice that could effectively destroy the constitutionally mandated life tenure of federal judges and give other judges broad new removal powers.

Other evidence argues against the constitutionality of any other means than impeachment for removal of judges. Early drafts of the Constitution gave impeachement powers to the Supreme Court; after long debate, it was decided that the best and most impartial tribunal would be the Senate, not members of the judicial branch. Further, there is overwhelming evidence that the Framers themselves considered impeachment the sole means of removal. Hamilton, in the Federalist No. 79 expressly said so. Jefferson also held that opinion. Justices Marshall, Story and Kent concurred. As the eminent constitutional student, Phillip Kurland, has said, it is "pellucidly clear . . . that the intention of the Framers was to make impeachment the sole means of removal."

The majority argues that other branches of government under the Constitution have alternate means of removal besides impeachment inherent within their own branch. Distinctions can clearly be drawn, however. An exception is expressly provided within the Constitution for the legislative branch (Art. 1, § 5). The Supreme Court decided that the President can remove certain federal officers performing executive duties within the executive branch for the reason that he appointed them. *Myers* v. *U.S.*, 272 U.S. 52 (1926). The same obviously cannot be said for the judiciary. The Court further held in *Humphrey's Executor* v. *U.S.*, 295 U.S. 602 (1935) that the President is restricted in re-

moving such an official as a commissioner of the FTC because his is a quasi-legislative, quasi-judicial role requiring independence from other officials or departments of government in order to function properly. The same might well be said in respect to the independence of a judge subject to the censure of the judiciary, as well as of the legislature.

It is also worth drawing an analogy to the 25th Amendment, which was drafted to continue the consistency of our constitutional pattern. The 25th Amendment provides that a President may only be removed for inability to perform his duties upon the judgment of the Congress and not the determination of his own cabinet. A disagreement between a judge and his fellow judges over his judicial inabilities should likewise be resolved by the House and Senate, i.e. impeachment, and not by giving certain judges powers over the removal of their peers.

The Constitution is clear that judges are protected from members of their own branch, as well as the legislative and executive.

THE GOOD BEHAVIOR CLAUSE DOES NOT IMPOSE A HIGHER STANDARD OF CONDUCT

Since it is conceded by the majority that Congress has the sole and exclusive power of removal for the commission of impeachable offenses, in order for S. 1423 to be constitutional, it is necessary that it prove that the "good behavior" clause provides a higher standard of conduct for judges than that required by impeachment. I do not believe this proof can be sustained.

The majority asserts that the language of Art. III of the Constitution which says that "the judges . . . shall hold their offices during good behavior" was intended by the writers to establish that judges who did not conform to good behavior should not be able to continue to hold office. These assertions again rest squarely on the scholarly opinions of Shartel and Berger. The great weight of historical research done by other constitutional experts, however, argues that tenure during good behavior was intended to differentiate from tenure "at the King's pleasure." It was rebellion against tenure "during the King's pleasure" which had led to the Act of Settlement in England in 1701, and it was the monarchy's arbitrary power over their judges which led the Colonists to include in their list of grievance against the King in the Declaration of Independence, "He has made Judges dependent on his will alone, for the tenure of their offices, and the amount and payment of their salaries." In other words, to the Founding Fathers, a good behavior grant of tenure meant that the executive was restricted in its powers of removal, not that it was a separate standard of conduct.

Further, although in our history we have never definitely established the standard for impeachment, it is generally agreed that it is not so high as an indictable offense, and indeed many scholars maintain that under 18th Century common law, "misdemeanors" was synonomous with "misbehavior." Certainly our record of impeachments would uphold that interpretation. In 1804, Judge John Pickering was impeached and convicted on several charges, including drunkenness and blasphemy. Judge George English was impeached, and subsequently resigned, on counts including conduct bringing the administration of justice into "contempt and disgrace." In 1936, the Senate convicted Judge Halsted Ritter on a count of misbehavior.

If a judge can be impeached for misbehavior then the good behavior clause creates no separate or higher standard of conduct. Where, then, is the constitutionality of S. 1423?

The majority also contends that the good behavior clause would allow removal for disability. Its authority is in Mr. Berger's analysis that involuntary absence from office caused by mental or physical illness was historically grounds for forfeiture of a good behavior office if not for impeachment. Other scholars, including Shartel himself, have taken issue with this interpretation, however, and argued that a good behavior tenure office was not forfeited by disability. It is clear that at the time of the Constitutional Convention it was thought that good behavior tenure excluded removal for disability. For example, a critic of Art. III, Sec. 1 complained in The Antifederalist Papers, "there is no authority that can remove them from office for any errors or want of capacity." Perhaps as strong a proof as any that insanity, for instance, was not regarded as a cause for removal is in the fact that in the first impeachment proceeding (Judge Pickering in 1804) insanity was raised as a defense by the judge's defenders. No one thought to prosecute for insanity.

It is important to remind the majority in conclusion, however, that many of the problems of judicial disability are already addressed by statute without provision for removal, and therefore no questionable unconstitutional removal mechanism for disability is necessary. 28 U.S.C. 372(b) allows the Judicial Conference to certify to the President that a judge is unable to discharge his duties because of a permanent disability, and the President may then appoint another judge to take over his duties.

THE REMOVAL STANDARDS OF S. 1423 ARE AN INFRINGEMENT ON THE CONGRESSIONAL POWER OF REMOVAL

If S. 1423 is not intended by its supporters to provide a removal mechanism which will operate for the same misconduct as will the impeachment process, serious questions arise about its removal standards, even if we assume, wrongly I believe, that a gap exists between good behavior and impeachable offenses. In other words, if the bill is to be constitutional, the majority must be able to show that the standards for removal by the judicial branch in S. 1423 do not infringe on the congressional power of removal by impeachment.

The general standard of the bill, "conduct which is or has been inconsistent with the good behavior required by Art. III" is at best vague. The further guidelines for bad behavior in Sect. 388 of the bill are based on terms which state supreme courts have employed in cases involving state judges. As observed above "habitual intemperance" and "conduct prejudicial to the administration of justice" are grounds which have already been applied for impeachment and conviction. What lower standard could reasonably be applied to define the bounds to good behavior as something less than an impeachable offense?

In a disturbing provision, Section 385(c)(6) of S. 1423 authorizes removal of judges convicted of a felony, or a crime involving moral turpitude. This is in clear conflict with and infringes on the standard for impeachment, "high crimes and misdemeanors", since by definition criminal behavior is the subject of the impeachment process. The opinion of Berger himself seems to contribute to confusion along this line. In 1976 he testified on S. 1110, the predecessor to this bill, that the purpose of the legislation is to catch "little crooks". It appears then that at least some of the standards embodied in S. 1423 are overinclusive.

If we were willing to concede however, that a gap does exist between good behavior and impeachable behavior to which the provisions of S. 1423 might validly apply, an ironic incongruity is the final result. With S. 1423 Congress would be creating a relatively easy mechanism by which it might rid itself of judges who have been guilty of "bad behavior" falling below the level of impeachable behavior. For the serious misconduct arising to the strictest standards of high crimes and misdemeanors, that is, indictable offenses, the cumbersome mechanism of impeachment remains. So S. 1423 would create a system for relatively easy removal of judges for failing to behave properly, but removal of criminals from the bench would be much harder.

S. 1423 AND SUPREME COURT JUSTICES

S. 1423 was amended in subcommittee in response to objections raised by the Judicial Conference and others to allow for different proceedings in the case of a Supreme Court Justice. It now provides for a recommendation for impeachment to be made to the House following a trial by the judicial court. As a final constitutional question, I would ask if this recommendation would not amount to an advisory opinion from an article III court, proscribed since *Hayburn's* Case 2 U.S. (2 Dall.) 409, 410 n. (a) (1792).

POLICY CONCERNS DO NOT JUSTIFY THIS LEGISLATION

The question which continues to trouble me after study of S. 1423 is what judges we want to be able to get rid of by this legislation and for what reasons. Since as has been argued in the preceding sections, there is small reason to believe that S. 1423 offers any new ground on which removal may be based, the question might well be, Do we simply want new ease of removal, and not necessarily removal for different kinds of misconduct? Or is it rather, that because of our frequent disaffection with unpopular opinions by the judiciary we want to be provided with new justifications for their removal? If any case, as in any major change in the way in which our constitutional system has functioned, the burden rests on the proponents of S. 1423 to prove that the relative ease of removal offered by this bill is worth the possible threat to judicial independence, independence, I have tried to argue, which the Constitution has provided should be protected from invasion by more powerful members of the judicial branch as well as by the legislative and executive branches. I would therefore hope that the Senate would fully address these issues of policy before it decides to approve or disapprove S. 1423.

First of all, the Senate must be convinced that there exists a problem among the Federal judiciary which demands a radical, new situation. Although I initially assumed such was the case, I have heard little of such proof in the Judiciary Committee. I am aware that some 36 States now have disciplinary commissions but the analogies between the State courts and the Federal bench are not strong. Interestingly, 26 of these commissions were established by constitutional amendments, presumably because mere legislation, such as S. 1423, was believed to be unconstitutional. Furthermore, the record on the bill discloses very little evaluation of these State policing systems, and in fact they have not been immune from criticism.

I cannot help but be aware of the dissatisfaction with which some judges, as authors of unpopular opinions, are held by our constituents, but the merits of opinions and judicial procedures are not, of course, intended to be legitimate subjects for complaint under this legislation. The press now and again presents a case against Federal judges, but what strikes me from these accounts is, first, that they are rare and isolated, and second, that in most instances the problems have been taken care of without the apparent need for legislation of this kind. Are the current means of handling the problems which will inevitably arise from time to time sufficient, or could they be strengthened at different points to make them adequate without establishing this radical, new system?

At the present time, the chief judge han-

dles most of the troublesome incidents as they arise in his district on an informal basis. The judicial council of the circuit has authority under 28 U.S.C. 332 to "make all necessary orders for the effective and expeditious administration of the business of the courts within its circuits." In addition, the Judicial Conference is empowered under 28 U.S.C. 372(b) to certify to the President the disability of any judge to fulfill his duties. And finally, there is the impeachment process. Improvement of these methods of control, along with greater care and investigation at the appointment of Federal judges might be sufficient solutions to the problems which exist.

It is not irrelevant at this point to take a look at the record on impeachment. The process may not have been as ineffective a means of discipline as it has been accused of being. Only four judges have been impeached and convicted but 55 have been charged on the floor of the House, an average of one every 3 or 4 years. Thirty-three have been charged with treason, bribery, or other high crimes and misdemeanors. Twenty-two have resigned rather than face Senate trial and public exposure. In all, one judge has left the Federal judiciary under pressure from impeachment approximately every 7 years.

Circuit Court Judge Clifford Wallace has proposed alternative legislation which would create greater disciplinary powers within the judicial circuits, with a final report from the Judicial Conference transmitted to the House in a case of serious misconduct. This proposal is among several seeking to improve the present system which I would hope could be the subject of hearings before the Senate decides on more drastic solutions provided by S. 1423. Certainly, also, the Congress should face its responsibilities under the Constitution and study methods by which impeachment will continue to be workable in the modern world.

The second question which the Senate should ask itself before it approves legislation such as S. 1423, is whether such a solution will create its own problems. There is, first of all, the obvious question which is presented upon the creation and vesting of power in any new bureaucracy: Will it abuse its power?

The striking thing about the structure of the bureaucracy created by S. 1423 is that its new and awesome power to remove fellow judges can be closely concentrated. The layers of the new bureaucracy are to be manned potentially by a small, tightly knit group. The 12-man Commission will represent only a few States. It will report its findings to the seven-member court, all of whom are to be chosen from the membership of the Judicial Conference by the presiding officer. He himself is selected from within the Conference. The Commission, through its Director (also chosen by the Judicial Conference) will initially screen complaints, a crucial step in the procedure, since an unscreened complaint is then sent back to the circuit of origin where investigation will be opened against the complained of judge. A hired staff which does not winnow out frivolous or ill-conceived complaints at this stage will be performing serious harm against the judge who has wrongly been accused of misbehavior. The Commission will conduct its own, in-depth investigation after receiving the report of the circuit committee and if it in turn recommends trial by the court, the Commission will become the prosecutor. Obviously, there is a danger of a close-knit overzealous bureaucracy seeking to justify its own existence by finding transgressions in all manner of judicial action, perhaps even in the nature of decisions and opinions.

By far the greatest damage which could result from an alternate removal mechanism of judges judging judges would be the chilling effect it could have on the individuals on the bench. Philip Kurland has remarked that disciplinary systems in the States operate as "polite blackmail" by other judges and the bar.

I shudder to think how early the Federal courts might have been deprived of the services of Judge Learned Hand under such a discipline system as California's, for politeness to counsel and a willingness to tolerate fools gladly were not among his virtues, and it is only such virtues as regular attendance at the courthouse that the policing system seem capable of evoking from timid judges.

Justices Black and Douglas protested surveillance by other judges in the strongest terms in their well-known dissent to the *Chandler* case *Chandler* v. *Judicial Council*, 398 U.S. 74 (1970). *Chandler* did not go to the merits of the constitutional question of whether judges sitting on the judicial council were empowered to suspend the individual activities of a fellow judge. It did, however, serve to give a modern day forum to Black and Douglas to reiterate the fears of loss of independence voiced by leading jurists dating back to Chief Justice Marshall. A survey taken by Senator Sam Ervin in 1970 illustrated this fear sharply when fewer than 1 percent of the Federal judges supported the concept of the Tydings bill, predecessor to S. 1423. A like survey ordered by the Judicial Conference in March of this year has not yet been completed, but I believe the Senate should watch for its results carefully to evaluate the views of those who could judge and be judged.

In a very real way, removal within the judicial branch could have a profound effect on the Federal bench. The caliber of the men and women attracted to the judiciary might well change if they knew that while in the performance of their duties they could be subject to a barrage of public complaints and to open public scrutiny. The confidentiality provisions of S. 1423 to the contrary, the recent case, *Landmark Communications, Inc.* v. *Virginia* 46 U.S.L.W. 4389 (May 1, 1978) holds that the first amendment does not allow criminal punishment of the press for divulging or publishing information of confidential proceedings. At the farthest extreme, we would all suffer if subtle pressures from fellow judges or the bar were brought to bear on those whose judicial opinions on Federal statutory or constitutional issues were "unpopular." The leadership taken by the courts on matters of individual rights are too important to run any risks of being jeopardized in the name of responsiveness to public opinion.

The final question to be answered about S. 1423 is what is "bad behavior"? The majority of the Judiciary Committee tells us it is not crimes or even serious misconduct, for these must be handled by impeachment (although as noted above section 385 of S. 1423 provides that removal may be automatic upon final conviction). It has nothing to do with the merits of a decision nor with procedures at trial. The guidelines of section 388 say it is willful misconduct, willful failure to perform duties, habitual intemperance, or conduct prejudicial to the administration of justice. These are broad, vague terms at best. If the misconduct is not serious enough to be impeachable, does it merely rise to the level of triviality?

Examples furnished us in the majority report leave me with a certain amount of skepticism. Is it for vulgar horseplay and obscene conversations with clerks (*Geiler* v. *Commission on Judicial Qualifications*, 515 P. 2d, (California 1973) that we are erecting this elaborate mechanism? Surely there is a less drastic method of controlling such situations. It is cases like this which make Kurland's assessment of Learned Hand's vulnerability under such a system seem very possible. Such examples also make us realize how easily censure and even removal of judges who consistently write unpopular opinions could be accomplished. Raoul Berger in his 1976 testimony expressed his opinion that judges could be removed for "ignorance." Finally, we are again stuck with the irony of being able to remove a judge guilty of obscene conversations with relative ease, but being able to get rid of a judge who has committed murder or treason or accepted bribes only through impeachment.

I firmly believe that it is the responsibility of the Congress to help insure that we have an effective and responsible Federal judiciary. In that wise, it is the duty of the Senate to play its role in the selection process well, especially since the number of judges will increase rapidly. It is the duty of both Houses to see that the impeachment and trial process work. Certainly much can be done in that area. Congress should be taking a look at other means by which the disciplinary process could be strengthened. S. 1423, however, appears to create a solution worse than the problem. Of dubious constitutionality, the implications of its policy are far reaching and dangerous. There has been only 1 day of hearings on S. 1423, and none since the bill was amended extensively in subcommittee. Our Federal judiciary deserves more from the Senate than precipitous action on this important matter. So in fact does the general public.

As Philip Kurland has reminded us:

"The provisions securing the independence of the judiciary were not created for the benefit of the judges, but for the benefit of the judged. It is not in the keeping of the judges to surrender this independence under pressure or voluntarily to give it away. Judicial independence is held in trust for the people. * * *"

(Mr. MOYNIHAN assumed the chair.)

Mr. HATCH. Will the Senator yield for a question?

Mr. BAYH. Yes.

Mr. HATCH. I am sorry to interrupt the Senator's very eloquent statement.

Mr. BAYH. If the Senator will give me just one other sentence or two, I shall be glad to yield.

Mr. HATCH. I am delighted to.

Mr. BAYH. I do not want what I have said to be misinterpreted. As the Senator from Georgia (Mr. NUNN) very honestly and accurately pointed out, most judges are not in need of this particular kind of sanction. Most of them are good judges. We are talking about isolated instances. But I suggest that our Constitution is as strong and provides as much protection for one individual citizen or one judge, as far as the rights guaranteed in that Constitution, as it does for the multitude. That is one of the real and really important distinctions of our form of Government compared to most others on the face of this earth. The individual and individual rights, whether it is an individual citizen or an individual judge, must be held sacrosanct under our Constitution, or our whole system changes. My concern, in closing, is about the creation of this panel, and to let a majority of this panel assume the responsibility which I feel very strongly was given to the Senate of the United States and the Congress of the United States, where our Founding Fathers said it is serious enough to require a two-thirds majority for impeachment. Instead, we are taking it away under this bill and we are permitting impeachment of judges by a majority vote of a panel of judges.

I do not believe judges are immune from the normal frailties that afflict all human beings from time to time, and I

am concerned that circumstances of the moment, some distant moment, whether it is because of a judge's personal habits or a judge's philosophical position on an issue, might be considered as a source of embarrassment to a majority of that panel of judges and they would use the vehicle which we are now considering to remove a judge—not because he is failing to perform his constitutional function under the Constitution of this country, but because he does not meet the standard they believe is important.

I am glad to yield to the Senator from Utah. I unfortunately had the floor for a limited amount of time.

(Mr. HODGES assumed the chair.)

Mr. DE CONCINI. Mr. President, I ask the Senator from Utah to yield 2 minutes to the Senator from Georgia for other business.

Mr. HATCH. Certainly.

Mr. TALMADGE. I thank my distinguished friend.

Mr. President, I am very pleased to rise in support of S. 1423, the Judicial Tenure Act, of which I am a cosponsor.

This is a measure to which my distinguished colleague (Senator NUNN) has devoted many long and hard hours of research and legislative effort in order to bring it before the Senate for consideration.

In this day of widespread public cries for accountability of all public officials in the executive, judicial, and legislative branches, the Congress has attempted to respond fully to the comments and criticisms concerning the executive and legislative branches. Until today, however, it has not addressed problems in the judicial branch.

S. 1423 provides an apparatus by which the judicial branch of the Federal Government can keep its own house in order in the form of a Judicial Conduct and Disability Committee. S. 1423 establishes procedures, in addition to the existing cumbersome process of impeachment, for the retirement of disabled justices or judges of the United States. It also provides for the removal of justices or judges whose conduct is or has been inconsistent with the good behavior requirement of the U.S. Constitution.

Impeachment has not insured, and cannot insure, compliance with the constitutional good behavior requirements with the size of today's Federal judiciary and the multiplicity and complexity of issues that are adjudicated. It is simply impossible in today's world for Congress to fulfill this role alone. Specifically, an additional mechanism is necessary because of the increases in the total number of Federal judges mandated by the judicial business of the Nation. Specifically, an additional mechanism is necessary because of the litigation trend which has given rise to predictions that there will be a need for over 1,000 district judges and over 250 circuit judges by the year 1990.

Also, specifically, an additional mechanism is necessary because of the rapidly increasing workload of Congress which has, as a practical matter, created an atmosphere in which consideration of any single issue for an extended length of time on the floor can threaten the passage of other vital legislation that is essential to the very lifeblood of the Federal Government. An impeachment must, therefore, compete with pressing national legislative priorities for the time of the House of Representatives and the Senate. To those of us who so strongly desire a sound judicial branch free from criticisms of failures of competence and integrity, this is simply not acceptable.

If I had my way, we would have much less Federal Government, Federal laws, Federal rules, Federal regulations, and, therefore, resulting Federal litigation. However, even this would not return us to the early days of our Nation where the impeachment process was sufficient to keep the judicial branch of our Government in proper working order.

Mr. President, I hope that the Senate will move to expeditiously act on S. 1423, and I once again commend Senator NUNN for his able efforts in this regard.

Mr. President, I yield the floor and I thank my distinguished colleague from Arizona for yielding.

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI addressed the Chair.

Mr. THURMOND. Mr. President, I yield 1 hour to the distinguished Senator from Maryland.

Mr. DECONCINI. Mr. President, I have the floor, I believe.

The PRESIDING OFFICER. The Senator from Arizona has the floor.

Mr. DECONCINI. Mr. President, I had agreed to yield 15 minutes to the Senator from Utah.

Mr. MATHIAS. I have been waiting.

Mr. HATCH. I will make my remarks very short to accommodate the Senator.

Mr. MATHIAS. I have been here since 12 o'clock.

Mr. HATCH. I have been here since 10 o'clock on all these bills, so I will make my remarks short.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona yields 15 minutes to the Senator from Utah.

The Senator from Utah has the floor.

Mr. HATCH. Mr. President, in deference to the distinguished Senator from Maryland, I will try to cut my remarks down, but I have been on the floor since 10 o'clock this morning, although on and off the floor, waiting to speak on some of these issues.

Mr. President, let me say I enjoyed the remarks of the distinguished Senator from Indiana and his eloquence on this subject. I think he has raised a number of important issues which deserve great consideration.

Mr. President, as a trial lawyer who has, literally, been involved in thousands of cases in front of Federal and State courts, I rise in support of the efforts of Senators NUNN, DECONCINI, THURMOND, and others. I support this judicial tenure bill. I think it is long overdue. It is something that this country needs and I believe it will be constitutionally upheld in spite of the objections raised by not only the distinguished Senator from Indiana, but also by my friend from Maryland. I think this bill is an intelligent approach to judicial tenure.

In spite of all that the distinguished Senator from Indiana has said, I do believe that many illustrations he has brought up, in fact, most of them, will not suffer from the applicability of the provisions of this bill.

The bill is designed to provide a means to remove those unwarranted restraints that appear in the law presently; so that we can, literally, handle some of the problems that exist in the judiciary today.

As a trial lawyer who has tried innumerable jury trials, all kinds of nonjury trials, in almost all courts in at least two States, I have found a lot of abuses in the judiciary that nobody does anything about.

I tried a number of cases in one of the courts most criticized by Judiciary Committees in both the House and the Senate, and I must say there were some redeeming qualities in our late chief judge in Utah. I liked him personally and considered him a friend. He always treated me with courtesy in his courtroom. Nevertheless, I saw and observed many things which should have been corrected and which were allowed to exist because there is nothing available in the present law that would have prevented or corrected those kind of abuses.

In my legal practice, I have seen certain Federal judges controlled or influenced by large corporations. I have seen control of certain Federal judges by large law firms and I have seen it on more than one occasion. I have also seen Federal judges who were controlled by special interests.

I have seen Federal judges become arbitrary, capricious, exhibit all kinds of partiality, and I have seen an abuse of the legislative processes by what has been referred to as "Government by judiciary."

I have seen judicial intemperateness and I have seen judges continually intervening in the trial of cases, even when there were competent trial lawyers trying the cases, because the judges took sides early in the trials instead of being impartial as judges should be.

I have seen repeated abuses of the trial process. I have seen judges who did not put the time in on the bench, who would not work hard, who, literally, would not do the things they should.

I have seen judges drunk on the bench, Federal judges, if you will, appointed for lifetime tenure, judges who should know better and, who should be examples, impeccable examples to the people of this country.

It is not any wonder to me that we have problems, even with all the good Federal judges on the bench, and I can say from experience that the vast majority of them are fine people, exceptional judges, and a credit to the Federal bar. But there are some who should never have been appointed to begin with, who have been a disgrace to the bench and continue to be a disgrace even today. There are those who literally ought to be thrown right off the bench because they are breaching every code of conduct that should be imposed on judges in our society.

I should say this, sometimes our selection of judges in this country deserves a little more consideration. I have been led to believe that of the judicial appointments since this administration has taken over, only one has been Republican—I have to admit the Republican Party is the minority party, but I do think more than one Republican is qualified in all the judges appointed by this adminstration.

The President of our country has repeatedly indicated he believes in judicial merit selection. Only the best should be on the bench in the United States.

As I have sat on the Judiciary Committee, I have seen some of the best who have been nominated and appointed, but I have seen some who probably should not have been appointed.

They cannot tell me that, in these United States, we cannot find better, more qualified people to sit on the Federal bench and work in the Federal Judiciary than some of the people we appoint right here in Washington.

I am aware of a matter in which a judge took the fifth amendment, a Federal judge took the fifth amendment himself, and continued to serve on the bench until he retired from the bench in what appeared to be political dealing.

I saw a case where some people actually went out and, as they always did, cut down Christmas trees on Federal land, which they have done for 30 years, and they were sentenced to 5 and 10 years imprisonment by a Federal judge for "theft" of a few dollars worth of Christmas trees.

I have seen cases where judges who knew better deliberately wrote opinions they hoped, it seemed to me that they hoped, would be reversed on appeal because they knew their opinions were wrong. I think those judges were influenced, or at least there is good evidence they were influenced, by special interest forces and special interests themselves.

The point I am making is that, in spite of the fact that the vast majority of our Federal judges are competent, decent, honorable, ethical people of integrity, there are those occasions when you have powerful Federal judges, appointed for life, who literally abuse their office, and nothing can be done about it because the remedy basically has been confined to impeachment.

I think this bill may be criticized by some because, under its provisions, we are relying on judges to judge other judges, and people never are going to believe that other judges are going to come down fairly against their peers. But I believe they will.

I have been shocked by the criticisms I have heard about certain judges in this country who have abused their offices, who have abused the attorneys, who have abused the parties, who have abused the citizens and the States in which they have sat, and who certainly have not lived up to the mandates of the Federal Government in taking the positions to begin with. These people literally should have to face responsibility for items listed in the report of the committee: willful misconduct in office, willful and persistent failure to perform duties of the office—you can go right down the line—habitual intemperance, and other conduct prejudicial to the administration of justice that brings the judicial office into disrepute. Their fellow judges may be a lot tougher on abuses of that nature than perhaps any of us in Congress would be.

I think the Senator from Georgia and others who are sponsoring this legislation are doing the country a great service, because if there is anything for which we should have respect, it is the judiciary of this country.

I have to admit that I have seen attorneys deprecate the Federal judiciary; I have seen the public deprecate them; I have seen the individual parties deprecate them; I have seen other leaders deprecate them. In all honesty, even though some of those deprecations were absolutely right, nothing could be done about it.

I do not believe that the Constitution forecloses getting rid of judges who have consistently acted improperly on the bench. I cannot conceive of any particular commission or committee throwing judges off the bench for innocent mistakes that could be made by any judge sitting on the bench.

However, we are talking about a lifetime tenure job the minute you put a Federal judge in; it seems to me you have made him a millionaire because, for the rest of his life, if he stays there 10 years, he has his full salary on that bench and can stay there as long as he wishes, basically, under present law, with impunity, and be just as vicious and violent as he wants to be. Again, fortunately, the vast majority of our Federal judges are not of this type.

This bill has merit. I support it. I support an upgrading of our judicial system. I support merit selection where judicial selection is taken out of politics. Unfortunately, I do not think we have any aspect of that today in our society.

I commend those who are managing the bill and those who have worked hard to have the Judicial Tenure Act come up and be considered by the Senate.

I also pay tribute to Senator BAYH and Senator MATHIAS, because I know their sincerity and the arguments they are making and have made. I disagree with those arguments. I believe that these officious problems that exist in the Federal judiciary have to be stopped. We have to solve them, and we have to do something to upgrade our judiciary so that it is, without question, the greatest system of justice in the world today. This legislation, I believe, will help us do that, without being abusive to judges who sit on the bench.

I share some of the concerns Senator BAYH has raised. I commend him for raising them. But, in balance, I cannot conceive of any panel of judges, any commission, deciding against a judge unless there is ample evidence that that decision should be made against him.

Mr. President, I thank the distinguished Senator from Arizona for this time, and I again thank the distinguished Senator from Maryland for his patience.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I yield 1 hour to the distinguished Senator from Maryland.

The PRESIDING OFFICER. The Senator from Maryland is recognized for not to exceed 1 hour.

Mr. MATHIAS. Mr. President, I express my thanks to the distinguished Senator from South Carolina for making this time available for me. It seems a lot of time after so much discussion, but this is a very important subject and one that deserves careful scrutiny. It is that kind of thoughtful consideration which the Senator from South Carolina and the Senator from Arizona give to this subject. I think this scrutiny indicates the importance they attach to it and indicates why they are willing to make arrangements for the kind of thorough review of this whole topic which it really deserves and demands.

I think we were all helped in our understanding of the bill by the participation in this debate of the author of the bill, the Senator from Georgia (Mr. NUNN). I believe we will have a better understanding of what are trying to do and what we should do—and perhaps, more important, what we should not do—because this whole debate really weighs the question of whether judicial control is worth the sacrifice of judicial independence.

As we weigh that question, we have to do it against the background of the very serious challenges that are before the courts today. We have to recognize that these are challenges which affect not only the Federal courts but also the State courts. We have to appreciate the enormous volume of judicial business which is generated not only by our population of more than 200 million Americans but also by an affluent society. Our populace finds more reasons to go to court, brings more causes of action than ever before, has higher degrees of civic awareness which have tended to be litigious at times, and is beset by social problems which we urge people to take it to the courts instead of to the streets.

All this has put pressure on the court system, and all this is involved in bringing this bill and this issue to the Senate today.

However, I believe this: The changes in the system of the administration of justice have to be approached with very great care. Tampering with judges is as dangerous as tampering with the courts themselves. I do not have to enlarge upon these apparent and obvious dangers.

However, when we look at a bill such as this, which provides for a rather radical remedy, we should reflect that, notwithstanding the unhappy experiences of the Senator from Utah, by and large, over the years, such unhappy experiences in the Federal courts are very rare. The Federal judiciary in almost every State is an ornament—an ornament to the bar, to the bench, and to our system of constitutional government.

Mr. HATCH. Mr. President, will the Senator yield for one comment on that? I do not mean to interrupt the Senator.

Mr. MATHIAS. I yield.

Mr. HATCH. I did not want to give

the wrong impression. My experience in the Federal bar and in cases before the Federal courts has been pleasant, for the most part, and extremely satisfying. But I have seen these isolated judges' actions which have been oft repeated, as I have mentioned, and those are only some I have heard of.

Again, I reiterate that I think—as does the distinguished Senator from Maryland—that the vast majority of the members of the Federal bench are extremely competent and dignified and decent men and good judges. My experience typically has been a very good experience.

The reason I asked for the Senator's kindness in interrupting is because if I indicated otherwise I certainly would not want the record to read that way. But in the many case experiences that I have had there have been more than a few unsatisfactory situations.

Mr. MATHIAS. I thank the Senator from Utah. I think he makes the point which is important. As he says, I think I use his word, which was "isolated" cases.

Mr. HATCH. That is right.

Mr. MATHIAS. The very fact that the cases are rare and the fact that they are isolated is the reason that they get a lot of attention.

But what I think we have to remind ourselves here today is that we do not want to be misled by the attention which some unique situations get to the point that we are saying to the American people that the whole system is archaic or outmoded or of very little further use.

I think that is the danger in allowing this to get out of the proper perspective.

The basic reason that I cannot support this bill is because of the radical and violent change that it would work on the architecture of the Constitution. Perhaps it is that I am just too conservative, and not only too conservative, too much of a strict constructionist of the Constitution. I think we are dealing here with a principle, and, Mr. President, it is a principle worth preserving. It is not a new principle. It is an ancient principle. It is a principle which goes back into the history of mankind long before the Constitution of the United States was written, long before Columbus arrived in America.

Herodotus, the Greek historian, writing the history of ancient Persia, tells us in that history:

> The royal judges are men chosen from among Persians, *who continue in office until they die*, or are convicted of some injustice. They determine causes between the Persians, and are the interpreters of the ancient constitutions and all questions referred to them.

So this principle of judicial independence is not 200 years old, but we have here the positive record that it is more than 2,000 years old.

And the founders of this country were wonderful men. They were citizens of the world. They were scholars. They read carefully the history of the classical world and they knew about Herodotus. They knew that in establishing the independence of Federal judges they were not creating any new experiment in government. They were in fact embodying the wisdom of the ages in the Constitution of the United States. They gleaned from the experience of other peoples the lessons to be learned from history; and they wrote those lessons into the organic law of this country. In this bill we today are tempted to tamper with that organic law.

The framers of the Constitution dealt at great length with this subject. They came back to it again and again and again during the Constitutional Convention.

On Monday, August 27, 1787, they came to it when Mr. Dickinson moved an amendment to article XI, section 2. After the words "good behavior" he would add the words "provided that they may be removed by the executive on the application by the Senate and House of Representatives."

Mr. Gerry, known to history for being the author of gerrymander, perhaps more notably than this particular occasion, seconded the motion. "Gouverneur Morris thought it a contradiction in terms during good behavior, and yet being removable without a trial. Besides it was fundamentally wrong to subject judges to so arbitrary an authority."

I am skipping down in the journal for that day:

> Mr. Randolph opposed the motion as weakening too much the independence of the judges. Mr. Dickinson was not apprehensive that the Legislature composed of different branches constructed on such different principles would improperly unite for the purpose of displacing a judge.
>
> On the question for agreeing to Mr. Dickinson's motion it was negative. Connecticut, aye, and all the other States present, no.

That was the vote. No. Every State except Connecticut.

What they were trying to do there was to provide for the embodiment of the ancient principle of the independence of the judiciary in the new Constitution.

The Senator from Georgia in his colloquy with the Senator from Indiana made the point that it was hard to impeach Federal judges, that it had not been done for 40 years. I agree with that. It is hard to impeach anyone under the procedures which we follow in this country and which have been imported or inherited almost directly from the British Constitution. But it ought to be hard to impeach a Federal judge. It ought to be very hard to impeach a Federal judge. And that is the way the Founders intended it; and that is the way they wrote it, and that is the way it is.

It does not mean that it cannot be done. But it is hard because they intended it to be hard, and it ought to stay hard.

There are a lot of things that citizens could do. People who do not feel that a judge is acting right can exercise their constitutional right to petition the House of Representatives for a bill of impeachment at any time. Any citizen, any group of citizens, any bar association, can do that any time.

But the impeachment process is and ought to be hard.

The Senator from Georgia raised the question of the views of Thomas Jefferson on this subject. Of course, Jefferson was serving in another capacity during the Constitutional Convention. He was on the other side of the Atlantic as our representative in France. But he has left us some evidence of his views about judges, one of which was quoted in a letter to Senator DECONCINI from Judge James L. Oakes, a judge in the U.S. Court of Appeals for the Second Circuit.

In that he quoted a letter from Thomas Jefferson, whom Judge Oakes characterized as no lover of the judicial branch, a letter from Thomas Jefferson to James Madison in which Jefferson said:

> In the arguments in favor of a declaration of rights you omit one which has great weight with me, the legal check which it puts into the hands of the judiciary. This is a body, which if rendered independent, and kept strictly to their own department merits great confidence for their learning and integrity.

Now, as Judge Oakes points out in his letter, the stress that Jefferson puts on the word "independent" is pertinent and important to our discussion here today.

I must say that I was taken by surprise by the colloquy between the Senator from Arizona and the Senator from Georgia on their interpretation of this bill as being a bill which was so comprehensive that it would really eliminate the necessity for further impeachment procedures in the Congress.

I had depended on that language on page 7 of the report in which it says, and I quote:

> Therefore, an alternative method of impeachment to accomplish the removal of Federal judges must have been contemplated by the framers to provide for the removal for misbehavior or disability that was in violation of the "good behavior" standard but was less serious than an impeachable offense. The substance of what constitutes "misbehavior" may be open to interpretation; but it is completely clear that procedurally, "good behavior" was a term involving the judicial process.

But we have made a considerable amount of legislative history here today. I am not sure what use it will be put to in the future; but I think that courts or other bodies that may have to interpret this bill at some time are going to find a good deal of difficulty with this particular portion of the bill.

I feel, however, if there is to be judicial interpretation of the legislative history we are making here, that we ought to refer to the report on the removal of Federal judges other than by impeachment which was rendered by the Committee on Federal Legislation of the Association of the Bar of the city of New York on April 1, 1977. In that report the city bar said this:

> We also do not believe that any gap exists between the "good behavior" and "impeachment" clauses. The grant of good behavior tenure is, in our view, simply a grant of life tenure subject to removal by impeachment. The impeachment process allows removal for misconduct which is criminal, and some which is not explicitly criminal, but stops short of the all-inclusive basis for removal suggested by the vague phrase "bad behavior." We believe a constitutional convention which rejected impeachment for mal-

administration because the term was unclear and overly broad, would not have provided for removal under so ill-defined a standard as failure to maintain good behavior.

We do not believe that framers, interested in defining and circumscribing power, would place such unlimited power in the hands of any group, even the judiciary.

I think that that certainly ought to be part of the legislative history of this particular provision.

George Mason, that great member of the Constitutional Convention from Virginia, suggested the addition of "maladministration," and his fellow Virginian, James Madison, objected "that so vague a term will be equivalent to a tenure during pleasure of the Senate." It was at that point that George Mason withdrew the word "maladministration" in favor of the phrase "other high crimes and misdeameanors," a phrase which was familiar to colonial lawyers and lawyers of the early Republic because that was a phrase carried on the title page of the reports of State crimes with which they were all familiar.

I think we do have some responsibility to deal with both the constitutionality of this bill and with the policy involved in it. I must take issue with my good friend from Georgia when he said that only the Supreme Court can interpret the Constitution, only the Supreme Court can decide the constitutionality of a bill.

I just have to say that I think we have a responsibility which we cannot avoid. We can be wrong, we can be in error, just as I think the Court is sometimes in error, but we have taken an oath to discharge the duties of Senators in accordance with the Constitution. I do not believe we can undertake to perform those duties without undertaking the responsibility to come to some conclusion as to whether what we are doing is constitutional and to interpret the Constitution in light of legislation that we are passing.

As Chief Justice Burger has reminded us:

In the performance of assigned constitutional duties, each branch of the Government must initially interpret the Constitution, and the interpretation of its powers by any branch is due great respect from the others. *United States* v. *Nixon*, 418 US 683.704 (1974).

I think that states very succinctly that we have the duty to make a judgment on this bill, and I have to come down on the point that the bill is not constitutional.

I think we can only encourage the denigration of that respect that we should have of the courts by saying, in effect, "Well, we don't know about the constitutionality of this, so let us just pass it and let the courts decide on it."

That is one of the reasons why the courts are in trouble these days. There are a lot of legislative acts that have been passed with that kind of disregard for the legal sculpting that ought to be done by legislators. If the laws were more carefully drawn, there perhaps would not have to be quite as much burden on the courts as there is.

In coming to my own conclusion that this bill is unconstitutional I feel fortified by the kinds of judgments that have been placed on the record by distinguished legal scholars and the judges around the country. I am happy to cite as an example one of the letters that was written to Mr. William James Weller of the Administrative Office of Courts on this subject by Judge Alexander Harvey of the U.S. District Court for the District of Maryland. Judge Harvey is one of the distinguished jurists not only in Maryland but in the entire country.

He says:

In my opinion, S. 1423 has serious constitutional defects and, in any event, is inadvisable legislation. I am therefore strongly opposed to the passage of this bill.

First, I do not believe that the proposed statute is constitutional. I do not think that a federal judge can, under he United States Constitution, be removed from office and his salary and retirement benefits terminated except through the impeachment process. Merely because such a process is unwieldy and time consuming does not mean that the Constitution can be interpreted in a manner not intended by its framers.

Mr. President, I ask unanimous consent that Judge Harvey's letter be printed in the RECORD in its entirety at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MATHIAS. But there is also, of course, a question of policy here, as well as a question of constitutionality, and that question of policy is addressed in a similar letter written to Mr. Weller by Judge J. Joseph Smith. In that letter, Judge Smith said:

We can survive the abrasiveness of a Judge Chandler or a Judge Willis Ritter. We could not survive the loss of independent minds which would result from outside monitoring—including monitoring by other judges applying discipline to their fellows.

And that, of course, gets us to this very difficult question of policy.

Mr. President, I ask unanimous consent that Judge Smith's letter also appear in the RECORD in its entirety at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. MATHIAS. I asked earlier whether we had invited our former colleague Senator Ervin to testify, because I have such vivid recollections of his forceful leadership and his eloquent expression of views when the subject of judicial tenure has been before the Judiciary Committee in past years. I regret that he was not here this year to speak again, but even though he has not been here in person, his words are here, and they are available to us. I think they are worthy of being repeated in this debate.

Sam Ervin said:

The separation of powers concept, as understood by the Founding Fathers, assumed the existence of a judicial system free from outside influence of whatever kind and from whatever source, and further assumed that each individual judge would be free from coercion, even from his own brethren.

Maybe those of us who have not been judges do not understand the full import of that phrase: "Free from coercion even from his own brethren." But judges understand that. Hugo Black, the distinguished Senator from Alabama who went to the Supreme Court for a long period of service, said in the case of *Chandler* v. *Judicial Council*, 398 U.S. 74 (1970):

The wise authors of our Constitution provided for judicial independence because they were familiar with history; they knew that judges of the past—good, patriotic judges—had occasionally lost not only their offices but had also sometimes lost their freedom and their heads because of the actions and decrees of other judges. They were determined that no such things should happen here. But it appears that the language they used and the protections they thought they had created are not sufficient to protect our judges from the contrived intricacies used by the judges of the Tenth Circuit and this Court to uphold what has happened to Judge Chandler in this case.

So Justice Black understood what judges could do to each other, and so did Justice Douglas. Justice Douglas, in the same case, said:

It is time that an end be put to these efforts of federal judges to ride herd on other federal judges. This is a form of "hazing" having no place under the Constitution. Federal judges are entitled, like other people, to the full freedom of the First Amendment. If they break a law, they can be prosecuted. If they become corrupt or sit in cases in which they have a personal or family stake, they can be impeached by Congress. But I search the Constitution in vain for any power of surveillance that other federal judges have over those aberrations. Some of the idiosyncrasies may be displeasing to those who walk in more measured, conservative steps. But those idiosyncrasies can be of no possible constitutional concern to other federal judges.

It is time we put an end to the monstrous practices that seem about to overtake us, by vacating the orders of the Judicial Council that brand Judge Chandler as unfit to sit in oncoming cases. Only Congress can take action, unless the Constitution is amended to allow judges to censor, police, or impeach their fellow judges.

That, Mr. President, I think sums up very succinctly what needs to be said both on the question of constitutionality and on the question of policy.

One of the great judges of this century was Justice Frankfurter. He offered a thought which is perhaps useful at this time, when we are finding new powers and new authority within the Constitution to deal with Federal judges; powers that were rejected by the Constitutional Convention itself; powers which have been considered from time to time and always considered to be lacking.

So this new discovery of power to deal with the removal of judges is, I think, akin to new powers that Justice Frankfurter referred to in a totally different context, in which he said:

The history of archeology is replete with the unearthing of riches buried for centuries. Our legal history does not, however, offer a single acheological discovery of new, revolutionary meaning in reading an old judiciary enactment. The presumption is powerful that such a far-reaching, dislocating construction as petitioner would now have us find in the act of 1875 was not uncovered by judges, lawyers or scholars for 75 years because it is not there.

I think that is really the case we are dealing with today. The reason why people have not found, with all of the legal archeological work that has gone on over the years, a way to get rid of unpopular judges, is because it is not there. And there have been plenty of unpopular

judges, and there has been great popular heat against some good judges.

I do not think we can find one today; and with all due respect to my good friend from Arizona and my good friend from Georgia, I do not think we can find these new powers within the four corners of this bill.

EXHIBIT 1

U.S. DISTRICT COURT FOR THE DISTRICT OF MARYLAND,
*Baltimore, Md., April 5, 1978.*

Re The Judicial Tenure Act—S. 1423, 95th Congress.

MR. WILLIAM JAMES WELLER,
*Legislative Liaison Officer, Administrative Office of the U.S. Courts, Washington, D.C.*

DEAR MR. WELLER: Receipt is acknowledged of your memorandum of March 15, 1978, with enclosures. As requested by the Judicial Conference, I am setting forth herein my views concerning S. 1423.

In my opinion, S. 1423 has serious constitutional defects and, in any event, is inadvisable legislation. I am therefore strongly opposed to the passage of this bill.

First, I do not believe that the proposed statute is constitutional. I do not think that a federal judge can, under the United States Constitution, be removed from office and his salary and retirement benefits terminated except through the impeachment process. Merely because such a process is unwieldy and time consuming does not mean that the Constitution can be interpreted in a manner not intended by its framers.

But besides these constitutional infirmities, I believe that this legislation is wrong for policy reasons and would have a serious inhibiting effect on decision making by federal judges. One of the keystones of our federal judicial system is the absolute and unfettered independence of each member of the judiciary. Unlike judges appointed or elected in many states, a federal judge, appointed for life, is beholden to no one. He is therefore absolutely free to decide each case before him on the basis of the facts and the applicable law. His decision need not be affected by the fear of personal consequences or by the desire to please some governmental commission.

I think it makes little difference whether such a commission exists within the executive or the judicial branch of government. A federal judge under present law need not be concerned with the views or predilections of other federal judges. Of course, if he errs in a ruling, appeal procedures are available to correct the error. The superstructure of a Judicial Conduct and Disability Commission with power to look over a judge's shoulder at all times can only result in having a serious inhibiting effect on every federal judge in his decision making.

Finally, I do not believe that the few instances in recent years of a lack of "good behavior" or of inability to perform judicial functions justify the procedures mandated by the statute. The problem instances in recent years have been very few. However, the unfortunate inhibiting effects on all judges will be substantial and certainly not commensurate with the perceived harm.

If further comment concerning my views in this regard are desired, please let me know.

Sincerely yours,

ALEXANDER HARVEY, II,
*U.S. District Judge.*

---

EXHIBIT 2

HARTFORD, CONN., *April 20, 1978.*

HON. IRVING R. KAUFMAN,
*Chief Judge,*
*U.S. Court of Appeals, U.S. Courthouse, New York, N.Y.*

DEAR IRVING: I agree with the tenor of Judge Brieant's letter of April 6, 1978. Impeachment is a cumbersome process. I can recall the time, effort and heavy weight of responsibility on members of the House in determining to present to the Senate articles of impeachment of a sitting judge. As a result minor and some not so minor faults of judges go uncorrected. Where actual corruption exists, impeachment can be and has been used. But no lesser machinery has been devised, or could be, that would place anyone in a position to monitor the day-to-day work of the judges without creating a danger to the judges' necessary independence of thought and action. Pride and peer pressure, as Judge Brieant points out, have kept the system functioning well, with relatively few problems. We can survive the abrasiveness of a Judge Chandler or a Judge Willis Ritter. We could not survive the loss of independent minds which would result from outside monitoring—including monitoring by other judges applying discipline to their fellows.

Our best judges are least swayed by passing changes in public moods, notably in times of crisis. To be sure, some of the best have not gladly suffered incompetence of counsel before them and may have reacted too strongly on occasion. They would be targets of any "disciplinary" system.

"Discipline" for such matters can too easily mask opposition to substantive rulings. That minor faults may be ignored is a small price to pay for the preservation of the fundamental integrity of the judiciary. In my view any "disciplinary" body poses too great a danger of use actually to control the decision making of the judges.

The architects of our system chose independence over control and rightly made removal no easy matter.

The title of S. 1423 is enough to condemn it. "Judicial Tenure" is a constitutional, not legislative, subject.

Sincerely,

J. JOSEPH SMITH.

Mr. BAYH. Will the Senator yield?

Mr. MATHIAS. I am happy to yield to the Senator.

Mr. BAYH. Mr. President, I want to express my deep appreciation to my friend and colleague, my coworker in the vineyards on previous constitutional matters, for his succinct and interesting dissertation. I particularly concur in the way in which he stresses the critical constitutional question, which it seems to me is the fundamental question we have to resolve the best we can, and having resolved that one way or the other to go on to the second point which he also emphasized, the policy question.

I concur with him. I think this legislation fails on both grounds. I do not see how in the world we can take the phrase "good behavior" which was clearly in the context as used by our Founding Fathers to be "good behavior, appointment for life," on one side, and appointment at the pleasure of the King on the other side, and use that as a reason to totally subvert the impeachment clause.

I would like to point out to my good friend from Maryland, if he will indulge me, matters that I did not have at my fingertips when the Senator from Georgia and I were discussing this earlier, a matter which the Senator from Maryland is very clear about.

As will be recalled, the Senator from Indiana asked the Senator from Georgia why the Founding Fathers did not give some more instructions to us other than just the use of the words good behavior as a suggestion that further implementing legislation was to be expected.

I would suggest to my good friend from Maryland that when we look at the specific degrees of particularity that are contained in the Constitution as far as how you remove House Members, as the Senator will recall in section 5, in article I, it goes into some detail about how the House shall govern itself. It sets its own rules.

Mr. MATHIAS. The Senator is exactly right. The Constitution provides that Congressmen can remove Congressmen, Representatives are removed by Representatives, Senators are removed by Senators, but it does not say that judges are removed by judges. That is a very significant difference.

Mr. BAYH. The only place it talks about removal being applicable to judges is in the impeachment clause. I concur with the sense of my good friend that this legislation does not pass muster on the constitutional merits, and it does not pass muster on policy merits.

If we can think for a moment in terms of Judge Frankfurter, instead of using the term bad judge, to use the term unpopular judge, that being a better phraseology in today's terminology, can the Senator imagine the kind of pressure that can be put on the panel of judges who wanted to maintain the dignity and the acceptance of the judicial branch as they bore in on some judge because of his position on some of the sensitive issues of abortion, of prayer, of busing, some of these things that cause all of us nightmares? I want a judge to feel he or she can stand up and say to any other judge that he is right until proven wrong by the Supreme Court of the United States, or until two-thirds of this body convicts him according to the impeachment clause of the Constitution.

I thank my friend. I am glad to be with him on this point.

Mr. MATHIAS. I thank the Senator from Indiana not only for this intervention but also for carrying so much of the burden of this side of the debate throughout the day. He has demonstrated his wonderful knowledge of the Constitution.

I might say to him, because he remembers sitting for many hours over a period of many years in the Judiciary Committee with Sam Ervin, that perhaps a good place for me to pause is to quote again Senator Ervin, who tried to sum up in the same eloquent way as the Senator from Indiana has just done not only the constitutional questions, the technical questions, but the human questions.

He used these words to do it. He said:

The Founding Fathers knew that the form of Government they established would not create a judiciary composed of judicial angels who could do no wrong. They knew the activities of a few judges might handicap the operation of the system. But at the same time, they realized that individual liberty is best protected by an independent judiciary composed of judges who were subject to the Constitution alone. They had learned the lesson of history, and attempted to build safeguards into our system which would prevent its repetition. We must not

reject their wisdom and destroy our own freedoms by regarding the Constitution they drafted as a piece of ancient parchment which can be folded and rearranged to suit the whims of individual men.

That expresses, I think very beautifully, that whole range of history which stretches into great art from Herodotus through the millennium down through the Constitutional Convention and to this very debate today.

I would hope that the Senate would read the lessons of history, would learn from the lessons of history, and would avoid a repetition of the problems that history tells us about. In order to do that, I think we have to reject this bill.

Mr. President, may I inquire how much time I have remaining?

The PRESIDING OFFICER. The Senator has 18 minutes remaining.

Mr. MATHIAS. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI. Mr. President, how much time does the Senator from New Mexico want?

Mr. SCHMITT. I would like 5 minutes on the bill.

Mr. DECONCINI. I yield 5 minutes to the Senator from New Mexico.

The PRESIDING OFFICER. The Senator from New Mexico may proceed for 5 minutes.

Mr. SCHMITT. Mr. President, on a variety of other occasions since entering the Senate, and I am sure on a variety of other occasions in the future, I have opposed what probably on many occasions will be called unnecessary tampering with the Constitution. I think whenever possible we should not tamper with the Constitution. I am afraid that S. 1423, the Judicial Tenure Act which is under consideration at this time, is an example of such unnecessary tampering.

On its face, with some particularly glaring cases having been in the public view recently, this bill may appear reasonable. It would establish within our judicial branch of Government a system for investigating and resolving allegations regarding the conditions or conduct of members of our heretofore independent Federal judiciary, conditions or conduct which may be inconsistent with the good behavior requirement of article III, section 1 of the Constitution of the United States.

That article and section reads as follows:

> The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish. The Judges, both of the supreme and inferior Courts, shall hold their offices during good Behavior, and shall, at stated Times, receive for their Services a Compensation which shall not be diminished during their Continuance in Office.

Article II, section 4, however, of that same Constitution, sets the standards for removal of the President, Vice President, and all civil officers of the United States, that is, officers such as those in the judiciary. For purposes of the Constitution, Federal judges are civil officers. That section, article II, section 4, reads as follows:

> The President, Vice President and all civil Officers of the United States, shall be removed from Office on Impeachment for, and Conviction of, Treason, Bribery, or other High Crimes and Misdemeanors.

Mr. President, what this bill would do is to remove from the legislative branch, the Congress, the sole constitutional right to remove Federal judges from office. Furthermore, it would lessen the standards for removal as they apply to our Federal judges. Instead of treason, bribery or other high crimes and misdemeanors, our Federal judges could under this bill, be removed from office for "lack of good behavior," whatever that means, or may be deemed to mean with changing times. They could be removed not by the elected Congress but by a small group of men not responsible to the Congress or to the people, for the most part.

Mr. President, this bill represents a most dangerous threat to our independent Federal judiciary, the judicious interpretation of our Federal laws, and our freedoms in general. Unnecessary tampering with the Constitution almost invariably will, in one way or another, affect at least the future freedom of our citizens. One of the reasons why our country has prospered is, in large measure, due to the structure, the designated structure and independence of the Federal judiciary. Because we have judges who are not afraid to render unpopular decisions if they are required, because we have judges who are protected from the temporary furor of those same unpopular decisions, there is, I believe, no better or fairer judicial system in the world today or, in fact, in history, at least a system that oversees the judicial problems of a country of the size and complexity of the United States of America.

The proponents of this measure claim that the actions of a few bad judges require this change that the experience of 190 years is inadequate. They claim that the fact that in our country's history, only eight judges and one Justice have been impeached and only four of those convicted makes this legislation necessary, because it shows how difficult it is to remove bad judges. Well, I look at the same record but interpret it differently. It should not be easy to remove Federal judges from their office. And the fact that it has been deemed necessary to try only nine times in 190 years is some indication of how well the system has worked.

Our Founding Fathers, the drafters of our Constitution, wisely made it very difficult to remove such judges. They had the foresight to realize that an independent Federal judiciary was absolutely essential if the rights of the citizenry were to be fully protected, not only in the present, but in the future. S. 1423 would dangerously erode the protection designed by our Founding Fathers. I am afraid.

To those Senators who are undecided on this issue, I commend for reading the excellent additional views of Senators BAYH and Senator MATHIAS. In those views, our distinguished colleagues clearly rebut the arguments of the proponents of this legislation.

If we want to avoid the situation of Federal judges not conforming to the requirements of "good behavior"—again, whatever that term is supposed to mean—then let us take more care in whom we place on the Federal bench. In my home State of New Mexico, I am happy to say, my senior colleague (Mr. DOMENICI), the New Mexico Bar, and I have established a New Mexico Federal Judicial Selection Commission to make recommendations as to those who should sit on the Federal bench, and for those recommendations to be made solely on merit. This process has already been activated for the appointment of one Federal judge and for the appointment of a Federal attorney. Hopefully, by using the highest standards for selection to the Federal bench, later problems with Federal judges can be avoided, but if not, there are other ways to address these problems. If the offense is that which is outlined in article II, section 4 of the Constitution, then impeachment is the proper step to be taken.

If a Federal judge's alleged offenses did not fall within the scope of article II, section 4, but rather was a failure to maintain the standards of good behavior, if they can be judged as standards, then there are measures which can be taken and have been taken by a higher judicial authority. For example, no cases would be assigned to that particular judge.

History has shown that our independent often courageous Federal judiciary, designed by our ever-seemingly-wise Founding Fathers who knew the dangers of the passions of the moment, has been the greatest bulwark for our freedoms. Passage of this bill would be a monumental blow against that independent branch of Government.

Finally, Mr. President, I shall again, as I am sure has been done before, quote Plato, who in the Republic wrote:

> Mankind censures injustice, fearing they may be victims of it and not because they shrink from committing it—

"It" being injustice.

This bill should be defeated and I commend my colleague from Indiana and my colleague from Maryland for their stalwart defense of the judiciary.

Mr. BAYH. Mr. President will the Senator yield for just a moment?

Mr. SCHMITT. I should be happy to yield, but I am afraid my time has expired.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BAYH. I want to thank the Senator for presenting a very fine statement.

Mr. THURMOND. Mr. President, I yield 5 minutes to the Senator from New York.

(Mr. NUNN assumed the chair.)

Mr. JAVITS. Mr. President, I have been a lawyer all my life, in addition to other careers, and I am deeply disquieted by this bill, though I admire the ingenuity and the craftsmanship which Senator NUNN has put into it. I should like to consider whether this is the best way. I realize there is a problem.

There is a problem, and it has been very adequately described, of whether impeachment and trial by the Senate are

simply not too difficult a course to deal with judges who may be inadequate to the task for very profound reasons. But the Federal judiciary has been such a bulwark of justice and selflessness, as far as anybody can be selfless, as a group in this country for 200 years, that I am very reluctant to see judges judged by judges. Senator NUNN has crafted a plan which is essentially the State plan. Many States have this kind of procedure. The Federal courts have been a unique body precisely because of life tenure and I think, on the whole, we have paid very little for this remarkable precaution.

I am deeply moved, because I, perhaps, had some of the most important times in my own career in the Senate, by the experience of Judge Johnson, of Alabama, who, because he believed in enforcing the Constitution, might easily have been removed by panels of judges from his own region, still suffering under what was then called the social order of that particular region.

When we consider one such case as compared with others where judges might have been drunk or irritated or otherwise irresponsible and the modern ability to strip them of their functions and of their cases as a way of dealing with that kind of situation, I am very deeply disturbed, still, by the fact that, in the Federal courts, we would establish a system by which judges could be removed by other judges.

I thought of, because it did not have a constitutional problem, the possibility of giving the right to Congress, by concurrent action of both bodies, to sustain or overturn a determination of removal by this council. That may be a way. I do not say it is or it is not, but it would require deliberation and consideration.

I deeply believe that the present occupant of the chair has been responsible for a historic breakthrough in trying to think this through and prescribe a remedy. I am not prepared to endorse that remedy here and now, because I believe it is so portentous for the history of our country. I understand there is not a bill in the House; there may not be. So this may go nowhere right now.

I wish that it were possible for all of us, paying due tribute to the Senator from Georgia, to hold it over until next year and to again consider it.

I emphasize my respect and admiration for the professional craftmanship which went into this bill, but at this time, because I have to vote yea or nay, I do not feel that I can support it.

But I am deeply interested. I may be able to support this or a variant next year. But I feel we all ought to deliberate on it very critically and seriously and that a good deal more exploration needs to be made, not inordinate in time, but that we should, and I have no doubt we will, come to a decision on this particular matter in the year 1979.

I hope very much we will have that span of time in which to do it, do it intelligently and do it responsibly.

I thank my colleague for the time.

The PRESIDING OFFICER. Who yields time?

Mr. BAYH. Will the Senator yield me just 1 minute?

Mr. THURMOND. I yield 1 minute.

Mr. BAYH. I want to say to my distinguished colleague from New York, who has had long legislative experience and a wealth of legal experience before coming to this body, that I think his contribution to this discussion is very rewarding.

I think we share common concerns with our distinguished colleague from Georgia that there is a problem that needs to be resolved, but that there is a better vehicle to be utilized, rather than this one which flies in the face of the Constitution on the one hand, and the good policy of independent judiciary on the other.

I just wanted to express my appreciation to my friend and colleague from New York.

Mr. JAVITS. I thank my colleague.

Mr. THURMOND. Mr. President, I yield 2 minutes to the distinguished Senator from Wyoming.

Mr. WALLOP. Mr. President, I rise in support of S. 1423, the Judicial Tenure Act. This legislation is designed to build public confidence in our Federal courts by establishing a new procedure for involuntarily retiring, censuring or removing Federal judges from the bench for conduct which falls short of the good behavior standard set forth in article III, section 1 of the Constitution.

In recent years, there has been tremendous demand for accountability of all public officials in the executive, legislative, and judicial branches of government. The American public deserves honest and scrupulous service from its elected and nonelected public officials, including its judges. This legislation is intended to provide greater accountability within the Federal judiciary. S. 1423 accomplishes this by establishing an alternative to the time-consuming and impractical impeachment procedure provided for in the Constitution for the removal of Federal judges for conduct inconsistent with article III's good behavior standard.

Over the history of this country, impeachment has proved to be an ineffective mechanism for disciplining or removing Federal judges whose conduct casts a cloud on the judiciary. Only eight Federal judges and one justice have been impeached and of that number, only four judges where convicted and removed from office. The last impeachment and conviction of a Federal judge occurred in 1936. It is apparent, then, that while the impeachment procedure is available for removing unsuitable Federal judges whose conduct does not conform to the good behavior standard of the Constitution, it has not provided an effective vehicle for disciplining members of the Federal judiciary. As a result, public confidence in the Federal courts has suffered.

Mr. President, S. 1423 provides a needed alternative to this cumbersome and infrequently used impeachment process. It establishes within the judicial branch a method for investigating and resolving complaints against Federal judges who are alleged to have acted inconsistently with the good behavior standard of article III, section 1, which reads as follows:

> The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish. *The judges, both in the supreme and inferior courts, shall hold their Offices during good behavior*, and shall, at stated times, receive for their Services, a Compensation, which shall not be diminished during their continuance in office. (Italics added.)

It is significant that S. 1423 envisions a disciplinary system for Federal judges which rests within the judicial branch of Government. The circuit committees, the Judicial Conduct and Disability Commission and the Court of Judicial Conduct and Disability established by this legislation consist of Federal judges who render decisions on the merits of the complaints filed with them. By placing the responsibility for disciplining, by involuntary retirement, censure or removal, those Federal judges whose conduct is inconsistent with the good behavior standard within the judicial branch, S. 1423 protects the independence and integrity fundamental and essential to the functioning of our Federal courts. This also preserves the separation of powers concept fundamental to our Constitution. To further insulate the members of the Federal judiciary from political, personal or philosophical assaults, S. 1423 provides for the dismissal of complaints which relate "to the merits of any decision or procedural ruling of a judge, and complaints relating to the condition or conduct of a judge which is not connected with his judicial office or which does not prejudice the administration of justice by bringing the judicial office into disrepute" (section 383).

Mr. President, the time is ripe to enact implementing legislation for the good behavior clause in article III of the Constitution. It is in keeping with efforts of this Congress to improve the Federal judiciary and its service to the public. Congress is on the verge of adding 152 new Federal judgeships to the judiciary. The Improvements in Judiciary Machinery Subcommittee and the Judiciary Committee have devoted their energies and attentions to providing more meaningful and greater access for this country's citizens to the Federal courts. S. 1423 will establish for the first time a disciplinary system within the judicial branch which will enhance the reputation, integrity and thereby, the effectiveness of our Federal courts. It would be ironic indeed if we achieve greater access to the courts only to find incompetency in the bench.

It would be shortsighted not to briefly discuss the principal objection argued by opponents to S. 1423, that is, that impeachment is the sole and exclusive constitutional means for removing Federal judges from the bench. It is the opinion of this Senator and of the Judiciary Committee which considered this legislation that S. 1423 will withstand constitutional challenge. While article I, section 2 of the Constitution provides that "the House of Representatives shall have the sole Power of Impeachment," it does not expressly bar other methods of disciplining or removing Federal judges. The committee report explores the constitutional and legal bases for

this legislation which I would incorporate by reference into my statement. I am persuaded by the arguments in support of the constitutionality of S. 1423 advanced by the distinguished constitutional law expert from Harvard Law School, Raoul Berger, whose views are referred to in both the hearing record and report on S. 1423. Having considered arguments to the contrary, I am persuaded that S. 1423 will pass constitutional muster and survive even the most rigid scrutiny of the Supreme Court.

It is noteworthy that support for the legislation comes from groups who have a strong interest in preserving the independence and strength of the judiciary and who are well versed in constitutional law. These organizations include the Judicial Conference of the United States, the American Judicature Society, the American Bar Association as well as the Department of Justice. In addition, the very distinguished jurists, Chief Justice Burger, Mr. Justice Rehnquist, and Mr. Justice Blackmun, have in extrajudicial statements indicated that they did not see a threat to judicial independence in predecessor measures to S. 1423.

Mr. President, before closing, I would commend my colleague and chairman of the Improvements in Judiciary Machinery Subcommittee, Mr. DECONCINI, for his efforts in bringing this important legislation before the Senate. Compliments are also in order for the diligence of the subcommittee staff in producing the excellent piece of legislation before us now.

Mr. President, I have heard the arguments on both sides and I remain convinced that this is a needed change to promote publice confidence in the judiciary. I endorse S. 1423 and encourage my colleagues to do the same.

I thank the Chair.

Mr. THURMOND. Mr. President, I yield 5 minutes to the distinguished Senator from Virginia.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. SCOTT. Mr. President, I appreciate the Senator yielding.

I believe that this proposal before us, the effort to provide tenure for our Federal judges, is a very fine thing. I feel that we should, that every official elected and appointed should from time to time have to account for his stewardship.

We in the Senate are elected for periods of 6 years and Members of the House of Representatives for 2 years.

So far as I know, all public officials from time to time have to account for their stewardship. Yet we find in the Constitution in article III the judicial power is vested in the Supreme Court and such inferior courts as the Congress may from time to time ordain and establish, and it provides that the judges, both of the Supreme and inferior courts, shall hold their offices during good behavior.

During good behavior, I believe, is the fly in the ointment insofar as this bill is concerned.

In my judgment, the bill is contrary to the Constitution. I think it is an act of futility for us to pass this measure, because I believe the only way that we can remove a Federal judge is through the impeachment process, and that is provided for. The House of Representatives impeaches, the Senate tries anyone that has been impeached by the House and has the power to remove that person from office. I feel that when we attempt to short circuit the regular procedure as is provided in the Constitution that we are attempting an unconstitutional act.

I know in some of our State courts we do have similar procedures, but in the State courts the judges hold their offices for terms.

In my own State of Virginia, a trial judge is elected by the General Assembly for a period of 8 years. A judge of our State Supreme Court is elected by the General Assembly for a period of 12 years. We have a procedure somewhat akin to what is provided for in this bill, but it is a different situation.

During good behavior, that is lifetime tenure unless removed by the Senate after the House has impeached.

I have offered a measure that would provide for tenure whereby we would amend the Constitution to provide that for the reconsideration of a judge every 10 years he could be renominated, the Senate would have the opportunity to reconfirm. To me, this is the proper procedure to follow and not the procedure that is provided in this bill. A good effort being made, but going at it in the wrong manner.

I hope this bill will be defeated, because I do not believe the Senate should pass an unconstitutional act, knowing it to be contrary to the Constitution, or having a reasonable doubt as to its constitutionality, and passing that burden on to the Supreme Court.

Did my colleague from Maryland want me to yield?

Mr. MATHIAS. I just wanted to have a moment to thank the Senator for his participation here and to say that I agree with him absolutely on both points he made, that if the change is to be made, the Senator from Virginia is exactly right, it has to be made through the amending process.

Mr. SCOTT. We had this matter up during the 94th Congress. The distinguished occupant of the chair, the junior Senator from Georgia, appeared before the subcommittee. We had others that appeared before the subcommittee. No action was taken by our subcommittee at that time and for the primary reason that we were of the opinion that this proposal was contrary to the Constitution.

Now it has been changed in that it has added the Justices of the Supreme Court, but the Justices of the Supreme Court would be handled in a different manner.

It would be recommended to the House that impeachment proceedings be brought against a Justice of the Supreme Court if he did not behave in the proper manner, if he were found to be guilty of wrong behavior, and perhaps that phase of it might be constitutional, where a recommendation would be made and the House and the Senate would act in a constitutional manner. But the bill, in my judgment, is contrary to the Constitution.

Does the Senator from Florida desire to speak?

Mr. CHILES. I desire to speak a moment on the bill, if I may.

Mr. SCOTT. The Senator from South Carolina yielded 5 minutes, and if time remains, I yield it to the Senator from Florida.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. THURMOND. Does the Senator wish to speak for or against the bill?

Mr. CHILES. For the bill.

Mr. THURMOND. The Senator from Arizona has time.

Mr. DECONCINI. I yield 5 minutes to the Senator from Florida.

Mr. CHILES. Mr. President, I welcome the opportunity to say a word for this bill.

If there is any concern by the distinguished Senator from Virginia, I say to him that I worked for this bill, and I consider it to be constitutional. I want to relieve any concern he might have.

All of us are constitutional experts, by virtue of being in the Senate. I suppose that is one of the things that go with us. I just want to say that I hereby pronounce it constitutionally sound, and I think it will stand the stamp of time in that regard.

We have a provision such as this, and we have a constitutional provision that virtually follows the U.S. Constitution in regard to the way we are set up to provide for impeachment.

Mr. MATHIAS. Mr. President, will the Senator yield?

Mr. CHILES. I yield.

Mr. MATHIAS. I think the Senator is exactly right in saying that we have a duty to make that constitutional decision. I believe he has made the decision all wrong, but he has accepted the responsibility that we have to make that decision.

Mr. CHILES. I am delighted to accept it. I accept it for the distinguished Senator from Maryland, too, if he would like me to.

Mr. MATHIAS. The only problem is that the Senator from Florida has only 1-percent shot.

Mr. CHILES. Constitutional tests have been made on this in Florida. We have a constitution that is very similar. We copied the U.S. Constitution in setting up our provisions for the judiciary.

We found that we were in a situation in which we had impeachment processes, and I happened to sit in on the impeachment of a judge. The trial lasted days in the House. The House voted for impeachment. It went to the Senate, where the trial lasted for a period of weeks—2 or 3 weeks at least.

At that time, there were not sufficient votes, because I think it required a two-thirds vote of the Senate, and a tremendous expense was incurred. I am sure that made many people feel there is no reason to try to bring a judge up on charges. The legislature cannot afford it, the people cannot afford it, nothing is going to happen, and there is not going to be discipline.

That went on for a period of time, until we changed our procedure, and we provided that we could discipline judges, and that has worked very satisfactorily in our State.

I believe this is something we should try to do. The court certainly will rule on the question, if the matter is brought before it, and it will have occasion to instruct us as to its final ruling, as it does on every act we pass.

The committee has had a chance to look at this. It comes before us from the committee. A lot of work has gone into this. It seems to me that this is a pressing problem that we have in the country today.

We see the feelings of the people with regard to their respect for the courts, knowing that there is no way that we in the Senate can act properly in our role to try to serve with respect to impeachment, and knowing there are many times when we should not be impeaching but simply discipline a judge, to see that we are going to be able to have the proper judiciary.

I support this bill, and I commend the distinguished Senator from Georgia, who has been working long and hard to pass it. He has had support in this matter from many distinguished members of the judiciary who know this has to be done. They are outstanding leaders of the bar who know that we have long needed this kind of legislation. I support the bill.

Mr. BAYH. Mr. President will the Senator from South Carolina yield me a minute, so that I may ask a question of the distinguished Senator from Florida?

Mr. THURMOND. I yield 1 minute to the Senator.

Mr. BAYH. I appreciate the concern of the Senator from Florida and his sharing the Florida experience.

In dealing with this problem, did Florida amend the State constitution?

Mr. CHILES. I think we did it two ways. We had a procedure that was set up statutorily. We later changed it and had a judicial article changed, too.

Mr. BAYH. I bring this up, because 16 States do have this kind of mechanism, all of which felt that this was important enough that they should amend their constitution. It is a concern some of us have here, that we are getting into an area, when we go this route, of violating the Constitution.

I salute the Senator from Florida for recognizing the problem, although I do not agree with the remedy.

Mr. SCOTT. Mr. President, will the distinguished Senator from South Carolina yield me 30 seconds on the bill?

Mr. THURMOND. I yield a half minute to the Senator.

Mr. SCOTT. Mr. President, I have looked for authority with respect to this bill, and the only time the Supreme Court has addressed itself to this question, it was done by Mr. Justice Black and Mr. Justice Douglas. These were opinions in the case of Chandler against Judicial Council.

They were dissenting opinions, but they were not dissenting as to the fact that Federal judges, under our system, can be removed only through the impeachment process.

When we know that a bill is unconstitutional or have reason to believe it is, I believe we have a responsibility, as Senators, not to pass legislation, if we have reason to believe it is contrary to the Constitution.

I thank the Senator for yielding.

Mr. THURMOND. Mr. President, I yield myself 5 minutes.

Mr. BAYH. Mr. President, may I ask the Senator from South Carolina to give us a breakdown of the time remaining?

Mr. THURMOND. Will the Chair announce the time situation?

The PRESIDING OFFICER. The Senator from South Carolina has 19 minutes. The Senator from Arizona has 98 minutes.

Mr. DECONCINI. I yield the Senator whatever time he wishes.

Mr. THURMOND. Mr. President, although I am in control of time for those opposed to the bill and the distinguished Senator from Arizona is in control of time for those in favor of the bill, he is yielding me such time as I may require to speak in favor of the bill.

Mr. President, I already have spoken on this bill, and I shall say only a few words more. I agree with the distinguished Senator from Virginia that a Member of this body should support only legislation which he feels is constitutional.

In fact, when I came to the Senate, I resolved that I would ask myself three questions when I voted on a piece of legislation:

First, is it constitutional?

Second, is it wise?

And, third, can we afford it?

So I heartily agree with the able Senator from Virginia that no Senator should vote for this bill unless he feels it is constitutional.

I presume no one knows for sure that this bill is constitutional. There is no decision of the Supreme Court on this question. There is no precedent for us to go by. But I want to say this:

There is nothing in the Constitution that I know that would prohibit Congress from passing this legislation.

Article II, section 4, of the Constitution reads this way:

> The President, Vice President and all civil Officers of the United States, shall be removed from Office on Impeachment for, and Conviction of, Treason, Bribery, or other high Crimes and Misdemeanors.

Mr. President, that says that if the President or the Vice President or civil officer is guilty of those things, on impeachment and conviction of those things, he shall be removed. He has to be removed if he is found guilty. But it does not say that this is the only way that they can be removed and it does not say that this is exclusive. Because it does not say exclusive, it seems to me Congress will have the right to pass this legislation.

Under this bill, also, judges may be better off than if they are impeached and tried because under this bill there is other action that can be taken. There can be involuntary retirement for a judge unable to discharge his duties efficiently because of permanent mental or physical disability, or a judge can be removed or censured for conduct inconsistent with the good behavior standard in article III. So this gives flexibility to the court that would act on this matter to determine whether a judge should be tried for impeachment or whether he should be tried for lesser conduct of misbehavior and maybe censure him or give him lesser punishment.

Mr. President, I realize, as has been stated, that Senators here on both sides are thoroughly conscientious and there is ground to take on either side that the bill is constitutional or unconstitutional, but those are merely opinions. There is nothing definite and no one can get up and say that this bill is unconstitutional or even say that it is constitutional. We can merely express an opinion.

I think it is constitutional; therefore, I support it. I think it has advantages. I think we need this flexibility. I think it will be a procedure where a judge will be considered by his peers and that might be better than to be considered by the House of Representatives and the Senate with a long drawnout trial. It seems to me that this will promote better administration of justice than just relying on impeachment alone. That being the case, I am supporting the bill and I hope it will pass.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. MAGNUSON. Mr. President, I ask the Senator from South Carolina—the Senator from Arizona is not here—how does this bill affect senior judges? We have a system now with Federal judges when they reach the age of 70 they technically retire but they still come in and try cases. Does it affect them just the same as the full-time judges?

Mr. THURMOND. Mr. President, in reply, I will say they will not be affected on that.

Mr. MAGNUSON. No; I hope not. They are merely called in to help a crowded calendar.

Mr. THURMOND. That is right.

Mr. President, this merely provides in the case of misbehavior what would be done.

Mr. MAGNUSON. All right. I just wanted to know that.

Mr. BAYH. Mr. President, will the Senator yield me 4 or 5 minutes, please?

Mr. THURMOND. Mr. President, I yield 5 minutes to the distinguished Senator from Indiana.

Mr. BAYH. I might not want to use it all.

I only wish to say to my friend from Washington that under normal circumstances the response that he received would be accurate, but in the event that a majority of the judges on this panel thought that when you got beyond age 70 you were no longer competent performing the duties of a judge, they could drag you off of there the same as otherwise would be the case.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. BAYH. I am glad to yield.

Mr. MAGNUSON. What happens is that the presiding judge in, say, the

western district of any area, calls upon these people to come in and help him with a case.

Mr. DECONCINI. That is right.

Mr. MAGNUSON. So his peers have acted upon him in a sense if they think he is capable of trying the case.

Mr. DECONCINI. That is right.

Mr. MAGNUSON. They do that when they assign the case to him. Is that not correct?

Mr. DECONCINI. That is right.

Mr. BAYH. That is accurate. But if a majority of the panel disagreed with the judge who was asking for help, in my judgment they would have every opportunity to exercise the same removal power.

Mr. DECONCINI. If the Senator will yield, that is correct, but that would be a frivolous complaint. It has to be something of substance. A complaint would have to be filed. The fact he is 72 years old would not be enough and would be considered frivolous and dismissed.

Mr. BAYH. Of course, the complaint would not be based on the fact he was 72 years old or 66 years old, or whatever it was, but because he was unable to operate. It is the same kind of situation we have when we are trying to deal with a fellow who was sitting there and just was not working. Something has gone haywire and he was not functioning properly.

I cannot see how you can say you are going to give this panel an opportunity to remove the full-time judge without at the same time saying they are going to have the power to deny a part-time judge of having the opportunity to serve.

Mr. DECONCINI. The Senator has interpreted it incorrectly. You have to file some reason for the removal with your complaint. The Commission then sends it back to the local districts to be reviewed, and they are going to make some determination. They cannot dismiss that. They then forward it back with their recommendation. They can recommend that it is a frivolous complaint; that is only done because they do not think he is popular or they think he is too old.

Mr. BAYH. The Senator from Indiana has not stated the case well, and I apologize.

Let us take whatever the criteria is that the Senator from Arizona feels is sufficient to let this panel remove a judge, whether it is, drunkenness, adultery, blasphemy, playing golf, and going fishing instead of sitting and hearing cases, whatever it might be for which you are going to be removed. Let us accept that that case is going to qualify and the majority is going to vote to remove that judge. Suppose you can make the same case, with all of the same ingredients, about a part-time judge who is asked to serve. Is it not fair to suggest that the power to remove a full-time judge and prohibit him from serving is also there as far as removing a part-time judge?

Mr. DECONCINI. Yes; that is correct. But if the Senator is trying to leave the impression that it would be subject to abuse in the fact that it would be filed because a certain case was designated to a senior status judge, I do not think that is realistic.

Mr. BAYH. The Senator did not say that.

Mr. DECONCINI. What objection does the Senator have?

Mr. BAYH. The Senator suggested that he cannot categorically state, as my friend from Arizona said, this would not apply to part-time judges who are asked to serve. That is not what the Senator meant but is what the Senator said.

The fact is the same criteria would apply to part-time judges as are applied to full-time judges. If the majority of the judicial panel said, "You are not qualified to serve," out you go in either case.

Mr. DECONCINI. But the Senator from Indiana said the panel could take them off because they were senior panel judges.

Mr. MAGNUSON. He does not ask to serve particularly; he merely says he is available for service, and the presiding judge—they have meetings—and he picks up Judge A who says "Here is a big case and the calendar is full," and he is willing to take on the case, and that is what happens. He does not ask to be put on.

Mr. BAYH. I do not know who has time, but I would like to pursue this for just a bit.

The PRESIDING OFFICER. Does the Senator yield time?

Mr. DECONCINI. Yes.

Mr. BAYH. This is really the kind of thing that worries the Senator from Indiana. If you have a clear-cut case of negligence, malfeasance or misfeasance and the judge is not qualified to serve, then I am not worried about what the panel is going to do. They are going to make the right decision.

I am concerned about the marginal question of whether he is qualified or is not qualified, and then in that instance the fact that the fellow is older might have the kind of an impact on the mind of those judges sitting there who want to see the judicial system turned over and old people purged and young people brought in. That is the kind of thing that could enter their minds, and that is the kind of thing that really concerns me about this legislation.

Mr. DECONCINI. But the Senator is using "qualified" as the standard. The standard is good behavior. That is the difference as to whether he qualifies. If he did not qualify he should not be on there in the first place. He should be there on good behavior.

Let us take the Senator's situation that he cited where someone files a complaint that is questionable, and the court decides to hear it. The judge at that time is able to have counsel and is entitled to full due process to present his side of the story in opposition to the complaint. Every protection is there.

Then after that it is subject to Supreme Court review. I do not know what more protection you can grant except, as the Senator suggested earlier eloquently, not to have this.

Mr. MAGNUSON. What bothers me a little is the question of is he qualified or not qualified for the particular case they ask him to come in on or is he not qualified to handle any case.

Mr. DECONCINI. That would not be subject to this bill at all.

Mr. MAGNUSON. What about a lawyer on one side or the other, the calendar is full, the regular judges are just rolling, so here is a retired judge—they call them senior judges—who says he would be willing to hear the case. Can a lawyer file a complaint against him on the basis that he is not qualified because of age? Could that happen?

Mr. DECONCINI. If a lawyer files a complaint based on that set of circumstances it would be dismissed because it would be considered frivolous. It is outside the jurisdiction of the Commission.

Mr. MAGNUSON. The judges would not ask him unless they thought he was qualified, I would assume——

Mr. DECONCINI. That is right.

Mr. MAGNUSON (continuing)—To handle this particular case, I am talking about the senior judge.

Mr. DECONCINI. Mr. President, I ask for the yeas and nays.

Mr. BAYH. Mr. President, will the Senator yield to permit me to ask him a question? In discussing this with the Senator from New York and the Senator from Maryland we do not want to be put in a position where by opposing the bill, opposing the efforts that the Senator from Georgia and the Senator from Arizona have embarked upon, that we give the impression that we do not recognize that there is a problem.

What I would like to do at the proper time and, frankly, you probably will beat us—I do not know where the votes are on this—but I would like to have this matter recommitted to the committee for further study without instructions. But I think that is what we want to do, not to say we are against this effort but we think this matter needs more thorough discussion, and I say that right now.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAYH. Is the proper time to make that request when all time is yielded back?

The PRESIDING OFFICER. The Senator can make that request now with a time limit of 20 minutes under the present order.

Mr. BAYH. Let me make that request. I move, Mr. President, that the bill be recommitted to the Judiciary Committee for further consideration. I will ask for the yeas and nays and will say, unless someone else desires to do this, that I do not want to prolong it unnecessarily, so, it would seem to me, there would be no need to have a roll-call on passage on this, but to just have one vote on the measure.

Mr. THURMOND. Mr. President, if the Senator has made the motion, I move to table the motion.

The PRESIDING OFFICER. There are 20 minutes on this particular motion. Until that time is yielded back, the motion to table would not be in order. There are 20 minutes.

Mr. THURMOND. Is the Senator ready to yield back the time?

Mr. BAYH. I think we have heard all that we possibly can.

Mr. SCOTT. Mr. President, will the Senator yield briefly? As I understand it, we did not have a rollcall vote on reporting this bill. In fact, I do not even remember when we passed it out from the Committee on the Judiciary. I do not doubt for a moment that we did this, but apparently it was without a rollcall vote, and on a matter of this importance certainly the Committee on the Judiciary should have a rollcall vote, so I support the motion the distinguished Senator from Indiana proposes that it be recommitted to the Commitee on the Judiciary.

Mr. BAYH. I appreciate the remarks of the Senator from Virginia.

Mr. THURMOND. Mr. President, from what I understand, both sides are ready to yield back the time. There will be a motion by the distinguished Senator from Indiana to recommit the bill, and at that time I will move to table that motion.

The PRESIDING OFFICER (Mr. TALMADGE). The motion to recommit has already been made. The question is on yielding back the 20 minutes.

Mr. BAYH. I would just like to make a 1-minute observation.

The thrust of this motion is very much in line with what we have been trying to say. There is a problem on occasion with judges who are not qualified to serve and that this matter should be handled in a way in which the Judicial Conference is given additional power, they make strong recommendations, and we can legislate, the Congress being required to act upon receiving certain kinds of recommendations.

We do not take away the right of Congress to impeach judges and give it to a panel of judges, this kind of unheard of authority. That is what we are trying to do. I would hope we could put it back in committee and come up with a solution to the problem.

Mr. NUNN. Mr. President, will the Senator yield on his 10 minutes just for a brief comment? I have no objection to proceed to a motion to table a motion to recommit, and certainly if that motion fails, of going ahead with a motion to recommit. I hope that will be defeated. But I would hope after years and years of debate on this particular issue, considering the importance of the issue, we ought to have a rollcall vote if the motion to recommit is defeated.

I would like to have a rollcall vote on passage of this legislation. If the sense of the Senate is such that we have a majority or very close vote on this, it is obvious it probably is not going to get very far in the House, but I think we ought to know this. This has been worked on for some 35 or 40 years, and some will say 100 years, and I think we ought to find out the sentiments of the Senate about whether we are going to do anything about some of the abuses that have taken place and continue to take place on the Federal bench.

Mr. THURMOND. Mr. President, if we are ready to yield back our time——

Mr. ROBERT C. BYRD. Mr. President, I hope the Senators will not yield back their time so that we can get the word out that there is going to be a vote, if the Senators can avoid yielding back their time for the present.

Mr. NUNN. Mr. President, will the Senator yield?

Does anyone object to going ahead if the motion to recommit does not prevail, of going ahead with a final vote on this bill? Does the Senator from Indiana have any objection to moving on to a vote if his motion fails?

Mr. BAYH. I think my friend from Georgia very thoughtfully mentioned in his remarks that the Senator from Indiana has tried in every way to cooperate with everyone who is for this legislation.

Mr. NUNN. And I commend him for it.

Mr. BAYH. I just felt compelled to point out we are on some very dangerous constitutional policy grounds, and I feel what we are really after is to recommit this bill and get a better solution; not to take a position that makes it look as if we do not recognize the problem.

Mr. NUNN. I understand the Senator from Indiana's position and I commend him for making a very erudite statement here on the floor. I do not happen to agree with his conclusions, but I do know there are two sides to the question. It is not an easy question. It is a close question, as I said earlier. I do not believe anybody can stand here and guarantee that the bill is constitutional. On the other hand, I do not think anyone can guarantee it is not constitutional, and I am persuaded that it is. But I would like to get a rollcall vote if the motion to recommit is not agreed to by the Senate, and I think the majority leader might want to notify Senators, if there is no disagreement on this, that we would have the likelihood of two rollcall votes, after which this bill will be concluded one way or the other.

Mr. ROBERT C. BYRD. I wonder if we can get consent that if the motion to table—am I to assume that there will be a motion to table the motion to recommit—if the motion to table the motion to recommit fails that the vote then occur immediately on the motion to recommit, and if it fails, that the vote occur immediately on the passage of the bill. Could we get that agreement?

Mr. NUNN. I certainly have no objection.

Mr. ROBERT C. BYRD. All right; then I modify my request as follows: Mr. President, I ask unanimous consent that if the motion to table fails, I take it the motion to recommit will occur immediately, because time will have expired, and if the motion to recommit fails, there will be 10 minutes for debate before final passage, that it be divided equally between Mr. DECONCINI and Mr. THURMOND, and that a vote then occur on passage.

The PRESIDING OFFICER. The committee substitute would have to be acted on first.

Mr. ROBERT C. BYRD. Yes; I ask unanimous consent that after the 10 minutes of debate, the committee substitute be acted upon without further debate or motion, and that upon the adoption of the committee substitute, a vote then occur upon the bill.

Mr. NUNN. Mr. President, does the majority leader's request include a request that if the motion to table the motion to recommit is agreed to by the Senate, we would go to final passage of the bill? Is that the request?

Mr. ROBERT C. BYRD. If the motion to table the motion to recommit——

Mr. NUNN. Passes.

Mr. ROBERT C. BYRD. Carries, then would Senators not want 10 minutes for debate?

Mr. NUNN. I think we have debated it pretty thoroughly. I think we could go on to final passage.

Mr. ROBERT C. BYRD. Then, in that event, there would be no further debate; but if the motion to table the motion to recommit fails, and the motion to recommit fails, would Senators then want 10 minutes of debate before the vote on passage?

Mr. BAYH. May I say to the majority leader I think we have discussed this up one side and down the other, but giving us 10 minutes, I think, gives us a safety valve, and it is not necessary to take the 10 minutes.

Mr. ROBERT C. BYRD. I agree with that, that Senators have 10 minutes which they may yield back.

Mr. NUNN. Mr. President, before concluding the debate, I would like again to commend the Senator from Indiana and the Senator from Maryland. I know they have strong views on this subject. I just want to say if the motion to recommit of the Senator from Indiana passes, I pledge my support in looking for another solution. I believe this is the best solution we can come up with, but I think the Senator from Indiana has shown a very constructive attitude, and if his motion is agreed to, I pledge my support in a search for another solution.

Mr. BAYH. Would the Senator from Georgia like to have another minute or two to proceed in that same vein?

Mr. NUNN. No, because I really do not want anyone to believe that I think the Senate would buy the Senator from Indiana's argument.

Mr. MAGNUSON. Let's go. Let's vote.

Mr. MATHIAS. Mr. President, if the Senator from Indiana will yield for a moment, I believe the pledge the Senator from Georgia has made to devote his astute mind and his erudite legal talents to this matter will make the passage of the motion to recommit virtually certain.

Mr. NUNN. Unfortunately there have not been enough Senators here to hear that argument and be persuaded.

Mr. MAGNUSON. Vote!

Mr. ROBERT C. BYRD. Mr. President, I would hope we could have just a very few more minutes before voting.

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI. Mr. President, I ask unanimous consent to proceed for 2 minutes on the motion.

The PRESIDING OFFICER. The Chair did not understand the Senator's request.

Mr. DECONCINI. Two minutes on the motion to recommit.

Mr. BAYH. The Senator has 10 minutes on the motion.

Mr. DECONCINI. All right; I yield myself, from the 10 minutes on the motion, such time as I may require.

Mr. President, I think we have had a good day of discussion, and we have gone over the matter with a fine-toothed comb.

I would like to remind the Senator from Indiana, the Senator from Maryland, the Senator from New Mexico, and the Senator from Georgia that a great deal of time and effort has been put into this proposal. It is not a piece of legislation that just came zipping out of the Judiciary Committee this year. It has had a history of constant hearings, with some 50 witnesses. It has been going on since 1968, in the 90th Congress.

Such outstanding Senators as Senators Tydings, EAGLETON, Goodell, HATFIELD of Oregon, MAGNUSON, MONDALE, MUSKIE, SCOTT, STEVENS, and Yarborough have served as cosponsors of this legislation, the Judicial Reform Act. The 92d Congress took it up, the 93d Congress took it up, the 94th, and the 95th. Thanks to the distinguished Senator from Georgia we were able to again bring this matter to the Judiciary Committee and thus hold hearings this year.

The constitutional question that we have hashed over very thoroughly today, I think, is one no one can be sure of, and that is the risk of being a legislator: You are passing on laws and passing judgment, and we all have to make the judgments for ourselves.

But it is interesting to note, as has been called to the attention of this body, that some very fine groups intimately involved in the law and in constitutional matters, such as the American Bar Association, the American Judicature Society, the Department of Justice, and the American Association of Attorneys General have all endorsed this measure, along with many scholars of constitutional law. This measure has wide support in the Senate, and I think it merits passage.

I am not standing here to say this is going to satisfy all of the problems of misbehaving judges, but it certainly will provide the American people, for the first time, some hope that judges are as responsible as anyone else is. The idea that we cannot alter the Constitution under article III, section 1, in interpreting the good behavior clause, does not make good sense to me. Article I, section 8, the necessary and proper clause, certainly gives the legislative branch, the House and the Senate, the right to do what we are doing today, and I sincerely hope that the Senate will join in supporting Senator THURMOND's motion to lay on the table the motion to recommit.

Mr. ROBERT C. BYRD. Mr. President, before Senators yield back their time, will they yield me some time?

Mr. THURMOND. Mr. President, I yield back the time on this side.

The PRESIDING OFFICER. Who yields time to the Senator from West Virginia?

Mr. DECONCINI. I yield to the Senator from West Virginia.

## THE NATURAL GAS CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, both Mr. ABOUREZK and Mr. METZENBAUM are here, and both Mr. BARTLETT and Mr. HANSEN are here——

Mr. METZENBAUM. If the Senator will yield, I do believe Senator LONG——

Mr. ROBERT C. BYRD. We tried to reach him and could not find him. But I believe there are Senators here to represent Senator LONG's point of view.

We have attempted, during the afternoon, to reach an agreement which would permit the Senate to proceed with debate on the conference report on natural gas tomorrow, the rest of the day today and tomorrow, and Monday and Tuesday and Wednesday, and which would protect all Senators who are away from town in the meantime from any surprise motion to table the conference report. Such a motion would, of course, be nondebatable, and there would be no way to protect Senators who are out of town. There are Senators on both sides of the aisle and Senators on both sides of the question who need to be protected.

Those of us who support the conference report are willing to enter into an agreement to protect Senators against a motion to table the conference report. We are willing to enter into an agreement to vote up or down on a motion to recommit the conference report, and set a date and an hour next week at which time that vote would occur. We are also willing to agree to set a date and an hour as to when the vote would occur up or down on the conference report itself.

The matter has been debated pro and con in the Senate now for 16 months. It has been debated in conference during that 16 months, certainly for 8 or 10 months. It is a lengthy report, and certainly is worthy of a reasonable amount of time and consideration. So I am not pressing for a vote on the conference report tomorrow or the next day or next Monday or Tuesday or Wednesday.

I would like for the Senate to begin debating the conference report, however, with an equal division of time, so that neither side will take all the time, and with the built-in protection for those Senators who are not in town against a surprise motion to table the conference report, which would be nondebatable.

I do not believe we have been able to be successful. Some of the participants on both sides of the question are willing to enter into such an agreement, but I think I ought to make one final effort to see if such an agreement could be reached.

While I say I would prefer an agreement that would see the Senate complete action on the conference up or down at a given date and hour, I am not asking for that now because I know that would be futile.

Therefore, in the interest of getting the measure up for debate, having equal time on both sides of the question, and to fully protect Senators on both sides of the question, on both sides of the aisle, who are out of town against a surprise nondebatable motion to table, I make the following request:

I ask unanimous consent that if the conference report is called up today or tomorrow, no tabling motion, no motion to table the conference report, will be in order prior to a vote up or down on a recommittal motion, neither of which votes will be in order before next Wednesday at 6 p.m.

The PRESIDING OFFICER (Mr. NUNN). Is there objection?

Mr. ABOUREZK. Reserving the right to object——

Mr. ROBERT C. BYRD. And that the time in the meantime be equally divided between Mr. JACKSON and Mr. HANSEN.

Mr. ABOUREZK. Mr. President, I want to yield to the Senator from Vermont but I want to ask a question of the leader before I do yield.

The prefatory remarks that the leader made to his unanimous-consent request indicated somehow that he philosophically or technically or procedurally could not call up the conference report without this agreement. I just want to ask the leader, is there anybody here preventing the chairman of the Energy Committee or the leader from calling up the conference report? We are all for it. That is what I am trying to say. He can call it up any time he wants to and we are ready to go. I have planned the last year of my life around that conference report and I am waiting.

Mr. ROBERT C. BYRD. Mr. President, I have the floor. I do not lose the floor while making my unanimous-consent request. I will answer the question.

Those of us who support the conference report are ready to enter into an agreement to vote on a motion to recommit at a certain date, on a certain hour. That is for the protection of Senators who are out of town. We want to protect Senators who are out of town against any surprise motion to lay on the table this conference report, a motion which is not debatable.

The answer to the Senator's question is no, there is nothing to prevent the Senator from Washington from calling up the conference report right now except—except—the desire of the majority leader to protect Senators on both sides of the aisle. I want to protect him. I want to protect Senators on both sides of the question, and my colleagues on want to protect Senators on both sides of the aisle. Most of them want to afford the same protection against a surprise motion to table this conference report. That is all that is keeping the Senator from Washington——

Mr. ABOUREZK. Mr. President, I was recognized.

Mr. ROBERT C. BYRD. No, the Senator from West Virginia——

The PRESIDING OFFICER. The majority leader asked for unanimous consent and the Chair asked if there were any objections.

SEVERAL SENATORS. Reserving the right to object.

Mr. ROBERT C. BYRD. Mr. President, in making the request——

Mr. ABOUREZK. Who has the floor, Mr. President?

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. A Senator does not lose the floor when he makes a unanimous-consent request, but other Senators can reserve the right to object. I would like to yield for a moment to the Senator from Vermont (Mr. LEAHY).

Mr. LEAHY. I thank the majority leader. I will be very brief. I reserve the right to object, though I will not object. I can truthfully say, Mr. President, that I am one of what I think is a fairly significant number of Senators who really have not made up their minds on this matter. Of course, a filibuster could occur, obviously. I might say, if I was leaning any way, I would be leaning against the conference report, but I will make up my mind based on what I hear in debate on the floor of the Senate, not from the lobbyists or anybody else. Quite frankly, I would hope that an agreement can be worked out on specific times and that during that time we can have full, significant debate on both sides of the issue for the benefit of those of us who have not been able to make up our minds, and for those of us who would like to be able to make up our minds in the way the Senate is designed. That is through debate.

I would really hope that nobody would object to a unanimous-consent request that would allow specific times set out for specific debate where we can plan our schedules, knowing when we can come in and hear the pros and cons of this matter.

Mr. ROBERT C. BYRD. Mr. President, that is the whole point I am making. That would give all Senators a date and an hour on which they could expect to be here, to know that the votes would occur on this very critical issue on which I am sure all Senators feel they want to be recorded.

Mr. JACKSON. Reserving the right to object——

Mr. ABOUREZK. Mr. President, may I be recognized?

Mr. JACKSON. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from West Virginia has the floor. The Senator has a pending unanimous-consent request.

Is there objection?

Mr. ABOUREZK. Mr. President, reserving the right to object.

Mr. BARTLETT. Mr. President, reserving the right to object.

Mr. ROBERT C. BYRD. May I yield to the Senator from Washington?

Mr. BARTLETT. I will reserve the right to object, but I think some of us would also like to participate in this discussion, and I am one of those.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may have the floor for 10 minutes while Senators may reserve the right to object. Mr. BARTLETT, Mr. HANSEN, Mr. ABOUREZK, and Mr. METZENBAUM may have the 10 minutes equally divided, 2 minutes each.

The PRESIDING OFFICER. Is there objection to that unanimous-consent request? Without objection, it is so ordered.

Mr. ABOUREZK. Mr. President, the first thing I would like to address to the distinguished majority leader is this: We have no intention of surprising anybody with any motion to table or motion to recommit. What we are willing to do is that if we do decide to make a motion to table or a motion to recommit, we will give adequate notice for that, although we do not want to agree to a time agreement.

Now, if, as the majority leader has said, he is interested in protecting the rights of absent Senators, and I am not here to try to tell the leader how to do his business of scheduling the Senate, I might just offer a suggestion: Call up the bill after you have given notice. Do not call it up today and make us sit here for 5 days after everybody leaves town and goes and campaigns knowing there will not be a vote until next week, with HOWARD METZENBAUM and I sitting here talking to each other about the natural gas conference report, trying to convince SCOOP JACKSON.

Mr. ROBERT C. BYRD. Is the Senator willing to agree that no motion to table the conference report will be made?

Mr. ABOUREZK. No; I cannot do that, as I stated this morning. It has the very same effect of running everybody out of town so they can campaign. They will know they are safe. When we debate the natural gas bill we believe it is of such significance that we ought to have a shot at getting Senators on the floor. We know they are not going to come over, all of them. We know that even if they are in town they are not going to come over. But if they are out of town, we do not even have a shot at them and I do not think that is fair, Mr. President. I think it is unfair to us.

We do not have the ability, Mr. President, to go down here and offer nuclear aircraft carriers or deep water ports in the Missouri River in South Dakota or nuclear breeder reactors or judgeships, or whatever else they have been promising at the White House. We have to depend upon debate in the open light of day in the Senate Chamber. That is the only thing we have.

We have to be able to do that. We have to have a shot at getting Senators over here to listen to what this natural gas bill is all about.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. ABOUREZK. HOWARD wants to yield me 1 minute.

Mr. METZENBAUM. I yield 1 minute.

Mr. ABOUREZK. This natural gas conference report, Mr. President, was fashioned in secret. We never had a chance to debate this conference report in the conference committee. There are many of us who are members of the committee who did not get invited to the meetings. They were held in secret, barred from the press, from the public, from many Senators who were, in fact, members of the conference committee. I do not think it is too much to ask that we have a chance for full participation of the Senate in debating this natural gas conference report.

I thank the Senator for yielding.

Mr. BARTLETT. Mr. President, I want to comment on the remarks made by the distinguished Senator from Vermont. He and I had a conversation privately, similar to this. I should like to say to him that I know he is very serious and sincere about participating and asking questions and listening to the debate that would take place. But I think he is the exception. I think that there will be some interested in the debate, but the debate is actually taking place right now, outside of this Chamber, with people explaining the conference report, others explaining the motion to recommit with instructions and what that does.

I should like to see us enter into a debate on the floor, but I do agree that if we enter into a restriction, then we are not going to have any audience outside of this Chamber, or in it, to talk to and explain our position and our side. I agree with him that there are many undecided voters. There are many people who are very confused, and I think rightfully so, because I think this is an extremely confusing bill.

A number of people have read it recently and they are very confused; they do not understand it. I think it is very important that we have a chance to explain our side and, certainly, the administration and Senator JACKSON, my chairman, will have an equal or even a better chance to explain their side, which is also important. We are both doing this at the present time and I think this will continue until the decision is made to bring the bill up. Then I guess that whichever side, at some time, decides it has the votes, will act. Right now, my own opinion is that neither side does.

I think we need to move as quickly as we can to have the bill brought up without any restrictions on the debate.

Mr. JACKSON. Mr. President, this is not just another bill. Without a doubt, I think it is the most important piece of domestic legislation that has been brought up in this Congress. As the majority leader has mentioned, the bill has been before the House and Senate for over a year. A lot of hard work has gone into it, day and night.

I think, Mr. President, that the distinguished Senator from Vermont (Mr. LEAHY) summed it up very well, that he would like to know when critical votes are going to occur. I can only say, Mr. President, that the decent thing to do, in the closing hours of this Congress, is to let our colleagues know when a critical vote—not just another vote—is going to occur. That, to me, is a test of decency.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. JACKSON. Yes, I yield.

Mr. ROBERT C. BYRD. There are 29 of them absent today. If a motion to table that conference report were to be made right now, 29 of our colleagues would be caught short.

Mr. JACKSON. I just want to point out that a motion to table could occur at any moment under those circumstances and how would this body look, with 29 absentees, voting on a critical matter such as the key part of the President's energy program?

I hope that the suggestion made by the distinguished Senator from Vermont, who is uncommitted and, he has indicated, may be leaning against the conference report—his recommendation makes a lot of sense, because it is the right thing to do in light of all the circumstances. I hope, Mr. President, that we can have a vote in which all Mem-

bers of the Senate will be able to vote on this, the most important domestic piece of legislation we have in this Congress.

Mr. HANSEN. Mr. President, let us recall what the history is. I hold few people in higher esteem than my good friend, the Senator from Washington (Mr. JACKSON), but if I recall correctly, it was he who spoke about legislation in the sunshine. Speaking as a member of the old Interior Committee and, more recently, the Energy and Natural Resources Committee, we held legislation in the sunshine. We held hearings, we held markups, we did not have any secret sessions.

Then what happened last spring? It is all well and good to say that 29 or 27 Senators are not here. The fact is that a very select, handpicked group sat down together for several months. I was not there; the Senator from Ohio was not there; the Senator from Oklahoma was not there; the Senator from Connecticut was not there, nor was the Senator from Nevada. I could go on and on.

We do not know what is in this bill and most Senators, I say categorically, do not know what is in this bill. After it had been seemingly brought into agreement and the thing fell apart here a few weeks ago, there were changes made on 119 pages; 119 pages were changed. I did not know what was being changed, nor did any other Member of the Senate, other than those who were participants in the secret session. That is exactly what we are talking about.

I have been around here not as long as many, but more than some, and I am aware of this fact: If you want to insure that very few people will be here to understand this bill as, indeed, we should understand it, let us agree to this unanimous-consent request and there will not be many people around until next Wednesday.

On the other hand, and this is precisely the crux of the matter, I think, the reason—and I can understand why my good friend, the majority leader, the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Washington, do not want to bring up the bill now. It is not so much that we may come up with a surprise motion to table.

I guess my time is up.

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senator have 30 seconds. I want to hear what he is going to say about the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. The concern is that no one knows exactly how this vote may come out. But obviously, the leadership does not have sufficient confidence to run the risk of bringing it up now. We are not going to surprise them by saying, "We'll table in the next 15 minutes." We shall give them adequate notice. But they are on notice that, under the rules of the Senate, that motion is in order and it is not debatable.

Mr. ROBERT C. BYRD. That is right.

Mr. HANSEN. I say there is nothing wrong with that, and if you want to assure that there is an understanding by all Members of the Senate, proceed under those rules, because everyone then is on notice that that motion is in order.

If we want to have them all, let us bring it up Monday. That is fine with me. But let us not go through the charade of trying to lay it down now and letting people scatter to the four winds and not return until Wednesday. I want the Senator from Vermont and every other Senator to know what is in that bill. I am persuaded that if they know what is in this bill, this compromise will not fly.

Mr. ROBERT C. BYRD. I ask unanimous consent now that I may have 1 minute to respond to the Senator, who mentioned my name.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, the Senator just might be surprised. He could be surprised.

Mr. HANSEN. I have been many times.

Mr. ROBERT C. BYRD. He has been many times, and undoubtedly he could be again.

Do not bank, just do not bet on the reason that the Senator has just stated as being the reason why the majority leader does not want to call up this measure right now. The majority leader has contacted, I daresay, more Senators, face to face, person to person, on this one issue than anybody else in the administration, outside the administration, in this Senate, or outside the Senate. I have the talley sheets here. I only take a man's word on this issue when I hear him say it with his own lips.

So it is not that I am afraid to call it up now, not that I am afraid to call it up now. We can beat you on a tabling motion today. We can beat you on a tabling motion. I would be willing to call it up right now, move to table myself and vote against the tabling motion, and show you we can beat you.

Mr. HANSEN. We are all ready.

Mr. ROBERT C. BYRD. We can beat you. But I do not want to catch Members on your side of the aisle, who are running for elections, out of town with that kind of surprise, low-blow motion.

But do not say that we are afraid we do not have the votes to beat a tabling motion. We can beat a tabling motion today. But I want a time that all Senators may know that they can come and vote on a motion to recommit, which I understand will be proposed. I think it is only fair to them and fair to the Senators who are here to know when that critical vote is going to take place.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Ohio has 1 minute.

Mr. METZENBAUM. Mr. President, I ask unanimous consent to have 3 minutes.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I agree with the majority leader that a motion to table, I think, could be defeated at the moment. I am prepared to say to the majority leader that I would support that motion today or at any other day because I do not want to defeat the Natural Gas Pricing Act and that is what we are talking about. We are talking about an alternative. We are talking about a bill. We are not talking about defeating the bill, and the issue has been totally confused.

I do not want to kill a bill and neither do many of these other persons who have stood with us on the motion to commit. But I have said to the majority leader Tuesday and on Wednesday, I was prepared personally to bring up the bill and with a time limit because I feel confident of our position, and if we cannot prevail, so be it.

But I have been persuaded by the logic of the position and the arguments that have been made, I have been persuaded by the fact that if the Senator says we are going to vote next Thursday, or next Wednesday, or next Tuesday, nobody is going to be on the floor. Everybody is going to run for home, and, if I did not have to protect the floor, I would be one of those running for home, as well.

I think the bill ought to be brought up because I do not think there is any chance this conference committee report can be tabled.

I say that because I am prepared to work the floor and try to urge people not to vote for a motion to table the conference committee report, and I do not think anybody is going to offer a motion to table the conference committee report. I think my friend from Wyoming would probably be in the same position. Nobody wants to kill the bill.

Mr. HANSEN. Will the Senator yield 15 minutes?

Mr. METZENBAUM. 15 seconds.

Mr. HANSEN. I mean 15 seconds.

He and I are cosponsors of a Dear Colleague letter which says precisely what we want to do. We are not going to try to table this bill. My good friend from West Virginia knows that.

Mr. ROBERT C. BYRD. I do not know it. I do not know it. If the Senators are willing to say they are not going to do that, let us enter into the unanimous consent agreement.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senate will be in order. The Senator from Ohio's 3 minutes have expired.

Mr. METZENBAUM. One second more.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. ABOUREZK. I ask unanimous consent for 1 minute.

Mr. JACKSON. 1 minute.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. I cannot say what other people will do, but what I will encourage them to do, and I will work against a motion to table, I can say I, personally, will not offer a motion to table. But as far as the unanimous consent, there are others in this body who have a view as well and, as we know, it takes unanimity.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. METZENBAUM. I certainly will.

Mr. ROBERT C. BYRD. I can assure the Senator, if talk lapses, we can put some other bills into the gaps and there will be votes to keep Senators in town.

Mr. METZENBAUM. I say to the Sen-

ator that I truly do not believe anybody will offer a motion to table. I do not believe that.

Mr. ROBERT C. BYRD. I think the Senator is very sincere in saying that, but I think we have to guarantee to our absent colleagues that a surprise motion will not be made.

Mr. ABOUREZK. Mr. President, I ask unanimous consent for 2 minutes on this issue.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. ABOUREZK. Mr. President, I think it is important, I think the Senator from Ohio brought up a very important point. I do not know that anybody in the coalition that is opposing the natural gas bill wants to do away with emergency allocation, and that happens to be in the substitute that we intend to offer when this thing does come up for debate.

I think the real issue of this is, do we want to debate at a time when we can have people's attention, at least those willing to come over to the floor to listen to the debate. That is the issue.

The attempt on the part of the chairman of the Energy Committee and the majority leader to paint this as coming within our control is an attempt that is not valid, Mr. President. What it amounts to is this, the control——

Mr. ROBERT C. BYRD. Will the Senator agree to my request, then?

Mr. ABOUREZK. Pardon me.

The control of the conference papers are within the control of the chairman of the Energy Committee (Mr. JACKSON). He can call up the conference report at any time he wants to.

We have told him that we are here now to protect against losing our rights under a unanimous-consent request.

He can bring that conference report up now and we are willing to go into debate with him and the majority leader when he discusses this matter, and, apparently, for some reason, do not want to call it up, and it goes beyond that. It goes beyond that then not wanting to call it up. They want to lay it off on us as though we had control. We do not have any control. We are here just waiting at their mercy.

We asked Senator JACKSON for the papers and said we would call it up. He said, "You can't have them. I've got them in my pocket," or wherever he keeps them. I think they are too bulky for his pocket. But he has got them and he will not give them up and we are willing to go anytime he wants to offer the report.

Mr. JACKSON. A big dark secret. It is part of that secret meeting we had.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent I may proceed for 1 minute.

The PRESIDING OFFICER. Is there objection?

Mr. SCOTT. Mr. President, reserving the right to object, and I shall not object, this is going on and on. I have told my staff I would be back over there to sign my mail. There should come a time when this terminates.

Mr. ROBERT C. BYRD. I agree, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, let me simply say, the Senator from South Dakota has said that the majority leader and the manager of the conference report have it all under their control. That is not quite correct.

Any single Senator who wishes to move to table the moment we bring it up has it under his control to bring about an immediate vote.

Mr. ABOUREZK. The Senator said he can beat us.

Mr. ROBERT C. BYRD. But who wants to do this with 29 Senators out of town?

Mr. ABOUREZK. I do not want that.

Mr. ROBERT C. BYRD. And they will pick the time to move to table.

Mr. ABOUREZK. That is better than the Senator picking the time.

Mr. ROBERT C. BYRD. All right.

Mr. President, I ask the Chair to put my request.

The PRESIDING OFFICER. Is there objection?

Mr. ABOUREZK. I object.

Mr. HANSEN. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. Mr. President, I make one further request, I ask unanimous consent the conference report may be called up with no tabling motion of the conference report to be in order today or tomorrow.

The PRESIDING OFFICER. Is there objection?

Mr. ABOUREZK. Reserving the right to object, the Senator is talking about the natural gas conference report?

Mr. ROBERT C. BYRD. I agree.

Mr. ABOUREZK. And the Senator is trying to limit our rights to offer any kind of tabling motion, or something else, at any time?

Mr. ROBERT C. BYRD. Today or tomorrow. No tabling motion today or tomorrow.

Mr. ABOUREZK. Mr. President, regretfully, I once again have to object.

The PRESIDING OFFICER. Objection is heard.

Mr. LEAHY. Will the Senator withhold that, reserving the right to object?

Mr. ABOUREZK. I will reserve my right.

Mr. LEAHY. As I understand that, Mr. President, all that means is that today and tomorrow there would be no motion to table and everything is fair game Monday, Tuesday, Wednesday, Thursday, or Friday?

Mr. ROBERT C. BYRD. Right, exactly.

Mr. LEAHY. Unless a unanimous-consent request is entered into.

I ask my good friend from South Dakota how that really differs, with the exception of a few hours remaining today and whatever time we are in tomorrow, how that differs from simply bringing up the conference committee report anyway and going forward? It involves only a few hours today, whatever hours we are in tomorrow, and then it is fair game from Monday on.

Mr. ABOUREZK. I ask the Senator from Vermont, if that request were agreed to, how many Senators does he think would stay in town between now and Monday, when it might be fair game?

Mr. LEAHY. If it is any help, I will stay here until late tomorrow afternoon, then I will go to Vermont.

Mr. ABOUREZK. Aside from the Senator from Vermont.

Mr. LEAHY. I do not know. Perhaps no more——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. LEAHY. Reserving the right to object to the unanimous-consent request, perhaps——

The PRESIDING OFFICER. There is no more time remaining.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senator from Vermont may have 1 minute.

The PRESIDING OFFICER. Is there objection?

Mr. BARTLETT. Mr. President, reserving the right to object, I would like to hear the question the Senator is stating.

Mr. LEAHY. I ask for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Perhaps not very many, but probably no more than if it were brought up anyway.

Mr. ABOUREZK. Mr. President, I object to the request.

The PRESIDING OFFICER. Objection is heard.

## JUDICIAL TENURE ACT

The Senate continued with the consideration of the bill.

Mr. ROBERT C. BYRD. Vote.

The PRESIDING OFFICER. The question recurs on the motion to recommit S. 1423.

Mr. LEAHY. Mr. President, I ask unanimous consent that Susan Brannigan, of my office, have the privilege of the floor throughout the remainder of the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I ask unanimous consent——

The PRESIDING OFFICER. The Chair has not recognized any Senator yet.

We are now on the pending business, which is the recommittal of S. 1423, and the vote is to occur.

Mr. DECONCINI. I move to table, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the motion to recommit. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from New Hampshire (Mr. DURKIN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire

(Mr. McINTYRE), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

I further announce that the Senator from Massachusetts (Mr. KENNEDY) is absent on official business.

I also announce that the Senator from Rhode Island (Mr. PELL) is absent because of illness.

Mr. CURTIS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Massachusetts (Mr. BROOKE), the Senator from Kansas (Mr. DOLE), the Senator from New Mexico (Mr. DOMENICI), the Senator from Oregon (Mr. HATFIELD), the Senator from North Carolina (Mr. HELMS), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. McCLURE), the Senator from Illinois (Mr. PERCY), the Senator from Vermont (Mr. STAFFORD), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The result was announced—yeas 43, nays 33, as follows:

[Rollcall Vote No. 374 Leg.]

YEAS—43

| | | |
|---|---|---|
| Bartlett | Glenn | Packwood |
| Bentsen | Goldwater | Ribicoff |
| Biden | Gravel | Riegle |
| Bumpers | Hansen | Roth |
| Burdick | Hatch | Sasser |
| Byrd, Harry F., Jr. | Hayakawa | Schweiker |
| | Hodges | Sparkman |
| Byrd, Robert C. | Huddleston | Stennis |
| Cannon | Jackson | Stone |
| Chiles | Leahy | Talmadge |
| Clark | Long | Thurmond |
| Culver | Magnuson | Wallop |
| Danforth | Morgan | Young |
| DeConcini | Nelson | Zorinsky |
| Garn | Nunn | |

NAYS—33

| | | |
|---|---|---|
| Abourezk | Hart | Metzenbaum |
| Bayh | Hathaway | Moynihan |
| Bellmon | Heinz | Muskie |
| Case | Hollings | Pearson |
| Chafee | Inouye | Proxmire |
| Church | Javits | Randolph |
| Cranston | Lugar | Sarbanes |
| Curtis | Mathias | Schmitt |
| Eagleton | Matsunaga | Scott |
| Ford | McGovern | Weicker |
| Griffin | Meicher | Williams |

NOT VOTING—24

| | | |
|---|---|---|
| Allen | Hatfield, Mark O. | McClure |
| Anderson | | McIntyre |
| Baker | Hatfield, Paul G. | Pell |
| Brooke | | Percy |
| Dole | Helms | Stafford |
| Domenici | Humphrey | Stevens |
| Durkin | Johnston | Stevenson |
| Eastland | Kennedy | Tower |
| Haskell | Laxalt | |

So the motion to table the motion to recommit was agreed to.

The PRESIDING OFFICER. There will now be 10 minutes debate on the bill.

Mr. DeCONCINI. Mr. President, I understood that the unanimous-consent agreement only asked for debate if the motion to table did not carry. Am I correct?

The PRESIDING OFFICER. No. There will be a period now for 10 minutes of debate unless Senators yield the time back.

Mr. DeCONCINI. I am ready to yield back.

The PRESIDING OFFICER. Time is yielded back.

Mr. DeCONCINI. Time is yielded back.

The PRESIDING OFFICER. The question then occurs on agreeing to the committee amendment in the nature of a substitute.

Mr. DeCONCINI. That is right.

Mr. President, I ask unanimous consent that the amendment in the nature of a substitute reported by the Committee on the Judiciary be adopted and the bill as thus amended be considered original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill is open to further amendment.

UP AMENDMENT NO. 1822

Mr. DeCONCINI. Mr. President, I send to the desk an amendment composed of technical corrections to the bill and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona (Mr. DeCONCINI) proposes unprinted amendment No. 1822.

Mr. DeCONCINI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

TECHNICAL AMENDMENTS TO S. 1423

1. On page 18, the 8th unmarked line, immediately after the word "Conference" insert the words, "of the United States".

2. On page 49, line 21, strike "January 1, 1979" and insert in lieu thereof "October 1, 1979".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arizona.

The amendment was agreed to.

Mr. CRANSTON subsequently said: Mr. President, I was opposed to S. 1423, and was seeking recognition, though I did not make any great effort to obtain recognition, before the vote. However, I ask unanimous consent that a statement of mine on that bill appear in the RECORD before the vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I oppose S. 1423, the Judicial Tenure Act, because I believe it to be unwise legislation which would invite subtle and direct pressures against the independent Federal judiciary, perhaps under circumstances which we cannot foresee today.

We must keep in mind that a Federal judge often sits alone, in the midst of a hostile community, upholding the Constitution and laws of the United States against angry local sentiments. That judge could be subject to strong pressures brought to bear through the mechanisms provided in S. 1423. The committee report merely hints at "letters from constituents, disgruntled litigants, and from attorneys containing various allegations concerning Federal judges" which could be referred to a "body that has the means and ability to investigate well-founded complaints."

It is fair to imagine what could happen. At the very least Federal judges who render unpopular local decisions will be harassed with a deluge of "complaints" and the possibility of some sort of investigation into his or her continued fitness to sit on the bench.

I do not think that the Founding Fathers' concept of an independent Federal judiciary serving on good behavior included a review of every complaint about some unpopular Federal judge. A reading of Federalist Paper No. 78 suggests instead that the authors of the Constitution believed that Federal judges should be insulated from local sentiments running contrary to their decisions and actions.

I recognize that my own State of California has used effectively machinery similar to that in S. 1423. But what is right for the individual States is not necessarily right for the Federal Government. The Founding Fathers recognized that the States differed among themselves on methods of appointment of judges and term of office. They accepted these vital differences and our Constitution accommodates them.

The guiding principles which ought to settle this matter for the Senate are provided for us by Hamilton in the 78th Federalist Paper. There he writes:

Liberty can have nothing to fear from the judiciary alone, but would have everything to fear from its union with either of the other departments. . . . The complete independence of the courts of justice is peculiarly essential in a limited Constitution. By a limited Constitution, I understand one which contains certain specified exceptions to the legislative authority; such for instance, as that it shall pass no bills of attainder, no ex post facto laws, and the like. Limitations of this kind can be preserved in practice no other way than through the medium of courts of justice, whose duty it must be to declare all acts contrary to the manifest tenor of the Constitution void. Without this, all reservations of particular rights or privileges would amount to nothing.

Hamilton said further that judges are to serve on good behavior. Enforcement of the standard of good behavior is provided by the Constitution in the impeachment power of Congress. There, in Hamilton's view, is where the matter should rest.

S. 1423 joins the legislative branch with the proposed Council on Judicial Tenure in the Judicial Branch in direct ways. The Council itself will be staffed by civil servants who will be beholden to Congress for appropriations, pay increases, benefits, amenities, and operating budget.

There already are numerous involvements of the judiciary with the legislative and executive without adding a new entanglement which more directly than any of the others threatens the independence of the Federal judiciary so essential to the protection of the Constitution.

In summary, S. 1423 changes fundamentally the original Constitution intent to establish an independent Federal judiciary serving on good behavior. If Congress arguably has the power to enact the Judicial Tenure Act, to do so, in my opinion would permanently and seriously alter the balance of Constitu-

tional powers among the three branches of Government.

There are adequate ways of dealing with the legitimate concerns of S. 1423. And if time must be the final cure to specific problems I do not think that is too high a price to pay for preserving the independence of the Federal judiciary.

On these grounds I recommend rejection of S. 1423.

Mr. DECONCINI. Mr. President, there are no further amendments. I ask for third reading and passage of the bill.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for third reading and was read the third time.

Mr. DECONCINI. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Shall the bill pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from New Hampshire (Mr. DURKIN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Minnoesta (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. MCINTYRE), and the Senator from Illinois (Mr. STEVENSON), are necessarily absent.

I further announce that the Senator from Massachusetts (Mr. KENNEDY) is absent on official business.

I also announce that the Senator from Rhode Island (Mr. PELL) is absent because of illness.

Mr. CURTIS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Massachusetts (Mr. BROOKE), the Senator from Kansas (Mr. DOLE), the Senator from New Mexico (Mr. DOMENICI), the Senator from Oregon (Mr. HATFIELD), the Senator from North Carolina (Mr. HELMS), the Senator from New York (Mr. JAVITS), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. MCCLURE), the Senator from Illinois (Mr. PERCY), the Senator from Vermont (Mr. STAFFORD), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) and the Senator from North Carolina (Mr. HELMS) would each vote "yea."

The result was announced—yeas 43, nays 32, as follows:

[Rollcall Vote No. 375 Leg.]

YEAS—43

| | | |
|---|---|---|
| Bartlett | Garn | Packwood |
| Bentsen | Glenn | Ribicoff |
| Biden | Goldwater | Riegle |
| Bumpers | Gravel | Roth |
| Burdick | Hansen | Sasser |
| Byrd, Harry F., Jr. | Hatch | Schweiker |
| Byrd, Robert C. | Hayakawa | Sparkman |
| Cannon | Jackson | Stennis |
| Chiles | Leahy | Stone |
| Clark | Long | Talmadge |
| Culver | Magnuson | Thurmond |
| Curtis | Metzenbaum | Wallop |
| Danforth | Morgan | Young |
| DeConcini | Nelson | Zorinsky |
| | Nunn | |

NAYS—32

| | | |
|---|---|---|
| Abourezk | Hathaway | Moynihan |
| Bayh | Heinz | Muskie |
| Bellmon | Hodges | Pearson |
| Case | Hollings | Proxmire |
| Chafee | Huddleston | Randolph |
| Church | Inouye | Sarbanes |
| Cranston | Lugar | Schmitt |
| Eagleton | Mathias | Scott |
| Ford | Matsunaga | Weicker |
| Griffin | McGovern | Williams |
| Hart | Meicher | |

NOT VOTING—25

| | | |
|---|---|---|
| Allen | Hatfield, Paul G. | Percy |
| Anderson | Helms | Stafford |
| Baker | Humphrey | Stevens |
| Brooke | Javits | Stevenson |
| Dole | Johnston | Tower |
| Domenici | Kennedy | |
| Durkin | Laxalt | |
| Eastland | McClure | |
| Haskell | McIntyre | |
| Hatfield, Mark O. | Pell | |

So the bill (S. 1423) was passed.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CORRECTION OF VOTE—S. 1423

(On September 11, 1978, the following proceeding occurred. The foregoing rollcall vote has been corrected to reflect the order of the Senate.)

Mr. MCGOVERN. Mr. President, on September 7, on final passage of the Judicial Tenure Act, S. 1423, I was recorded as not voting. I was here and cast a "nay" vote. Indeed, my vote was so recorded by the unofficial recorder, Mr. Patrick Hynes, but was missed by the official recording the vote.

I ask unanimous consent, under those circumstances, that my vote be recorded as I voted. I pointed out that this change will not affect the outcome of the vote.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, this matter was brought to my attention this afternoon. While it is an extraordinary thing to change a roll call vote, I thing it also would be extraordinary not to accept the representations just made by the Senator from South Dakota. Since it does not change the result, since he was kind enough to bring it to our attention before making the request, and since he was in the Chamber and did vote, we have no objection to the RECORD being changed in accordance with the request made by the distinguished Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MCGOVERN. Mr. President, I thank the distinguished minority leader.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of S. 1423, as amended.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I again wish to thank Senator THURMOND, the ranking Republican member of the Judiciary Committee, Senator EASTLAND, the chairman of the committee, the staff, particularly Mike Altier and Romano Romani, and the ranking Republican member, Mr. WALLOP, and the members of his staff, who gave a great deal of time and effort.

Needless to say, Senator NUNN, the author of this bill, deserves a great deal of credit for the fact that we have had an opportunity to pass it today.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. DECONCINI. I yield to the Senator from South Carolina.

The PRESIDING OFFICER. The Senate will be in order. The Chair is now ruling that, without objection, the title amendment is agreed to.

The title amendment is as follows:

A bill to establish a procedure in addition to impeachment for the retirement of disabled members of the Judiciary of the United States and the removal of those whose conduct is or has been inconsistent with the good behavior required by article III, section 1 of the Constitution, and for other purposes.

Mr. NUNN. Mr. President, I simply want to thank again the Senator from South Carolina (Mr. THURMOND), the Senator from Arizona (Mr. DECONCINI), and the able staffs for all the work they have done. I would add the Senator from Wyoming (Mr. WALLOP), and Gordon Griffin, my able legislative assistant, who has worked on this measure long and hard for about 4 years. I think he has done a tremendous job.

The PRESIDING OFFICER. Who seeks recognition?

Mr. THURMOND. The Senator from Arizona yielded to me.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. DECONCINI. Mr. President, I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I want to commend the able and distinguished Senator from Arizona for the great amount of work he has done on this bill. I think it is a fine accomplishment, and I think it will be a great asset to the administration of justice.

I also commend the able Senator from Georgia for sponsoring this measure as its chief sponsor. I feel that his work on this bill has been most valuable.

Mr. NUNN and Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia. Does the Senator

from Georgia yield to the majority leader?

Mr. ROBERT C. BYRD. Mr. President, there is nothing before the Senate, is there?

The PRESIDING OFFICER. There is no business before the Senate.

Mr. ROBERT C. BYRD. So any Senator could speak.

The PRESIDING OFFICER. The Senator is correct.

## ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. I merely seek recognition to ask unanimous consent that there now be a period for the transaction of routine morning business of not to exceed 30 minutes, with Senators permitted to make statements therein up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGES FROM THE HOUSE

At 11:24 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the bill (S. 3067) to extend the Commission on Civil Rights for 3 years, to authorize appropriations for the Commission, to effect certain changes to comply with other changes in the law, and for other purposes, with amendments in which it requests the concurrence of the Senate.

The message also announced that the House has passed House Joint Resolution 1088, providing financial assistance for the city of New York, in which it requests the concurrence of the Senate.

---

At 2:57 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to H.R. 6699, an act to establish a national climate program, and for other purposes.

The message also announced that the House, having proceeded to reconsider H.R. 10929, an act to authorize appropriations for fiscal year 1979 for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test and evaluation for the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for civil defense, and for other purposes, returned by the President of the United States with his objections, was not passed.

### ENROLLED BILL SIGNED

The message further announced that the Speaker has signed the following enrolled bill:

H.R. 6669. An act to establish a comprehensive and coordinated national climate policy and program, and for other purposes.

The enrolled bill was subsequently signed by the Acting President pro tempore (Mr. LEAHY).

## COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC–4241. A communication from the Acting Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Navy's proposed Letter of Offer to Iran for Defense Articles estimated to cost in excses of $25 million; to the Committee on Armed Services.

EC–4242. A confidential communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Navy's proposed Letter of Offer to Australia for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4243. A communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Air Force's proposed Letter of Offer to Korea for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4244. A communication from the Acting Assistant Secretary for Congressional Relations, Department of State, reporting, pursuant to law, that the President has determined that it is in the national interest for the Export-Import Bank of the United States to support transactions involving the purchase or lease of products or services by, for use in, or for sale or lease to, the Hungarian People's Republic; to the Committee on Banking, Housing, and Urban Affairs.

EC–4245. A communication from the President and Chairman, Export-Import Bank of the United States, reporting, pursuant to law, on loan, guarantee and insurance transactions supported by Eximbank during July 1978 to Communist Countries (as defined in section 620(f) of the Foreign Assistance Act of 1961, as amended); to the Committee on Banking, Housing, and Urban Affairs.

EC–4246. A communication from the Acting Secretary, Interstate Commerce Commission, reporting, pursuant to law, that the Commission is unable to render a final decision in Docket No. 36810, Rail-Water Rates, Sea-Land Service, January 1978, within the initially-specified seven-month period; to the Committee on Commerce, Science, and Transportation.

EC–4247. A communication from the Acting Secretary, Interstate Commerce Commission, reporting, pursuant to law, that the Commission is unable to render a final decision in Docket No. 36810, Rail-Water Rates, Sea-Land Service, January 1978, within the initially-specified seven-month period; to the Committee on Commerce, Science, and Transportation.

EC–4248. A communication from the Acting Chairman, Interstate Commerce Commission, transmitting, for the information of the Senate, an updated copy of Appendix M, "Operating Results by Route," of the ICC's March 15, 1978, Amtrak Report; to the Committee on Commerce, Science, and Transportation.

EC–4249. A communication from the Acting Secretary of the Interior, reporting, pursuant to law, that the Mesa Petroleum Company has submitted an application to the Department for repayment of one year's rental totalling $15,000 for lease OCS–G 2291, South Marsh Island Block 171, offshore Louisiana; to the Committee on Energy and Natural Resources.

EC–4250. A communication from the Assistant Secretary for Policy and Evaluation, Department of Energy, reporting, pursuant to law, of a delay in submission of the annual report on the Economic Impact of Energy Actions; to the Committee on Energy and Natural Resources.

EC–4251. A communication from the Under Secretary, Department of Energy, transmitting, pursuant to law, a report on Photovoltaic Incentives Options, August 1978; to the Committee on Energy and Natural Resources.

EC–4252. A communication from the Secretary of the Interior and the Secretary of Agriculture, transmitting, at the request of the President, the Twelfth and Thirteenth Annual Reports on the status of the National Wilderness Preservation System; to the Committee on Energy and Natural Resources.

EC–4253. A communication from the Secretary of Transportation, reporting, for the information of the Senate, on the recent determination by the Department of the Interior that there are technical and program constraints on the use of funds from the Abandoned Mine Reclamation Fund for projects to improve roads that serve active coal mines; to the Committee on Energy and Natural Resources.

EC–4254. A communication from the Administrator, General Services Administration, transmitting, pursuant to law, the 1977 Status Report of the GSA covering public buildings projects authorized for construction, alteration and lease in accordance with the Public Buildings Act of 1959; to the Committee on Environment and Public Works.

EC–4255. A communication from the Assistant Administrator for legislative Affairs, Agency for International Development, Department of State, transmitting, pursuant to law, justification of an increase in the funding level of the proposed FY 1978 program in Chile; to the Committee on Foreign Relations.

EC–4256. A communication from the Chairman, Board of Directors, Washington Metropolitan Area Transit Authority, transmitting, pursuant to law, a long-range financial plan to cover funding of all remaining segments of the full Metro system, to provide for federal/state/local cooperative action to service principal and interest on Metro revenue bonds, and to establish more equitable and politically realistic means for paying annual Metrobus/Metrorail operating subsidies; to the Committee on Governmental Affairs.

EC–4257. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "What Rules Should Apply to Post-Federal Employment and How Should They Be Enforced?" August 28, 1978; to the Committee on Governmental Affairs.

EC–4258. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Progress in Improving Program and Budget Information for Congressional Use," August 29, 1978; to the Committee on Governmental Affairs.

EC–4259. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Department of Defense Continues to Improperly Subsidize Foreign Military Sales," August 25, 1978; to the Committee on Governmental Affairs.

EC–4260. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Problems and Outlook of Small Private Liberal Arts Colleges," August 25, 1978; to the Committee on Governmental Affairs.

EC–4261. A communication from the District of Columbia Auditor, transmitting, pursuant to law, (1) a report entitled "The City Should Consider Whether an Exemption From Deed Recordation Tax Which Benefits Developers Should Be Restricted"; (2) a letter to Council Chairman Sterling Tucker re Job Corps Centers at Junior Village and Maple Glen; (3) a letter report to Mayor and Council re Elimination of GS–2 Positions

from Workforce; (4) a letter to Councilmember Marion Barry re various aspects of the District's Supplemental Food Program; (5) a report entitled "Preference of Police Officers for Police District Assignment and Stationhouse Duty Has Created a Racially and Sexually Imbalanced Work Force"; (6) a letter to Councilmember David Clarke re assumptions used by the Department of Finance and Revenue in estimating revenue loss; (7) a report entitled "Management of Contracts for Services to Public Housing Projects"; (8) a letter report to Mayor and Council re reprogramming of funds at budget category level; (9) a letter report to Mayor and Council re safety and health inspections of food vendors; and (10) a letter to Councilmember David Clarke re overtime records of the Metropolitan Police Department; to the Committee on Governmental Affairs.

EC–4262. A communication from the Acting Secretary of the Interior, transmitting, pursuant to law, a report on the organization of leasing operations of the Federal Government; to the Committee on Governmental Affairs.

EC–4263. A communication from the Assistant Secretary for Administration, Department of Transportation, transmitting, pursuant to law, a modification to an existing system of records; to the Committee on Governmental Affairs.

EC–4264. A communication from the Administrator, Veterans Administration, transmitting, pursuant to law, a report on the new system for the VA Fee Basis Medical and Pharmacy Program; to the Committee on Governmental Affairs.

EC–4265. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on July 25, 1978, which would amend the Condominium Act of 1976, D.C. Law 1–89 (Act 2–260); to the Committee on Governmental Affairs.

EC–4266. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on July 25, 1978, which would order the closing of a public alley and the dedication of certain other land for public alley purposes (Act 20261); to the Committee on Governmental Affairs.

EC–4267. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on July 25, 1978, which would order the closing of part of an east-west public alley and the dedication of certain other land for public alley purposes (Act 2–262); to the Committee on Governmental Affairs.

EC–4268. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on July 25, 1978, which would create employment opportunities for blind and other severely handicapped individuals by assuring a market for products and services provided by them, and for other purposes (Act 2–263); to the Committee on Governmental Affairs.

EC–4269. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on July 25, 1978, which would order the closing of Eye Street, N.W., between 23rd and 24th Streets, N.W. (S.O. 75–34) (Act 2–259); to the Committee on Governmental Affairs.

EC–4270. A secret communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the major issues of the Army's ballistic missile defense program and related aspects of strategic offensive weapons; to the Committee on Governmental Affairs.

EC–4271. A communication from the Chairman and General Counsel, National Labor Relations Board, transmitting, pursuant to law, the Board's report for a proposed new system of records; to the Committee on Governmental Affairs.

EC–4272. A communication from the Deputy Secretary, Department of Energy, transmitting, pursuant to law, a report for a proposed new system of records; to the Committee on Governmental Affairs.

EC–4273. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a report for a proposed new system of records; to the Committee on Governmental Affairs.

EC–4274. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a report for a proposed new system of records; to the Committee on Governmental Affairs.

EC–4275. A communication from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, the first annual report of the Director of the National Institute of Arthritis, Metabolism, and Digestive Diseases on arthritis activities under the Arthritis Plan; to the Committee on Human Resources.

EC–4276. A communication from the Chairman, National Institute of Education, Department of Health, Education, and Welfare, transmitting, pursuant to law, the fourth annual report of the National Council on Educational Research, Reflections and Recommendations; to the Committee on Human Resources.

EC–4277. A communication from the Chairman, National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research, transmitting, pursuant to law, a report entitled "Report and Recommendations: Institutional Review Boards"; to the Committee on Human Resources.

EC–4278. A communication from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, orders in cases of certain aliens who have been found admissible to the United States under the Immigration and Nationality Act; to the Committee on the Judiciary.

EC–4279. A communication from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, 431 reports covering the period July 31 through August 14, 1978, concerning visa petitions which the Service has approved according the beneficiaries of such petitions third and sixth preference classification under the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

EC–4280. A communication from the Deputy Comptroller General of the United States, transmitting, pursuant to law, a report and recommendation concerning the claims for relief from liability to the United States of 17 employees of the Long Beach Naval Shipyard, Department of the Navy, Long Beach, California, whose names appear in the report; to the Committee on the Judiciary.

EC–4281. A communication from the Certified Public Accountants, Future Farmers of America, transmitting, pursuant to law, a financial report as of June 30, 1978 and 1977, and the related statements of income and retained income and changes in financial positions; to the Committee on the Judiciary.

EC–4282. A communication from the Chairman, Federal Election Commission, transmitting the Commission's fiscal year 1980 appropriation request; to the Committee on Rules and Administration.

## PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions and memorials, which were referred as indicated:

POM–780. A resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

"HOUSE RESOLUTION No. 66

"Whereas, Aircraft noise is a major problem affecting the present viability and future growth of this country's air transportation system; and

"Whereas, Over 6 million Americans and 900,000 acres of land are impacted by aircraft noise; and

"Whereas, Airport proprietors have expended over $200 million to acquire noise impacted land around airports; and

"Whereas, Potential noise liability suits may measure in the billions of dollars; and

"Whereas, Future airport development and expansion face long delays; and

"Whereas, Aircraft noise is present in every state in the Union which makes this a national rather than a local problem; and

"Whereas, A strong national policy and national funding source are necessary; and

"Whereas, The United States House of Representatives has before it for floor action the week of August 7 HR 8729 and the United States Senate Finance Committee is holding S 3279 pending a vote by the house on HR 8729; and

"Whereas, Title I of the bills is aimed at making compatible those lands adjacent to airports; and

"Whereas, Title II increases airport grant levels of the Airport and Airways Development Act of 1970; and

"Whereas, Title III of HR 11986 and S 3279 provide the funding to re-engine and replace noisy aircraft; now, therefore, be it

*"Resolved by the Assembly of the State of California,* That the Congress of the United States is hereby requested to favorably act on HR 8729, HR 11986, and S 3279; and be it further.

*"Resolved,* That the Chief Clerk of the Assembly transmit a copy of this resolution to each Senator and Representative from California in the Congress of the United States."

---

POM–781. A concurrent resolution adopted by the legislature of the State of Iowa; to the Committee on Commerce, Science, and Transportation:

"HOUSE CONCURRENT RESOLUTION 112

"Whereas, the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (Milwaukee Road) provides rail transportation service to many Iowa counties and directly serves many Iowa communities and population centers; and

"Whereas, the Milwaukee Road rail system is an essential portion of Iowa's grain and industrial transportation system; and

"Whereas, this rail transportation system is essential to Iowa's ability to participate in the international grain and industrial market; and

"Whereas, sales of Iowa grain and industrial exports help to substantially reduce the United States' deficit balance of payments; and

"Whereas, many of Iowa's farms and industries are directly dependent on the Milwaukee Road and will incur substantial financial hardship if the Milwaukee Road ceases or suspends operation; and

"Whereas, there are over 13,000 employees on the Milwaukee Road whose employment will be adversely affected even to the point of furlough or termination, if the Milwaukee Road were to cease or suspend operation; and

"Whereas, the existing and anticipated long range energy shortage requires that energy efficient means of hauling bulk goods for long distances be preserved and protected; and

"Whereas, the calculated shortage of boxcars and jumbo hopper cars the week of

February 6, 1978, was 3,000 in Iowa and 7,000 in the Midwest; and

"Whereas, the Milwaukee Road's financial problems have been grievously aggravated by the intolerable delays of the Interstate Commerce Commission in dealing with merger requests of the Milwaukee Railroad and other railroad companies; and

"Whereas, the delays by the Federal Railroad Administration in processing and approving loan and grant applications have further weakened the Milwaukee Road; and

"Whereas, federal aid and regulatory responsiveness is essential for the Milwaukee Road to continue to provide transportation services and employment and pay property and corporate taxes in Iowa and elsewhere; Now therefore,

"Be it resolved by the House of Representatives, the Senate concurring, That the President of the United States, the Secretary of Transportation and the Federal Railroad Administration act quickly in providing the necessary loans and grants to the Milwaukee Road; and

"Be it further resolved, That the President of the United States, the Secretary of Transportation, the Interstate Commerce Commission, the Federal Railroad Administration and Congress consider and act on a permanent solution to the midwest rail crisis; and

"Be it further resolved, That copies of this Resolution shall be transmitted to the President of the United States, the President of the Senate of the United States, the Speaker of the House of Representatives of the United States, the Secretary of Transportation, the administrator of the Federal Railroad Administration, and the Iowa Representatives and Senators in Congress.

"We, Dale M. Cochran, Speaker of the House and Arthur A. Neu, President of the Senate, and David L. Wray, Chief Clerk of the House and Kevin P. Light, Secretary of the Senate hereby certify that the above and foregoing Resolution was adopted by the House of Representatives and the Senate of the Sixty-seventh General Assembly, Second Regular Session."

---

POM–782. A resolution adopted by the National Water Supply Improvement Association, relating to reauthorization of the Federal Desalination program; to the Committee on Environment and Public Works.

POM–783. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance;

"ASSEMBLY JOINT RESOLUTION No. 92

"Whereas, California's unique environment and its enterprising farmers have combined for a total agricultural production in excess of nine billion dollars; and

"Whereas, California produces over 200 agricultural commodities and is unique among the states in the diversity of its agricultural production; and

"Whereas, Exports of California's agricultural products generate over 80,000 jobs and provide a favorable balance of trade surplus; and

"Whereas, Agriculture is California's number one industry, and there is a worldwide demand for the agricultural products produced in California; and

"Whereas, Despite the demand for these commodities, some nations unfairly penalize California agricultural exports through illegal quotas, discriminatory duties and other nontariff barriers; and

"Whereas, The removal of these trade barriers would permit the expansion of California's agricultural exports resulting in expanded job opportunities and in improvement in the nation's balance of payments; and

"Whereas, Negotiators from the Office of the Special Trade Representative, the International Trade Commission, and the Department of Agriculture are presently involved in negotiations aimed at reducing these illegal trade barriers; now, therefore, be it

"*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes both the Congress and the President of the United States to vigorously negotiate the reduction of unfair barriers to free trade which currently exist and, thereby, expand the international commerce in agricultural products, including the agricultural commodities produced in California; and be it further

"*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

---

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ABOUREZK, from the Select Committee on Indian Affairs, with amendments:

S. 2502. A bill to authorize the States and the Indian tribes to enter into mutual agreements and compacts respecting jurisdiction and governmental operations in Indian country (Rept. No. 95–1178).

By Mr. LONG, from the Committee on Finance, with an amendment and an amendment to the title:

H.R. 2852. An act to amend the Internal Revenue Code of 1954 to provide that refunds of the taxes on gasoline and special fuels shall be made to aerial applicators in certain cases (Rept. No. 95–1179).

By Mr. LONG, from the Committee on Finance, without amendment:

S. Res. 553. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 2852. Referred to the Committee on the Budget.

---

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. PROXMIRE:

S. 3485. A bill to amend the Federal Reserve Act to provide for maintenance of reserves in order to facilitate the implementation of monetary policy, to promote competitive equality among depository institutions, to require the imposition of service charges for services by Federal Reserve banks, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. STENNIS:

S. 3486. A bill to authorize appropriations for fiscal year 1979 for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test and evaluation for the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for civil defense, and for other purposes; to the Committee on Armed Services.

By Mr. BELLMON (for himself and Mr BARTLETT):

S. 3487. A bill to change the name of Clayton Lake in the State of Oklahoma to Sardis Lake; to the Committee on Environment and Public Works.

By Mr. CASE:

S. 3488. A bill for the relief of Yaroslav L. Tiajoloff; to the Committee on the Judiciary.

---

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PROXMIRE:

S. 3485. A bill to amend the Federal Reserve Act to provide for maintenance of reserves in order to facilitate the implementation of monetary policy, to promote competitive equality among depository institutions, to require the imposition of service charges for services by Federal Reserve banks, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

MONETARY POLICY IMPROVEMENT ACT OF 1978

Mr. PROXMIRE. Mr. President, I am today introducing the Monetary Policy Improvement Act of 1978. The legislation is designed to deal with the problems associated with the erosion of membership in the Federal Reserve System. The objectives of the bill are to:

First, strengthen the ability of the Federal Reserve Board to conduct monetary policy;

Second, promote greater competitive equality between financial institutions;

Third, enhance the safety and soundness of the banking system;

Fourth, improve the efficiency of the Federal Reserve payments system; and

Fifth, minimize any loss in Treasury revenues.

I am introducing this bill primarily for discussion purposes and in an effort to provide the Senate Banking Committee with a lower cost alternative to the various membership proposals that have been advanced. These include the original Fed proposal, S. 3304, which I introduced by request, S. 3461 introduced by Senator BROOKE, and H.R. 13847 introduced by Congressman REUSS together with the changes to that bill recommended by the Federal Reserve Board and by the staff of the House Banking Committee.

The House Banking Committee is meeting on September 7 to begin discussing the Fed membership issue and the Senate Banking Committee has scheduled a corresponding mark-up on September 19 and 20. While I am reasonably flexible on the details of any membership proposal, I am concerned about the cost to the Treasury. Accordingly, if the Congress does act on the Fed membership issue, I do believe the cost to the Treasury, and ultimately the American taxpayer should be held to a minimum. The legislation I am introducing would result in an annual net, after-tax revenue loss to the Treasury of only $41 million. This is about what the Treasury will lose anyway, without legislation if Federal Reserve membership continues to decline at current rates.

SUMMARY OF MAIN FEATURES

The principal features of the bill are as follows:

First. Universal reserve requirements: All federally insured depository institutions with deposits above a specified amount would be required to maintain reserves against those deposits in accord-

ance with the reserve ratios prescribed by law. The Federal Reserve Board is authorized to vary those ratios within a limited range for monetary policy reasons.

Federally insured commercial banks would be required to maintain reserves against their combined demand and savings deposits in excess of $40 million and against their time deposits in excess of $40 million. A savings deposit is defined as a deposit with a maturity of 30 days or less and a time deposit is defined as one with a maturity of more than 30 days.

All other federally insured depository institutions or members of the Federal Home Loan Bank System including mutual savings banks, savings and loan associations, and credit unions would be required to maintain reserves against their transaction accounts in excess of $40 million. A transaction account is defined to include a demand deposit, a NOW account, a share draft account, or other account from which payments may be made to third parties.

Second. Simplified reserve requirements: Under the present hodge podge system, the Federal Reserve Board has prescribed 12 separate reserve ratios depending upon the type of deposit, its maturity, and the size of the bank. The proposed legislation would substantially simplify this complex structure by prescribing just three reserve ratios for all commercial banks subject to reserve requirements:

(i) 9 percent against demand and savings deposits;

(ii) 4 percent against shorter term time deposits with initial maturities of less than 180 days; and

(iii) 1 percent against longer term time deposits with initial maturities of 180 days or more.

Other depository institutions subject to reserve requirements would be required to maintain a 9-percent reserve against their transaction balances.

Third. Reporting requirements: The Federal Reserve Board is authorized to require periodic financial reports from all depository institutions in order to perform its monetary policy responsibilities. Institutions not subject to reserve requirements can provide these reports to their respective supervisory agencies.

Fourth. Access to discount window and other Fed services: All depository institutions required to maintain reserves and who are not members of the Federal Reserve System would be automatically entitled to all of the privileges of membership including access to the discount window. In addition, all nonmember banks who, because of their size are not subject to reserve requirements, would be given access to the discount window upon a certification of solvency from the FDIC.

Fifth. Pricing of Fed services: The Federal Reserve Board is required to publish a schedule of fees for its services to commercial banks by July 1, 1979, and to begin charging for these services by July 1, 1980. All depository institutions would be able to purchase these services on the same terms and conditions as member banks. The fees would take into account an allowance for taxes and the cost of capital.

EFFECT OF THE PROPOSAL

First. Effect on financial institutions: The system of universal reserve requirements together with the $40 million exemptions as proposed in the legislation would halt the decline in the percentage of bank deposits subject to reserve requirements, while at the same time relieving most banks from the burden of maintaining reserves. The bill would subject only 1,723 banks to reserve requirements compared to a present total of 5,664. Moreover, because the bill authorizes banks to count their vault cash against their reserve requirements, only 1,117 banks would have to keep reserves at a Federal Reserve bank. This includes 762 banks that are presently members of the Federal Reserve System and 355 nonmember banks. Some of these nonmember banks covered by reserve requirements would be covered anyway by the International Banking Act recently passed by the Congress.

Of the 5,664 current member banks, 4,523 would be relieved by reserve requirements entirely; 379 would be able to meet all of their reserve requirements with their present amount of vault cash; 706 would have their present reserve requirements reduced; and 56 would have their present reserve requirements increased. The bill provides that any increase in reserve requirements would be phased in gradually over 4 years for any member bank facing higher reserve requirements and for any nonmember bank subject to reserve requirements.

The bill also would apply reserve requirements to nonbank depository institutions offering transaction accounts that are equivalent to demand deposits. However, because of the $40 million exclusion, and because many thrift institutions still lack the legal authority to offer transaction accounts, and because of the ability to satisfy reserve requirements with vault cash, less than 10 nonbank institutions would actually be required to maintain reserves with the Fed, according to estimates supplied by the Federal Reserve staff. Thus, the application of reserve requirements to all depository institutions offering checking-type accounts would have virtually no financial impact on the thrift industry; but it would foreclose a potential source of erosion in monetary control if, in the future, Congress and the States were to provide thrift institutions with additional powers to offer checking or similar type accounts. It also insures a greater degree of competitive equality between bank and thrift institutions in competing for the public's checking account business.

Second. Effect on monetary policy: The legislation would strengthen in a number of ways the ability of the Federal Reserve Board to perform its monetary policy responsibilities.

First, the bill would halt the decline in the portion of total bank deposits subject to reserve requirements. The erosion in the Federal Reserve's membership has reduced the percentage of total deposits at banks subject to reserve requirements from approximately 84 percent in 1961 to less than 73 percent today. Unless action is taken to halt this decline, a further erosion in Fed membership could begin to weaken the ability of the Federal Reserve to control the Nation's money supply. The system of universal reserve requirements proposed in the bill together with the $40 million exclusions would cover 71.6 percent of total bank deposits. Thus, the Fed's ability to control the monetary aggregates would be stabilized.

Second, the simplified structure of reserve requirements proposed in the bill would make it far easier for the Fed to predict and control future changes in the money supply. Under the present system, if a consumer transfers funds from his checking account to his savings account at his bank, the bank's reserve requirement against those funds could decline from 16¼ to 3 percent. These freed-up reserves could produce a multiple expansion in the money supply unless offset by the Federal Reserve. Similar complications arise when funds are transferred from a checking account into a NOW account or from a checking account in a large member bank to a checking account in a medium or similar sized member bank. In theory, the Fed can predict these transfers and take them into account when formulating monetary policy. However, innovations in funds transfer technology have made it far easier for consumers and businesses to shift funds between their accounts, thus complicating the Fed's monetary projections.

Many of these problems would be alleviated under the proposed legislation. The bill would apply the same reserve requirement against demand deposits, savings accounts, and NOW accounts. Thus, deposit shifts between these types of accounts would have no monetary significance. Also, the uniform 9 percent reserve requirement against demand deposits would reduce the complications arising from shifts in demand deposits between different size banks which, under the present system, have reserve requirements ranging from 7 to 16¼ percent.

Monetary policy would be further strengthened by authorizing the Fed to require timely financial reports from non-member financial institutions. The lack of timely data from these institutions has, in the past, caused the Fed to make monetary policy judgments on the basis of incomplete and inadequate information. In order to minimize reporting burdens, the bill further provides that these reports may be provided through an institution's regular supervisory agency.

Finally, monetary policy would be strengthened and the safety and soundness of the banking system would be enhanced by permitting all banks to meet their liquidity needs through the Federal Reserve's discount window. Under the current system, a sizable portion of the banking industry is excluded from the discount window except under severe emergency conditions. This exclusion can dilute the aggressiveness of the Federal Reserve Board in pursuing a restrictive monetary policy. There are times when the Board may hesitate to impose the degree of restraint called for by economic conditions in order to avoid the

potential liquidity strains that could be visited upon non-member banks. Guaranteeing all nonmember banks access to the discount window will allow the Board a great degree of freedom in conducting monetary policy.

Third. Effect on competitive equality: On balance, the legislation would provide more competitive equality between different classes of financial institutions. Our present system creates numerous imbalances in the competition for deposits, since reserve requirements are not applied uniformly. A 1 percentage point reserve requirement raises the effective cost of funds by as much as 10 basis points. This extra cost can place member banks at a substantial disadvantage compared to nonmember banks and thrift institutions.

Under the proposed bill, the system of universal reserve requirements will place member and nonmember banks on a more equal footing. All banks would be subject to the same reserve requirements regardless of membership status.

The bill also helps to equalize competition between commercial banks and thrift institutions in the market for certificates of deposits (CD's). Under the present system, a member bank is required to maintain a reserve of 6 percent against its short term CD's in excess of $5 million with initial maturities of less than 180 days. Under the proposed bill, this reserve requirement would be reduced to 4 percent. The bill further helps to restore competitive parity in the longer term CD market where, under the present system, member banks are required to maintain a reserve of 2½ percent against CD's in excess of $5 million that are between 179 days and 4 years in maturity. This would be reduced to 1 percent under the proposed bill.

The bill would also provide further competitive equality between banks by guaranteeing that all nonmember banks shall have access to the discount window. This access would be automatic in the case of the 355 nonmember banks required to keep reserves at the Federal Reserve. However, the remaining 8,374 nonmember banks would also be given ready access to the discount window upon a certification of solvency from the FDIC. Under current Federal Reserve Board interpretations of the Federal Reserve Act, nonmember banks cannot be given access to the discount window except under severe emergency conditions.

Access to the Fed's discount window can enhance the long-term viability of our smaller, locally controlled banks. By providing them with an alternative source of credit for liquidity needs, it also reduces their dependence on their larger correspondent banks. This in turn should strengthen the ability of smaller banks to compete more equally with their big city rivals.

Finally, the bill promotes competitive equality by requiring that all depository institutions be able to purchase Federal Reserve services on the same terms and conditions that apply to member banks. This will insure that the Federal Reserve pricing proposals do not discriminate against nonmember institutions.

On the negative side, the bill would raise the reserve requirement on savings deposits from 3 to 9 percent, thus affecting the ability of the larger banks to compete for these deposits with thrift institutions and with smaller banks. However, it should be noted that these requirements apply only to 1,117 banks. For 4,902 smaller member banks, the present 3 percent reserve requirement against savings deposits would be eliminated, thereby strengthening the ability of these banks to compete more equally with thrift institutions.

Fifth. Effect on Treasury revenues: This legislation would affect the revenues of the Federal Reserve banks and ultimately the Treasury in a number of ways:

First, the revised reserve requirements together with the $40 million exemptions would cost the Treasury $682 million in pre-tax revenues.

Second, the application of reserve requirements to the larger, nonmember banks will result in a $140 million revenue increase to the Treasury before taxes.

Third, the mandate to begin charging for Federal Reserve services would produce an additional $451 million in pre-tax revenues to the Treasury. This assumes the Federal Reserve's estimate of the cost of these services—$410 million—would be increased by 10 percent to reflect the cost of capital and taxes that would be incurred by a private firm providing similar services.

The combined effect of these changes would result in a pre-tax revenue loss of $91 million. However, these net losses in revenue to the Treasury would also constitute a corresponding net gain in income to the banking system or its customers. This additional income would be subject to taxation. Assuming a marginal tax rate of 55 percent, the net after tax revenue loss to the Treasury would be approximately $41 million.

While $41 million a year is a substantial amount, it is far less than the cost of other Fed membership proposals that have been advanced. Moreover, according to estimates by the Federal Reserve, the Treasury will lose about this much revenue anyway if the decline in Fed membership continues at the same rate that has occurred over the last several years. Finally, the reserve loss must be evaluated in terms of the corresponding benefits. It is clearly worth something to strengthen the ability of the Federal Reserve to conduct monetary policy. Also, the efficiency of the banking and payments system will be enhanced through pricing of Fed services and through the greater degree of competitive equality that will result from the legislation. These benefits will accrue to the public generally in the form of lower prices for banking services.

Mr. President, I ask unanimous consent that a section-by-section analysis of the bill be printed in the RECORD.

There being no objection, the analysis ordered to be printed in the RECORD, is as follows:

MONETARY POLICY IMPROVEMENTS ACT OF 1978

SECTION-BY-SECTION ANALYSIS

Section 1. Title. This section indicates that the title of the Act is the "Monetary Policy Improvements Act of 1978."

Section 2. Definitions. This section defines "depository institution" as any insured bank, mutual savings bank, savings bank, insured credit union, and savings and loan association. It also indicates that for the purposes of collection of checks, drafts, or maturing notes and bills by Federal Reserve Banks any association which consists of depository institutions will itself be considered a depository institution.

This section also defines "transaction account" as a deposit or account on which the holder of the account is allowed to make withdrawals by any type of negotiable or transferable instrument for the purpose of making payments to third persons. Transaction accounts include demand deposits, negotiable order of withdrawal (NOW) accounts, and share draft accounts.

Section 3. Transaction Accounts. This section indicates that the Federal Reserve Board, in consultation with the Board of Directors of the Federal Deposit Insurance Corporation, the Federal Home Loan Bank Board, and the National Credit Union Administration, may determine on account or deposit to be a transaction account where such accounts may be used to make payment or transfer funds to a third person.

Section 4. Reporting requirements. In this section the Federal Reserve Board is authorized to collect reports from any depository institution of the institution's liabilities and assets as may be necessary or desirable to enable the Board to discharge its responsibility to conduct monetary policy. In cases where the depository institution is subject to reserve requirements set by the Board, such reports would be made directly to the Federal Reserve. For all other depository institutions the reports would be made to the appropriate Federal regulatory agency, or to a state officer or agency, and through such agency to the Board. This section indicates that the Board shall endeavor to avoid unnecessary reporting burdens. Different reporting requirements may be made in different classes of depository institutions.

Section 5. Reserve requirements. This section indicates the basic framework for reserve requirements against deposits held by depository institutions. Reserve requirements would be set by the Federal Reserve Board and would be applicable to deposits held by insured banks and to transaction accounts at other depository institutions. Reserve requirements would apply to the total of demand and savings deposits in excess of $40,000,000 and to time deposits in excess of $40,000,000 at insured banks. Banks may apply the $40,000,000 exemption for time deposits against such deposits with initial maturities of 179 days or less first and other time deposits second. For nonbank depository institutions reserves would apply to transaction accounts which in the aggregate exceed $40,000,000.

Reserve requirements would be uniform for all institutions regardless of size. The initial reserve requirement and the range within which the Federal Reserve Bank may set the reserve requirement by regulation (solely for the purpose of implementing monetary policy) are as follows: (1) total of net demand deposits and savings deposits at banks and transaction accounts at other depository institutions, 9 percent within a range of 8 to 10 percent; (2) time deposits with initial maturities of 179 days or less, 4 percent within a range of 2 to 6 percent; and (3) time deposits with initial maturities of 180 days or more, 1 percent within a range of ½ of 1 percent to 2 percent.

This section also provides that in extraordinary circumstances the Federal Reserve Board may impose reserve requirements outside the limits prescribed for a period not exceeding 30 days, which may be extended for an additional 30 days. Exercise of this authority requires the Board to promptly transmit to Congress the reasons for its use of this authority.

For banks subject to reserve requirements, the Board is also permitted to impose re-

serve requirements against net balances owed by domestic offices of banks in the United States to their related foreign offices and to nonrelated foreign banks and against their borrowings based on loans to United States residents made by overseas offices of banks with offices in the United States and assets held by foreign offices of banks in the United States acquired from their domestic banks, if such action is necessary to the implemention of monetary policy.

Reserve requirements for any depository institution not a member bank on August 30, 1978 would be phased in over a period of four years. During the first year required reserves would be reduced by 75 percent, during the second year by 50 percent, and during the third year by 25 percent.

For any member bank which would have its reserve requirements increased by this legislation, the additional reserve requirement would be phased in over a four year period in a similar manner.

This section also indicates that in the case of affiliated banks and affiliated nonbank depository institutions, the total deposit liabilities exempted from reserve requirements shall not exceed in the aggregate the product resulting from multiplying the number of institutions in such affiliated group on August 1, 1978 by $40,000,000 for each such exemption. For each such exemption, no more than $40,000,000 shall be exempted at any individual bank or nonbank depository institution.

The new reserve requirement structure in this section would result in a reduction in reserve requirements for many member banks and for the banking system as a whole. In order to provide for an orderly transition period, the Board may implement the new reserve requirements on a gradual basis over a period of 24 months.

Any depository institution maintaining reserves as required by the Federal Reserve Board would be entitled to all the privileges of membership in the Federal Reserve System, except the holding of stock in, or voting for any director of, a Federal Reserve Bank.

Nonmember banks not maintaining reserves would be entitled to access the Federal Reserve discount window. The Federal Reserve Board may as a condition of access require certification of solvency of such bank from the Federal Deposit Insurance Corporation.

Section 6. Form of reserves. Reserves held to meet the reserve requirement set by the Board may be in the form of (1) balances in a Federal Reserve bank at which the depository institution is a member or at which it maintains an account; (2) balances maintained by a nonmember depository institution in a bank that maintains required reserve balances at a Federal Reserve bank, in a Federal Home Loan Bank, or in a central liquidity facility that may be established for credit unions, provided that such funds are then passed-through to a Federal Reserve bank; or (3) in the form of vault cash. The proportion of vault cash that may be counted to satisfy reserve requirements must be identical for all depository institutions. Balances received by a bank from another depository institution that are used to satisfy reserve requirements on such depository institution would not be subject to reserve requirements imposed on the receiving bank or to assessment imposed on such bank pursuant to the Federal Deposit Insurance Act.

Section 7. Pricing of services. This section requires the Federal Reserve Board to price services provided by the Federal Reserve System at a market cost and to provide access to such services to all depository institutions on the same terms and conditions. Such services are currently provided by banks without charge. The Board would be required to publish for comment a set of pricing principles and a proposed schedule of fees for Federal Reserve services by July 1, 1979, and to institute pricing of its services by July 1, 1980.

The pricing principles would be required to take into account the taxes that would be paid and the capital costs that would be incurred if privately owned organizations provided similar services. Due regard would be given to competitive factors and to the provision of an adequate level of services nationwide.

Section 8. Committee on money substitutes. This section would require that the Federal Reserve Board establish a committee to examine questions related to the imposition of reserve requirements against bank and nonbank liabilities that are substitutes for demand deposits. The Committee would be composed of five members to be appointed by the Broad and the individuals would have broad backgrounds on monetary affairs, economic policy, or finance. The appointees could not be United States Government employees, or employees, officers, or directors of a Federal Reserve bank.

The committee would conduct a thorough study and investigation of (1) the need for legal reserve requirements against short-term liabilities such as nonbank "federal funds", security repurchase agreements, Eurodollars, security dealer repurchase agreements, liquid asset mutual funds, cash management services, and travelers checks; (2) the appropriate level of reserve requirements against each type of money substitute; and (3) the need for the Federal Reserve Board to have flexibility to change such reserve requirements.

The committee would be required to include in its report to the Board recommendations for administrative actions and legislation.

Section 9. Authority of State bank supervisors. This section indicates that nothing in this Act or in amendments made by this Act shall be construed as derogation of the authority of any state bank supervisor over any institution it supervises by state law.

Section 10. Effective date. The new reserve requirements included in Section 5 and 6 shall take effect on the first day of the sixth calendar month after enactment. All other sections take effect on the date of enactment.

---

By Mr. STENNIS:

S. 3486. A bill to authorize appropriations for fiscal year 1979 for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test and evaluation for the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for civil defense, and for other purposes; to the Committee on Armed Services.

(The remarks of Mr. STENNIS when he introduced the bill appear elsewhere in today's proceedings.)

---

By Mr. BELLMON (for himself and Mr. BARTLETT):

S. 3487. A bill to change the name of Clayton Lake in the State of Oklahoma to Sardis Lake; to the Committee on Environment and Public Works.

● Mr. BELLMON. Mr. President, I am introducing a bill today for myself and my colleague, Senator BARTLETT to correct a situation that occurred inadvertently due to the Flood Control Act of 1962. This act provided for a new reservoir to be constructed in Pushmataha County, Oklahoma.

This reservoir, presently under construction, was named Clayton Lake in the legislation. Less than ten miles from the site of the new lake is an existing Clayton Lake. Many Oklahomans have contacted my office pointing out the confusion that would result from two lakes of the same name in the same county.

The bill, which I am introducing today, will rename the lake, Sardis Lake, after the town of Sardis which will be partially inundated by the new reservoir. The name Sardis was chosen by the resident of Pushmataha County during a public meeting.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3487

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the lake known as Clayton Lake, which is being constructed as part of the project for the Clayton and Tuskahoma Reservoirs, Kiamichi River, Oklahoma, authorized in the Flood Control Act of 1962, shall hereafter be known as Sardis Lake, and any law, regulation, document, or record of the United States in which such lake is designated or referred to shall be held to refer to such lake under and by the name Sardis Lake.●

---

## ADDITIONAL COSPONSORS

S. 3248

At the request of Mr. MORGAN, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 3248, to create a National Agricultural Cost of Production Board.

S. 3280

At the request of Mr. BAYH, the Senator from South Dakota (Mr. ABOUREZK) was added as a cosponsor of S. 3280, to establish a National Institute of Justice.

S. 3320

At the request of Mr. HATHAWAY, the Senator from New Hampshire (Mr. DURKIN) was added as a cosponsor of S. 3320, a bill to provide tax breaks for investments in stock of small businesses.

S. 3425

At the request of Mr. HATHAWAY, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 3425, the Community Mental Health Assistance Act of 1978.

S. 3447

At the request of Mr. STONE, the Senator from North Carolina (Mr. MORGAN), and the Senator from Iowa (Mr. CLARK) were added as cosponsors of S. 3447, the Agricultural Export Trade Expansion Act of 1978.

---

## SENATE RESOLUTION 553—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. LONG, from the Committee on Finance, reported the following original

resolution, which was referred to the Committee on the Budget:

S. RES. 553

*Resolved*, That (a) pursuant to section 402 (c) of the Congressional Budget Act of 1974, section 402(a) of such Act shall not apply with respect to the consideration in the Senate of the bill (H.R. 2852) to amend the Internal Revenue Code of 1954 to provide that refunds of the taxes on gasoline and special fuels shall be made to aerial applicators in certain cases; and

(b) That waiver of this section is necessary in order to enable the Senate to consider legislation which will extend and modify the program of antirecession fiscal assistance established by the Public Works Employment Act of 1976; and further

(c) That it was infeasible to complete action on this legislation within the usual time limits prescribed by this section because of the uncertain legislative status of the program in the House and because this program is so particularly related to economic conditions as to make it highly desirable to delay action beyond the usual deadline in order to obtain as accurate a view of present economic trends as possible.

## NOTICES OF HEARINGS

SUBCOMMITTEE ON FEDERAL SPENDING PRACTICES AND OPEN GOVERNMENT

● Mr. HEINZ. Mr. President, the Subcommittee on Federal Spending Practices and Open Government is announcing a hearing on S. 3284, the Free and Fair Trade in Procurement Act of 1978, to be held Tuesday, September 12, at 10:00 a.m., in 3302 Dirksen Office Building.

Any inquiries regarding the hearing should be directed to Mr. Joseph Robinson, subcommittee professional staff (224–6740.)●

SUBCOMMITTEE ON LABOR

● Mr. WILLIAMS. Mr. President, the Subcommittee on Labor will have hearings on the Administration and Enforcement of the Occupational Safety and Health Act of 1970 on Tuesday, Wednesday, and Thursday, October 3, 4, and 5, 1978. The hearings will be held in room 4232 of the Dirksen Building, and will commence, on each day, at 9:30 a.m.

Those wishing additional information, or wishing to testify at these hearings should contact Mike Goldberg of the committee staff, at room G–237 of the Dirksen Senate Office Building, Washington, D.C. 20510, telephone (202) 224–3674.●

COMMITTEE ON VETERANS' AFFAIRS

● Mr. CRANSTON. Mr. President, I would like to announce for the information of the Senate and the public that the Committee on Veterans' Affairs will conduct a hearing to receive the legislative recommendations for fiscal year 1979 from the national commander of the American Legion, John M. "Jack" Carey, on Tuesday, September 12, 11 a.m., in room 318 of the Russell Building.●

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate today to hold an oversight hearing on motor carrier safety.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### THE LOBBYING CAMPAIGN ON HOSPITAL COST CONTAINMENT LEGISLATION

● Mr. CURTIS. Mr. President, the National Conference on State Legislatures apparently has undertaken a massive lobbying campaign on behalf of the amendment introduced by my colleague on the Committee on Finance, the Senator from Wisconsin (Mr. NELSON). On August 17, they wrote all of the chairmen and members of the respective State legislative health committees, urging that they contact their senatorial delegation in support of the Nelson amendment to H.R. 5285, the hospital cost containment legislation recently reported by the committee.

State Senator Richard A. Snyder, a distinguished member of the Pennsylvania State Senate and ranking minority member of the Public Health and Welfare Committee, does not at all share NCSL's enthusiasm for the Nelson amendment. I request that his response, forwarded to Senator HEINZ, be printed in its entirety in the RECORD.

The material follows:

SENATE OF PENNSYLVANIA,
*August 22, 1978.*

Hon. H. JOHN HEINZ, III
*U.S. Senate, Dirksen Building, Washington, D.C.*

DEAR SENATOR HEINZ: This is response to the Honorable Irving Stolberg's communication of August 17 requesting my views on legislation which is presently before the Congress. Representative Stolberg is Chairman of NCSL's Committee on Human Resources.

I regret that I cannot support the Nelson amendment to HR 5285. Interestingly, such an effort in Pennsylvania's medical assistance program was declared unconstitutional several weeks ago.

While the hospital increases exceed inflation figures in other areas of our economy, it is encouraging to note that the Voluntary Effort program by the nation's hospitals has succeeded in lowering the rate of inflation in the past year. It would seem only fair to permit the hospitals to monitor their own industry for at least another few years, offering incentives for more efficient management rather than the threat of government control.

Government does not belong in the private hospital business as suggested by the Nelson amendment. We already have too much government control, and perhaps it is time for government to examine the proliferation of inspections and paper work with which hospitals must comply rather than to take a broad step that will only lead to additional government intervention.

I do share the concern of Congress for the high rate of inflation in medical charges by hospitals. I also must express my concern for the high costs of public assistance and other government programs. If Congress is truly attuned to reducing overall costs of medical charges, it is time to review eligibility criteria and waste and fraud in these areas. Penalizing those who provide needed care to the indigent will not correct the problem.

Cordially,

RICHARD A. SNYDER.●

### CURRENT U.S. POPULATION

● Mr. PACKWOOD. Mr. President, I wish to report that, according to U.S. Census Bureau approximations, the total population of the United States as of September 1, 1978 is 219,294,521. In spite of widely publicized reductions in our fertility levels, this represents an increase of 1,677,708 since September 1 of last year. It also represents an increase of 183,637 since August 1, 1978, that is, in just the last month.

Over the past year, therefore, we have added more than enough people to fill the city of Houston, Texas. In the last month, we have added more than enough people to fill the city of Syracuse, N.Y.●

### DEEP SEABED MINING AND THE LAW OF THE SEA CONFERENCE

● Mr. JACKSON. Mr. President, the Senate will soon be considering S. 2053, the Deep Seabed Mineral Resources Act. Similar legislation has already been passed by the House of Representatives (H.R. 3350).

This legislation has a significant relationship to the current negotiations in the Third United Nations Law of the Sea Conference. I have been concerned about the potential impact of any Law of the Sea Treaty on the ability of American industry to recover minerals from the deep ocean floor.

On August 7, I put into the RECORD (page 24670) a copy of a letter to Ambassador Richardson from Senator HANSEN and me expressing our concerns about the current version of the treaty. I have just received an encouraging response from Ambassador Richardson which, I believe, will be of interest to all Senators. I ask that Ambassador Richardson's response together with the letter which Senator HANSEN and I sent him be printed in the RECORD.

The letters follow:

COMMITTEE ON ENERGY AND NATURAL RESOURCES,
*Washington, D.C., August 2, 1978.*

Hon. ELLIOT RICHARDSON,
*Ambassador at Large, Department of State, Washington, D.C.*

DEAR MR. AMBASSADOR: S. 2053, the Deep Seabed Mineral Resources Act, has been ordered reported by the Senate Energy and Natural Resources Committee and is now pending before the Senate Commerce, Science, and Transportation Committee. The House of Representatives recently passed a similar bill. Since it is likely the Senate will consider this legislation sometime this summer, we have been keenly interested in the progress of negotiations in the Third United Nations Law of the Sea Conference, particularly those in Committee. One bearing on formulation of a new legal regime for the deep seabed.

We fully appreciate the complexity of your assignment. Defining the national interest relating to UNCLOS negotiations is in itself an extraordinarily difficult exercise, quite apart from the problems inherent in carrying forward discussions with over 150 delegations each with its own constellation of national

interests in maritime law. We can understand the need to balance and weigh these many considerations in arriving at the United States position on any given issue. The U.S. delegation under your leadership has achieved impressive gains in some areas. For these achievements you are to be congratulated.

However, the trend in Committee One negotiations appears less than promising. Last September you testified before Congress that there were a number of key features of the Informal Comprehensive Negotiating Text (ICNT) produced at the Sixth UNCLOS Session which were "fundamentally unacceptable" to the United States and you itemized those unacceptable provisions. Unfortunately, the Seventh UNCLOS Session held at Geneva appears to have yielded little progress in satisfactorily modifying these unacceptable provisions of the ICNT. Spokesmen for the U.S. ocean mining industry have voiced serious doubts about the ability to proceed to commercial recovery of manganese nodules under terms and conditions of the ICNT. After the Geneva Session, a joint statement representing the views of Belgian, British, Canadian, Dutch, French, German, Japanese and United States ocean mining companies said that "the draft treaty texts resulting from the Seventh Session did not significantly improve the previous draft treaty proposal (ICNT) which was considered to be 'fundamentally unacceptable'—in some cases the new texts were worse."

As we understand it, the ICNT would (among other things) impose what amounts to the mandatory transfer of technology from private firms who have invested many millions of dollars in development, to a competing international seabed authority; would unduly limit the production of minerals with no comparable restraint upon production by the authority; would severely restrict the number of available mine sites for U.S. ocean mining firms; would allow no meaningful review of authority decisions denying contracts to U.S. ocean mining firms; and would establish a 20-year termination process which would inhibit entry by new U.S. firms into ocean mining activity.

We are deeply concerned that our legitimate seabed mining rights are being traded away in the treaty negotiations. We understand you have stated in more than one forum that (in effect) the United Nations Moratorium Resolution of 1969 (G.A. Res. 2574D XXIX) declaring the resources of the deep seabed to be the Common Heritage of Mankind and off-limits to exploitation has all but nullified the traditional high seas freedoms under which U.S. ocean mining firms have always assumed their right in international law to engage in the commercial recovery of manganese nodules. To illustrate this point, you are said to have compared the current United States position in Committee One with a hypothetical multinational corporation dickering with the Government of Indonesia for off-shore drilling rights. It seems to us in so doing you are implicitly acknowledging ownership and control of the deep seabed by an international community dominated by a Third World majority which is unfriendly to U.S. ocean mining rights and interests.

The implications of this position are most disquieting. There are several reasons for our uneasiness. First, the United States has never, either formally or informally, recognized the U.N. Moratorium Resolution as carrying the force and effect of international law. In fact, in May, 1970, the President said "I do not believe it either necessary or desirable to try to halt exploration and exploitation of the seabed beyond a depth of 200 meters during the (treaty) negotiating process." U.S. negotiators have consistently adopted this attitude ever since that time.

Second, deep seabed mining legislation now moving through Congress (as well as similar bills introduced in prior Congresses) strongly asserts the right of U.S. ocean mining firms to proceed to commercial development under existing high seas freedoms, pending completion of UNCLOS negotiations and ratification of a law of the sea treaty by the Senate.

Third, until such time as the term Common Heritage of Mankind has been given legal definition by a treaty ratified by the United States Senate, its legal application to U.S. citizens is inevitably subject to conflicting and ambiguous interpretation. Fourth, in our view the moratorium on seabed mining contained in the U.N. Resolution of 1969 cannot prevent seabed development unless control of the seabed has been acquired by an international seabed authority under terms of a duly ratified law of the sea treaty. Fifth, we detect an inconsistency between the United States delegation's forthright—and so far successful—defense of high seas freedoms of navigation for vessels in the Exclusive Economic Zone and your apparent relinquishment of high seas freedoms for ocean mining activities.

Sixth, we can see no evidence of a United States negotiating "bottom line" in Committee One: what you cited as being fundamentally unacceptable to the United States in the ICNT before the Geneva Session would now appear to be acceptable through changes in the text which lack substance. Nor are we aware of any straight-forward response to the point-by-point criticisms of the U.S. negotiating position which have been submitted by the ocean mining industry and other more neutral observers.

Last October, when you appeared before the combined hearing of the Senate Energy and Commerce Committees to report on the unacceptable terms of the ICNT, you accurately set forth what is essentially our own view of the position the United States should adopt in Committee One negotiations. We believe the statements you made then is worth repeating:

"What is involved here is the establishing of a regime for half the Earth's surface. While today's technology points only to manganese nodules, there is no telling what lies ahead in the future. We simply cannot agree to a regime which would unnecessarily inhibit, and perhaps even prevent, deep seabed development. To do so would make a mockery of the Common Heritage of Mankind and reduce to a pitiful trickle the benefits that could otherwise accrue—not only to the entrepreneurs who will risk their capital, but also to mankind as a whole, in particular the developing countries."

In light of this statement, and in light of our considered opinion that high seas freedoms for U.S. ocean industries are not impaired by United Nations actions short of a duly ratified law of the sea treaty, we would respectfully suggest a reassessment of the direction and tenor of the United States negotiating posture. Moreover, we would suggest a careful examination of whether or not the United States Senate is prepared to ratify a law of the sea treaty containing terms and conditions such as those in the ICNT which would inhibit and prevent deep seabed development by U.S. firms. We are inclined to believe the Senate would not ratify such a treaty.

Would it be possible to provide the Senate, prior to the reconvening of the Law of the Sea Conference in New York, with a report on the "bottomline" United States negotiating position in Committee One? This could be done either in the form of a letter or, if you prefer, through your appearance before a hearing of the Senate Committee on Energy and Natural Resources.

We look forward to your response.

Very truly yours,

HENRY M. JACKSON,
*Chairman.*
CLIFFORD P. HANSEN,
*Ranking Minority Member.*

---

AMBASSADOR AT LARGE,
*Washington, D.C., August 28, 1978.*

Hon. HENRY M. JACKSON,
*U.S. Senate*

DEAR MR. CHAIRMAN: Thank you for your letter of August 2. As you may know, I have only recently returned from a trip to Latin America. I regret that my absence from Washington prevented an earlier response to your letter.

Your letter raises several very important issues. I would begin by examining three assumptions upon which your arguments appear to be based. The first of these is that the "trend in Committee I negotiations appears less than promising." Certainly, no one could safely predict a quick and satisfactory resolution of Committee I issues, but if we are patient, the trend is in our direction.

The session in Geneva this past spring may have marked a turning point in the Conference. The posturing and rhetorical excess that had marked previous sessions was absent in Geneva. It was replaced by a genuine willingness upon the part of all delegations to seek a workable compromise embodied in a "parallel system of access" to seabed resources.

This is not to say that the substance of the negotiations improved at the same pace as the atmosphere, for the issues dealt with were among the most difficult. Though there was some improvement in texts at Geneva, we are still far from agreement that fairly accommodates the interests of the U.S. and other industrialized countries.

This brings me to the second assumption: that the ICNT seabed texts are regarded by the U.S. delegation as acceptable or nearly acceptable. This assumption has underlain much of the criticism directed toward the delegation since the end of the Geneva session. Putting it bluntly, it is a "red herring."

I share many of the criticisms that have been directed toward the ICNT by the industry and other observers, and have so stated publicly on many occasions. Enclosed is a copy of a statement made last week by my deputy, Ambassador Aldrich, in Negotiating Group I to ensure that there can be no misunderstanding of our position in the Conference.

Clearly, an acceptable seabed text will have to contain significant improvements over the ICNT. We are engaged in what could well be a long process of seeking these improvements. Our objective is to negotiate a text that provides assured access to seabed resources for state-sponsored miners.

The means we have chosen to achieve that objective is to create a parallel system that is and is perceived to be viable on both sides—the "private" (state-sponsored) side and the "Enterprise" side.

Several elements must be combined into a package to form a viable parallel system. These include a structure and voting system of the governing institutions which protect the important economic interests at stake, financial arrangements which place reasonable burdens on private miners, and procedures for obtaining contracts that provide reasonable assurance of access.

In addition, ways must be found to provide reasonable assurance that the Enterprise will be able to get into business promptly. This part of the package includes financing the Enterprise and providing it as-

surance that it can purchase the necessary technology during the start-up period.

Because we are negotiating a package, it is not possible to define a single "bottom-line" position in terms of each separate element. If we could, it would make our task far easier. It is necessary, rather, to assess the package in its entirety to determine whether it satisfies our basic requirement of assured access. Following the close of the Seventh Session, we shall examine the seabed package as it then stands with a view to formulating Administration policy for subsequent negotiations.

The third assumption is to me the most troubling. It is the idea that we have fallen back from the position that seabed mining is a freedom of the high seas. We continue to hold this position just as firmly as ever. I have pointed out that others disagree with our view. I have described their arguments.

But my description of their positions and analysis of the possible consequences of a legal and political conflict over this issue should not be mistaken for adoption on my part of those arguments nor for a lack of willingness on the part of the Administration to face up to the consequences of such a conflict. Also enclosed is a copy of a statement I made on August 28 in the General Committee of the Conference defending the legality and the wisdom of our legislation on seabed mining.

I am also disturbed by the implication that we have not taken into account the views and suggestions of the industry and other observers. Our relationship has been one of constant cooperation and interchange of ideas. Industry representatives have been most helpful to us in preparing for the current negotiations in New York where we continue to consult closely with them.

You asked that I consider ". . . whether or not the U.S. Senate is prepared to ratify a Law of the Sea Treaty containing terms and conditions such as those in the ICNT . . ." Such an examination would be necessary only if I were willing to recommend to the President that he submit such a treaty to the Senate. I am not so willing. When and if a treaty is submitted to the Senate, I intend that it be a treaty that protects U.S. interests in seabed mining.

I have explained above why it is impossible to provide the Energy and Natural Resources Committee a "bottom-line" seabeds negotiating position. I would be more than happy, however, to meet with the Committee following the conclusion of the current session to explain in greater detail our positions on various issues and to provide you my assessment on future prospects.

With best regards,

Sincerely,

ELLIOT L. RICHARDSON.

---

STATEMENT MADE IN NG–1 BY THE REPRESENTATIVE OF THE UNITED STATES

AUGUST 24, 1978

MR. CHAIRMAN: I want to support your proposal that we not go back over the texts produced in Geneva, but move ahead to work on other elements of the system of exploitation, in particular, Annex II. I think the most important thing is that the texts produced in Geneva have moved us closer to consensus and will form the basis for further negotiations.

Even more significant than the production of these new texts is the fact that the negotiation proceeded in a heartening atmosphere of cooperation. Virtually all delegations have accepted a common challenge—how to make the parallel system of exploitation workable, and our efforts have been directed to this common task.

I would not, however, want to leave the impression that our future work will be easy. Far from it; many seemingly intractable issues lie ahead. The texts produced in Geneva reveal our failures as well as our accomplishments. My delegation's belief that we should now proceed to other issues should not be misunderstood as implying our satisfaction with or acceptance of the Geneva texts. These texts need significant further improvements, both in detail (which I would not wish to discuss here) and with respect to major issues. Ambassador Richardson has asked that I make clear our concerns with respect to these issues.

Among the major defects of these texts is the review clause, which remains unsatisfactory, although it is clearly an improvement over the comparable provisions in the ICNT. The minerals from the seabeds will be more needed by the world's economy in the next century than they are now; clearly we could not be expected to agree that our access to them might be denied at that time. The common heritage of mankind is not something that can be hidden away and hoarded. On the contrary, it must be available for use by all states as needed.

Similarly, some of the provisions on transfer of technology continue to cause us deep concern. While they use an acceptable standard, fair and reasonable commercial terms and conditions, we were disturbed to find that our willingness to contemplate the imposition upon contractors of extraordinary and unprecedented obligations in order to assure the Enterprise that it will be able to acquire the technology it needs has encountered further demands that these obligations continue indefinitely, long beyond the time they are needed, and that the same obligations be undertaken for the benefit of developing countries which may want to engage in seabed mining on their own.

These provisions are not needed to make the parallel system of exploitation workable, and pressure for them would imperil acceptance of obligations designed to put the Enterprise in business. Moreover, I think it is generally recognized that the texts produced in Geneva need improvement with respect to arbitration, the award of damages, and the availability of other sanctions to avoid any implication that contracts can be annulled as a result of inevitable disagreements over the terms on which technology will be sold.

The production control contained in Article 150 bis is clearly an improvement over that contained in the ICNT. Like all compromises, it confronts both producers and consumers with painful decisions. My government has not yet decided whether it is acceptable, and we can understand that others may also wish to examine it in the context of a fully developed parallel system of exploitation.

Article 150 bis needs to be revised to make clear that the Authority can become a party to any commodity agreement only if all major producers and consumers of the commodity in question also become parties. This is necessary to protect the interests of both producers and consumers. We should not overlook the fact that many other elements of the system of exploitation require much further work, clarification and improvement before my government, or, I would expect, the governments of most states represented here would be in a position to pass judgment on the acceptability of the system as a whole. This will be one of our principal tasks at this renewed session.

Also, we shall have to ensure that the Enterprise is a responsible competitor—that it bears substantially the same burdens as state and private companies. This consideration impels me to suggest that we begin our work this year with the question of whether part or all of Annex II applies to the Enterprise. It is impossible to deal intelligibly with the question of the selection of applicants without including the whole question of the approval of plans of work for the Enterprise as well as for state and private contractors.

---

STATEMENT BY AMBASSADOR ELLIOT L. RICHARDSON ON NATIONAL SEABED MINING LEGISLATION AT THE GENERAL COMMITTEE OF THE LAW OF THE SEA CONFERENCE

AUGUST 28, 1978

Mr. PRESIDENT, I have listened with respect to the views expressed by the distinguished representative of Fiji on behalf of the Group of 77, and I do not wish to precipitate a lengthy debate on the subject of the deep seabed mining legislation. However, in my view and in the view of the other countries whose enterprises are now in the process of developing the means of recovering hard minerals from the deep seabed, the concept of the common heritage of mankind, which we supported in 1970 and to which we still subscribe, has never meant that these resources must remain unexploited in the absence of an internationally agreed seabeds regime. I would have thought this point would have been made clear by our concurrent opposition to the moratorium resolution, which was not adopted by consensus.

In our view, states and their nationals have the legal right to use the mineral resources of the deep seabed beyond national jurisdiction. This is a freedom of the high seas which has not been abridged either by any treaty or by customary international law. Although we are all engaged in the process of developing a treaty, this process has proved long and difficult, and its successful conclusion is not yet at hand.

I understand why the Group of 77 would prefer that we agree to defer any mining until an agreed treaty can be concluded, but I trust the Group will also understand why we cannot responsibly do that in face of the world's long-range need for the minerals and the more immediate need to proceed with the research and development that will in turn lead to the beginning of commercial mining. Far from jeopardizing the Conference, seabed mining legislation should facilitate the early conclusion of a generally acceptable Law of the Sea Treaty by dispelling any impression that the governments of the countries preparing to engage in such mining can be induced to acquiesce in an otherwise unacceptable treaty because that is the only way to obtain the minerals.

Mr. President, so far as the US is concerned, the goal of my Government remains the earliest possible conclusion of a generally acceptable Law of the Sea Treaty, and I believe the legislation now before the Congress to be entirely compatible with the principles on which the eventual treaty will be founded;

It recognizes that the resources of the seabed are the common heritage of mankind.

It requires that revenues be set aside for developing countries.

It requires stringent standards for the protection of the marine environment.

It does not assert any right of sovereignty or sovereign rights over seabed mine-sites.

It will be superseded whenever a law of the sea treaty takes effect with regard to the United States.

It does not declare or imply any intention that American seabed mining companies should remain outside the jurisdiction of an International Seabed Authority under such a treaty.

Finally, Mr. President, under the legislation that has just emerged from the Senate Committee on Foreign Relations, no permits for commercial recovery of hard mineral resources could in any case be issued for several years. This will allow ample time for our negotiations to conclude, thus assuring that seabed resources will be developed only under the international regime we are striving to achieve.

Thank you, Mr. President●

## SHIRLEY CUSICK CROWNED WINNER OF MISS INDIANA WHEELCHAIR PAGEANT

● Mr. LUGAR. Mr. President, in July of this year Shirley Cusick of Terre Haute, Ind., was crowned as the winner of the 2d Annual Miss Indiana Wheelchair Pageant. Her life is one of triumph over the odds and victory over a handicap which might have defeated individuals of lesser determination and commitment. I draw her story to the attention of my colleagues as an example of the tenacity of the human spirit and as a source of inspiration to us all.

Shirley Cusick enjoyed an active childhood and loved the outdoors. She played softball, baseball, basketball, and participated in water sports of all kinds. Throughout her high school years and the first few years of her marriage, she was a member of countless organizations, often serving as the chairman or officer of a committee. Her secure childhood and early adult life were temporarily shattered on August 10, 1968, when an automobile accident left her totally paralyzed. In time and with extensive rehabilitation, Shirley regained the use of her body but learned that she would have to use a wheelchair for the remainder of her life.

Accustomed to an active life, the adjustment to a wheelchair could not have been an easy one for Shirley Cusick. As the mother of two small children, she knew that the accident which forced her into a wheelchair could not retire her from a demanding schedule. She set about to pick up the pieces of her life and decided to enter college. Six years later, Shirley is a college graduate who fully operates her own home and cares for her children. She has worked as a Girl Scout leader, a volunteer in the physical therapy department, and as a member of various groups formed to increase the public's awareness of the special needs of handicapped persons.

Shirley Cusick is continually tackling a new challenge and is presently learning to drive a van. She intends to continue her education and her work on behalf of the handicapped. For Shirley Cusick the future is a promising one filled with unlimited opportunities for service. I salute her courage and willingness to share her life so abundantly with her family, friends, and community.●

## THE INVESTIGATION OF GENERAL SERVICES ADMINISTRATION

● Mr. CHILES. Mr. President, as you know, last March I directed the Federal Spending Practices Subcommittee to begin an investigation into the substantial scandals which, 6 months later, appear to be engulfing the General Services Administration (GSA). While investigative hearings have been held in June, and will continue on September 18, one matter has become so pressing as to require immediate action and public knowledge that the problem exists.

Accordingly, I want to advise the Senate that I have contacted Mr. Ben Civiletti, head of the Criminal Division of the Department of Justice, and Mr. Vincent Alto, Acting Inspector General of GSA, and requested them to meet with me early next week.

The topic of our discussion is painfully familiar to them, and to many persons in the law enforcement community who are involved in the current GSA investigations.

Once again, it appears, the internecine warfare between competing bureaucracies has begun. As public interest in the GSA scandals rises, the race for glory becomes more intense.

Unfortunately, this race is working to the detriment of the investigation itself. My investigators report that several rapidly progressing and very promising investigations have become bogged down in a three sided name calling contest among Federal Bureau of Investigations agents, GSA investigators, and Justice Department personnel.

Out on the street, various charges of ineptitude and incompetence are traded among the investigatory staffs involved. Too much time is still being spent arguing about who dropped the ball back in 1975 when Mr. Bob Lowry first went to the authorities.

As a consequence, I regret to report that we will probably hear at our September 18 hearing that the reforms promised at the June hearings have not happened yet. The indictments would not be in, and the crooks will not have been fired. Some perhaps, but not in anywhere near the numbers necessary to overcome the waves of criminal activity GSA has suffered for years.

I realize that Mr. Civiletti and Mr. Alto have met several times on their own initiatives in an attempt to solve this problem. But, while I compliment them for their foresight, it is now plainly evident that the word has not trickled down to their squabbling subordinates.

Consequently, I propose to extract an operating protocol from these gentlemen and then hold them to it. If the squabbling and time wasting continues, then I shall be forced to consider making public the names and ranks and specifics of each instance we are aware of where Federal officers have spent more time fighting among themselves than conducting criminal investigations. I would, of course, only do this as a last resort. But I think this constitutes fair warning to the obstructionists that the Congress is not going to stand aside and accept the possibility that the GSA investigations are going to go down the drain again.●

## COLUMBUS, IND.

● Mr. BAYH. Mr. President, the September issue of National Geographic magazine contains an article on Columbus, Ind., which I would like to share with my colleagues. I have long recognized the outstanding qualities of Columbus and am pleased that a magazine such as the National Geographic has focused national attention on this extraordinary city.

A combination of talented people, generous businesses, and remarkable architecture make Columbus a unique community. The article aptly captures the spirit, history, and lifestyle of Columbus and reinforces my pride and honor in representing such a fine community.

I request that the article be printed in the RECORD.

The article follows:

A MOST UNCOMMON TOWN: COLUMBUS, IND.

As civic decoration, it's not your typical cannon on the courthouse lawn—"Chaos I" (left), a clanking tangle made of old Indiana machinery by Swiss sculptor Jean Tinguely. But it's in Columbus, and that's not your typical midwestern county seat, either.

This day schoolchildren have come to The Commons, an enclosed public space designed by architect Cesar Pelli, to draw their impressions of the kinetic sculpture. People on their way to the adjoining shopping mall stop to look and to listen. Some regard the sculpture with heads cocked in puzzlement. Some scowl while others smile. Few ignore it.

At one end of The Commons older men gather in small groups to solve the world's problems and bemoan the price of fertillizer. Maybe some parts from their old combines, threshers, and augers—serious machines for serious work—have become, well, *art*. That's a good one.

In a way Columbus is like that, a town without any apologies for hard work, solid and industrious, yet one alive to and filled with art, especially contemporary architecture of national significance.

Roughly 40,000 people yearly come to look around this town of 32,000. Some just wander about on their own. Many go to the Visitors Center for guidance. So it's commonplace for a bus loaded with architecture students on tour to stop at The Commons. Children there won't pay them any mind, busy as they are exploring the universe of their fancies in a Playtank (right) while their parents run errands.

For townspeople the forty-plus buildings designed by modern masters of architecture do not make a spectator sport. They are places to learn in, pray in, read, in have fun in, work in, bank in, have the daily life of the community written and printed in. Small town in scale, they fit in like slightly eccentric neighbors, adding variety, provoking debate, and stimulating a taste for the unconventional.

Turning on at the City Power House, the Senior Citizens Kitchen Band, with Clara Wilds on her kazoosahose-funnelphone, practices in the former utility plant renovated for senior activities. The band goes "everywhere we're asked," getting raves at the State Fair and such requests as the one from a man in the convalescent home who asked for "a good old Methodist hymn—'Barney Google.'"

Over at City Hall, there's a brief break from the necessary but mundane concerns of streets, utilities, and budgets. Mayor Max Andress (facing page), former schoolteacher and football coach, beams as he concludes a wedding ceremony for a couple who had come down from Indianapolis because they like the lively spirit of building and rebuilding in Columbus.

Morning lights the rectangular planes of the First Christian Church (below), built in 1942 to Eliel Saarinen's design as the town's pioneer modern building.

Now that towns and small cities across the United States are enjoying a renaissance, Columbus stands among them as something of a Florence, with its Medici of the corporate variety.

Responsibility to the town was well established as a policy of the Cummins Engine

Company when J. Irwin Miller (above, with his wife, Xenia) became its chief executive. Founder Clessie Cummins was the chauffeur to a local banker, W. G. Irwin, and persuaded him to finance improvements to the diesel engine. But the profits, Irwin insisted, were not to be the sole purpose of the venture. They were also the means to provide jobs and personal and moral growth for the community. The jobs now total about 11,000 locally. The firm's philanthropy continues.

Most visible during Miller's tenure was a program that began with the schools. Cummins would pay the design fees if the school board picked from a given list of top architects. That was all; otherwise, the schools had complete control. Since 1957, 11 schools and several other public buildings have been so designed.

Setting its own example, Cummins built a new plant (right) into the landscape, with parking tucked away on top, and an outside view for all 2,000 employees.

From A to Z, the schools designed under the architects fee-paid program have, over 20 years, mirrored changing trends in educational philosophy. The most recent, Fodrea Community School, nestles into a neighborhood of modest, well-kept houses. Planned with the active participation of students, parents, and teachers, it features learning centers that occupy open, flexible space, where team teaching may be used to best advantage. As plans develop and funds permit, the school should become a center for the activities of all ages.

Sometimes the town gets its back up a bit. The building committee for the new library decided it wanted to choose its architect directly. So it went out and hired the renowned I. M. Pei on its own. It then turned around and asked Cummins for a building gift—and got $800,000.

A sampler of Columbus architecture might begin anywhere and run a gamut of public, private, and commercial structures done by such prominent architects as Harry Weese, John M. Johansen, Eero Saarinen, and Skidmore, Owings & Merrill. A spacious glass arcade connects two downtown bank buildings. The bell tower of the First Baptist Church crowns a house of worship whose aura is both post-modern and pre-Gothic. Eero Saarinen thought his North Christian Church might be the work that would most commend him to St. Peter.

Others are less reverent, calling Saarinen's church the "olican" and grumbling about company-town charity. Hoosier disdain for paternalism goes back a long way. In 1821 Gen. John Tipton gave 30 acres to found a town named Tiptona in his honor. The town promptly changed the name to Columbus. The general left in a huff and never came back.

Clowning around on the Fourth of July, children mug it up as some 40,000 Cummins employees and families converge on their own recreation complex, the 345-acre Ceraland, which offers everything from camping to concerts.

All on "The Family," a granite schoolyard sculpture by Harris Barron, join in on a chopper launch.

Art for its own sake enjoys widespread support and participation. When the Hartford Ballet came to town, it not only gave performances but also offered workshops in dance. Corporate and private sources help finance the arts, but their vitality depends on volunteers. That is what all the musicians in the Columbus Symphony Orchestra are. As commercial and cultural center for a seven-county area, Columbus has it both ways: enough people, talent, and enthusiasm to support city amenities, yet preserve a smaller town atmosphere.

For six generations the same family has watched sunsets go down beside the original farmhouse as additions to it went up. With a thousand acres in wheat, soybeans, corn, and tobacco, Ray and Lou Marr expect to see "at least one more generation in farming." Lou is active in historic preservation, and here enthusiasm is widely shared by others as concerned for the best of the old as for the best of the new.

At Zaharako's turn-of-the-century ice-cream parlor downtown, a satisfied customer thinks the cut glass, onyx, and polished brass are OK, but the cherry phosphates—wow!

Retired from big crops, a farmer and his wife expertly tend their small, intown yard and garden.

Little details can make life more livable. Add some paint and imagination, and a handball court becomes a poster. Multiply the details, large and small, all over town, and life becomes that much more pleasant. Made a part of corporate philosophy by such large local concerns as Cummins, Arvin Industries, and Cosco, Inc., the amenities become strong points in recruiting executive talent that might more naturally head for the big cities.

"We're really mountain and ocean people." That's how Dianne and Ron Hoge felt six years ago when they came to town with a two-year commitment to midwestern life. In their cedar and glass home designed by architect Scott Mitchell, they admit to having "been won over by Columbus," where in day-to-day living they learned to enjoy an improved quality of life away from the "urban hassle."

With the nation's growth now shifting to more rural areas, Columbus can only hope that hassle doesn't end up moving to town.●

## U.S. PIONEERS IN INSULIN RESEARCH ACHIEVE BREAKTHROUGH FOR DIABETICS

● Mr. SCHWEIKER. Mr. President, yesterday afternoon a team of researchers in California announced an extremely significant breakthrough in medical research. In the laboratory, they have succeeded in producing human insulin using new recombinant DNA techniques.

As reported by the group of scientists at the City of Hope National Medical Center and at Genentech, Inc., the process used involves the insertion of a synthetic gene into a bacterium known as E. coli. The gene can "order" the bacterium to produce insulin. The bacteria, complete with the new gene, are then grown in a fermentation process. As the bacteria reproduce, the offspring also contain the synthetic gene. In other words, the scientists are able to restructure the genetic material, or DNA, of the E. coli to incorporate an insulin-producing trait, which can then be triggered by the scientists.

The implications of this research breakthrough are enormous. There are over 1 million diabetics in the United States alone who must depend on daily insulin injections, and the number is steadily increasing as the prevalance of diabetes rises. The insulin now used is extracted from the pancreas glands of cattle and swine, so it is obvious there are definite limits to the total supply. A recent report from the National Diabetes Advisory Board indicates that some day, the demand for insulin in this country could exceed the amount available from beef and pork glands, although no shortage can be predicted for at least the next two decades. The possibility that bacteria can be used to produce insulin at the bidding of scientists could help alleviate any supply problem far into the future, guaranteeing diabetics in the United States and throughout the world that the life-sustaining insulin they need will always be available. They will no longer be dependent on the vagaries of beef and pork production. The price of insulin may also come down, as insulin manufacturers will no longer have to depend on costly extraction from animal glands.

The production of human insulin holds out other important benefits. Although the insulin we have today is undoubtedly life-giving, insulin produced in animal pancreas glands is not a perfect match for human insulin. Many diabetics, perhaps as many as 10 percent at one time or another develop an allergic reaction to the animal insulin they are now using. Obviously, this presents a very serious medical problem. If diabetics are able to receive insulin, produced by bacteria but identical to that produced in the human body, these allergic reactions may significantly decrease.

Yesterday's news also pointed out the importance of cooperation between the scientific community and American industry. Simultaneously with the scientists' announcement of this exciting breakthrough in insulin research, the U.S. largest manufacturer of insulin, Eli Lilly and Co., announced an agreement with the researchers to begin long-range development aimed at eventual commercial production. According to Lilly's research officials, much more work needs to be done before we can know for certain that mass commercial production of human insulin using this technique is feasible, and it is still too early to predict when animal and human testing can begin. American industry is excited about the potential application of the scientists' discovery and is eager to pursue it.

The foundation for the achievement reported yesterday lies in the groundbreaking work of other U.S. scientists in developing recombinant DNA technology, many of whom have been supported by our National Institutes of Health. The first success of experimenters in producing human insulin represents an application that grew out of years of painstaking basic research into the understanding of the workings of DNA; we are now beginning to see how this research can be of important practical benefit. The end result may help millions of people throughout the world who suffer from diabetes. I know my colleagues join with me in congratulating all those responsible for this breakthrough, which stands as a clear reminder of the pioneering greatness of American science and industry.●

## CETA REAUTHORIZATION

● Mr. BAYH. Mr. President, as the senior Senator from the State of Indiana, a State that overwhelmingly supports the reauthorization of the Comprehensive Employment and Training Act (CETA), I voted in favor of this legislation.

It is my strong feeling that a comprehensive job and jobs training program such as CETA is necessary if we are going to effectively fight unemployment

among our youth and disadvantaged citizens. The plight of our country's unemployed has always been one of my major concerns. Over the years I have struggled with this problem. Therefore, it is pleasing to me to know that so many of my colleagues, as is reflected in the vote, also share my concern.

But it is important that we not stop now in our constant battle with unemployment. We must turn our attention to the Humphrey-Hawkins legislation as another tool in our efforts to reduce unemployment. With the reauthorization of CETA and with the eventual passage of Humphrey-Hawkins, the Senate can stand proud in its accomplishments on behalf of our unemployed.

Specifically, I feel that the Senate version of the CETA reauthorization legislation reflects the President's and Congress intent to eradicate the abuses the program suffered during its first 5 years. Such provisions in title I as the limits on the length of time an individual can be enrolled in a CETA program and the maximum wage provision should cut back on the amount of substitution practiced by local prime sponsors. The establishment of an office of compliance and investigation should serve as an effective mechanism by which to combat fraud and abuse.

The title II provision limiting expenditures for public service employment wages to not more than 50 percent of the title II allotment will assure that at least half those funds be used for manpower services like on-the-job training, manpower training projects, work experience and other support services needed to enable people to obtain unsubsidized employment.

I am pleased to note that the Senate version of this legislation has retained the President's request for 725,000 title VI job slots. As you know the House cut 125,000 jobs from the title VI provision. Such cuts can only hurt the overall intent of this legislation, which is to reduce the unemployment ranks. The reason given for the House action was that antirecession jobs are not necessary in an improving economy.

However, it seems to me that the improvement in the economy may be as a result of such public service jobs. To cut back while unemployment still exceeds 6 percent is comparable to cutting off medication before the patient is well simply because he shows signs of improvement. Even though we all must be conscious of the need to cut back on unnecessary programs, we cannot afford to do so to the detriment of those most in need of such assistance.

Another key component of the legislation is the private sector initiative program. This program is designed to encourage prime sponsors to work more closely with local private employers, organized labor, community based organizations, and educational agencies and to experiment with a variety of approaches which ultimately will place disadvantaged persons in private employment. It is my understanding that Indianapolis has already established a Private Industry Council, consisting of a wide range of businessmen, local prime sponsors, and key citizen organizations for the purpose of coordinating the private sector initiative program. I will watch with great interest the progress of this program in the largest city in my home State. Hopefully in the future such councils can be established throughout the State of Indiana. For it is ultimately within the private sector that the problem of unemployment will be solved.

And finally, I am pleased to see the provision under the CETA bill for displaced homemakers. I have indicated over the years, my strong concern for the plight of those women, who through no fault of their own, find themselves without any economic assistance. In the last two Congresses, I have introduced legislation which would provide employment opportunities, training and counseling services to homemakers who are considered displaced from their family support through death of a spouse, divorce, or other loss of family income. The provisions of this bill are the first step in our country's dedicated effort to protect American homemakers, who often times find themselves in extremely vulnerable positions.

So again let me reiterate my firm support for the CETA reauthorization and further urge that this Congress continue to push legislation designed to eradicate poverty and unemployment in this the richest and greatest Nation in the world.●

## PROVIDING FOR SOCIAL SECURITY

● Mr. HAYAKAWA. Mr. President, although the Social Security Amendments of 1977 did several things to alleviate ever-increasing troubles, the social security system remains significantly underfinanced.

Under the new law, the tax rate and the wage base have been increased and will continue to be for several years. However, if we are to pay all of the benefits we promise, these levels will have to be increased again and again. The rising cost of social security, along with various other retirement systems, is becoming an unbearable burden on today's working population. This burden is bound to grow heavier.

Yesterday's Wall Street Journal carried an interesting article on this subject, written by A. Haeworth Robertson, chief actuary of the Social Security Administration from 1975–1978. Mr. Robertson states that we need to change our views on old age and retirement. He speaks of training persons for second, third, and even fourth careers, an idea I agree with profoundly.

I think Mr. Robertson presents some excellent ideas and I wish to share them with my colleagues. I ask that this article, entitled "Providing for Social Security," be printed in the RECORD.

The article follows:

PROVIDING FOR SOCIAL SECURITY

(By A. Haeworth Robertson)

The Social Security Amendments of 1977 made important revisions in the Social Security program. These amendments are generally considered to be the most significant social security legislation since 1972, and possibly since 1950.

Under the old law future generations of workers would have received progressively higher levels of retirement benefits, relative to their preretirement earnings, than today's generation receives. The amendments revised the method of determining benefits so this would no longer be true. In fact, benefits will be about 5 percent to 10 percent less generous for the majority of future recipients than for today's recipients. There will be an even greater reduction in the case of death and disability benefits payable with respect to relatively young insured persons. Of course, these changes reduced the future cost of the program.

The amendments provided for extraordinary increases in the maximum amount of earnings used for computing benefits and assessing taxes during the period 1979–81. Thus, in 1981 and later approximately 91 percent of the total payroll of persons in covered employment will be subjected to tax and recognized in determining benefits (compared with 85 percent at present). This change increased the income more than it increased the benefit payments.

INCREASES ALL AROUND

The amendments increased the tax rates themselves as well as the earnings which are taxable. The tax rate for both employes and employers under the Old-Age Survivors, Disability, and Hospital Insurance programs combined is 6.05 percent in 1978. The new law provides for a gradual increase in this tax rate, beginning in 1979, to an ultimate level of 7.65 percent in 1990 and later. Tax rates for the self-employed are scheduled to increase from 8.10 percent in 1978 to 10.75 percent in 1990 and later.

But even after all these changes, the Social Security program is still significantly underfinanced. To pay for the benefits which have been promised, taxes paid by the employe and the employer must continue increasing beyond the level of 7.65 percent in 1990. The tax rate must increase to approximately 8 percent by the year 2000 and 12 percent by the year 2025. The ultimate tax rate for the self-employed must become about 16 percent.

These future tax rates are based on the "intermediate" assumptions utilized by the trustees of the Social Security program. Actual future tax rates will be different from these estimates but it seems more likely that they will be higher than the estimates than that they will be lower.

The Social Security program, however, is only one component of the myriad of employe benefit systems which have grown up over the years in an attempt to satisfy the needs generated by an individual's illness, disability, old age or death. There are numerous other employe fringe benefit and income maintenance programs: worker's compensation, unemployment insurance, private retirement systems, group life and medical insurance plans, sickness benefit plans, among others.

The steadily growing cost of these systems may well be developing into an unsustainable burden. If this is true, the only conclusion is that the problem itself must be changed. Some way must be found to reverse the present trend whereby the inactive population is growing at a faster rate than the active working population. It seems highly unlikely that the active working population, already chafing under the yoke of today's burden, will be able and willing to assume the heavier burden projected for tomorrow.

In seeking ways to change the dimensions of the problem, the nation's concept of work, education, leisure and retirement should be reviewed carefully. It should be presumed that an individual will engage in gainful employment suitable to his physical and mental condition until an age well beyond age 60 or 65, perhaps even until the end of his life.

Such a trend may be a natural development as health and life expectancy improve

and as the growth in the work force slows because of the low fertility rates now being experienced and expected to continue in the future. Still, significant changes will be required in existing social and economic arrangements.

The nation must take appropriate action to provide an environment in which the capabilities of each individual can be utilized effectively, an environment which fosters meaningful activity, not empty idleness. Both the incentive and the opportunity should exist to enable every individual to work and produce throughout his lifetime in a series of endeavers compatible with his changing physical and mental abilities. Governmental policies should be directed toward these goals and not toward the removal from the active work force of able-bodied persons who must then be supported by the remaining active workers.

Jobs must be structured so they are more meaningful and satisfying to the individual. Persons must undergo training and retraining to enable them to have not just second careers, but third and fourth careers. In some instances jobs must be designed to fit the capabilities of the human resources available. For older persons as well as disabled persons, less strenuous jobs and part-time employment must be made available.

Significant advances will be required in our ability to match persons with jobs. Sometimes this can be achieved with one employer, but in some cases it will involve many different employers and may require geographical relocation as well.

These changes must begin to take place during the next 10 years, and they must be well under way by the turn of the century when the children of the post-World War II baby boom begin to reach their 40s and 50s. Bringing about these changes will be a slow process which will require the cooperation of many institutions, not just Social Security.

The first step in this process of change was the recent action by Congress prohibiting an employer from imposing mandatory retirement at an age lower than age 70 (with certain exceptions). This action was coincidental and was just another step in the direction of eliminating job discrimination altogether. Nevertheless it fits in well with the eventual need for a more complete utilization of the nation's human resources. As time goes by and health of the elderly improves, further increases in the mandatory retirement age may be advisable.

But the Social Security program effectively dictates the retirement policy of the nation and, since the program itself fosters a policy of relatively early retirement, Social Security must be revised. The mere existence of the Social Security program in its present form sets a standard and thus creates an expectation, which then fosters a presumption of entitlement, for retirement in a person's early to mid-sixties, regardless of the condition of his health and his ability to continue as a productive and useful member of society. The Social Security program thus creates some of the needs it purportedly exists to serve.

JUST 28 YEARS FROM NOW

To some observers, major changes in the Social Security program are out of the question because of the size and scope of the program and because it is so firmly established. On the other had, 53 percent of the present population consists of those born after World War II, persons who are now under age 33. These young persons will begin reaching their 60s just 28 years from now in the year 2006.

It is today that a general framework should be constructed regarding the retirement of this generation—the type and level of benefits to be provided, the source of benefits and the approximate age at which benefits will commence. In making these choices the nation must not be influenced unduly by decisions made in the past by and for different generations of people living under different circumstances.

It will not be easy for the nation to move in the direction of full utilization of its human resources and thus bring under control the rising cost of supporting the inactive population. The alternative, however, will be even more difficult: continued high unemployment and underemployment, an ever increasing pool of idle "disabled persons" and "aged persons," and a total cost to society which will become destructive.●

## VETO OF DEFENSE AUTHORIZATION BILL

● Mr. BAYH. Mr. President, I am pleased that the House of Representatives has sustained President Carter's veto of the Department of Defense Authorization bill for fiscal year 1979. After a review of the issue involved, I believe that the President has acted correctly and that our national defense will be strengthened if we forego construction of a fifth nuclear-powered aircraft carrier and redistribute those funds to the more unglamorous but essential programs aimed at improving the readiness of our forces in being. Those programs involve funding more armored combat vehicles, cargo helicopters, surface-to-air missiles for field army air defense and additional tanks for our front line forces in NATO. They include more money for operations, maintenance, and logistics purposes to make sure supplies are available to our troops when they need it. They will support a real increase in our excellent research and development efforts in all phases of defense policy in order that we retain our qualitative edge over the Soviet Union which is in our supreme national interest. By rejecting authorization of a $2.4 billion nuclear-powered aircraft carrier, we will also free up funds in the appropriation process so we can purchase more of the right kinds of combat aircraft to help deter a Soviet armored challenge in Europe and immediately bolster our national security across the board without "busting" the budget.

Like the B–1 strategic bomber program which was cancelled before it, the fifth nuclear-powered carrier (CVN–71) would have been an impressive addition to our Nation's military arsenal. Anyone who has ever stood overlooking the flight deck of a large aircraft carrier cannot help but be impressed by the sheer size a vessel over 1,000 feet long, weighing more than 80,000 tons and equipped with the most sophisticated weaponry known. Nor should the importance of the carrier task force in a dangerous and unpredictable world be discounted. Its ability to control the seas by projecting power shore to secure, or exert control over critical terrain (such as Norway's North Cape or the Dardanelles) remains crucial to our security. In addition, there is perhaps no more visible and compelling symbol of American power and purpose than the sight of a task force steaming off the coast of a world trouble spot. Another nuclear-powered carrier would, however, be an expensive symbol which could impair our efforts to control the sea lanes.

Despite the important "traditional" missions of the carrier task force, the advent of the Soviet antiship cruise missile threat has forced some naval planners to rethink just how effective such a force could be operating close to the Soviet Union or on the open sea if the Soviet Union chose to challenge our fleet. This situation has been recognized by John Collins who is the senior specialist in national defense at the Library of Congress. In his analysis of American and Soviet Military Trends Since the Cuban Missile Crisis, he points out that:

U.S. sea control tactics traditionally try to destroy enemy weapons before they endanger our ships. Surprise first strikes by Soviet cruise missiles, launched at close range, could make this approach obsolete. . . . Successful defense likely will depend on SAM's and interceptor aircraft systems in combination with ECM, strategy, tactics and doctrine. An appropriate package is not yet available.

The absence of such a package concerns me greatly. For this and other reasons I supported additional funding for work to put the Navy on course in developing antisubmarine warfare platforms and the kinds of aircraft and helicopters to go on them to defeat the Soviet submarine launched cruise missile threat. I believe more resources would be available for this task if we did not fund another nuclear-powered carrier.

In addition to the diversion of resources from this vital task and subsequent delay of such an antiship cruise missile defense package, the $2.4 billion for construction of the CVN–71 could adversely affect the other services as well. This is so because the true cost of another nuclear-powered carrier is $40 billion not $2.4 billion or the $1.9 billion suggested by the Armed Services Committee; $40 billion is the total estimated cost of the carrier plus escort ships (17), complement of aircraft (88) and operations and maintenance expenses of the world's most expensive ship for its 30 year life cycle. And even if we do procure the CVN–71, she will not be ready to sail until 1987. In the meantime, $40 billion could purchase the following for the Army, Navy, and Air Force:

ARMY

1. 3 Armored Divisions with new equipment.
2. 5,000 infantry fighting vehicles.
3. 2,300 new Main Battle Tanks—XM–1's.
4. 1,000 Black Hawk Helicopters.
5. 550 Advanced Attack Helicopters.

NAVY

1. At least one Trident Ballistic Missile Submarine with full complement of 24 missiles.
2. Naval Battle Group less Aircraft Carrier but with underway replenishment.
3. 12 Guided Missile Frigates.
4. 6 nuclear attack submarines.
5. 3 Spruance Class destroyers.

AIR FORCE

1. 130 F–15 "Eagle" Interceptors.
2. 350 F–16 fighter-bombers.
3. 480 A–10 anti-tank close support aircraft.
4. Enough Air Launched Cruise Missiles to equip 105 B–52's (7 squadrons).

Mr. President, perhaps the money saved by not purchasing another carrier task force could buy even more hard-

ware. The items listed above serve to illustrate just what a defense commitment of $40 billion can mean. I think even the most stalwart supporter of another nuclear-powered carrier task force would agree that the defense items listed above provide us with a better overall balance for our defense forces than the commitment of those same dollars to construct a CVN–71 and all that must go with it.

When viewed in this light, the CVN–71 program appears to be a sea-going B–1. Both programs were glamorous and exciting. The potency of each was truly impressive. Yet each can only be seen as a luxury when matched against the military realities of the times and the availability of more cost-effective alternatives.

As such, I am persuaded that another nuclear-powered aircraft carrier can only impair our national defense. Unfortunately, the Congress did not suitably grasp this aspect of the issue and defeated attempts to take the CVN–71 out of the fiscal year 1979 defense program. The President has wisely used his constitutional prerogative of the veto at the proper time to assure that our resources for defense are spent wisely and in a manner which will guarantee our security now and in the future.●

## OSHA

● Mr. WILLIAMS. Mr. President, the Occupational Safety and Health Act of 1970 represented the promise by this Government to millions upon millions of American working men and women, a promise that the greatest industrial nation in the history of the world could maintain productivity while assuring workers a safe and healthful working environment.

That law has been in effect for more than 6 years and while the initial administrative and enforcement efforts of the Occupational Safety and Health Administration left much to be desired, during the past 20 months, under the stewardship of Secretary of Labor Marshall and Assistant Secretary for Occupational Safety and Health Bingham, great improvements have been made. Under their leadership, OSHA has vastly reduced burdensome recordkeeping, it has reduced the amounts of penalties assessed for violations, and has redirected its regulatory and enforcement thrust so that the vast bulk of its efforts are now directed toward the most serious workplace hazards.

Despite this progress, the OSHA program has generated more than its share of controversy. Employers, both large and small, see OSHA as a bureaucratic monster, which interferes with the operation of business enterprises. And, we in the Congress have reacted by imposing restrictions on the enforcement of many parts of the program. With increasing, and distressing frequency, the Congress is being called upon to make major and substantive changes in the Occupational Safety and Health program, without the benefit of hearings or a full appreciation of the nature of the problem and the effects of the offered solutions.

It is therefore my intention to conduct oversight hearings on the Occupational Safety and Health program on October 3, 4, and 5, 1978. In my mind, a number of factors warrant such oversight.

First, it is necessary for the Congress to measure the progress made by Secretary of Labor Marshall and Assistant Secretary Bingham in streamlining the enforcement of the act.

Second, there have been several significant court decisions bearing on the OSHA program, including the Supreme Court's decision in Barlow's against Marshall, the effects of which must be clearly understood in terms of the overall statutory program.

Third, the interagency task force on workplace safety will have issued its first report on the overall OSHA program, and the work of this group deserves careful congressional scrutiny.

Finally, it is the responsibility of the Human Resources Committee to investigate the allegations by small and sometimes even large businesses, that the OSHA program constitutes a harassment of business far out of proportion to the benefits which it ultimately provides to workers, and to understand how we can best protect workers in a manner which least interferes with the operation of American business.

These hearings are intended to examine and evaluate the broad range of OSHA programs.

They must be held now, so that if the need for legislative reform is demonstrated, the Committee on Human Resources will be able to propose legislative solutions early in the 96th Congress.

Piecemeal limitations of the OSHA program in the long run serve neither workers nor small business. If, in fact, the charges currently being levied against the OSHA program are justified, comprehensive permanent legislative solutions are in order. These solutions can only be brought about after careful review and appropriate consideration by the Committee on Human Resources. These hearings are the first step in determining our future actions.

America's workers and the American public deserve the best, the most efficient and the most effective program to control workplace hazards. At the same time, the legitimate businessman must not be overburdened with costly bureaucratic overregulation which serves no useful purpose.

These hearings are to be the first step in insuring that both of these objectives are accomplished in a just and equitable manner.●

## ACHIEVEMENTS OF PRESIDENT CARTER

● Mr. BAYH. Mr. President, last weekend I attended a meeting of the Indiana Democratic Editors Association and was privileged to hear my colleague in the House of Representatives, the Honorable LEE HAMILTON, give a speech on the accomplishments and high quality of the first 20 months of the Carter administration.

It has become fashionable for many to criticize the President and his administration, and, as a result, President Carter's great successes have been overlooked far too often. I think LEE HAMILTON accurately brought to our attention the many achievements of Presdient Carter on a variety of issues facing this country today.

I commend him for his speech and ask that it be printed in the RECORD.

The speech by Mr. HAMILTON follows:

SPEECH OF LEE HAMILTON

I have the high privilege this evening to speak for eight Democratic members of the United States House of Representatives from Indiana: Adam Benjamin, Floyd Fithian, John Brademas, Dave Evans, Dave Cornwell, Phil Sharp, Andy Jacobs, and myself.

At the risk of being immodest, may I say to you what the Speaker of the House has said to me on several occasions: the Indiana House Democratic delegation stands second to none in the United States Congress for the quality and effectiveness of its representation.

My colleagues from Indiana asked me to convey their warm wishes to each of you. They also asked me to convey several comments to you.

First, we are grateful to you, as the leaders of the Democratic party in Indiana, for making it possible for us to serve in the Congress. We know that without you we would not have that opportunity.

Second, we are proud to endorse and run with Rex Carpenter, Pat Byrd, John Ruby and Billy McCullough and we pledge our best efforts to elect each of them and the entire state and county Democratic ticket.

Third, it is time, in our judgment, to speak up for the Carter Administration.

President Carter's polls may be down, but they were down for Harry Truman, too. Recent history tells us that no matter what an American President does, his popularity declines. It is one thing to be down in polls that measure the President against someone's standard of excellence, but quote another to run against a real live Republican.

When measured against the like of Richard Nixon and Jerry Ford, Jimmy Carter stands tall. Besides, nothing is more dangerous for a President than to live in the tempermental atmosphere of the public opinion polls. He has only one duty, only one safe course, and that is to try to be right and to do and say what he believes to be right.

Mr. Carter, more than any other President, has been measured against expectations. There is no doubt that he raised high hopes and great expectations during his campaign. Neither he nor we need apologize for that.

Mr. Carter expressed his dream with the fervor of an evangelist. He built the hope of a fresh, new administration that would be clean, honest, efficient and capable of producing change. He talked about economic stability, balanced budgets, and an end to political favoritism. He talked about fair tax laws, cutting down the bureaucracy, and a new era of fairness and competence.

We Democrats have to acknowledge that all these things have not been accomplished. There has not been a great leap forward from the day Mr. Carter became President. We are a long way from achieving all of these things. But it is a plain fact that if these goals had not been expressed, people today would have relatively little to criticize.

It is always better to aim higher than you hit.

We may not have rung in a millenium. We may not have hit all of our targets. But one thing is quite clear: Mr. Carter's Administration is by no means as clearly disastrous as the years of Nixon and Ford.

Criticisms of President Carter as ineffective come with ill-grace from our Republican friends. It was they who gave us 9 percent unemployment, double-digit inflation,

the largest and deepest recession in the post-war period, and government by veto—to say nothing of Richard Nixon, Bob Haldeman, John Erhlichman, and John Mitchell. The President inherited a sticky and messy economic and political situation with a lot of economic damage done. It takes time to turn that around.

It is still true, as Will Rogers observed, that the only way to keep the Republican party respectable is to keep it out of office.

We all believe in the two-party system and we believe in a Republican party that is strong, vigorous, alert—and small.

I believe Jimmy Carter will be a two-term President. He stands low in the polls principally because he has had the fortitude to tackle the tough issues, like energy, the Panama Canal, Social Security and Civil Service Reform, in his first months in office.

Let's take a closer look at the Carter record.

In foreign affairs he has had major victories with

The passage of the Panama Canal Treaties;

The vote to lift the Turkish Arms Embargo; and

The vote to approve the Middle East Arm Sales.

He has won for the United States new acceptance and new respect in Africa. He has strengthened NATO's combined forces in Europe. He has brought human rights to the consciousness of every world leader. He continues to work to keep the Middle East at peace. Our prayers go out to him in these days as he prepares for the historic and unprecedented Camp David Summit meeting.

And most important of all: This country is at peace today.

On the domestic side, the accomplishments are also impressive.

Foremost is the substantial drop in unemployment. It stood at 8 percent when Mr. Carter took office. It has dropped in 18 months by almost 2 percentage points. His administration has seen a net total of 6.1 million jobs added to the economy, and that is a record.

Business recovery has continued for 4 years, the longest peacetime recovery since World War II.

When President Carter took office, the social security system faced bankruptcy. He submitted proposals to the Congress. Congress approved them and the system is now fiscally sound until after the year 2000.

The budget deficit has been reduced from about $60 billion dollars a year in fiscal year 1977 to somewhere in the $40 billion range or below for fiscal 1979—and it will drop further in 1980.

A comprehensive effort is now underway to reorganize the government:

A new Department of Energy has been created;

The Executive Office of the President has been streamlined;

Consolidations have occurred in other areas;

A major civil service reform proposal is pending before the Congress, and

A new tone, civil and compassionate, has come into government.

Already his Administration has seen: Dramatic decreases in airline fares; a reduction of "perks and frills" at the White House; the termination of nearly 500 advisory commissions; tougher financial disclosure requirements for the executive branch; and record numbers of blacks, hispanics, and women in government service.

The President has made the American Presidency an open one. He is more accessible to the press and public than any other modern President.

I think this President is a good man. I do not know anyone who has occupied the Office of President who has tried harder and with more ability than Jimmy Carter.

He does not have an ego problem. He admits mistakes. He does not have a mean streak in him. I am impressed by a man trying to do his absolute best—trying to do what he thinks is right.

If I have a criticism, it is that he should let up on those 18 hour days in Washington and get into the country to see the people more. He should come to Indiana.

So, my friends, the President is presiding over the country during a period of remarkable stability. He may not have worked heroic changes, but times are pretty good.

It is time for you and me to stand up and be counted for Jimmy Carter and for the Democratic Party.●

## A RESPONSE ON THE BHUTTO TRIAL

● Mr. McGOVERN. Mr. President, on August 21, I inserted in the RECORD an article by former Attorney General Ramsey Clark containing his osbervations on the trial of former Prime Minister Bhutto of Pakistan.

The Embassy of Pakistan, through Press Counsellor Khalid Ali, has submitted a response to the Nation magazine in which that article appeared.

To permit my colleagues to examine both sides of this issue, I request that the response be printed in the RECORD.

The letter follows:

AUGUST 31, 1978.

THE EDITOR,
*The Nation,*
*New York, N.Y.*

DEAR SIR: The article by Mr. Ramsey Clark, in your issue of August 19, is full of erroneous statements calculated to cast aspersions on the judicial process in Pakistan, prejudge a case which is before the Supreme Court and interfere in the internal affairs of Pakistan.

The peaceful takeover on July 5, in contrast to brutal violence and killings of overthrown personalities in other countries, and the rejection of a quick summary trial of those involved in the murder case shows that the Government is not interested in the elimination of personalities but the dispensation of justice. The murder conviction of Mr. Benigno Aquino in the Philippines, to which Mr. Clark referred bears no comparison to the present case. Mr. Aquino was tried by a military court while Mr. Bhutto is being tried under the normal law in the civil courts.

The question is: Should political leaders accused of murder not be tried under the law of the land? If no man is above law, if life has a sanctity, who else but the courts of that country can make the final determination of the guilt or innocence of the accused.

The appeal in this criminal case is being heard in an open court and by judges who were serving in the Supreme Court or the High Courts under the regime headed by Mr. Bhutto. It is not a trial under martial law or even a specially constituted tribunal. The accused have been given full facilities of legal defense and Mr. Bhutto's lawyers presented the case for 57 days which was fully reported in the press. The Supreme Court accepted Mr. Bhutto's plea for the presentation of the in-camera statements recorded in the lower court. These statements now form part of the record of the Supreme Court and were reported in extenso in the media. Even Mr. Bhutto's lawyer has acknowledged the fairness of the proceedings and has thanked the Supreme Court for "its exceptional kindness, consideration and a very patient hearing." Mr. Ramsey Clark also acknowledges that "the nine judges engage in a meticulous review of the record. They are impressive men, learned in the law and skillful in their examination of the trial transcript."

Yet, instead of letting these "impressive and learned men" decide the case, Mr. Ramsey Clark has arrogated to himself the role of defence, prosecution and judge. Mr. Clark has said that the Chief Justice of Lahore High Court, which sentenced the accused to death was "an old enemy who had heard Bhutto's case when he was arrested in 1968." He should therefore have been disqualified. The fact is that in 1968 the High Court, of which this judge was a member, came to the rescue of Mr. Bhutto and his associates. In December 1968, the Court ordered the release of one of Mr. Bhutto's associates, Mr. Khar. Sensing the trend of the Court, the then Government released Mr. Bhutto. This evoked expressions of satisfaction from the Court of which the now Chief Justice of Lahore High Court was a member. In any case the Supreme Court which is seized of this and many other points and whose members have been extolled by international jurists, can be expected to make a fair and honest determination of this as well as other aspects of the case. The Supreme Court is fully competent to uphold, set aside or to commute the sentence awarded by the High Court.

The doomsday scenario drawn up by Mr Ramsey Clark is a futile exercise in speculation. There is peace in the country. The Government of Pakistan has announced that election would be held by October 1979 and power would be transferred to civilian hands. The future of States or indeed of democracy does not depend upon the fate of single individuals. The judicial process and rule of law cannot imperil the future of States.

Yours sincerely,

KHALID ALI,
*Press Counsellor.*●

## SENATE SEATS FOR WASHINGTON, D.C.?

Mr. SCOTT. Mr. President, I have before me a copy of an editorial published in the September 11 U.S. News & World Report, entitled "Senate Seats for Washington, D.C.?" It is a very timely article. It suggests that the States, in their ratification process, take their time and consider very carefully the proposal for full voting rights for the District of Columbia.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SENATE SEATS FOR WASHHINGTON, D.C.?

(By Marvin Stone)

"No taxation without representation." That was a stirring battle cry in the American Revolution. Now it is being used again—this time as an argument for giving the District of Columbia voting representation in Congress.

States are being asked to ratify a constitutional amendment that would let residents of the nation's capital elect two U.S. senators and at least one, perhaps two, members of the House of Representatives.

On its face, that seems only fair. The District, which is actually the city of Washington, has a population of nearly 700,000. Seven states with smaller populations have the same kind of voice in Congress that Washington wants.

The issue is not a simple one, however. And because backers of the amendment have seven years to procure the required approval of three fourths of the state legislatures—38 in all—the individual states should take time to give it cautious study.

Admittedly, politicians face problems in voting on this amendment. D.C.'s population is 75 percent black. In local and presidential elections, it has voted overwhelmingly Democratic and liberal. Its selections for Congress

would almost surely be black, liberal Democrats. So anyone opposing the D.C. amendment risks being accused of racism and Republican partisanship. Those who support it can count on winning votes among blacks.

Issues raised by the amendment, however, are too important to be decided by such considerations. Some of the arguments deserve critical examination.

Take that cry of "taxation without representation." In Senate debate on the amendment, it was pointed out that the District gets back from the federal government $1 for every 29 cents it pays in federal taxes. "That is not taxation without representation," argued one senator.

D.C. is not entirely unrepresented in Congress. It has a delegate in the House of Representatives. Though he can't vote on the floor, he can in committees. And he can argue for his constituents on the floor.

Washingtonians are not the only American citizens who have no direct representation in Congress. Puerto Rico, with more than 3 million U.S. citizens, has the same nonvoting representation. So do the territories of Guam, American Samoa and the Virgin Islands. Will they be next to demand votes in Congress?

The question boils down to this: Should a single city be given the same kind of representation in Congress as an entire state?

Washington has an area of only 67 square miles, and lacks many of the attributes of even a thinly populated state. Without farms, mines, forests, small towns or much industry, its interests are narrow. Almost half its people make their living off the government—federal or local. As one senator said: "What we are doing here is giving the federal bureaucracy itself voting representation in Congress."

That obviously is not what the authors of the Constitution intended. They set up the District of Columbia as a separate, nonpolitical enclave, belonging to citizens of all the states, and immune to local pressures. Would giving it votes in Congress inevitably lead to the kinds of pressures that the framers of the Constitution wanted to avoid?

It was frequently predicted, in Senate debate, that the D.C. amendment will fail to win ratification by the states. Its passage by Congress, sending it on its way to the states for further action, was described by some lawmakers as a "political charade" to woo black votes back home.

That's probably an unfair characterization. Undeniably, there are appealing arguments for giving D.C. residents a voting voice in Congress. But there are also good reasons why states should weigh both sides carefully before voting on such a fundamental change in Washington's constitutional role.

## ORDER THAT S. 2640 BE PRINTED AS PASSED

Mr. RIBICOFF. Mr. President, I ask unanimous consent that S. 2640, the Civil Service Reform Act of 1978, be printed as passed by the Senate and that 300 additional copies be printed for use by the Committee on Governmental Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

## PRIVILEGE OF THE FLOOR

Mr. CRANSTON. I ask unanimous consent that Hal Gross and Karen Manden may have the privilege of the floor throughout the consideration of the natural gas conference report when it comes before the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SUSTAINING THE VETO OF THE MILITARY PROCUREMENT BILL A SETBACK TO OUR NATIONAL DEFENSE POSTURE

Mr. THURMOND. Mr. President, the national defense posture of this Nation in real terms and in the eyes of our friends and enemies abroad suffered a severe setback today when the veto by President Carter of the military procurement bill was upheld in the House.

President Carter's veto action was not one of strength but one of weakness. His position on defense matters is so out of tune with the people of this Nation and the Congress itself that he has resorted to the veto, an action needing only one-third support in either House to be sustained.

Besides killing the B–1 program and delaying the mobile missile development, he has cut Navy shipbuilding by one-half for the next 5 years and today axed a badly needed nuclear aircraft carrier for the Navy. This action will not only weaken us in real terms, but will confuse our allies and encourage our enemies.

Mr. President, I shall continue to fight for ships for our Navy, including an aircraft carrier. When the military bill once again comes before our committee it should be strengthened, not weakened. This veto makes absolutely no sense. It was apparently the work of President Carter's advisers who oppose naval superiority on the grounds it is inimical to the United States-Soviet strategic balance.

Mr. President, in my judgment today was a watershed in the internal efforts to beat down our defense programs under the whip of the veto. Although this Congress is one of the President's own party by a sizable margin, his weak and misguided defense policies have to depend on the veto to be sustained. By sustaining this veto, those who favor parity with the Soviets have been handed a new weapon which they will continue to use in order to whip the Congress into line. This is a sad day in this Nation's national defense history.

## THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the following calendar orders, all of which have been cleared on the minority side: Calendar Orders Nos. 1063, 1067, and 1075.

The PRESIDING OFFICER (Mr. BAYH). Without objection, it is so ordered.

## AIR FORCE GRADE EXTENSION AND EXTENSIONS OF CERTAIN OTHER CURRENT MILITARY PERSONNEL PRACTICES

The PRESIDING OFFICER. The first bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 3454) to amend the Act of August 29, 1974 (88 Stat. 795; 10 U.S.C. 8202 note), relating to the authorized numbers for grades of lieutenant colonel and colonel in the Air Force and to authorize the President to suspend certain provisions of law when he determines that the needs of the Armed Forces so require, and for other purposes.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 1823

(Purpose: To change an incorrect section reference and to make other technical changes)

Mr. ROBERT C. BYRD. Mr. President, I send an amendment to the desk on behalf of Mr. NUNN and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) on behalf of Mr. NUNN, proposes an unprinted amendment numbered 1823.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 3, strike out "provision" and insert in lieu thereof "provisions".

On page 2, line 5, strike out "5705 (c)" and insert in lieu thereof "5707 (c)".

On page 3, line 25, insert "incurred in line of duty" before "during the period".

On page 6, line 22, strike out "5787d." and insert in lieu thereof "5787d".

On page 7, strike out lines 5, 6, and 7 and insert in lieu thereof the following:

"(1) A board to recommend brigadier generals for promotion to the grade of major general, consisting of nine officers serving in the grade of major general or above.".

On page 7, line 11, insert "(a)" after "Sec. 11.".

On page 7, line 15, strike out "promotions" and insert in lieu thereof "promotion".

On page 7, after line 23, add the following:

(b) The table of sections at the beginning of chapter 545 of such title is amended by striking out the item relating to section 5787c and inserting in lieu thereof:

"5787c. Navy and Marine Corps; warrant officers and officers designated for limited duty: temporary promotion.".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 3454

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Act of August 29, 1974 (88 Stat. 795; 10 U.S.C. 8202 note), is amended by striking out "through September 30, 1978" and inserting in lieu thereof "through September 30, 1979".

SEC. 2. (a) For the period beginning on September 15, 1978, and ending on September 30, 1979, the President is authorized to suspend application of the following provisions of title 10, United States Code:

(1) Section 5707(c).

(2) Section 5751 (a), (b), and (e).

(3) Section 5770.

(b) No suspension invoked by the Presi-

dent under authority of subsection (a) shall be effective after September 30, 1979.

SEC. 3. Effective only for the period beginning September 15, 1978, and ending September 30, 1979—

(1) Section 1201(3) of title 10, United States Code, is amended as follows:

(A) striking out the word "or" at the end of subclause (B)(ii);

(B) striking out the period at the end of subclause (B)(iii) and inserting in lieu thereof a semicolon and the word "or"; and

(C) adding at the end of subclause (B) a new item as follows.

"(iv) the disability was incurred in line of duty during the period beginning on September 15, 1978, and ending on September 30, 1979, except that the condition provided for in this item shall not be effective during such period unless the President determines that such condition should be effective during such period and issues an Executive order to that effect.".

(2) Section 1203(4)(A) of such title is amended by—

(A) striking out the word "or" at the end of item (i);

(B) striking out the semicolon at the end of item (ii) and inserting in lieu thereof a comma and the following: "or (iii) incurred in line of duty during the period beginning on September 15, 1978, and ending on September 30, 1979, except that the condition provided for in this item shall not be effective during such period unless the President determines that such condition should be effective during such period and issues an Executive order to that effect;".

(3) Section 1203(4)(C) of such title is amended by striking out "the proximate result of performing active duty nor incurred in line of duty in time of war or national emergency" and inserting in lieu thereof "(i) the proximate result of performing active duty, (ii) incurred in line of duty in time of war or national emergency, nor (iii) incurred in line of duty during the period beginning on September 15, 1978, and ending on September 30, 1979, except that the condition provided for in this item shall not be effective during such period unless the President determines that such condition should be effective during such period and issues an Executive order to that effect".

SEC. 4. (a) Chapter 545 of title 10, United States Code, is amended by inserting after section 5787c a new section as follows:

"§ 5787d. Navy lieutenants: temporray promotion.

"(a) Line officers not restricted in the performance of duty in the grade of lieutenant, possessing skills in a critical shortage and serving in lieutenant commander billets requiring such skills, may be temporarily promoted to lieutenant commander under such regulations as the Secretary of the Navy may prescribe. Temporary appointment under this section shall be made by the President alone.

"(b) Temporary appointments under this section do not change the permanent, probationary, or acting status of members so appointed, prejudice them in regard to other promotions or appointments, or abridge their rights or benefits.

"(c) Temporary promotions under this section may be made only upon the recommendation of a board of officers convened for that purpose. In addition to recommending officers for promotion, a board so convened shall make the report required by section 6384 of this title.

"(d) Each temporary appointment under this section, unless expressly declined, is, without formal acceptance, regarded as accepted on the date made, and the member so appointed is entitled to the pay and allowances of the grade to which promoted from that date.

"(e) Temporary appointments under this section will terminate upon an officer's detachment from a qualifying billet so designated by the Secretary of the Navy. When an officer, whose name is on a promotion list as a result of selection to lieutenant commander other than under this section, is detached, an appointment will be issued to include the interim period between the subject officer's detachment from the qualifying billet and the date of promotion as a result of selection board action.

"(f) When his temporary appointment under this section is terminated or expires, each member of the naval service on active duty shall have the grade he would hold if he had not received any such appointment.

"(g) No appointments may be made under this section after September 30, 1979.".

(b) The table of sections at the beginning of chapter 545 of such title is amended by inserting

"5787d. Navy lieutenants; temporary promotion."

below

"5787c. Navy and Marine Corps, warrant officers: temporary promotion.".

SEC. 5. Section 5504(d) of title 10, United States Code, is amended by inserting "or 5787d" after "5787".

SEC. 6. (a) Section 5786(c) of title 10, United States Code, is amended by inserting "or 5787d" after "5787".

(b) Section 5791(a) of such title is amended by inserting "and 5787d" after "5787".

SEC. 7. Section 6325(b) of title 10, United States Code, is amended by inserting "or 5787d" after "5787".

SEC. 8. (a) Section 6384(a) of title 10, United States Code, is amended by inserting "and each board of officers convened under section 5787d" after "under chapter 543".

(b) Section 6385 of such title is amended by striking out "or 5787" and inserting in lieu thereof "5787, or 5787d".

(c) The catchline of such section is amended by striking out "and 5787" and inserting in lieu thereof "5787, or 5787d".

(d) The table of sections at the beginning of chapter 573 of such title is amended by striking out "and 5787" in the item relating to section 6385 and inserting in lieu thereof "5787, or 5787d".

SEC. 9. Section 905(h) of title 37, United States Code, is amended by inserting "or 5787d" after "5787".

SEC. 10. (a) Section 5703(a)(1) of title 10, United States Code, is amended to read as follows:

"(1) A board to recommend brigadier generals for promotion to the grade of major general, consisting of nine officers serving in the grade of major general or above.".

(b) The amendment made by subsection (a) shall be effective only for the period beginning on September 15, 1978, and ending on September 30, 1979.

SEC. 11. (a) Section 5787c of title 10, United States Code, is amended to read as follows:

"§ 5787c. Navy and Marine Corps; warrant officers and officers designated for limited duty: temporary promotion.

"(a) Warrant officers may be temporarily promoted to higher warrant officer grades under such regulations as the Secretary of the Navy may prescribe.

"(b)(1) Officers designated for limited duty may be temporarily promoted to a higher grade under such regulations as the Secretary may prescribe.

"(2) No promotion may be made under this subsection after September 30, 1979.".

(b) The table of sections at the beginning of chapter 545 of such title is amended by striking out the item relating to section 5787c and inserting in lieu thereof:

"5787c. Navy and Marine Corps; warrant officers and officers designated for limited duty: temporary promotion.".

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. GOLDWATER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1144), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

FORM OF COMMITTEE ACTION

The administration has submitted several legislative proposals related to the extension of authorized grades for the Air Force and relating to several current personnel practices that would lapse under the provisions of the National Emergencies Act of 1976 (Public Law 94–412). Many of these personnel procedures and many other provisions not involving these procedures are included in another bill, H.R. 5503, on which hearings were held but on which action has not been completed. These circumstances made it desirable to report an original bill.

COMMITTEE BILL

The bill provides for the following:

1. Extending the authorizaiton of an increase for 1 year in the number of Air Force colonels and lieutenant colonels provided under 10 U.S.C. 8202(a). This would be effected by extending for 1 year, Public Law 93–397, which expires on September 30, 1978.

2. Authority for the President to suspend the application of certain provisions in law through September 30, 1979, when he determines that the needs of the Armed Forces so require. The application of these provisions is now suspended. Suspending these provisions of law for another year would maintain current personnel practices for the military in these areas.

3. Extending authority for 1 year to allow spot promotions of certain Navy lieutenants, below the zone promotion for Navy limited duty officers, and to allow temporary Marine Corps major generals to sit on Major General Selection Boards.

AIR FORCE GRADE EXTENSION

The bill would provide authority for 1 more year for the number of Air Force colonels and lieutenant colonels currently authorized by Public Law 93–397 which expires on September 30, 1978. Public Law 93–397 authorizes an increase in the number of colonels and lieutenant colonels serving on active duty in the Air Force above the permanent authorization of 10 U.S.C. 8202. The number of authorized colonels and lieutenant colonels is based on the total officer strength of the Air Force.

The temporary extension of this authority should allow the Air Force to adequately man its officer force and to maintain predictable promotion patterns for commissioned officers pending enactment of permanent legislation. Failure to enact legislation extending this authority would mean that the number of officers allowed to serve in the field grades would be based upon the table established in permanent law by the Officer Grade Limitation Act (OGLA) of 1954, substantially below current strengths.

The extension of the authority will permit the Air Force to promote officers for the next year to the grade of major, lieutenant colonel, and colonel at about the same career points and with approximately the same percentage of promotion opportunity as has been the case in the recent past and as is comparable to the Army and Navy.

BACKGROUND ON THE AIR FORCE FIELD GRADE OFFICER PROBLEM

The original Officer Grade Limitation Act (OGLA), which placed limits on the number of field grade officers in the Armed Services, was passed in 1954. At that time, the

Air Force was a comparatively younger branch of the Armed Services and thus needed fewer grade authorizations to provide adequate career progression. Aware of this fact, Congress provided substantially fewer field grades for the Air Force than for the Army and Navy, but it also realized that the Air Force would need to seek relief in the form of additional authorizations as the force matured. The Congress has provided this additional authorization on eight previous occasions. The most recent authority was provided by Public Law 93-367 which expires September 30, 1978.

THE PROPOSED DEFENSE OFFICER PERSONNEL MANAGEMENT SYSTEM

The Defense Officer Personnel Management System (DOPMS) proposed by the Department of Defense, is far-reaching, complicated legislation to provide permanent and more uniform promotion systems among the Services and new field grade authorization tables. It would include new grade authorization tables for the Air Force, and thus obviate the need for temporary grade relief legislation. While the DOD proposal would overhaul or eliminate more than 300 sections of current law, it would not make a major shift from the present officer management system.

The Subcommitee on Manpower and Personnel has studied the DOPMS proposal in detail but has not completed action on the proposal. The Committee therefore finds it prudent to act on the needed Air Force grade relief extension pending action on the broader DOPMS proposal.

NATIONAL EMERGENCIES ACT RELATED PERSONNEL ITEMS

The National Emergencies Act of 1976 terminates the current reliance by the executive branch on national emergency power to suspend provisions of law. The effect of this act is to revoke, effective September 15, 1978, suspensions of provision in law which depend upon the declaration of a national emergency for the suspension. There are several military personnel items that are affected. Most, but not all of these, would have been repealed or changed under the proposed Defense Officer Personnel Management Act. For these items the committee bill will have the effect of allowing the military to maintain current practices by providing new authority for the President to suspend through September 30, 1979 the application of appropriate provisions of law when he determines the needs of the Armed Forces so require. The committee intends to review each of these items again in detail when the proposed Defense Officer Personnel Management Act is considered.

REQUIREMENT FOR SEA OR FOREIGN SERVICE FOR REGULAR OFFICERS OF THE NAVY

Prior to 1917, the promotion of Navy officers was solely a function of seniority. In the Naval Appropriations Act for fiscal year 1917, the 64th Congress provided for promotion through a selection process. The sea service requirement was included to insure that officers performed at sea prior to promotion.

In 1964, Executive Orders 11151 suspended section 5770. The National Emergencies Act (Public Law 94-412) will, in effect, vacate the suspension as of September 15, 1978.

The 1964 suspension was necessitated by developing technology which resulted in the skill requirements for Naval officers being considerably different than they were in 1917. The increased complexity of weapons, engineering and management systems required that unrestricted line officers receive concentrated scientific training in discrete technological areas. This training, in many cases, precluded the opportunity for sea duty for extended periods. The Navy believes that this rationale for the suspension remains valid and will continue to obtain for the foreseeable future.

The committee bill would authorize the President to suspend section 570 of title 10, United States Code, relating to the requirement of sea or foreign service to certain officers of the Regular Navy when he determines the needs of the Armed Forces so required.

LIMITS ON BELOW THE ZONE SELECTION AUTHORIZATION FOR REGULAR OFFICERS

Current law authorizes below the zone selection for promotion for most Navy and Marine Corps officers on active duty. Permanent regular officers who may receive accelerated selection are limited to 5 percent of the total number that a selection board is authorized to select. By way of comparison the Army and the Air Force do not have a legal restraint on the number of below the zone selections.

In order to provide for accelerated promotion of exceptional officers who have demonstrated that they can progress rapidly to positions of greater responsibility, Executive Order 11554 in 1970 suspended the operation of the provisions of section 5707(c) of title 10, United States Code. Pursuant to the authority provided by the Executive Order, increased below zone selections have been selectively utilized and have never exceeded 15 percent. The suspension of section 5707(c) will expire September 30, 1978. An extension will be precluded by the effect of the National Emergencies Act. The 5 percent limited on below zone selection for permanent regular officers would then be reinstated.

The committee bill would provide authority to the President to suspend Section 5707(c) of title 10, United States Code, which now limits below the zone selection of permanent regular officers to 5% of total number of officers authorized to be recommended for promotion, when he determines that the needs of the Armed Forces so require.

SERVICE IN GRADE ELIGIBILITY REQUIREMENTS FOR CONSIDERATION BY SELECTION BOARDS FOR PROMOTION OF ACTIVE DUTY NAVY MALE LINE OFFICERS AND TO ACTIVE DUTY MARINE CORPS OFFICERS

Initial time in grade eligibility requirements were established by the Officer Personnel Act (OPA) of 1947. Sections 5751 (a) and (b) of title 10, United States Code, provide that an active duty male officer of the line of the Navy, or of the Marine Corps is eligible for consideration for promotion to the next higher grade by a selection board that is convened in the fiscal year in which he completes the specified number of years of service in the grade in which he is serving.

In the years since passage of OPA, continued adherence to the above minimum time in grade eligibility requirements became increasingly difficult. Since 1947, promotion flow points for certain grades, have been accelerated to meet vacancy requirements. As a result, in these cases, increasingly younger officers have been made eligible for consideration. The time in grade laws were originally designed to operate in a stable strength environment with normal promotion flow occurring at specified points during a 30-year career. During the period 1954 through 1967, various portions of sections 5751 (a) and (b) were suspended by Executive orders.

Vacation of the President's suspension of sections 5751 (a) and (b), effective September 15, 1978, would mean a return to the 1947 time in grade eligibility requirements which, in certain cases, could severely limit the number of officers eligible for selection to fill vacancies in higher grades.

The committee bill would provide authority for the President to suspend sections 5751(a) and 5751(b) relating to service and grade eligibility requirements for consideration of selection boards for promotion of certain Navy and Marine Corps officers when he determines that the needs of the Armed Forces so requires.

PHYSICAL DISABILITY RETIREMENTS

Since December 16, 1950, when President Harry S. Truman proclaimed the existence of a state of national emergency (Proclamation 2914), any member of the Armed Forces who is unfit for service because of physical disability incurred while on active duty for more than 30 days who is disabled in line of duty while entitled to basic pay has been entitled to retirement or separation (depending on the extent of disability) with pay. The National Emergencies Act terminates the authority in law possessed as a result of a declaration of national emergency. As a result a member with less than 8 years' service would be entitled to retirement or separation under existing criteria only if the disability were the proximate result of performing active duty; if it were not, he would be entitled only to separation pay and then only if the disability exceeded 30 percent under Veterans' Administration standards.

Those who would be affected by this change are the junior members of the Armed Forces without extensive service for pay purposes.

The committee bill would add a provision to 10 U.S.C. 1201 and 1203 allowing the President to continue current practice through September 30, 1979, if he determines that the needs of the Armed Forces so require.

SPECIFIC AUTHORIZATIONS FOR PROMOTION PROCEDURES

In some cases current promotion procedures in the Navy and Marine Corps rely upon specific authority given to the President in time of war or national emergency. The committee bill would allow these practices to continue through September 30, 1979 by providing new authorization not related to a declaration of war or national emergency. The committee will review each of these provisions as part of its consideration of the proposed Defense Officer Personnel Management Act.

TEMPORARY PROMOTION OF NAVY LIEUTENANTS

The committee bill provides authority for unrestricted line officers in grade of lieutenant possessing skills in a critical shortage and serving in lieutenant commander billets, to be temporarily promoted to lieutenant commander for the period through September 30, 1979. This authority is referred to as spot promotion authority.

The spot promotion authority currently in effect is authorized by 10 U.S.C. 5787 and is applicable only in time of war or during a national emergency declared by the President. Current spot promotion authority will terminate in September 1978, due to the effects of the National Emergency Act.

The Secretary of the Navy is currently using his authority under 10 U.S.C. 5787 to spot promote line officers in the grade of lieutenant possessing skills in a critical shortage and serving in lieutenant commander billets as engineer officers, engineering department principal assistants, material officers in afloat units and other staff engineering billets which directly support fleet engineering readiness. Fleet engineering readiness is impeded by the shortage of middle grade officers with skills in this area.

Under the current provisions prescribed by the Secretary of the Navy, there are about 386 spot promotion qualifying billets. Due to the shortage of available middle grade qualified engineers, significant numbers of lieutenants are being assigned to fill these designated lieutenant commander engineering billets. In the nuclear submarine community, there are currently only 91 qualified lieutenant commanders available to fill 189 engineering department head billets. This shortfall is further evidenced by the fact that 104 of 166 nuclear submarine Engineer Officer billets are currently being filled by spot promoted lieutenant commanders. The surface warfare community is faced with a similar situation. Only about 75 lieutenant

commanders with prior engineering experience are available to fill 130 engineering department head billets.

SELECTION BOARDS TO RECOMMEND BRIGADIER GENERALS FOR PROMOTION AND FOR CONTINUATION ON THE ACTIVE LIST IN THE MARINE CORPS

The National Emergencies Act will terminate the Secretary's authority pursuant to 10 U.S.C. section 5448(a) to prescribe a number of permanent major generals and brigadier generals in excess of 36 on the active list. Currently, the Marine Corps has a total of 66 general officers on the active list, all in the permanent grades of major general and brigadier general, 33 in each grade. The National Emergencies Act will not affect the total number of general officers (66) that may be on active duty in the Marine Corps, nor their distribution in temporary grades; however, it will reduce to 36 the number who may hold permanent appointments.

The need for a change in law is related to the legal requirements of promotion board membership. Section 5703(a)(1), title 10, U.S.C. specifies that at least once each year the Secretary of the Navy will convene a selection board to recommend brigadier generals for promotion and for continuation on the active list. The section further specifies that the board will consist of nine officers holding permanent appointments in the grade of major general or above. In addition, section 5703(e) specifies that no officer may be a member of two successive boards for the consideration of officers for promotion to the same grade.

When the National Emergencies Act becomes effective September 15, 1978, the number of permanent major generals will be limited to 18, and the Marine Corps could not meet the requirements of section 5703, of title 10, United States Code without every permanent major general on active duty serving on a major general selection board every other year.

The committee bill provides authorization through September 30, 1979 for permanent and temporary major generals to sit on selection boards convened to select brigadier generals to the grade of major general.

PROMOTION OF LIMITED DUTY OFFICERS

Present law does not specifically provide for below zone selection for limited duty officers. The limited duty officer program is unique to the Navy and Marine Corps and provides an avenue for technically oriented enlisted members to obtain officer appointments and participate as a separate group in the promotion process through the grade of commander in the Navy and lieutenant colonel in the Marine Corps. These officers are assigned to duty in their respective specialties and enable the Navy Department to meet the requirements for specialized technical management at a higher level than provided by warrant officers. The authority contained in section 5787 of title 10, United States Code has been used to provide for limited duty officer below zone selections in concert with those provided other officers. This authority will terminate September 14, 1978 under the National Emergencies Act.

The committee bill would allow the President to suspend through September 30, 1979 the operation of section 5751(e) of title 10, which prevents normal below zone selection of limited duty officers. The bill also amends 5787(c) to provide for temporary promotion of limited duty officers for the period through September 30, 1979 similar to the present authority for warrant officer temporary promotions. This provision is necessary to prevent grade revision for limited duty officers who have been previously selected and promoted under section 5787 of title 10.

## INTERNATIONAL PETROLEUM EXPOSITION

The joint resolution (S.J. Res. 154) authorizing the President to invite the States of the Union and foreign nations to participate in the International Petroleum Exposition to be held at Tulsa, Okla., from September 10, 1979, through September 13, 1979, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President of the United States is authorized and requested to invite by proclamation, or in such other manner as he may deem proper, the States of the Union and foreign nations to participate in the International Petroleum Exposition to be held at Tulsa, Oklahoma, from September 10, 1979, through September 13, 1979 for the purpose of exhibiting machinery, equipment, supplies, and other products used in the production and marketing of oil and gas, and bringing together buyers and sellers for the promotion of foreign and domestic trade and commerce in such products.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1145), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE RESOLUTION

The joint resolution calls for the President to invite, by proclamation or in any other appropriate manner, foreign nations and the individual States of the United States of America to participate in the 1979 International Petroleum Exposition to be held in Tulsa, Okla.

BACKGROUND

The International Petroleum Exposition is sponsored by a nonprofit organization composed of major oil companies, petroleum and gas trade associations, and trade publications. For over 50 years it has periodically held trade fairs to exhibit products used in the production and marketing of oil and gas, and to bring together buyers and sellers of such supplies. Its purpose is to stimulate both the domestic and international sale of these products.

In 1975, the Congress acted favorably on a similar joint resolution which requested the President to extend invitations to the 1976 trade fair in Tulsa. Over 37,000 participants representing every State of the Union and 63 foreign nations attended that exposition. Inasmuch as the 1979 International Petroleum Exposition will feature enhanced recovery techniques, the organizers anticipate even larger attendance. Furthermore, as the United States is the largest producer of oil and gas drilling, transporting, refining and distribution materials, and the furthest ahead in petroleum technology, the organizers believe the fair will stimulate exports, thereby promoting the domestic economy and improving the Nation's balance of payments.

## W. R. "BOB" POAGE PECAN FIELD STATION AND THE ROMAN L. HRUSKA MEAT ANIMAL RESEARCH CENTER

The Senate proceeded to consider the bill (S. 3467) to designate the U.S. Department of Agriculture Pecan Field Station in Brownwood, Tex., as the "W. R. 'Bob' Poage Pecan Field Station," and to designate the U.S. Department of Agriculture Meat Animal Research Center located near Clay Center, Nebr., as the "Roman L. Hruska Meat Animal Research Center."

Mr. HATCH. Mr. President, I ask unanimous consent that a statement by Senator TOWER be printed at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR TOWER

The Congress of the United States has few more appropriate occasions to honor its members than at those times when official names for public buildings are under consideration. Memorials to the great men who have served in the Congress, who have won the hard-earned respect and admiration of their colleagues and their constituents seems a small price to pay for the service they have given.

A bill we are considering today would provide permanent public tribute to one most deserving of the honor. I speak of my colleague and good friend from Texas' eleventh congressional district, Bob Poage. He is co-dean of the House, having served Texans in his district since the 75th congress, and the unquestioned "dean of good sense" in that fine body. He has been a voice of reason and studied eloquence in the legislative process for lo these many years. As a member of the House Committee on Agriculture since the beginning of the 77th Congress, and its chairman from 1967–74, in addition to other leadership roles, Bob Poage has helped shape every piece of agricultural legislation for nearly 4 decades. Such a record indeed speaks of a dedicated public official . . . one worthy of the public's lasting recognition.

S. 3467 would designate the U.S. Department of Agriculture Pecan Field Station in Brownwood, Texas, the "W. R. Poage Pecan Field Station." It is a tribute richly deserved. Bob Poage will be retiring at the end of this Congress. We could provide no more fitting recognition for such dedicated public service than to ascribe Bob Poage's name to this USDA facility. I urge my colleagues to join me in passing this measure.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 3467

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

W. R. "BOB" POAGE PECAN FIELD STATION

SEC. 1. The United States Department of Agriculture Pecan Field Station in Brownwood, Texas, is designated as the "W. R. 'Bob' Poage Pecan Field Station". Any reference to such pecan field station in any law, regulation, map, or other record of the United States shall be held and considered to be a reference to the W. R. "Bob" Poage Pecan Field Station.

ROMAN L. HRUSKA MEAT ANIMAL RESEARCH CENTER

SEC. 2. The United States Department of Agriculture Meat Animal Research Center lo-

cated near Clay Center, Nebraska, is designated as the "Roman L. Hruska Meat Animal Research Center". Any reference to such meat animal research center in any law, regulation, or other record of the United States shall be held and considered to be a reference to the Roman L. Hruska Meat Animal Research Center.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1153), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

SHORT EXPLANATION

The bill would authorize the naming of Federal facilities in honor of Congressman W. R. "Bob" Poage of Texas, and former Senator Roman L. Hruska of Nebraska, for their outstanding contributions to American agriculture.

BACKGROUND AND NEED

I.

The Pecan Field Station in Brownwood, Tex., would be renamed the W. R. "Bob" Page Pecan Field Station in honor of Congressman Poage. Mr. Poage has served in the House of Representatives since 1937.

In 1941, Mr. Poage was appointed to the House Committee on Agriculture, whereupon he left all other committees to serve solely on Agriculture. He was the committee's vice chairman from the 82d through the 89th Congresses and during the 94th and 95th Congresses. He served as chairman of the Agriculture Committee during the 90th through 93d Congresses.

Mr. Poage's reputation as an expert on virtually all aspects of agriculture is well established. Of great importance to Mr. Poage was the establishment of the Department of Agriculture Pecan Field Station near Brownwood, Tex. Although raising pecans is considered by some to be merely an avocation, in many areas of the country it is a large commercial business with significant impact on local populations. Mr. Poage is aware of the importance of this industry and was instrumental in the establishment of the field station, although it was not in his district at the time it was created. Through the years, he has been an avid supporter of the field station and as a result of his efforts, the station has had a significant impact on the industry and has been of particular benefit to the many small pecan farmers who use this as a cash crop.

The research station occupies 160 acres of land near Brownwood, Tex., and employs 12 persons. The station was established for the purpose of conducting breeding and culture studies on pecans with emphasis on the development of new varieties, the development of superior root stocks, studies of high density planting, and method of controlling pecan insects. The field station is also in the process of establishing a pecan germplasm repository. This will involve the collection and preservation of superior native and wild pecan seedlings that will be made available to pecan breeders for the development of superior future varieties.

II.

Roman L. Hruska began his service in the House of Representatives in 1953. After serving one term, he was elected to fill the vacancy caused by the death of Senator Hugh Butler. Born and raised in rural Nebraska, Roman Hruska kept his respect for, and belief in, American agriculture when he came to the Congress. He filled out the remainder of the unexpired term to which he was first elected to the Senate, and on his reelection in 1958, he began his first full term as a member of the Senate Committee on Appropriations.

In 1959, he began his service as ranking member of the Subcommittee on Agricultural Appropriations, and served on it continuously until his retirement from Congress in 1976. In that position, Roman Hruska represented the interests and concerns of agriculture and rural America. It was from this vantage point that he was to play the single most important role in the development and establishment of the U.S. Meat Animal Research Center.

While serving on the Senate Appropriations Subcommittee for Agriculture, Roman Hruska was quick to realize the problems and shortcomings of the Department of Agriculture in the field of livestock research and production improvements. Senator Hruska sponsored and supported efforts by the Department of Agriculture to centralize its research activities in livestock. His encouragement and interest in working with the Agricultural Research Service to establish a claim on Federal lands near Clay Center were instrumental in securing approval by the Secretary of Agriculture for the location of the facility in Nebraska. His dedication to the need for livestock research was rewarded, in 1964, by the passage of legislation to establish the Meat Animal Research Center in Nebraska.

The first appropriations for acquisition of lands and initial construction of the Center were provided is fiscal year 1966. Today, it occupies 35,000 acres of land in central Nebraska. It is now serving as the central location for Government research, development, and study of increased efficiency in livestock production, quality, and feeding; in disease control in livestock; and in virtually all other areas of concern in the production of livestock.

Animal scientists and veterinarians working at and through the Meat Animal Research Center study and test ways to develop superior strains of livestock; to control diseases and parasites affecting these animals; and to improve feeding and management practices that provide efficient production while avoiding or minimizing pollution due to animal wastes. Because of the longstanding efforts of Senator Hruska for the establishment of the U.S. Meat Animal Research Center, it is appropriate that the Congress rename this facility the Roman L. Hruska Meat Animal Research Center.

III.

The Nation has profited greatly from Congressman Poage's and Senator Hruska's dedication to agriculture. To name the pecan field station and the animal research center after these men would be an appropriate way to show appreciation for their tireless efforts. The committee members, as well as other Members of Congress, realize the outstanding contributions made by Congressman Poage and Senator Hruska to agriculture.

The committee is aware of the U.S. Department of Agriculture's general policy of not singling out individuals for recognition in view of the contributions others have made to a research facility. However, the accomplishments of men like Congressman Poage and Senator Hruska should not go unnoticed. Worthy individuals should be recognized for their services to agriculture and the Nation, and to have Federal facilities bear the names of such individuals is an acknowledgement of their contributions. This bill gives the Federal Government and its people an opportunity to honor these men.

## INTERNATIONAL INVESTMENT SURVEY AUTHORIZATIONS

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2928.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

*Resolved*, That the bill from the Senate (S. 292) entitled "An Act to amend the International Investment Survey Act of 1976, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause, and insert: That section 9 of the International Investment Survey Act of 1976 (90 Stat. 2059) is amended to read as follows:

"SEC. 9. To carry out this Act, there is authorized to be appropriated $4,000,000 for the fiscal year ending September 30, 1979.".

SEC. 2. Section 4(d) of the International Investment Survey Act of 1976 is amended by striking out "his findings and conclusions" and all that follows through the end of the subsection and inserting in lieu thereof the following: "to the Congress an interim report of his findings and conclusions not later than two years after the date of enactment of this Act and a final report of such findings and conclusions not later than three years after such date of enactment.".

SEC. 3. Section 8(b) of the International Investment Survey Act of 1976 is amended—

(1) by striking out "It shall be the responsibility of the Council on International Economic Policy to" and inserting in lieu thereof "The President shall"; and

(2) by striking out "Council's" and inserting in lieu thereof "President's".

SEC. 4. The amendment made by the first section of this Act shall take effect on October 1, 1978.

Amend the title so as to read: "An Act to authorize appropriations for the fiscal year 1979 under the International Investment Survey Act of 1976, and for other purposes.".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate agree to the amendments en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments were agreed to en bloc.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendments were agreed to en bloc.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## ORDER FOR CONSIDERATION OF S. 3447 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow after the two leaders or their designees have been recognized under the standing order, the Senate proceed to the consideration of Calendar Order No. 1061,

S. 3447, a bill to strengthen the economy of the United States through increased sales abroad of American agricultural products.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. May I ask if that has been cleared with the minority?

Mr. HATCH. It has not been cleared yet. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MATSUNAGA). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders or their designees have been recognized on tomorrow, the Senate proceed to the consideration of Calendar Order No. 1061, S. 3447, a bill to strengthen the economy of the United States through increased sales abroad of American agricultural products.

The PRESIDING OFFICER. Without objection, it is so ordered.

### ORDER FOR RECESS FROM TOMORROW UNTIL 11 A.M. MONDAY, SEPTEMBER 11, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business tomorrow, since the Senate will not be in session on Saturday, it stand in recess until the hour of 11 o'clock a.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the Senator for yielding.

### ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

### RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered that the Senate stand in recess until 9:30 a.m. tomorrow.

The motion was agreed to; and at 6:16 p.m. the Senate recessed until Friday, September 8, 1978, at 9:30 a.m.

# HOUSE OF REPRESENTATIVES—*Thursday, September 7, 1978*

The House met at 10 a.m.

The Reverend James E. Casey, St. Michael's Roman Catholic Church, Brandywine, Md., offered the following prayer:

Almighty God, we thank You for the gift of a new day. Help us to use this day for Your honor and glory. Make our thoughts, words, and actions pleasing to you. Give all Members the grace to act wisely as they use the gift of leadership for the common good. Holy Scripture states You are interested in justice, mercy, and compassion more than You are in holocausts and sacrifices, may these virtues be exercised in all deliberations of this body. You remind us that "unless the Lord builds the house they labor in vain who build it." Remove all vanity and grant grace as Members strive diligently to carry out the legislative responsibilities placed upon them. Oh, God grant these blessings so that "treasure may be stored in heaven where thief does not steal and moth does not destroy." We ask in the name of Jesus Christ our Lord. Amen.

### CALL OF THE HOUSE

Mr. BAUMAN. Mr. Speaker, under rule I, clause 1, of the rules of the House, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 729]

| | | |
|---|---|---|
| Abdnor | Bingham | Conable |
| Ammerman | Bolling | Conyers |
| Anderson, Ill. | Brodhead | Crane |
| Andrews, N.C. | Brown, Calif. | Davis |
| Archer | Buchanan | Delaney |
| Armstrong | Burke, Calif. | Dellums |
| Ashley | Burke, Fla. | Diggs |
| Beard, R.I. | Byron | Dingell |
| Beard, Tenn. | Chisholm | Dodd |

| Ireland | Preyer | Wilson, Tex. |
| Johnson, Colo. | Quie | Young, Alaska |
| Kasten | Quillen | Young, Tex. |
| Kemp | Richmond | |

The SPEAKER. On this rollcall 331 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

### THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

### MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a concurrent resolution of the House of the following title:

H. Con. Res. 683. Concurrent resolution revising the congressional budget for the U.S. Government for the fiscal year 1979.

### REV. JAMES E. CASEY

(Mr. STAGGERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STAGGERS. Mr. Speaker, I rise this morning to say a few words about our visiting chaplain, the Reverend James E. Casey.

Jim Casey's life is a modern-day Horatio Alger story. He is now pastor of St. Michael's Church at Brandywine, Md., but he was born and raised in my hometown of Keyser, W. Va. During the time of the depression, after he graduated from high school, his father died. Jim Casey had to start to work in order to help support the family. During World War II, he joined the Navy, and the Navy put him to work as an inspector at the Glenn L. Martin Airplane Co. As an aircraft inspector, he rose to one of the high positions with the Martin Co. While working in Baltimore, Jim attended Johns Hopkins University and earned a degree. Continuing his service with the Navy, Jim applied for, was accepted, and attended law school at night.

After receiving his law degree, Father Casey was requested to serve at the Pentagon, with the National Security Agency, in a high-level position. During his assignment with that agency, Jim Casey realized that "fame and fortune" were not his ultimate goals in life. He felt the highest calling one could have and the best job he might be able to do would be to serve his God through serving his fellow man. Jim realized in order to do this he would have to begin again—and he did just that. He accepted that great call; attended a seminary in Boston, and after 4 years was ordained as a full-fledged priest of the Gospel.

Mr. Speaker, today the Reverend James Casey is with us to deliver our morning invocation. I am very proud to have known him throughout the years and doubly proud because I had the privilege of marrying his younger sister.

## DEPARTMENT OF DEFENSE APPROPRIATION AUTHORIZATION ACT, 1979—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95-377)

The SPEAKER. The unfinished business is the further consideration of the veto message of the President on the bill H.R. 10929, to authorize appropriations for fiscal year 1979 for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test and evaluation for the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for civil defense, and for other purposes.

The question is: Will the House on reconsideration pass the bill, the objections of the President to the contrary notwithstanding?

The gentleman from Illinois (Mr. PRICE) is recognized for 1 hour.

Mr. PRICE. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, I shall try to say that which I have to say as succinctly as possible.

Following my remarks I shall yield to the ranking minority member of the Committee on Armed Services, Mr. WILSON, for his statement. Then I shall yield to Members on both sides to the extent time is available. Under the rules there is a limited amount of time, and a number of Members wish to speak. Therefore, I can only yield a brief allotment of time to each speaker; and in fairness to all, I shall have to oppose the yielding of any additional time to any one Member.

I wish to be fair to those who seek time to speak in support of the veto. But in that regard I shall have to yield first to members of the committee: Mr. DELLUMS, Mrs. SCHROEDER, Mr. CARR, and others who seek recognition.

Mr. Speaker, it is with great reluctance that I oppose the President and find it necessary to ask the House to pass a bill over the President's objections. My reasons for doing this are spelled out in my letter to the President, which has been made available to all Members of the House.

As I stated in that letter to the President, my principal concern is with the failure of the administration to recognize the place of Congress as a partner in determining defense policy.

Nowhere does the veto message recognize any worthwhile contribution by the Congress to a strong defense. Nowhere does the veto message recognize any of the positive additions in H.R. 10929. Nor does it acknowledge that Congress identified over $1.5 billion of unneeded funds in the President's original request. These are programs where the funds could not be spent in fiscal year 1979 if authorized and appropriated because of program changes or contract modifications.

The veto message uses cost figures which are sometimes questionable, sometimes demonstrably incorrect, and are almost always confusing.

On the aircraft carrier, the administration position has vacillated between support of a conventional carrier this year, opposition to any carrier, and support of a conventional carrier next year.

The administration loosely makes statements that a conventional carrier can be built for $1 billion less than a nuclear carrier. The administration is publicly stating a cost estimate for the conventional carrier although it does not have a design or even a single blueprint for such a carrier. Yet somehow the cost estimate stated by the Pentagon for the conventional carrier in the last 2 weeks is $95 million less than what was stated to the committee several months ago.

Such statements cast grave doubt upon the credibility of administration spokesmen and the amount of substantive review accorded the bill by the White House.

I think it hurts the administration's credibility to have the Pentagon publicists writing letters to newspapers charging the Congress with billion-dollar mistakes.

I think the President is mistaken about the aircraft carrier.

If only one more large carrier is to be built, the nuclear carrier is clearly preferable.

If only one more large carrier is to be built, the cost of a custom-made conventional carrier would be close to that of the present nuclear carrier.

I think the President was ill-advised about the bill. H.R. 10929 does improve our defense capability.

I think it is wrong to say that the congressional action hurt NATO. No one has been able to point out where the bill would weaken NATO.

Between the House and Senate there were $280 million in reductions of certain development items related to NATO that were reclaimed by the Secretary of Defense. The conference restored all but $50 million of those items.

It is wrong to say the bill cut needed equipment for the Army and Air Force. When pressed for specific cases, the administration cited a $30 million cut in obsolete armored personnel carriers for war reserve stocks as one of its highest priorities for restoration.

The veto message is wrong in saying that this bill hurts military readiness.

Have you read any statement by the Joint Chiefs of Staff supporting this veto? Has anybody heard from the Secretary of the Navy on this veto?

No.

We are hearing mostly from young civilian staffers and publicists who became experts in the legislative process yesterday.

It will be said now by administration apologists that the only issue is the aircraft carriers. Now they want to limit consideration to the carrier. I suspect the President's advisers are experiencing a bit of procedural sorrow because of the confusing advice and incorrect information they gave to the President. So they want to narrow the discussion to the aircraft carrier.

But the veto message does not say that. That is not the message that was beamed to millions of Americans on their TV screens or that is being served up at Pentagon press briefings.

The message that the public saw and heard was that Congress cannot do anything right on defense; that Congress took steps to weaken defense.

The message the American people received was that Congress voted to hurt readiness, to hurt NATO, and to cripple our R. & D. program.

I say to you that Congress did not do that.

I state emphatically that at no time during committee hearings or conference did we discuss deliberately cutting programs to make money available for an aircraft carrier.

This bill will not in any way result in a reduction in combat capability. This bill does not cut muscle out of our national defense.

If we sustain this veto can we create a better bill? I do not believe that we can. I do not think we would produce as good a bill in the next few weeks as we produced in H.R. 10929 after months and months of hard work.

If you vote to sustain the veto, you will be telling the American people that they can believe the message they heard from their TV's. You will be telling them that Congress was ready to cut the muscle of defense; that Congress cannot be trusted as a partner in determining defense policy.

Finally, I would like it understood that what we are considering here is the proper course of action on a particular bill, and Congress place in the defense policy process.

I do not believe a vote to override would cause any permanent difficulties for the President or weaken him in his dealings in other areas. Many Presidents have had vetos overridden but have gone on to be effective Presidents and to get reelected.

But I do think a vote to override the veto will be a message to the world that the United States is not prepared to let its defense capabilities be reduced and that our potential adversaries cannot afford the misconception of doubting our willingness to meet our national security commitments.

I have served in public office for more than 40 years, and in this House for more than 32 years. Through all of my years in this House it has been my lot to have special responsibilities regarding national security. I have always worked to strengthen our national security, and I have worked in this area with every President since Harry Truman. It is not pleasant for me to have to oppose a President now.

If this veto is overidden, as I hope it will be, I will greet the result not with any sense of joy, but only with the belief that we in the House have performed our duty.

Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. BOB WILSON).

Mr. BOB WILSON. Mr. Speaker, I thank the distinguished chairman for sharing time on this very important measure.

I yield 3 minutes to the gentleman from Virginia (Mr. WHITEHURST).

Mr. WHITEHURST. Mr. Speaker, I would like to begin this morning by recalling to this House the words of Winston Churchill uttered in the House of Commons over 40 years ago. In this moment of high drama he said:

> Listen—listen carefully. I think I hear something. Don't you hear it? It is the sound of marching men, the tramp of 2 million Germans and 1 million Italians crunching the gravel of parade grounds, splashing through rain-soaked fields.

Mr. Speaker, in this House this morning, we could paraphrase that and say:

> Listen carefully. Do you hear the sound of bosun's whistles, nautical commands, in a language that until recent times has never been heard of on the seven seas?

What is really at stake here is whether or not we are going to succeed in projecting American naval power abroad.

Yes, the heart of this veto, the heart of this veto, I say, is the *Nimitz*-class carrier that this House voted to include in this Defense budget. Some of us have said, "Well, it is too much money."

For the price of this ship, for the price of this vessel, you cannot acquire three modern destroyers. You cannot acquire four modern attack submarines; so the point is that if you think you are going to get some cheap ships by knocking out this money, then you are just being led down the primrose path. Nothing so projects American power in the world as this warship. There is no platform that has the firepower on it as this carrier does.

This administration has pledged this House first 30 ships a year, then 15. We gave them everything they wanted in this budget and we added this ship. I think that the American people who want us to remain strong will endorse the earlier action of this House in preserving this vessel in the budget and will endorse it this morning in overriding this veto.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. CARR).

Mr. CARR. Mr. Speaker, what we have here today is what seems to be a semiannual event in the Congress. It is the semiannual armed services "death dance."

The Committee on Armed Services, continuing out of step with the Congress of the United States, has once again managed to slip by the Congress a nuclear carrier which this House, has voted against on two occasions in this Congress.

It is true that the record is unclear. It is true that on other occasions the House has voted for the carrier, but I contend to my colleagues that this House has never taken the firm, unequivocal kind of position on a nuclear carrier that the proponents of override and the advocates on the Committee on Armed Services Committee are proposing to us today.

This is not a constitutional crisis. The vocates of override will tell us that the President is slapping the Congress in the face, that the Congress no longer has any role in military policy. Nothing could be further from the truth. The Congress is a constitutional partner in the formulation of military policy, but what the advocates of the override fail to tell us is that there is another portion of the Constitution which says that the President of the United States is a partner in the legislative process, and he cast his vote, through the veto, "no," because of the nuclear carrier. We simply are not the rubber stamp of the administration, but the administration is not the rubber stamp of the Congress.

So here we are today, and the issue is the nuclear carrier, not constitutional confrontation. Administrations, beginning with President Ford and his Secretaries of Defense and continuing to the administration today and the Secretary of Defense, have all been opposed to the nuclear carrier.

Also there is the issue of carrier vulnerability.

Mr. Speaker, I hear the veto opponents claiming you cannot count the $200 million vulnerability reduction cost against the large carrier, because the conference turned that down. That is OK if that is the kind of carrier you want, although the Secretary of the Navy says if he has to take a CVN he would rather have the survivable one. But then I also hear the veto opponents claiming the CVV is more vulnerable than the CVN.

You cannot have it both ways. The Navy vulnerability study shows that in almost every case the CVV is much less vulnerable than the unimproved CVN. Under a typical threat wherein the CVV has a 10 or 20 percent chance of being taken out of action, the unimproved CVN has an 80 or 90 percent chance, and I have all the vulnerability curves here for anyone to look at. So you are proposing to spend more money for a more vulnerable ship.

Do not make the mistake of regarding this carrier as the only one in our future fleet. We are going to have four large nuclear carriers no matter what we do in this bill. Never in history has there been a requirement for an aircraft carrier to exercise its unique capability to steam for thousands of miles and then engage in battle without resupply. We have never needed a carrier to do this in the past, and I am willing to bet we never will in the future. But if the occasion does arise, we will have four carriers which can fill this bill. You do not need to have every ship capable of every mission, particularly when the mission is both the most expensive and the most improbable imaginable.

Mr. BOB WILSON. Mr. Speaker, I yield 3 minutes to the gentleman from Tennessee (Mr. BEARD).

Mr. BEARD of Tennessee. Mr. Speaker, I rise in support of overriding this veto.

I must say that it comes somewhat as a surprise to me, as I think to the rest of the Members of this body, that we have received the President's veto on this particular part of the defense authorization bill. The President had many opportunities to let this body and also the Senate know that he would veto this particular piece of legislation if the nuclear carrier were included.

I must say I was extremely offended when one of his Deputy Secretaries appeared on television in my district saying that Congress acted irresponsibly by putting $1.9 billion into this budget for a nuclear carrier when it should have been used to strengthen our forces in NATO and other areas of importance. What the administration fails to say to the American people, though, is that they plan on spending $1.7 billion for a conventional carrier, even after a 1-year study which concluded the nuclear carrier was much more cost effective and twice as strategically valuable as the oil powered, conventional carrier.

If there is any question at all about the administration's intention to replace this nuclear carrier with a conventional carrier—and I have not heard any of the proponents of sustaining the veto mention this—I would like to refer to a memo from the Chief of Naval Operations, Admiral Hayward, who states that we have got to have a replacement for the *Midway* carrier immediately, and that the replacement must be at least as capable as the ship replaced. Then he goes on in his interdepartmental memo as follows:

> The President remains committed to a replacement carrier in the fiscal year 1980 budget. I see little likelihood that there will be any wavering on this issue, and the Secretary of Defense has reiterated the President's commitment to a fiscal year 1980 carrier in the wake of the veto action.

What they say is that we need the $1.9 billion for NATO and for strengthening forces in other critical areas, but they do not tell the American people that the administration has committed to spend $1.7 billion for a conventional carrier. And that estimate is unstable as far as the price goes, because the conventional carrier is not even on the drawing board.

It would be past 1980 before they could even start construction of a conventional carrier. We do not know when we could even start construction. The fact of the matter is that the *Midway* is 40 years old. We need a carrier to replace it immediately, and we have the plans and the design for the nuclear carrier.

I think it is irresponsible for us to sit back and say, "Let us study it; let us continue on and develop new plans."

Mr. Speaker, I think the President and this administration have been extremely misrepresentative of the facts in trying to say that the Congress acted in an irresponsible way by taking $1.9 billion and spending it on a carrier versus spending it on other needed items when the President plans to support, and also has assured the Chief of Naval Operations that he will support, the building of a $1.7 billion conventional carrier. This administration has once again committed the ultimate in hypocrisy.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Speaker, this carrier is needed. The President, and everybody, agrees that we must have 12 carriers and that there will be a need to replace one of them before the year 2000 because one carrier—the *Midway*—will soon be too old to use safely. The question is: What is the best kind of carrier to get?

The gentleman from Michigan said there was some vacillation on the part of Congress. Actually, there is very little vacillation on the part of Congress. Last year there was a dispute and a deferral. That was resolved by a law which provided for a Navy study to see what kind of carrier we should build. The study came in this year from the Navy and said that the nuclear carrier was the most cost effective, the most combat effective, would save the most lives, and would be the best for the dollar that we could put in for our national defense.

The kind of carrier is really at issue. The President has said that there should be another carrier to replace the *Midway*. Everybody agrees there should be this one replacement carrier. All of the defense studies show that this replacement carrier should be a nuclear carrier. The studies of the National Security Council, the studies of the Joint Chiefs of Staff, the view of the Chairman of Naval Operations, Admiral Holloway, all give top priority to the nuclear carrier. If we are going to have a carrier, it ought to be the nuclear carrier.

There was a recent speech at Annapolis by the Secretary General of NATO saying that one of the things that worried him most in NATO was the vacillation and weakness about just such issues as this. He mentioned the nuclear carrier specifically. I had a hard time getting a copy of that speech, but I finally did, and it certainly justifies the belief that NATO is very much concerned about having adequate carriers on the flanks of NATO.

The President in his speech said we need more flexibility and that Congress should return the ships requested in the budget. We did not cut a single ship. We gave him every ship he asked for and indeed added the nuclear carrier. He obtained more flexibility, not less, by the bill we passed. I urge that the President's veto be overridden.

Mr. BOB WILSON. Mr. Speaker, I yield 3 minutes to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. Mr. Speaker, unfortunately, in the heat of the debate, the time perhaps is not apt to discuss the issue here; but certainly I think that my colleagues who have preceded me in the well on both sides of the aisle have made a very strong case for the need for this carrier. I would say what we are voting on here today is whether America is going to maintain and still remain a first-class naval power in the world in the future. The building of ships—and I am not a technical expert on these matters—as I understand it, is not something you turn on and turn off on short notice. This is a very important decision we are making here, and we are not voting for this year's budget, for this year's Navy; we are voting for the size of the Navy up to the year 2000 and whether it is going to be comprised of 12 effective carriers or not. For that reason I think this vote is something that should not be taken lightly. It is something that cannot be reversed and easily put off until the next year or the year after. I can tell the Members that if it is put off, it is going to cost more. If we are going to remain a first-class naval power, in light of the growing naval strength of the U.S.S.R., we are going to be spending this money some day. The question is how much are we going to spend. Are we going to face up to reality today, when the shipyards are intact, when the workers are there? Or are we going to buy some of the never-never land and say that we will do this some day and we will put it all back together when we need it? And when we do that, if we can do it, it will cost a great deal more than if we do it now.

I want to analyze for the Members for just a second some statements which I found unfortunate in the President's veto message. He gave the idea to the American public, certainly, that we are not doing enough for NATO. I think this is misinformation, and I do not use that word lightly because I think those who advise the President know better. Certainly the truth is that one of the facts is that we cut back eight helicopters, which eliminated $45 million for these helicopters.

The truth is we did cut back these helicopters, but they had been requested for the Korean forces and they had nothing to do with NATO. The only thing that was done was that better models would be purchased at a later time. The bill did cut $170 million from the XM–1 program. This was requested by the Department of the Army, due solely to renegotiations with primary and subcontractors. That was not needed right now because of these negotiations.

The fact of the matter is that the committee, after holding hearings, added other types of combat vehicles to be used by our NATO forces, and they were included in the bill even when they were not requested, and were turned down.

In summary, Mr. Speaker, the President's veto statement was highly inaccurate. The committee worked long and hard on this bill and certainly considered each separate procurement item on its own merits. There were no trade offs. Therefore this veto should be overridden.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent to reserve my time.

The SPEAKER. Does the gentleman from California (Mr. DELLUMS) realize that it is at the discretion of the chairman of the committee?

Mr. DELLUMS. That is why I made the request.

Mr. PRICE. Mr. Speaker, I think it would be a little difficult to operate under that basis, of reserving time during a limitation.

Mr. DELLUMS. Mr. Speaker, I withdraw my request, and I will accept the time.

The SPEAKER. The gentleman from California (Mr. DELLUMS) is recognized for 2 minutes.

Mr. DELLUMS. Mr. Speaker, Members of the House, 2 minutes is not adequate time to discuss this matter. One hour is not adequate time to discuss this matter. The gentleman from California has spoken many times against this nuclear aircraft carrier. All of us know that it is a sitting duck, a $2 billion turkey.

The President exercised his wisdom and judgment and has vetoed this bill in an appropriate fashion. It is simply my hope that a majority of the House will sustain the veto. I take it that some Members are proposed to overriding a veto and support the position of the President. It is my hope that this group is sufficient to do so. All of the statements that have been made by the President are not statements that I subscribe to. Some of them I think are unfortunate in certain areas, even to me.

This committee has tried diligently in some areas to make cutbacks, but I cannot go along with a $2 billion turkey in the atmosphere of saving the people's money. Why do we not save $2 billion? I do not see why this is going to add anything to our arsenal or beat back communism or face up to the world. It seems to me that we ought to be redirecting the money into the real problems of the American people rather than having another carrier floating around the high seas to maintain the so-called political presence of the United States.

Mr. BOB WILSON. Mr. Speaker, I yield 3 minutes to the gentleman from Alabama (Mr. EDWARDS).

Mr. EDWARDS of Alabama. Mr. Speaker, I rise in support of the veto, and I urge my colleagues to sustain the veto. We have debated this issue at some length on a number of occasions. Putting my position very briefly, I think there are better places to spend $2.5 to $3 billion of the taxpayers' money.

We talk about this carrier as if it is the only carrier we have got. We have got four nuclear carriers by the time the last one comes off the ways. We will have 8 nonnuclear carriers, and we will have 12 out there on the high seas. I think that in view of that, we need to be building other ships and we need to be putting more money into readiness.

What we have done basically, in round numbers, is to take some $1.2 or $1.3 billion out of the Army and Air Force and put $1.2 or $1.3 billion in the Navy budget so that we can find the money for this carrier. I think that is the wrong way to go.

I know why the committee is so frustrated and why the Congress is so frustrated, and I share that frustration because the truth is that we have not had any direction whatsoever from the White House. We are only talking about 15 ships

this year when we ought to be talking about 30. If this veto is sustained, I hope the committee goes back and puts some other ships in the bill that we can use. I do not think we can best use our money by building this one ship. In that connection I would like to submit for the RECORD various combinations of ships that can be built for the price of one nuclear carrier:

Combinations of Ships Which Could Be Bought for $2.5 Billion:

(1) 1 CGN–42 cruiser (Aegis).
1 SSN–688 submarine.
4 FFG–7s frigates.
(2) 1 FFG–7 frigate.
1 DDG–2 destroyer conversion.
1 DDG–47 destroyer (Aegis).
1 aircraft carrier slep (service life program).
1 DD–963 destroyer.
1 SSN–688 submarine.
(3) 1 DDG–47 destroyer (Aegis).
1 DD–963 destroyer.
7 FFG–7 frigates.
(4) 4 FFG–7 frigates.
1 DDG–47 destroyer (Aegis).
1 DD–963 destroyer.
1 SSN–688 submarine.
(5) 13 FFG–7 frigates.
(6) 3 DDG–47 destroyers (Aegis).
(7) 8 DD–963 destroyers.

This carrier question has been equated with the President's decision on the B–1 bomber and equated with the President's decision on the neutron weapons. I think the President was dead wrong on the B–1 and the President has been dead wrong on the neutron weapons, but we need the B–1 because the old B–52 is about to fall apart. We need the neutron weapons because we do not have any in our arsenal like that, and it is a good weapons system that will do a good job.

But, we have got 12 carriers—we have got 12 carriers, 4 of which are nuclear, and this world is not going to rise or fall today or next year on whether we provide one more carrier at this time. Let us take that $2.5 or $3 billion and let us put it into good military hardware that will get our readiness up and get more ships in the oceans of the world. If we do that, we will have a better military posture as we face the Russians or anybody else in this world.

Mr. Speaker, the question today is not whether we will have a nuclear carrier or a conventional carrier. The question is whether we need another carrier in view of our many other defense needs. We are told that next year, if this veto is sustained, the President will include a conventional carrier in his budget. In truth we do not know much about that smaller carrier. Certainly I want to know much more about that carrier before I will commit to support it.

Mr. Speaker, for these reasons I will vote to sustain the President's veto.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. MAHON).

Mr. MAHON. Mr. Speaker, I am pleased to follow the distinguished gentleman from Alabama, who is my minority counterpart on the Subcommittee on Defense Appropriations, and I agree with the philosophy which he has expressed.

The carrier is really the issue before the House. There are a lot of collateral matters, but it is just the matter of the carrier that we are concerned with principally. The question is: Shall we in 7 or 8 years have another nuclear carrier? It will take that much time in which to construct the carrier. I would say that this is not a life or death decision at this time.

I would say something else: That this issue is not something that is novel or recently raised. In the full Appropriations Committee we had a vote on eliminating the carrier from the Defense Appropriation bill, and the vote to eliminate it was 26 to 26. So this is a question on which there is a division of opinion in the Appropriation Committee and in the Congress.

It has been said that the President vetoed the wrong bill. I am glad to see some attention given to authorization bills and that attention should be extended to all areas of Government spending. We cannot realistically hope to hold the line on spending, move toward a balanced budget, and combat inflation if we are not constantly aware of the dynamics of the entire authorization and appropriations process. The authorization bills represent the starting point in the legislative process and are often the genesis of spending momentum.

The real issue here is the carrier and this is the bill in which to address the matter.

Mr. Speaker, we can have only one President at a time. I have not always agreed with Presidents but I have never wanted to tear them down. Democrats and Republicans do not wish to destroy the effectiveness of the President of the United States while he sits in the shadow of the Summit Conference on the Middle East. We are spending more than $2 billion a year in the Middle East, $1.5 billion goes to Israel. I would hate to see this House repudiate the President and bring him to his knees at a time when he needs all of his strength if he is to make a maximum contribution to the cause of settling the issues in the Middle East.

So it seems to me that is is a day when we should support the President rather than destroy further the influence which he should wield as the President of this Nation.

Further, I would hope that we would not take steps to generate additional inflation which is causing so much hardship and disharmony in the Nation and in the world. We need to resist the impulse to spend the taxpayers' money on nonessential programs.

I would hope that we would recognize that building this carrier and finishing it up in about 7 or 8 years from now is not vitally related to our national security. If war comes with the Soviet Union, whether we have 12 or 13 carriers will not make the difference. The carrier will not be that important in a war with the Soviet Union. In a conflict which does not involve the Soviet Union, we already have a sufficient number of carriers.

I rise in support of the President's veto and urge the House to sustain the veto.

Mr. BOB WILSON. Mr. Speaker, I yield 3 minutes to the gentleman from Virginia (Mr. TRIBLE).

Mr. TRIBLE. Mr. Speaker, I rise in support of the motion to override the President's veto of the Defense Authorization Act of 1979. President Carter has intruded into defense planning in an unpredictable and arbitrary way and threatens to destroy a very carefully crafted bill which satisfies the immediate defense requirements of the United States.

This veto is a reminiscent of the President's decision to terminate the B–1 bomber, defer the development of the neutron bomb, withdraw troops from South Korea, transfer control of the Panama Canal, and reduce naval shipbuilding by 50 percent over the next 5 years. Aside from the very strong national security arguments that can be advanced against each of these decisions, I am concerned that the pattern of these decisions has convinced the world that the United States is retreating from its worldwide commitments. That impression invites only Soviet initiatives and causes instability and turmoil in the world.

This morning, I would suggest that it is necessary to keep in mind one simple fact. While President Carter objects to the congressional decision to spend $2 billion on a nuclear aircraft carrier, his administration has already announced plans to include a nonnuclear carrier in its next budget request. The whole issue is, merely, this year or next year, and conventional or nuclear?

Everyone agrees that the nuclear carrier is a more capable fighting ship and is more survivable than the nonnuclear carrier. Also, the nuclear carrier is more cost effective. A $2 billion new nuclear carrier takes about one sixty-third of the defense budget. It would be built to the proven pattern of three sister ships. The smaller oil-burning carrier which the President promises would not be. Inflation and cost overruns would make it as costly to procure as the nuclear carrier, taking no account of the significant oil costs that must be added to propel this ship.

It is important that we procure a carrier in fiscal year 1979. If we delay the procurement of this ship we will risk losing the skilled manpower and shipyard capacity necessary to build a carrier and this will only dramatically increase the cost of any carrier built in the future.

Moreover the procurement of the carrier in fiscal year 1980—as suggested by President Carter—will force a jump of more than 20 percent ($7.2 billion) in the fiscal year 1980 budget for weapons procurement and research and development.

Construction delays in the Trident program and flexibility in expanding production of new weapon systems have made it possible for the Congress to authorize the construction of a new carrier this year without adversely affecting other programs or adding substantially

to defense spending. However, the circumstances will be different next year. Procurement cannot be delayed further for F–16's for NATO, new missile and weapons systems to modernize the Air Force and Army, and—with the elimination of the construction backlog—an additional $1.2 billion Trident submarine.

I seriously doubt whether our economy could absorb a $7.2 billion boost in weapons spending without significantly increasing the rate of inflation. Yet, that is exactly what we will be doing if we defer buying an aircraft carrier until next year. Alternatively, failure to override the veto will force cuts next year in domestic programs and delays in buying other weapons systems such as the MX missile. I hope you will agree with me: We cannot have guns and butter next year if we do not buy a carrier this year.

For these reasons and for the many other reasons advanced by my colleagues here today, I urge the House to override the President's veto.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. LLOYD).

Mr. LLOYD of California. Mr. Speaker, I rise to support the veto override, which comes, as I am sure, as no surprise to most of the Members here. But I would like to say that, as bad as it may be, clearly I am the person who has had the most experience as far as those of you who are on this floor with respect to carrier aviation and carrier operations. Which does not mean to tell you that I am a paragon of carrier knowledge or that I am the only knowledgeable speaker because that is simply not so. There are a lot of good men who have worked on carriers, and who are certainly better prepared and have a better understanding of a carrier's capabilities than I was, but the fact remains that we are not dealing with the issue of just a carrier, we are dealing with an issue of national defense. It is not my fault that the President chose this time to veto this bill when he faces the problem of a summit meeting and when he faces an energy problem. I did not mandate that timetable, he did. Now, if he cannot handle it, that is his problem, and I would add that I am for him, I support the President, but I think he is dead wrong and for the wrong reason with regard to this issue. The issue is our national defense. If you are going to cut here, where are you going to stop? We have gotten rid of the B–1, we have gotten rid of the neutron bomb, we have gotten rid of this and that, and each time we want to do it next year, and next year, and next year. I want you to know something, Members, and that is that next year is here, now. The time to talk about national defense is now. I am saying that on the basis of my background and experience as a person who has operated on and with carriers. A nuclear carrier is the right kind of carrier and the right time to do it is now. Now is the time.

Therefore, Mr. Speaker, I think we should go forward and override this veto.

Mr. HAMMERSCHMIDT. Mr. Speaker, will the gentleman yield?

Mr. LLOYD of California. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Speaker, I wish to associate myself with the remarks of the gentleman in the well, Mr. LLOYD. I know of his personal knowledge and experience with our naval aircraft carrier system. At this time I wish to call to the attention of my colleagues a well-written article from today's Wall Street Journal. It calls attention to the "trick mirror maneuver" used by the White House in vetoing H.R. 10929.

ADMIRAL RAFSHOON

"It's not just talk, Congress cut muscle for another layer of fat." So Gerald Rafshoon, Atlanta adman and student of the defense budget, instructs John Stennis, Melvin Price and other greenhorns who don't understand President Carter's veto of the defense procurement bill.

Admiral Rafshoon's military career has been the most meteoric since Gilbert and Sullivan's Ruler of the Queen's Navie, and he should be duly rewarded with the Order of the Cardigan and the title Lord Get Tough for helping to engineer a supposedly image-enhancing veto. But as Congress votes on the move to override, something is shaping up beyond cosmetic politics. If the veto is sustained, it will be largely through the votes of Congress's scrap-the-Pentagon bloc.

Critics of the veto in Congress include not only Armed Services Chairmen Stennis and Price, but Sen. Gary Hart, the chief apostle of a more-but-smaller-ships navy. Some who oppose nuclear carriers don't think the veto was procedurally wise, since it will reignite congressional debate on the bill's compromises and slow all military improvements. The President can count on the support of partisan loyalists like Speaker O'Neill, on votes for sale for dams or breeder reactors, and on the bloc that thinks slowing military improvements is a good thing. But among Congressmen sensitive to the merits of the issue, the administration has lost the debate.

This is scarcely surprising, considering the quality of the argument the administration has been advancing. We have already remarked on how in announcing the bill the President assailed Congress by confusing authorization bills and appropriation bills. He also remraked, "I have not had a single adviser who told me that we ought to go ahead with the nuclear aircraft carrier." We wonder if the President ever met his just-retired Chief of Naval Operations, James Holloway, who publicly testified in favor of another Nimitz-class boat last April.

Then there is the administration's persistent claim that the nuclear carrier would cost $1 billion more than the oil-powered version it wants. Some $268 million has already been spent buying the nuclear components for a new ship, and Congress figures it could finish the job for another $1,930 million. The oil-powered ship is estimated at $1,575 million. The nuclear ship comes with a 13-year fuel supply, worth $330 million in oil at current prices. Treating sunk costs as sunk, and adjusting for fuel included in one purchase price but not the other, the vastly more capable nuclear ship costs only $25 million more.

How this becomes $1 billion was explained in a letter last week from Thomas B. Ross, Assistant Secretary of Defense for Public Affairs (and, in a former incarnation, co-author of "The Invisible Government," one of the first sensationalist assaults on the CIA): The nuclear components will be stored in case one of the present nuclear carriers breaks down, so add the sunk costs back into the nuclear purchase price. Forget fuel costs, because there are also the operating costs. Add in $200 million to put certain equipment contemplated for the conventional ship on the nuclear one as well. When you have done all this, $268 million plus $330 million plus $200 million plus the original $25 million, you get $823 million. Cose enough for government work, call it $1 billion.

Now, there have been detailed life-cycle cost studies of the two carriers, most conveniently summarized in Admiral Rickover's April testimony. Including all operating costs and aircraft, the nuclear option costs 1.38 times as much as the conventional one over their respective lifetimes but the nuclear ship provides 1.45 times as many aircraft. Per plane, nuclear is 5 percent cheaper. And the nuclear ship is faster, freer of a logistical tail, more able to defend itself, and more able to sustain combat damage.

All of these calculations, further, are likely to be dwarfed by a simple industrial fact. Plans, facilities and construction crews are primed to build a follow-on Nimitz-class boat as soon as the one now under construction is launched. The design of the oil-powered option is not even complete; in the end its estimated $1,575 million cost is altogether likely to work its way above the $1,930 million for the nuclear version.

The administration's contentions are simply unsustainable on the merits, which explains why it chose the essentially unprecedented route of vetoing the whole defense procurement bill. It could have asked for a simple recision without upsetting the rest of the bill, a course it took last year. But to get a recision it needs a majority in both houses, while it can sustain a veto with a third in either. And a third is an easy target because, despite much healing of the Vietnam trauma, there are still a significant number of Congressmen prepared to vote against anything military.

In pursuit of Mr. Rafshoon's "tough" image, the administration is striking an alliance with the antimilitary faction in Congress. Meanwhile, it charges that Sen. Stennis and the rest are soft on defense. By now it should be clear that the electorate wants not cosmetics but a stronger defense, and Congressmen who lend themselves to the administration's trick-mirror maneuver should be called to account in November.

The article of course, speaks for itself. Mr. Speaker, I shall vote to overide the veto.

Mr. BOB WILSON. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, I rise in opposition to the Presidential veto of H.R. 10929, the Defense Department authorization bill for fiscal year 1979 and urge my colleagues to support the construction of the nuclear carrier. It is economical, it is cost effective when we compare the cost of construction and add the fuel cost, the two carriers are virtually equal.

Among the important authorizations contained in this measure is approximately $2 billion targeted for a *Nimitz*-class nuclear aircraft carrier (CVN). The President's veto would cancel this much-needed carrier.

It is a veto which undercuts the strength of our Nation's defense preparedness and is not, as the President would have us believe, a cost-effective

measure which would save defense dollars.

After carefully reviewing the arguments both for and against the proposed nuclear carrier, I can only conclude that the overwhelming weight of the evidence supports—in the name of both a strong Navy and cost-effectiveness—construction of this nuclear carrier.

While the administration has launched an attack on the nuclear carrier as too costly and unnecessary, it still supports construction of a conventional carrier (CVV) claiming the economy and effectiveness of such a move as opposed to building a nuclear-powered vessel.

The President's claims, however, do not stand up to close and careful scrutiny. The initial comparison of construction costs, $2 billion for the nuclear carrier and $1.575 billion for a conventional carrier, scratches only the surface of a cost analysis of both ships. The costs of the CVN include sums for approximately 13 years of nuclear fuel. The price tag for the CVV does not include fuel costs; however, estimates for 13 years worth of fuel would add approximately another $330 million to the cost of the conventional ship.

Moreover, the administration supported vessel has not yet been designed. By the time such design is complete and submitted, and the Newport News shipyards, where such ships are built, shifts gears for such construction, delays and prohibitive cost overruns will be unavoidable. On the other hand, as the Wall Street Journal points out in an August 28, 1978, article, Newport News is currently completing the *Vinson*, a nuclear carrier such as the one in the measure before us, and thus, construction of the nuclear vessel would not meet those construction delays awaiting the Carter-supported conventional carrier.

Furthermore, although the administration first proposed inclusion of the conventional carrier in the current—fiscal year 1979—it then revealed its support for inclusion of such a carrier in next year's—fiscal year 1980—budget. Yet, with no official proposal and thus no design available, inflation would certainly increase the original estimate of $1,575 billion by the time construction got underway.

Beyond these important cost considerations' the CVN is far superior to the CVV in terms of hitting power and dependibility. Compared with the 95 planes the larger vessel can hold—(including our newer and larger fighter planes)—the conventional vessel could accomodate only 64 aircraft. The larger carrier is less vulnerable to foul weather, with operation in the North Atlantic, for example, being forced to shut down only about 12 percent of the time, as opposed to about 21 percent of the time for the CVV. The larger carrier would not need the frequent fuel replenishments required by a conventional ship. The CVN also is capable of carrying up to three times the stocks of aircraft fuel and muni'ions its conventional counterpart can handle.

Writing in the August 27th, 1978, Washington Post, Pulitzer Prize winning columnist, George F. Will stated:

Exhaustive studies demonstrate that large carriers are more survivable than the small carriers the administration favors.

Moreover, Will asserts that the utility of carriers was underscored when the United States lost all Korean bases in the first 5 days of that war.

There is a clear need for carriers to help maintain adequate force levels in the Southern Pacific, especially if the administration succeeds in reducing U.S. ground strengths in South Korea, and to buttress NATO strength levels in the Mediterranean area so that both friend and foe clearly recognize the U.S. commitment to necessary defense obligations.

The President has also stated that by providing $2 billion for the nuclear carrier, Congress has cut needed muscle in other areas of the defense budget. Unfortunately such statements are inaccurate. Claiming the bill contains an $800 million reduction in weapons and equipment for the Army and a $200 million cut in weapons and equipment for the Air Force is clearly at odds with the facts that this legislation cuts only $188.7 million in such funds for the Army—over $127.4 million being saved in the Army XM–1 tank program; the Army having informed Congress that this sum was not necessary as a result of contract modifications—and actually increased Air Force funds in this area by $80.2 million.

Mr. Speaker, for these reasons I believe that the President has unjustifiably vetoed an important and well-balanced, defense budget. Accordingly, I urge my colleagues to support the vote to override this veto.

Mr. BOB WILSON. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. MITCHELL).

Mr. MITCHELL of New York. Mr. Speaker, I rise in support of the motion to override the veto.

Mr. Speaker, the Congress, our Nation and the nations of the world are confused by the Carter defense policy. The rhetoric is not consistent with the deed. During a period of détente the President talks tough to the Russians as if we were in a cold war situation. He said, "We will not allow any other nation to gain military superiority over us." He said this after scuttling the B–1 bomber, the M–X missile, the Minuteman III production line and announcing a troop withdrawal from South Korea.

Next the President states we will have a Navy second to none as he cuts back the shipbuilding program severely—from 30 ships to 15 ships. But the greatest confusion to date arose when the President apparently vetoed the wrong bill. It is as though his advisers did not know the difference between an authorization and an appropriation.

For example if we were debating H.R. 4 on the floor and someone pointed out that a different bill, say H.R. 13, was scheduled on the calendar, a point of order would be revised. The debaters would be laughed off the floor. I am not sufficiently aware of legislative history to know how many Presidents have vetoed the wrong bills, or precisely what our rules provide for such a situation. Suffice it to say we are debating a veto message that has little to do with the bill before us. Armed Services Chairman PRICE has specified 8 or 10 substantive differences between the veto message and the authorization bill.

Let me address those of you who are concerned about the size of defense budget or carriers.

At the very least this technnical difficulty should provide a sound reason for voting to override regardless of one's position on defense generally or carriers specifically.

Due to the constraints of time I will allude to the specifics of the veto override and the carrier debate at the close of my remarks.

Mr. Carter's strongest objection was levied at the congressional decision to spend $2 billion on a nuclear carrier while his administration has already announced plans to include a large oil burning carrier in the next budget request. It has not been established that an oil-powered carrier would save money. Supposedly it would be cheaper to build.

But this is questionable because the CVV has not even been designed. No one knows what it will cost. With the CVV we are buying a pig in a poke. It also would be more expensive to fuel over the long haul—if fossil fuel is available.

In the long run it would appear the overall costs would be similar. But with the extra punch of the CVN, its earlier availability and its additional survivability, it is clearly a bigger bang for the buck.

If we are to have one more carrier, and the Congress and the President agree we should, let us minimize one aspect of the confusion by opting for the best, rather than second best.

The President has stated that Congress cut $800 million in Army weapons and equipment when the actual figure is $188.7 million. He stated that the Congress cut $200 million in Air Force weapons and equipment when the facts are that the Congress increased this program by $80.2 million. He went on to say the Congress cut $500 million in readiness when in actuality the defense authorization package does not address O. & M. readiness at all. This item is a provision of the defense appropriations bill. President Carter said the Congress made heavy cuts in R. & D. The actual reduction was $209.5 million or a 1.7-percent cut from the President's request. Finally, Mr. Carter said that Congress weakened the Navy by funding fewer ships that are more costly. The facts are that the President had 15 ships at $4.7 billion in his budget. With CVV, which the President intends to request in the next budget, he has 16 ships at $6.3 billion. In the authorization measure, Congress has 16 ships at $6.2 billion.

I urge my colleagues to vote to override the President's veto.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Speaker, I rise in support of the President's veto. I think my position on the procurement of another nuclear aircraft carrier is well known and I do not want to belabor the point I believe the President's veto was justified.

Spending another $2 plus billion on a fifth nuclear carrier is a gross misuse of our defense dollars. Proponents of another nuclear carrier have unfortunately argued for it strictly in terms of its individual capabilities. What we should be examining is how such a carrier fits into our force structure and what our carrier requirements should be. A fifth nuclear carrier would add only incrementally to our existing capabilities. Nuclear power has its advantages but they are highly situation specific. Admiral Zumwalt, a former chief of naval operations, has clearly pointed this out in a letter he has sent to Members of Congress. He says:

> The direct and hidden costs of CVN's provided significant benefits in naval capability in the case of the first nuclear carrier. Worthwhile but decreasing benefits were achieved with each subsequent investment in the second, third, and fourth nuclear carriers.
>
> With two nuclear carriers soon to be available to provide their incremental advantages in mobility and versatility in each ocean, the benefit, at the margin, for the fifth nuclear carrier in the 1979 authorization would clearly not be worth the money that could be saved provided that the money is invested, in the 1979 authorizaton process, to achieve optimum naval capability.

Clearly there are higher priorities within the Navy and the other services. At the end of the last fiscal year, for instance, the Navy still had 42 ships backlogged for overhaul to bring their material readiness up to par. As to aircraft readiness Admiral Holloway testified this year in his posture statement that.

> Fleet aircraft material readiness underwent a steady decline from fiscal year 1972 through fiscal year 1976, reaching an all-time low during the later fiscal year.

Although the Admiral noted that in fiscal years 1977 and 1978 this trend was reversed, "the fiscal year 1979 aircraft material readiness will decrease with the annual average being equivalent to that achieved in fiscal year 1977." These are the types of unglamorous activities that suffer the burden of wasteful expenditures elsewhere in the budget.

There is also increasing evidence that the missions of the carrier can be performed less expensively and more effectively by substitutes such as land-based air. Our goal shoud be to provide the greatest capability for the least cost, but we have lost sight of that goal.

I support the President on his action and I urge the House to do likewise.

Mr. ADDABBO. Mr. Speaker, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from New York.

Mr. ADDABBO. Mr. Speaker, I thank the gentlewoman for yielding.

Mr. Speaker, we are talking or seem to be talking about a carrier that will be built and in service in the next year. The carrier we are speaking about cannot be started for another 2 years. The only shipyard which can build the carrier is presently way behind delivery date in building the EVN 70.

Mr. Speaker, the President has said that in the next budget he will be bringing up the question of a carrier. At that time we can wage a fight on whether it should be a conventional or a nuclear carrier.

What we are going to do today if we do not sustain the President's veto is to give the Navy $2 billion to put in their bank since they cannot spend it now. What the President is saying is, "Let us talk about it in next year's budget. Give me that $2 billion now to reinforce our forces where that reinforcement is needed today. Let us spend the tax dollars, the defense dollars, on today's defenses, not on 1990's. We can make that decision next year, but the decision must now be made to buy the weapons we need now, to spend those defense dollars now. They are needed now by our NATO forces in Europe. They need them now, not 10 years from now."

That money should not be given to the Navy to be put into the bank and held for when they can spend it in the year 1980 and beyond. So that is the question today. This carrier cannot be built, cannot be started for another 2 years, so we must, if we really want to work on our defenses and build our defenses, give the Department of Defense the dollars they can spend today for our defenses today. I support the President's veto and ask my colleagues to support the veto.

The SPEAKER. The time of the gentleman has expired.

Mr. BOB WILSON. Mr. Speaker, I yield 3 minutes to the gentleman from Virginia (Mr. ROBERT W. DANIEL, JR.).

Mr. ROBERT W. DANIEL, JR. Mr. Speaker, I think that what I may term a couple of red herrings ought to be laid to rest here. I have got to take issue with the remarks of the gentleman from New York (Mr. ADDABBO) that it would be 2 years before construction work would begin on this carrier. According to Ralph Cousins, who is the president of the Newport News Shipbuilding Co., such work could begin immediately. The beginning of construction on a ship is not the keel laying, but it is a beginning of preliminary work without which beginning Mr. Cousins has said the capability of the shipyard to build this ship eventually would be diminished anyway.

A second point: We have been told that the President exercised wisdom in vetoing this bill, so there would be no carrier at all that would be built. That is not so. The choice is between a capable carrier and a less capable carrier. In fact, in a letter from the Secretary of the Navy, of which I have a copy, in May of this year the Secretary informed us that the administration was willing to support the carrier in an earlier fiscal year than the one being considered. The choice is between a less capable ship, the CVV, which Admiral Moorer, former Chief of Naval Operations, has described as incapable and a ship roughly of the same cost which would be truly capable of doing the job.

There is something I would point out. When you reduce the size of a carrier, you must reduce its air wing, but it requires the same number of fighters to defend a carrier of any size. So what you reduce is the muscle, the attack component of the wing.

We hear about the $2 billion cost, which would be about the same for the less capable CVV. If we look back into history and see what preceding carriers cost, we see that this is about the same in terms of gross national product percentage, about the same in relationship to the cost of an escorting destroyer. Such margin as we enjoy over the Soviet Union at sea exists now because of carriers. We need this ship. Without carriers, in the words of Admiral Moorer, the U.S. surface Navy would be little more than a high-mix Coast Guard. We must support this ship to preserve this edge we have, and I urge the overriding of the President's veto.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. SIKES).

Mr. SIKES. Mr. Speaker, let us look beyond today. This vote may be the final important action in the gradual surrender of America's leadership of the free world. We need a new carrier and I doubt there will be another opportunity. If the House votes today against the carrier, a weapon that is essential if we are to continue to carry out America's global commitments to peace, we will, in essence, continue to relinquish the power required for those commitments. We know the Communists are ahead of us in military power. We know they are moving steadily to increase that superiority in every area. We know they are out maneuvering us and expanding world communism to new areas and new nations.

We are retreating in Africa, in Asia, in the Far East. Our influence is shaky in the Western Hemisphere. Other than through NATO in Europe, only in the Middle East are we aggressively seeking a stable balance, but even there, the Communist influence is felt in as many nations as ours.

Military power is essential if we are to continue to exercise any effective measure of world leadership.

Now let us take a careful look at the things America has done in recent months in the development of weapons to help regain equivalency, not superiority, equivalency in military power.

Canceled the development of the B–1 bomber.

Slowed the development of the cruise missile.

Shelved research and development on the neutron bomb.

Delayed production of the MX mobile missile.

And we have continued to cut our military and civilian forces in the Department of Defense.

If we do not build this carrier, it is doubtful there will ever be another. We will continue to slide down a continuing road of retrenchment and the world will look more and more to leadership somewhere else.

Last year the Congress was persuaded to drop a carrier which had been approved and for which funds were being expended. We were told—"Drop the big carrier. Next year, the administration will ask for two smaller carriers with a new type of aircraft." We were also told there would be 30 new combat or support ships. That was last year. When the budget reached us, we found no new carriers, no design for a new aircraft, and only 15 combat and support ships. Now we hear that next year, next year, we will have a request for one small carrier. If that request comes, it will be a completely new design, it will probably cost as much as the big nuclear carrier, and its lifetime operating cost will be a great deal more. That is not a very good record to stand on.

The Congress has approved the authorization of a new nuclear carrier to insure a measure of modernization in a carrier fleet which is getting old. The House has voted to fund it. The Senate was prepared to do likewise. Now the procurement bill has been vetoed with a message which admits some half billion dollars in additional procurement in other areas is needed. Of course additional procurement is needed and should be provided. That is no excuse for killing the carrier. Killing the carrier may also help to kill America's hope for a non-Communist world in the years ahead.

Mr. BOB WILSON. Mr. Speaker, I yield 2 minutes to the distinguished minority leader, the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, this veto should be overridden. It is an action which, in my opinion, unless we override it, will leave our Armed Forces less strong than they should be in a very serious time in our history.

I recognize the logic of those Members of the House, and in the Armed Services, who are counting ships. I know that there are many who feel that our Navy is slipping behind because it does not have as many ships as it should. On the other side of the coin are those of us who feel that the quality of the ships of the Navy is more important than the quantity of ships in the Navy.

I have been convinced that we should go with a nuclear fleet ever since the days when I served on the Defense Subcommittee of the Appropriations Committee. I went out in the Mediterranean on the U.S.S. *America*, which is a very fine conventional carrier. I was there when she had to refuel. I could not help but feel, during those hours in which that huge ship was being refueled, and was cruising at a very slow speed, that she would have been a sitting duck for any potential aggressor. I said then that I was more convinced than ever that we needed to go to nuclear carriers and a nuclear fleet. I am still of that conviction.

I think we should also understand that if we make a decision not to build this new ship, we are making a decision to build a nonnuclear carrier, a conventional carrier. We do not have a carrier as big as this is going to be, able to launch the F–14. We have nothing on the drawing boards and we would have to start from scratch to design such a ship; so we will be losing time and losing money.

I hope that the people of the country on November 7 will elect a Congress that will stop inflation. I do not know whether that will happen or not, but nevertheless, it is necessary we go ahead with this nuclear carrier and override the veto.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Speaker, this vote is really not a vote on the nuclear carrier. We have been through the nuclear carrier issue many times, as the gentleman from Michigan (Mr. CARR) has said, and almost every time it has come up the House has strongly supported it. What we are voting on today is the veto of the entire defense authorization bill. This is a bill that passed the House by 319 to 67, if I recall.

Do we support that bill that came from Congress or do we want to throw away the work of 8 months and go back and write another bill?

This is also today a question of whether Congress is going to make an important decision like this on inaccurate information. I have never seen a more inaccurate document than the veto message the President sent up to Congress. Even the Washington Post this morning talks about the "funny figures" which President Carter used.

The issue this morning is simply this: A direct challenge to the integrity of the Congress.

If the President did not like the carrier, the proper method would have been a rescission. He could have sent up a rescission next year. That is the way it should have been done. That is the way, in fact, the Defense Department recommended that he do it. But he knew a rescission would lose and he wanted a direct confrontation with the Congress anyway.

Before we vote, we ought to recognize that if this veto is not overridden, we probably will not have a defense appropriation bill, a defense appropriation act, at the beginning of fiscal 1979, on October 1.

That is just about 3 weeks away, and if this committee and this House have to go back and go over this entire bill again and then go back into another session with the Senate, with all the compromises we made, I think we are going to have to operate under a continuing resolution and then come back after the election to write a final bill. That means that in the meantime there will be no new starts and no increases in pay in any defense installations that any of you may have, and no incentives for the Reserves or the National Guard.

Mr. BOB WILSON. Mr. Speaker, I yield 2 minutes to the gentleman from South Carolina (Mr. SPENCE).

Mr. SPENCE. Mr. Speaker, it seems to me that the Presidential veto has very neatly side-stepped what the real needs are for maintaining a strong defense, and particularly a strong and capable naval force.

The one ship which provides the edge of superiority over the growing Soviet naval force is the carrier. I suspect that there must be rejoicing in Moscow over the prospect that the Congress may sustain the veto and eliminate the carrier, or provide for a less capable ship sometime in the future.

The President and the Secretary of Defense have consistently reiterated the theme that they wish to reverse the trend toward a Navy of "fewer and fewer, more-and-more expensive ships." I agree that we need to reverse the trend toward fewer and fewer ships, but the point needs to be made that all ships are expensive. A price tag cannot be put on the Nation's defense and security. If the weapons systems do their assigned missions, then peace is maintained and we get what we paid for.

The Congress certainly has not overlooked the fact that the Navy is at its lowest level of ships in recent history. We have clearly demonstrated our concern and voiced our strong belief that a meaningful and steady growth pattern must emerge to increase the number of ships in the Navy. The authorization bill this year provides for the beginning of new initiatives in naval shipbuilding. But a Navy has to be built with some purpose in mind, not just building ships by the numbers for the sake of numbers.

The carriers are the nucleus of the fleet. It was with that fundamental thought in mind that the Armed Services Committees opted not to wait until next year and lose another year to inflation, but to start to build the replacement carrier for *Midway* as soon as possible. With the funding for the carrier settled, it becomes more plausible to think in terms of smaller and a greater number of purposefully selected ships for next year, and into the future. The carrier takes a long time to build. Smaller ships can be built much faster, so the urgency to get them off the drawing boards and into the shipyard is not as great as that of a large ship.

In his veto message the President said of naval ships:

> It is crucial to maintain an appropriate overall annual level of ship construction. The Congress should return all of the general purpose ships requested in our budget.

The President is not being candid with us or the American people in this statement. We did not take away any general purpose ships in the authorization bill. In fact we added ships. With all due respect to his high office, the President's statement does not make sense. In "down home talk" that the President understands, "the words don't match the deeds."

Let me ask what the administration is doing to establish "an appropriate level of ship construction." I will tell you in a nutshell. It cut Navy shipbuilding in fiscal year 1979 from around 30 to 15 ships. Then the administration sent us a 5-year plan which showed a nogrowth pattern of 14 to 15 ships per year.

That pattern certainly does not conform to the promises for a trend toward a larger Navy. Rather, the pattern to which the Congress has been subjected over the past 2 years from this administration has been one of promising, promising and reneging.

At this point I want to conclude with some general observations over the frustrations we on the Armed Services Committee have faced over the years on the carrier issue.

Opponents of aircraft carriers in general keep calling for more studies; more studies to search for alternative systems. We have studied this issue to death. Every study I know of in the past 10 years has concluded that the carrier is the foundation of our naval arsenal. There is no need for more studies.

Some people who oppose inclusion of the carrier in the fiscal year 1979 defense authorization bill, who parrot administration rhetoric for more navy ships, are the same individuals who year after year consistently vote against more ships, and in fact the entire defense bill.

The majority in the Congress has been on the right track this year in the fiscal year 1979 defense authorization bill. There is no legitimate reason for us to change the growth pattern we have established for a promise from the administration of what is to come.

The veto must be overridden.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin (Mr. ASPIN).

Mr. ASPIN. Mr. Speaker, let me make a couple of comments in response to the points made by the gentleman from New York (Mr. STRATTON).

What we are really seeing here is the latest skirmish in the battle for the soul of the Navy. I am, for one, happy that President Carter is assuming some leadership on this issue and showing us what direction he wants to go. We have been fooling around with this issue for many years, whether we should go to smaller ships or whether we should go to larger ships, and I am glad the President is deciding to move out in the direction he is taking. The people who control the next couple of defense budgets are going to say which direction the U.S. Navy is going.

If this means we are going to have to go back and redo this defense budget, I think it is well worth the cost, because it is time we had some consistency as to the direction the U.S. Navy should go. Too often in recent years we have had these deadlocks between Congress and the administration about which direction we are going.

The gentleman from New York (Mr. STRATTON) is talking about further deadlocks and saying that if we support the veto we are not going to have a defense bill. If that is the case, that would be extremely irresponsible. We can take out this nuclear carrier and substitute other things very quickly. We can do that quickly enough to have a defense bill within a month if we want to do it.

But if we want a deadlock, if we want to get stubborn when the veto is sustained, and we want to deadlock the whole thing, we can do that, too. That, I think, would be very shortsighted, and that really would hurt the defense of this country.

It is time that we come together behind a single direction for the U.S. Navy. Some of us would like to go to nuclear carriers and larger ships; others would like to go to smaller ships and more numerous ships. I think the direction we go is less important than the fact that we finally decide on a direction.

If the President has finally decided on the direction he would like to go, I would urge the Congress to get behind him, and let us all move in that direction together. At least if we move in that direction together, we can have a stronger Navy, and stop this continuing deadlock and this continual business of carriers being put in and carriers being taken out, which is what we have had in the past.

Mr. BOB WILSON. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. DICKINSON. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Alabama.

Mr. DICKINSON. I thank the gentleman for yielding.

Mr. Speaker, I want to rise and say that I do oppose the veto. I do support the committee position.

Mr. Speaker, I rise in support of the motion of the distinguished chairman of the House Armed Services Committee, the gentleman from Illinois (Mr. PRICE), to override the President's veto of H.R. 10929.

Many of us who carry responsibilities for our national security view the President's veto of this bill with alarm. Why is this veto so alarming? There are several reasons.

First, no President has vetoed a defense authorization bill in recent times. Such an action sends the wrong signal to both our friends and enemies. Our friends may think we have lost our resolve—and we could gradually find ourselves isolated. Our enemies could read it the same way—as a growing weakness—and they could become more aggressive and test us and our friends as they are already doing in Africa. The President's action does not represent the consensus of our people. That consensus was expressed through the Congress which passed the defense bill by a large majority.

Secondly, the word around Washington is that this is only the first "get tough with Congress" veto that the President will exercise. Apparently, his advisers have concluded that he is presently the image of a weak leader and they feel a few vetos will be good public relations. The tragedy is that they so casually selected for the first "public relations veto," a measure that is so important to the security of our country.

This action is only another hint of apparent White House willingness to take chances with our security and follows other noteworthy Presidential decisions such as, pardoning the deserters and draft dodgers, withdrawal of U.S. troops from South Korea, allowing the Vietnamese Communists in the United Nations, giveaway of the Panama Canal, and cancellation of the B–1 bomber and other vital weapon systems.

And finally, it was a bad veto because the President wants to kill construction of a fifth nuclear aircraft carrier. This would be the only such carrier to be built during the remainder of this century and it would be used to replace a World War II carrier which is becoming obsolete.

The President has agreed and has indicated he will eventually request one more large deck carrier to maintain a fleet of 12 active duty carriers. The President has also said that this will be the last large deck carrier we will build during the 20th century. If this indeed is the case—that is, we need one and only one more large deck carrier—then there are a number of factors that favor a CVN over a CVV.

First. A CVN is clearly more operationally capable than a CVV. On this issue there is no disagreement.

Second. We have never constructed, or for that matter have we yet to design a CVV, whereas our shipyards are set up to build a fourth and final CVN. No retooling or new training of shipyard personnel is required.

Third. A CVV will be a one of a kind ship with all of the problems, both construction and operational, that entails. After the inevitable cost overruns, inflation, and oil price increases have taken their toll on this one of a kind ship, it will surely cost more than one CVN.

The President claims that as a result of Congress adding the carrier to this year's budget, many high priority programs were deferred to accommodate it. To the extent that this is true, the problem will surely be exacerbated in next year's budget if the President requests a CVV. The Army's procurement bow wave problem is worsening year by year. The Navy will continue to require large sums of money if the fleet is to be rebuilt and the Air Force will likewise require increased research, development and procurement funds if our strategic deterrent forces are to be modernized.

In my view, if the President's veto of this year's authorization bill is sustained, it is highly doubtful that Congress will shift the carrier funds to other parts of the budget. In fact, it is entirely conceivable that this Congress will report a new bill that is identical in every way to the present bill minus funds for the carrier. To whatever degree the carrier has impacted funds for other programs in this year's budget, it will surely have a similar, if not a more drastic, effect on next year's budget. It would seem to me that a successful veto of this bill simply inflicts a "double whammy" on defense.

I believe it is important for our Nation's long-term security that we override this veto.

Mr. FRENZEL. Mr. Speaker, the President's veto of H.R. 10929, the defense authorization bill remains incomprehensible only so long as we assume he vetoed the right bill. It is pretty clear from reading the veto message and other administration statements that the President should have vetoed the defense appropriation bill. For the first time in my memory most of the arguments marshaled in support of a veto do not apply to the vetoed bill.

With Congress not having completed action on the defense appropriations bill, the President apparently chose to put the

authorizing legislation on the chopping block instead.

It is also important to appreciate what this veto does not seek to do. This is not an attempt to reduce Federal spending. Any funds that would be freed up by deletion of the $1.93 billion nuclear carrier will be applied to other defense programs.

Furthermore, the veto does not mean the President opposes procurement of another large carrier. Earlier this year the Secretary of the Navy indicated the administration favored inclusion of a conventional aircraft carrier (CVV) costing an estimated $1.6 billion in this year's authorization bill. When Congress opted instead to build another nuclear carrier (CVN), the President reassessed his position and decided we should defer authorizing another carrier until next year. Both Congress and the President want to build one more large carrier. The dispute centers on when to authorize construction and the type of propulsion.

The President further muddled the issue by charging that Congress crippled several high priority defense programs to make room in this year's budget for the nuclear carrier. The distinguished chairmen of both the House and Senate Armed Services Committees have carefully research these charges and shown them to be either false or misleading. This is not to suggest that Congress simply rubberstamped the administration's request. As is usually the case, adjustments were made at the margins of some programs. It is difficult to understand why these sorts of routine adjustments should have precipitated the first veto of a defense bill in over a century.

There is room for honest disagreement as to the cost differential between a *Nimitz*-class nuclear carrier and the proposed one-of-a-kind conventional oil-burning carrier. The administration claims the CVV can be built for $1 billion less than the CVN. Others including the shipyards themselves argue the conventional carrier could end up costing more than the nuclear carrier, given the potential for cost overruns on a new design ship. There is no disagreement that the nuclear carrier is a far more capable fighting ship.

If it comes down to a choice between a proven nuclear carrier and a less effective, more vulnerable nonnuclear carrier that has yet to be designed, my clear preference would be to go with the more capable weapons system.

When the Defense authorization bill was considered earlier this year I opposed funding for either carrier in the light of our acute economic situation. Now, however, a vote to sustain this clumsy veto will more than likely lock us into building the costly but vastly inferior oil-burning carrier which the President wants. Given these options, the President's veto should be overridden.

Many observers have suggested that the President cast his veto at least partly out of a desire to look "decisive." Whether that is true or not, it is a fact that the veto message and the Secretary of Defense's statement do not make sense.

It is also a fact that the veto, if sustained, is likely to cost us more and give us less defense. A continuing resolution is a poor way to start the year, and the Armed Services Committee is sure to come up with a costlier bill.

A bitter alternaive is to override the veto.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. WHITE).

Mr. WHITE. Mr. Speaker, it is readily apparent that the advisers who recommended to the President that he veto H.R. 10929 did not understand the difference between the authorization and appropriation processes in Congress. The veto message actually referred to the wrong bill. The message claimed that Congress had cut $800 million in Army weapons and equipment, but the authorization bill only cut $189 million. It claimed that Congress had cut $200 million in Air Force weapons and equipment, but the bill actually added $80 million. It claimed that Congress had weakened the Navy by authorizing fewer ships, but the bill actually authorized more. It claimed that Congress had heavily cut research and development but the bill had reduced R. & D. by only 1.7 percent. The message also claimed that Congress had cut $500 million in readiness. Readiness is not even addressed by the authorization bill.

One further example is the President's assertion that training of personnel was damaged by H.R. 10929. The facts are as follows:

I requested an increase of $1 billion for items which are not glamorous, but which provide the immediate fighting capability of our forces—funds (requiring appropriation but not prior authorization) for repairs of weapons, spare parts for vehicles and aircraft, ship overhauls, *training of personnel*, communications, and logistical support to move equipment to where it is needed. Adding the nuclear-powered aircraft carrier means eliminating half of that increase in fighting capability—some $500 million. (The President's veto message.)

*President's Budget*

Reduced training manpower from FY 1978 level

Army

minus 6,800 military personnel
minus 1,300 civilians

Navy

minus 10,500 military personnel
minus 800 civilians

*Congress/H.R. 10929*

Added to President's request for training activities

Army

plus 2,100 military personnel

Navy

plus 1,850 military personnel

ACTIONS IN PERSONNEL AREA NOT MENTIONED BY THE PRESIDENT RELATED TO READINESS IN WHICH CONGRESS AND THE PRESIDENT DIFFERED

*President's Budget*

Reserves

Reduced Naval Reserve from FY 1978 level
minus 35,600

*Congress/H.R. 10929*

Restored proposed reduction
plus 35,600

(Recruiting incentives)

(50,000 short of authorized and 130,000 short of peacetime manning goal)

*President's Budget*

Asked for $0.5 million to continue current test of reenlistment bonus

*Congress/H.R. 10929*

Authorized $25 million to assist enlistment and reenlistment

Shortages in the Individual Ready Reserve (−320,000)

*President's Budget*

IRR shortages

No action

Civilians

Reduced aircraft maintenance facility manning
−1,100 in Naval Air Rework facility manning
−400 in Air Force aircraft maintenance facilities

Training loads

*Congress/H.R. 10929*

IRR shortages

Included provision to halt transfers from IRR manpower pool to standby reserve. Will add 50,000 to IRR manpower pool when fully in effect

Civilians

Added
+1,100
+400
to improve operational readiness rates for aircraft

Training loads

Increased President's request for the Army by 424 (324 for more One Station Unit Training and 100 for physicians' assistants training)

Congress did not reduce the President's request in the area of manpower at all, except for a reduction of 2,000 civilian personnel out of the total of 1 million. This reduction is specifically directed at white collar civilian employees in the Washington, D.C. area. It will be difficult for the case to be made that this reduction will impact on efficiency, let alone readiness.

It appears that the reason for the veto was the inclusion of the nuclear-powered aircraft carrier. One wonders if the nuclear-powered aircraft carrier is the reason or is this one item in an overall plan to drastically alter the defense posture of the country. Strategic air power has been adversely affected by the elimination of the B–1 bomber and failure to pursue the MX missile. Land power has been adversely affected by failure to pursue the enhanced radiation weapon. Now seapower is being adversely affected by this attempt to restrict the successful deployment at sea of tactical aviation, a capability in which our Navy enjoys its only advantage over the Soviets, and at a time when our seapower may be called upon to defend sea lanes at greater distances from home than ever before.

Let us examine one more time the carrier issue which the presidential advisers, whoever they may be, are so opposed to.

The large carrier can operate in heavy seas; a small carrier cannot. The large carrier can carry more aircraft, more ordnance, more fuel, is faster, has greater range, can operate its aircraft more efficiently, is safer in flight operations, and is more survivable. The addition of nuclear rather than conventional power improves these advantages markedly and pays for itself. The cost of nuclear fuel is included in ship construction costs and latest information indicates that nuclear fuel will last significantly longer than 13 years—close to 20 years.

The issue is not whether or not a carrier is needed. We have already agreed that it is needed. Nuclear power is not the issue. We have already agreed that nuclear is needed. I have here a hand-

written memorandum from the Secretary of the Navy to Mr. Frank Sullivan, Staff Director of the Senate Armed Services Committee indicating that as late as July 13, 1978, the Secretary and Deputy Secretary of Defense were in agreement that the House authorization of $2.129 billion for a CVN including survivability features should be supported.

There are no design plans for a smaller ship. Cost estimates have been based on multiple smaller carriers but none are included in long range ship construction plans. The administration speaks to inclusion of some kind of carrier in the fiscal year 1980 proposal—delaying any ship by another year and increasing costs regardless of which design is selected.

Commonsense dictates that if we are to build only one carrier and if the costs are essentially the same—we should build the most effective ship which can be built. We should build the nuclear powered aircraft carrier.

The authorization bill presented to the President represents months of complex study and review by the Congress and is considered to be a balanced effort to begin to redress deficiencies in our national defense posture.

Anything less than this effort would be inimical to the safety and best interests of the United States. As the Congress is responsible under article I of the Constitution for the raising, provisioning for, and maintenance of our Armed Forces, I strongly recommend that we move to override this veto.

Mr. BOB WILSON. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, my text for today is taken from the Wall Street Journal of this morning, which has a very good editorial which I hope some of the Members have read. It is entitled "Admiral Rafshoon." It says, in the first paragraph:

"It's not just talk, Congress cut muscle for another layer of fat." So Gerald Rafshoon, Atlanta adman and student of the defense budget, instructs John Stennis, Melvin Price and other greenhorns who don't understand Presidet Carter's veto of the defense pocurement bill.

Admiral Rafshoon's military career has been the most meteoric since Gilbert and Sullivan's Ruler of the Queen's Navie, and he should be duly rewarded with the Order of the Cardigan and the title Lord Get Tough for helping to engineer a supposedly image-enhancing veto.

In the last paragraph of the article it says:

In pursuit of Mr. Rafshoon's "tough" image, the administration is striking an alliance with the antimilitary faction in Congress. Meanwhile, it charges that Sen. Stennis and the rest are soft on defense. By now it should be clear that the electorate wants not cosmetics but a stronger defense, and Congressmen who lend themselves to the administration's trick-mirror maneuver should be called to account in November.

Mr. BADHAM. Mr. Speaker, will the gentleman yield?

Mr. BOB WILSON. I yield to the gentleman from California.

Mr. BADHAM. Mr. Speaker, I rise in strong support of this action to override the ill-conceived Presidential veto of the military procurement authorization bill.

The situation is really not very complicated, and I will not dwell on the issues already covered: Namely whether the President vetoed the right bill or not, whether or not the Armed Services Committee, of which I am a member, deleted other items to make room for a carrier—which it did not—whether or not the President reneged on his promise of 30 ships and 2 carriers—he did renege because this year he asked for 15 ships and no carriers—or whether or not we need another carrier—the President and the Congress have already agreed that we do. Rather I will deal with the sole issue of cost which seems to be the President's bottom line.

First of all, to put it in proper perspective, CVV started out a few years ago as a textbook weekend exercise in economic studies at the Pentagon when the economic duty section was asked to come up with rough description of an aircraft carrier that would cost in the neighborhood of $1.2 billion. I stress that this was not to be based on design for a carrier and a carrier mission, but strictly based on what kind of carrier you can build for $1.2 billion. The economic team started with America's most modern carrier, the *Nimitz* class, and then removed costly items one by one until the cost was down to the desired level. I stress that this had nothing to do with mission, vulnerability, fightability, survivability, or anything else remotely related to a real ship. Catapults were removed; elevators were removed; clear vertical space on the hangar deck was removed; the nuclear powerplant was removed. When all was said and done, the result was a gutted *Nimitz* class carrier that cost $1.2 billion in then year dollars. Clearly as a class of carrier such an animal would be less costly. Now, however, we are faced with the President's proposal to build one.

The slippage has now caused with inflation the $1.2 billion economic exercise to become a $1.5 billion CVV. Since, however, there are no plans, no test models, and no design work even commenced for their economic exercise, we must assume that if planning, design, and drawing were commenced on October 1 of this year, it would be approximately four years before the keel could be laid. Now I do not suppose it is going to be any great secret to the Members of this House that 4 years from now the inflation factor will have probably added about 35 percent to the $1.5 billion economic exercise. Despite the fact that the President and Dr. Brown tell us that if commenced in fiscal year 1980 a CVV could be operating before a CVN could be operating if started today, we must face the real facts, and that is you still have to add 3 more years slippage for planning and design.

A *Nimitz*-class carrier today if the keel were laid would cost $2 billion, so the bottom line is for the same amount of money and a slight time delay, we could have a CVV that is less sustainable, less fightable, more vulnerable, and smaller than the CVN.

In addition, the projected economic exercise (CVV) assumed the building of more than one—possibly five or six carriers—to reduce the unit costs. The President and the Secretary of Defense, however, have said we need only one more carrier. How can we therefore justify the design, testing, and planning of only one new carrier which by virtue of the fact of its "oneness" will be a custom-made ship?

Throwing all other arguments aside, such as fuel cycle, fuel replenishment vessels, number of aircraft carried; the simple fact remains: If we need another carrier—and we do—all fiscal, military, time, and energy logic dictates that it be nuclear.

Mr. BOB WILSON. I thank the gentleman.

Mr. Speaker, let me just say something about image making. For 26 years I have hidden the fact that I am also an image maker. I am an advertising man. I hope I have successfully created a better image than what I am, but I do know something about image making. The image maker who has been hired by the President is trying to do one of two things. Either he is trying to make him into something that he is not, or else he is trying to hide what he is, one of the two. That is what you hire an image maker for, and that is why the taxpayers are paying $50,000 per year for Admiral Rafshoon's work.

Mr. PRICE. Mr. Speaker, I yield 1 minute to the gentleman from Virginia (Mr. DAN DANIEL).

Mr. DAN DANIEL. Mr. Speaker, I rise in opposition to the President's veto of the 1979 Defense Authorization Act.

Many of my colleagues will discuss the role of Congress in establishing defense policy, and the need to authorize a nuclear carrier. I will limit my remarks to clarifying one point—that is, the legislation sent to the President does not adversely impact our NATO commitments.

Whatever the outcome today, there is a message which must be clearly conveyed to the American people, our allies and our adversaries. The message is that the House Armed Services Committee, does not trade off major defense mission areas, either intentionally or inadvertently.

Let there be no misunderstanding, neither the committee nor the Congress intended to fund the nuclear carrier at the expense of our NATO needs or any other defense requirements. Every defense program action, whether it was an approval, reduction or termination, was based on the testimony of Defense witnesses or the best supporting data that is available.

Setting aside questions of how the 1979 defense budget which includes a nuclear carrier was structured, I want to highlight a consideration for the 1980 budget that must be seriously deliberated before we cast our votes.

Both the Congress and the President have declared their commitment to an active 12-carrier fleet. In order to provide such a fleet, another large-deck carrier must be built.

The Congress believes that carrier should be funded this year and the President believes it should be funded next year. The President's proposal will have a heavy impact on our Army, since next year the Army procurement requirements will balloon in order to fund needed mod-

ernization programs in the wake of the expenditures made for the Vietnam war. The Army's planned procurement increase for next year is approximately 30 percent. Therefore, to include an aircraft carrier in next year's budget request will obviously affect our Army modernization programs. If I am to believe the testimony we have received, then, this will hinder improvement of our NATO capabilities.

We need the Army programs and the Navy programs when considering NATO readiness and can afford both. On many occasions we have been asked to identify that part of the defense budget which is NATO related. The answer is the entire defense budget is related to NATO, for it is our total military capability which deters aggression and it must be measured in an overall context. In fact, we must look at not only our coventional capability, but also our strategic capability. Therefore, the total defense budget must be considered in order to determine if there is an adverse impact on NATO.

I have supported the Armed Services Committee's actions on the defense budget, those actions taken by the House of Representatives and those taken by the conference committee on the Defense Authorization Act because I firmly believe that the act sent to the President provides authorization for necessary defense appropriations with correctly ordered priorities. This is a properly structured Defense Authorization Act and provides for our defense requirements including NATO.

It is for these reasons, and others that have been mentioned, that I will vote to override the veto and urge my fellow Members to do likewise.

Mr. BOB WILSON. Mr. Speaker, I yield the balance of my time to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Speaker, we are living according to the well-known Yugoslav writer Milovan Djilas, in one of the most crucial moments in history since World War II. Djilas, according to Richard Whalen, in his outstanding book, "Taking Sides," is one of the best informed sources available to the West on the workings of the Soviet mind. A Communist revolutionary before World War II and a frequent wartime emissary to Stalin, he became Vice President of Yugoslavia under Marshal Tito.

The Soviet invasion of Czechoslovakia in August 1968, Djilas wrote the following year, was not the end of a policy, but the beginning of a new Soviet policy, a policy of aggression, not only by economic and political subversion, but by raw, naked military force. Djilas, who personally knows many members of the Soviet ruling elite, offers this urgent advice to the West:

> The West must rid itself of any lingering illusion that the present Soviet leaders are sophisticated men who eventually will come to their senses.

He says, "If peace is to be preserved in the world, the world must insure that it possesses overwhelming military superiority."

He says that the margin must be so great that "even the Soviet bureaucracy can understand it."

Mr. Speaker, the American people do not want any doubt in the world as to who is superior, militarily speaking. Mr. Speaker, the first line of defense of this Nation is our credibility and that of our President. I share the belief of our friend from California (Mr. LLOYD) that we pray for peace and wish the President well at Camp David but certainly, the military superiority of the United States is in doubt and the credibility of our defense in question.

The purpose of defense spending and of a nuclear carrier is not just to replace the *Midway* but to help defend peace. There is no debate in this Chamber as to whether or not we are going to have a carrier, or another carrier. The only question is whether it is going to be nuclear or conventional, this year or next year. The purpose of this nuclear carrier is to help prevent war and preserve the peace of the world and I would suggest that in the western Pacific, Mediterranean, and Indian Oceans carriers have had a tremendous record of extending U.S. power in such a way as to help minimize war. All studies show the CVN–71 to be the most cost effective and most combat effective vis-a-vis conventional carriers. To stop the production of the B–1 bomber, limit the range of cruise missile, stop the enhanced radiation warhead, cut the shipbuilding program and the MX program and now this is to threaten the credibility and the defense of the West.

Mr. PRICE. Mr. Speaker, I yield 1 minute to the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Speaker, I rise in support of the President's veto, and urge the Members of this body to sustain the veto. I think the essential thing to consider here is that each year we have a limited number of dollars for defense purposes. This year, we have approximately $127 billion, and it behooves us to make certain that those scarce moneys are put into the areas that will give us the greatest defense.

It is not clear whether a new additional nuclear carrier will give us the greater defense. It is clear, however, that we have other immediate military needs. We have immediate needs for readiness programs, for ammunition programs and for materiel for our Army and for our Air Force.

These needs should not be deferred. This $2 billion can very well be expended in these areas, and I suggest that is what the President is trying to do. In later years, we will have time to decide on the carrier and to make a decision as to whether the new carrier should be nuclear powered or conventional. We do not have to decide that issue in the 1979 fiscal year budget.

Mr. PRICE. Mr. Speaker, I yield 1 minute to the gentleman from Missouri (Mr. ICHORD).

Mr. ICHORD. Mr. Speaker, I have given careful consideration to the President's veto message of August 17 on H.R. 10929, and I am appalled by the misinformation that this message conveys to the Congress and the American public. In the entire message, there is only one sentence with which I agree and that is the President's assessment, and I quote, "I believe that the defense of the United States needs to be strengthened."

I would like to join those of you here today who recognize that key administration officials, after 21 months in office, still fail to recognize the difference between an authorization bill and an appropriations bill, and have advised the President—perhaps ill-advised is a better term—to veto the wrong bill. To complicate the situation, he vetoed the wrong bill on the basis of incorrect information. Even the Washington Post, which advocates the lightweight carrier, agreed in this morning's edition that the figures provided to the President in support of the veto went the way of a "meringue in a blast furnance."

Mr. Speaker, I want to set the record straight here today. As chairman of the Research and Development Subcommittee, I, along with 12 other Members of this Congress, held some 40 hearings in reviewing the administration's research and development program proposal. To the best of my recollection, the subcommittee never once discussed the issue of an aircraft carrier. We made 150 program changes—additions and deletions, by carefully examining each program in the President's budget request, and deciding on the basis of the merit of each program, whether or not it would contribute to our national security.

I want to state categorically that we did not displace any program because of the requirement to find money to develop an aircraft carrier, be it nuclear or conventionally powered, with a large or small deck. To cite a few examples, the administration requested $105 million for continued development of the B–1 bomber. May I remind each and every one of you here that the administration and this Congress have already decided against the production of this aircraft. As a result, we reduced this program request by $50 million, $20 million of which the administration fully concurs with. The resulting $55 million authorization will enable the Department of Defense to complete some valuable electronic countermeasure experiments with the fourth B–1 aircraft. So on this particular program, we save the taxpayers $50 million.

A second example is the light airborne multipurpose system, frequently called the LAMPS submarine-hunting helicopter. It was obvious to me and my colleagues that after reviewing this program there was some $400 million in fat. The program was poorly managed and was literally running amuck. My subcommittee and the Armed Services Committee has taken action on this program that will result in a direct saving to the American taxpayers of $400 million. In the September 6 edition of the Wall Street Journal, Assistant Navy Secretary David Mann was quoted as saying—

> The early phase of the program just wasn't well run, and we admit it. . . . As a result, the program schedule slipped by about fifteen months and costs rose. We wear our hair short in public on this.

Mr. Speaker, I resent the allegations

that the Armed Services Committees of the House and Senate, and in fact this entire Congress, have weakened our national defense by the passage of H.R. 10929. I wish to point out that the administration offered no objection to nearly $100 million of reductions in research and development. This concurrence makes it difficult at best to convince me that we cut muscle, and not just plain, ordinary, down-home fat.

I am greatly concerned about the defensive capability of this Nation when the nuclear carrier will come into being. Why am I concerned? Why am I worried? It is because our defensive efforts for the past several years have been characterized by "Start! Stop! and Delay!" "Start! Stop! and Delay!" We start on the B–1 bomber and stop. We start on the M–X system and enhanced radiation device and delay. If we fail to override this veto a majority of the Congress will have started a nuclear carrier and have stopped again.

I urge you to override this veto and give this country the kind of defense that is really needed to not only defend ourselves, but to convince our allies of our firm commitment to preserve world freedom.

Mr. PRICE. Mr. Speaker, I yield 1 minute to the gentleman from Missouri (Mr. BURLISON).

Mr. BURLISON of Missouri. Mr. Speaker, I rise in support of the President's veto. The principal point I would like to emphasize deals with the increased costs of a nuclear carrier task force over that of a conventionally powered task force. The gentlemen who have preceded me here in the well have established the fact that, clearly, there is about a $1 billion difference between the procurement of the CVN 71 and a conventionally powered CVV. There does not seem to be much argument about that.

But most arguments have overlooked the fact that we also need nuclear escorts to go with each of the nuclear carriers to make up a nuclear task force. Nuclear propulsion is expensive, not only for the CVN under discussion, but in the procurement of nuclear-powered escorts that are critical to attaining full effectiveness in operating the CVN. Without these nuclear escorts the CVN is held back by operating limitations of the conventionally powered ships.

There have been differences of opinion as to the number of escorts needed for the all-nuclear-powered carrier task force. But one point is clear; a minimum of two and possibly four nuclear powered cruisers are needed depending on the composition of the individual escort force.

The following escort requirements for each of the four all-nuclear-powered carrier task forces have been variously described:

Case 1. Two nuclear-powered Aegis-equipped cruisers per task force group; for a force level of eight Aegis-equipped CGN's.

Case 2. Three nuclear-powered cruisers (one Aegis equipped) per task group; for a force level of 12 CGN's (including 4 Aegis equipped CGN's).

Case 3. Four nuclear-powered cruisers—one Aegis equipped—per task group; for a force level of 16 CGN's (including 4 Aegis equipped CGN's).

The estimated cost per nuclear Aegis escort is $1.5 to $2 billion per copy while the cost of each DDG 47 conventionally powered Aegis destroyer is about $760 million. The difference in buying conventional escorts vs. nuclear escorts for this one ship is well about $2 billion.

So the issue really comes down to whether we have a carrier force of four nuclear and eight conventional carriers or whether it is five nuclear and seven conventional. As it now stands we do not have enough nuclear escorts for the four nuclear carriers already funded and the Congress has not funded a new nuclear escort since 1974. With the commissioning of the U.S.S. *Arkansas* (CGN–41) in 1980 the Navy will have nine operational nuclear-powered cruisers. The chief of naval operations has testified that an all-nuclear-powered aircraft carrier task group should have three nuclear-power guided-missile cruiser (CGN) escorts, one of which would be Aegis-equipped. On this basis, the navy needs 12 CGN's just to meet current requirements. If Congress funds this CVN that requirement increases to 15 CGN's. The estimated cost of 6 nuclear-powered escorts to fulfill this shortfall is roughly $6 billion.

So, what we are talking about here is the overall costs of procuring nuclear powered carrier task forces versus conventionally powered carrier task forces. If we override the President and approve the CVN 71 we are committing ourselves to an additional expense of $1 billion for the CVN itself and at least another $1 billion in nuclear escort costs. (and this allows for the procurement of the necessary conventional escorts for the new conventional carrier). If we vote to sustain the veto we are taking a big step toward being able to provide more ships for the Navy at a time when its most pressing problem is numbers. It is clear to me that the only way to provide ships in the numbers needed is to get away from nuclear powered surface ships.

I urge my colleagues to support the President on this crucial issue.

Mr. PRICE. Mr. Speaker, I yield 1 minute to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, like all Americans I deplore the rising cost of defense whether we measure it in today's or yesterday's dollar values and state it as a percentage of the GNP or the Federal budget—and I regret the necessity to keep this Nation armed to the teeth. But I think a strong defense is just that, a necessity.

We are debating today what I consider to be the third devastating blow to our defense posture. Airpower has been altered by canceling the B–1 bomber and delaying the MX missile. Landpower was adversely affected by deciding not to develop the neutron bomb. Seapower is now altered by vetoing the nuclear-powered carrier.

All of this is occurring at a time when I see no lessening of the need to provide a stabilizing influence in many situations throughout the world. The nuclear carrier is one of the least vulnerable and most effective ways to do this.

I cannot support any defense policy which will result in a second-rate Navy for the United States. In my view, if we are going to have a carrier—and that does not seem to be the question here—we ought to have the best one available in terms of cost and capability.

Mr. SPEAKER. Members, from the confusion generated by the debate on this issue, it is no wonder that the American people are divided on defense.

The administration has implied, and Members have said, that the building of this carrier means a $2 billion cut for needed programs elsewhere. The distinguished chairman of the Armed Services Committee and other members have demonstrated that this is simply not so.

As a Member, not serving on the Armed Services Committee, I have tried to judge this issue on the basis of the facts as I perceive them.

There is no persuasive argument that an oil-burning carrier is significantly cheaper than a nuclear-powered carrier (CVN) if we consider R. & D. for the carrier and increasing fuel oil costs.

There is conclusive evidence that the inferiority of the conventional carrier's fighting capability would make the saving dubious.

A nuclear carrier would carry 50 percent more aircraft, almost three times the aviation fuel, and twice the aircraft munitions and double the accessories and would carry heavier armor. And it will steam faster for 13 years without refueling.

It has greater capability to defend itself and to project a U.S. presence in remote corners of the globe without the necessity for uncertain fuel supplies or foreign land-base support.

I think we cannot continue to weaken our defense posture and decrease the flexibility of our military response without dire consequences to ourselves and our allies. Accordingly, I support the effort to override the President's veto.

Mr. PRICE. Mr. Speaker, I yield 1 minute to the gentleman from Florida (Mr. CHAPPELL).

Mr. CHAPPELL. Mr. Speaker, undoubtedly the Soviets want a "no" vote today on this defense authorization bill. They want a "no" vote, because they know perhaps better than we that sea power today is dependent upon air power, and air power is dependent upon the carriers to project it. The only way to get that air power to where it is needed is through the use of the aircraft carrier. That is the reason they are going toward the development and use of the aircraft carrier rather than away from it. The Soviets want a "no" vote, because they know, perhaps better than we that our failure to replace our retiring carriers reduces our carrier air power by one-

thirteenth. They know how vital it is today to us when we cannot get land bases across the world to do the job we have to do. They want a "no" vote, because they know perhaps better than we that we must fight ships with airplanes, not with ships. You fight ships with airplanes.

If we want to retain that power, we will have to override this veto, the objections of the President to the contrary notwithstanding.

Mr. Speaker, the editorial page of this morning's edition of the Washington Post carried a statement by former Chief of Naval Operations, retired Adm. Elmo R. Zumwalt, in which the admiral seemingly applauds the President's decision to delete a fifth nuclear carrier from the fiscal year 1979 budget. Zumwalt comments that "the direct cost of the nuclear carrier is much greater than the fossil-fueled carrier * * *" and goes further, to say that the better choice would have been a fossil-fueled CVV.

Undoubtedly, most of us read the admiral's statement before coming to the House Chamber this morning to vote on the subject of the President's recent veto.

However, I would like to emphasize what I consider to be the most important point about Admiral Zumwalt's position, Mr. Speaker. Even in the article in this morning's Post, the former CNO indicates the crucial need for a carrier in the fiscal year 1979 budget. Certainly, this represents a difference of opinion between Zumwalt and the President.

There is, moreover, another side of the story—as told by the same person. In January of this year, the Center for Strategic and International Studies, at Washington's Georgetown University, published a study entitled "Aircraft Carriers: The Real Choices." The author was John Lehman. Contributing the foreword was former CNO, Adm. Elmo R. Zumwalt. As with the other admirals who have held the Navy's top job, Zumwalt acknowledges the vital need for an effective carrier fleet, and recalls that when he was CNO, he fought hard for 12 to 16 large carriers.

As most of us know, the admiral is a small-carrier advocate, but his professional experience comes to the fore in recognizing the need to defer no longer on our carrier building program.

In fact. Zumwalt emphasized exactly that need in discusions last week with the author of "The Real Choices" study. Specifically, he told John Lehman that if the fiscal year 1979 budget failed to include funding for some kind of carrier, Congress would be best advised to override the President's veto.

Mr. Speaker. the comments written by Admiral Zumwalt in January are, in my belief, the more relevant, and I submit his foreword for the RECORD. I call the attention of my colleagues specifically to the admiral's last paragraph:

Through national indecision we have drifted without a settled building policy for carriers. Their numbers have dwindled to 12 and no new carriers, large or small, has been authorized since 1971. Further indecision cannot fail to bring serious damage.

I hope that we in the Chamber will today help bring an end to that indecision—and proceed with the previously authorized construction of the nuclear carrier we so desperately need.

The article follows:

FOREWORD

In each of the four major international crises that took place during my watch as Chief of Naval Operations—Jordan, September 1970; Indo-Pakistan, December 1971; Mining of Haiphong, May 1972; and the Yom Kippur War, October 1973—carrier aviation was the primary military tool available to the President for the management of the crisis.

Successful crisis management requires the capability to deploy armed strength in timely and sufficient measure in areas of the world where American interests are involved. The objective of such deployments, in concert with diplomatic and other measures, is to influence favorably the actions of one or more states or groups. Such deployment may be coercive, to compel a nation that threatens our interest, or inducive, to encourage, reinforce, or protect an ally under external or internal threat. For a very large area of the world, carrier aviation is easily the most effective means for deploying armed strength, and in many areas, the only means available to a President.

In addition to this role of protecting Western interests and influence and countering the intrusion of hostile interests, carrier aviation must serve also the requirements of deterring full-scale war with the Soviet Union. Here again carrier aviation provides a capability available from no other means of armed force. In the NATO area, it is carrier task groups that provide the essential security of the Scandinavian flank in the North and the Italian-Greek-Turkish flank in the South. In such a war, carrier aviation must also provide the security for the vital energy sources in the Middle East and Persian Gulf, and simultaneously in the Pacific ensure that Japan survives as our ally and the PRC remains hostile to the Soviets.

These two broad requirements for carrier aviation—peacetime presence/crisis management, and deterrence of full-scale war with the Soviet Union—do not necessarily demand the same configuration, numbers or size of our carrier force. That force, of necessity, must be a compromise between the two missions. On my watch I argued for a high-low mix of 12–16 large carriers and more numerous small "sea-control" carriers. Others have advocated different sizes, different numbers, and different aircraft.

John Lehman is uniquely suited to examine this issue with a rare combination of academic credentials, service in the highest levels of national security decision-making, and operational flying experience. In this small book he has reduced the carrier issue to its essential elements. Why do we need them, how many, how big, how vulnerable, and what kind of aircraft. It is an excellent handbook for a serious examination of this issue.

Through national indecision we have drifted without a settled building policy for carriers. Their numbers have dwindled to 12 and no new carrier, large or small, has been authorized since 1971. Further indecision cannot fail to bring serious damage.—Adm. E. R. Zumwalt, Jr. (ret.)

● Mr. WON PAT. Mr. Speaker, as a member of the Armed Services Committee, I strongly urge my colleagues to vote to override the Presidential veto of H.R. 10929, the fiscal year 1979 defense authorization bill.

There is much room for honest disagreement in the calculations and implications of the funding for various portions of this bill. I will leave it to others to debate the validity of these figures.

However, there is one aspect which is not ambiguous to me, and that is the fallacy of the principal reason presented for this veto: that the United States should not construct another large nuclear-powered aircraft carrier.

What is very clear is that a strong Navy is a vital requirement for the defense of our Nation and that our naval force is being allowed to dissipate. Each year more ships are deactivated and long-range plans for replacements are reduced.

The present thrust of the administration is to strengthen our European defense posture. This is certainly vitally important. However, in doing so it is incumbent upon us to make certain, imbalances in our overall force structure do not develop. Unfortunately, this is also happening, to the detriment of our naval forces.

Our national defense commitments are worldwide. Meeting these farflung needs requires a large and capable Navy. We are not meeting this important requirement and present trends would make this bad situation much worse in the near future.

Immediate corrective action is necessary but has not been forthcoming from the administration. The responsibility for correcting this serious deficiency has fallen on Congress and the bill vetoed by the President provides some of the means of doing so. More particularly, the aircraft carrier objected to by the President is one important program which we in the Congress determined should be built to strengthen our Navy.

Personally, I have some reservations about building expensive giant nuclear carriers. They would be vulnerable to nuclear attack. On the other hand, carriers of any size, and all land bases, would also be vulnerable in the event of nuclear war.

As imperfect as a nuclear carrier might be, it is the best system immediately available to meet defense needs which cannot be deferred. The United States no longer has land bases in most of the world. Our only access is by sea and the best naval system is the aircraft carrier. The most capable carrier is the one proposed by Congress.

Defense Department officials have allowed an unacceptable deficiency to develop and do not propose corrective actions. It has fallen to Congress to do this.

These same administration officials object to another nuclear carrier, but do not propose a viable alternative. The best option presented to date is a smaller oil-fueled carrier, as yet undesigned, on which to base aircraft of a type not yet developed, to be constructed at some indefinite future date.

Our naval needs are now and this bill, carefully crafted after many months of intensive study and consideration in Congress, provides the best available means of providing for these needs.

Our defense responsibilities throughout most of the world can not be met by

nebulous concepts which have not even reached the drawing boards.

There are widespread concerns that a preoccupation with improving European land forces are resulting in a further emasculation of our naval forces. I share this fear, and the conviction of most of our colleagues and many military experts that it should not be allowed to happen.

Administration officials contend this is not the case, but the evidence is otherwise. While proposing increased dependence on oil-fueled carriers, plans to construct the large tanker ships that would be necessary have also been deleted from shipbuilding programs.

I would also point out that the very high costs of constructing, operating and protecting these tankers for many years should also be calculated in comparing the relative costs of the two carrier concepts but generally are not. It has been mentioned that this floating fuel lifeline could be provided by civilian ships but the fact is our merchant marine does not have this capability either.

As a resident and congressional representative of Guam, far in the Western Pacific, I am very conscious of the concerns of officials in allied countries of the Far East about U.S. defense intentions. There is correct recognition that a strong capable U.S. Navy is necessary to protect our interests and theirs in the Pacific and Indian oceans and for meeting requirements short of nuclear war in that huge area of the world between Hawaii and Africa. They, and I, not with dismay and fear, the gradual, but continual, diminution of our naval capabilities.

We must not allow a preoccupation with one aspect of our global defense posture cause neglect and imbalance in another equally vital area. The oceans and seas around Europe comprise but a small part of the world. We can not allow our national defense posture to consider only these limited areas.

Further deterioration of our Navy must be halted, and immediately. Instead it must be strengthened, and as quickly as possible. With its imperfections, the nuclear aircraft carrier is the best available means of doing this.

Mr. Speaker, I urge our colleagues to recognize this fact today and vote to override this veto of the fiscal year 1979 defense authorization bill. To not do so would allow continuation of the aimless drift of our defense program, increased imbalances in our global defense posture and serious dangers to our Nation.●

● Mr. LEGGETT. Mr. Speaker, this debate on the future of a nuclear powered aircraft carrier touches some of the most sensitive issues the 95th Congress has to deal with—national defense and Federal spending. I believe we have a rare opportunity to be on the right side of both questions with a single vote—to sustain the President's veto of the ill-advised action to build a nuclear-powered carrier and reduce Federal obligations by $2 billion or more.

The carrier question has been debated up, down and sideways in the press, in committees, in telephone calls, and in the blizzard of dear colleague letters you all have received this week. The bottom line issue comes down to this: If you believe that there is no limit to the amount of money we should spend on armaments, vote to override the veto; if you believe that there is a limit to what we can spend on guns, ships and planes and that the money must be squeezed for every bit of value it has, the nuclear powered carrier is not the best option and the veto should be sustained.

Simply put, a conventionally powered carrier could serve virtually all of the reasonable purposes we have in mind for a carrier just as well as a nuclear-powered one will with fewer personnel, fewer planes, less necessity for resupply, and at substantially lower costs. I would point out that with the heavily documented difficulties the Armed Forces are having retaining trained personnel, and naval officers qualified in nuclear propulsion constitute one of the major problem areas, it is not reasonable to increase our manpower requirements unnecessarily.

I should also point out that for the Navy to buy this ship now is analagous to the two-car family whose cars both require overhauls but who, instead, choose to buy a new Mercedes-Benz. They really cannot afford the new car, and the old cars have been neglected so long that they barely run. Many of our Navy ships are frankly in similar condition to those old cars. It is true that we are on track to fixing our sadly neglected fleet, but it is going to take time and money—money which would be soaked up by this seagoing behemoth.

Many knowledgeable people, both in and out of Congress, have constructive ideas about what the Navy should be doing about new hardware—surface effect ships, VSTOL aircraft, antisubmarine warfare advances, and the like. All these ideas have one common denominator; they all cost a basketload of money. To concentrate so many of our resources in one area leaves many other fields uncovered and, in fact, increase our vulnerability in key areas we ought to be defending. This is just not good policy.

As chairman of the Task Force on National Security and International Affairs of the Budget Committee, I have participated not only in a detailed review of our defense posture, but also in the Budget Committee's deliberations on the economic well-being of our country—itself a major security concern. I and many of my colleagues believe that we just do not have $2 billion to spend on the marginal increase in military might that a new nuclear-powered carrier represents. In fact, a fully equipped nuclear-powered carrier task group could cost up to $11 billion in the long range—a staggering sum by any standard.

No carrier, conventional or nuclear-powered, is going to survive in a major nuclear war for very long. To think otherwise is to ignore the realities of advances in weaponry in 1978. If you doubt this at all, I would simply invite your attention to what has happened to tank warfare in the last 10 years. The same principles which developed one-shot, one-kill weapons for bridges and tanks have, for all practical purposes, doomed the carrier in a major conflict as surely as the carrier, in its turn, doomed the dreadnought battleships of a previous era.

At the time we passed the second concurrent budget resolution I said in my additional views:

> The budget process has been helpful to all of us in understanding our dilemma, but has yet to be very effective in helping us to solve our problems. This is going to have to change, but the motor for change will have to be the will of the Congress.

This is one of the hard choices I had in mind at that time. Does the Congress have the will, even with the President's help, to separate scare rhetoric from statements of the country's true needs and resist the kind of needless spending that this ship represents? I hope so.

None of what I have said is a particularly new or startling revelation. It is all on the record for anyone who chooses to make a serious study of the question. The final link in the chain is to decide, in light of what we know, whether to spend the tremendous amounts of money involved in this question to acquire something we can get for much less; and in that light, a decision to build a nuclear-powered carrier is not supportable with the facts at hand. It is true that emotional arguments and jingoistic judgments could be substituted for rational analysis, and such an expenditure would then be defensible. I do not believe that we should make decisions on those bases. The President has reached a proper conclusion and has acted with the courage of his convictions; it is time for the House to act with equal courage and conviction to sustain the veto.●

● Mr. SEIBERLING. Mr. Speaker, I strongly oppose this motion to override the President's veto.

The American people, I believe, are pleased by the restoration of the constitutional balance on foreign policy issues which has been established in the last several years. They do not want Congress to sit meekly by, deferring without hesitation to Presidential discretion in foreign policy and defense issues. The era of the imperial Presidency is gone, and with it the passive congressional role which enabled the imperial Presidency to lead us into Vietnam and into disaster.

The President's veto is not an attempt to restore the old days. Just as Congress has the right to make changes in the President's budget, so too does the President reserve the right to veto those changes. The issue here is substantive, not constitutional. The substantive issue is whether a nuclear aircraft carrier should be procured in this fiscal year.

The nuclear carrier was not requested by the President and was not planned for by the Navy in its shipbuilding and conversion program for fiscal year 1979. This veto can be sustained—and the carrier removed—without any adverse impact on our national security. But if the veto is overridden, it will cost us dearly in wasted funds, outmoded strategy and less capable military forces.

There is a growing consensus that the future Navy should have larger numbers of small ships rather than smaller numbers of large ships. But the exact shape and missions of this new type of Navy force structure are still being worked out.

Only last year we voted to delete the nuclear carrier in order to give administration planners an opportunity to develop their plan. I see nothing in the international situation which now should cause us to substitute haste for prudence. The 12 carriers we have now are enough to meet any foreseeable contingency.

There is a real likelihood of huge cost overruns with this ship. The previous three *Nimitz*-class carriers have averaged 42 percent cost overrun of their final cost compared to their estimated cost when first budgeted. The *Nimitz* had a cost overrun of 56 percent. The *Eisenhower* had an overrun of 42 percent. The *Vinson*, now being constructed, is at a 37-percent overrun by current estimates. This means a probable cost closer to $3 billion than the present estimate of $2 billion. And all were or will be delivered late. So when we get down to the practicalities of actual ship construction, there have been real problems. Waste in Government should not be tolerated. It should not be tolerated at the welfare office, and it should not be tolerated at the shipyard either.

There are also strategic considerations. As the widespread support for moving toward a Navy of numerous smaller ships rather than fewer large ships has to do with the development of new, precision-guided defense munitions, such as anti-ship cruise missiles, which make the carrier more vulnerable now than several years ago. There is also the development of new missions for the Navy, such as sea control, which require a naval presence over larger areas of the ocean than in previous planning.

In the past, one mission of carriers was to engage in strategic nuclear retaliation against the Soviet Union. However, intercontinental ballistic missiles and intercontinental bombers have rendered this mission obsolete. The same holds for projecting conventional power against the Soviet Union. The Soviet coastline is heavily defended, and the carrier would have to deploy a great deal of its weaponry just to protect itself, leaving a relatively small amount of military force available against Soviet targets. This no longer makes sense, in view of various available alternatives, such as land-based aircraft.

For example, there is the possibility of using land-based air to perform the sea control mission in the North Atlantic. Land-based air, complementing a number of smaller, light ships, could perform this mission without the need of any supercarrier, either nuclear or conventional. There is the possibility of homeporting an additional carrier in Subic Bay or in Japan, which would allow the Navy to maintain its current forward deployment of four carriers, but at a lower overall carrier level.

In the past decade, the carrier's major role has been to project conventional power against Third World countries, such as Vietnam and the Dominican Republic in 1965. As we move away from this type of intervention, we should also reexamine whether we can safely reduce the force structure which grew up around interventionist goals. For example, we could safely reduce our military presence in the Pacific both because our post-Vietnam commitments are fewer and because our relationship with the People's Republic of China no longer requires a "containment" policy in Asia.

Another consideration is the $4.5 billion price tag for the nuclear-powered escorts to accompany the carrier. These escorts cost as much as $1.5 billion each, and three are needed for each nuclear carrier. If the nuclear carrier does not have these nuclear escorts, then much of its alleged superiority is wasted. Escorts for a conventional carrier cost roughly half as much—$760 million for the AEGIS destroyer (DDG–47). Since there is already a shortfall of three nuclear escorts for the already-funded four nuclear carriers in the force, it is not good military policy to rush ahead with another nuclear carrier.

Finally, the nuclear carrier could well be obsolete before it is launched, because of the promising development of vertical short-takeoff and landing (the V/STOL), as well as other technologies which are expected to make it possible to use smaller carriers, if they are needed.

These are the considerations which lead me to support the President's veto on the substantive issue of the carrier.●

● Mr. GOLDWATER. Mr. Speaker, I rise to announce my intention to vote for an override of the President's veto of the Defense Department authorization bill. I am going to follow the recommendation of the House Armed Services Committee, and keep the congressionally mandated bill intact.

I have studied this matter carefully, Mr. Speaker, trying to concur with the President on his objections that proceeding with plans for a nuclear-powered aircraft carrier would "eliminate funds for high priority defense requirements," as he points out in his veto message. In giving the President every benefit of the doubt that his reasoning is sound, I remain unconvinced that a new *Nimitz* carrier is not in the best interest of our national security. My good friend and respected colleague, CHARLES BENNETT of Florida has informed us that the Navy, in accord with the Joint Chiefs of Staff, have given this project top priority for our military operations on the high seas.

The President's alternative proposal that a conventionally powered carrier be constructed instead, disregards the need for a technologically sound addition to our carrier fleet. The nuclear carrier is the most cost effective we could possibly build. It is capable for combat, and safe for its personnel.

There is something else connected with this veto which distresses me. It deals with the clumsy way in which he handled this veto. It deals with the entire defense policy of this administration. It deals with the political motivation of President Carter on a highly sensitive public matter.

All of us are familiar with the misrepresentations and inaccuracies in the President's veto message. It shows the ineptness of the President and his staff in coming to this Congress, exercising the power of veto, and presenting himself in a most unprofessional manner, unbefitting of a President of the United States.

For a number of years we have been carrying out negotiations with the Soviet Union on strategic arms limitation. We have yet to reach a final resolution in these talks, but all the while we have seen this White House compromise our bargaining position by refusing to support the B–1 bomber, backing down on deployment of the neutron bomb, and now this veto of the Navy carrier.

What incenses most about this veto, however, are the political overtones associated with it. We are all aware of the plummeting popularity of this President in the public opinion polls, the widespread criticism of him, because he "is not getting tough." So a special adviser has been brought in to redress the President's image, to get him to take the bull by the horns, wrestle him to the ground, and come out of a good fight flexing his muscles. Mr. Speaker, we are dealing with a weapons system involving billions of dollars for the defense of our country. It is clear to me that the President's action is not only undesirable for our Nation's interest, but does not speak well for the motives and tactics of this administration. I am voting to override this veto, and believe the House will use its good judgment, and prevail in its intention to enact this legislation into law.●

● Mr. BRINKLEY. Mr. Speaker, for the record, it would seem to me that the interest of the country could have been served better by accepting the President's veto in committee. Instead of a head-on clash or confrontation over an issue perceived to be that of an aircraft carrier, we could have at our Armed Services Committee meeting yesterday, made one simple change toward working together with the administration and which would have been an invitation to the administration to take one simple step in working with us. Precedent for this procedure may be found in President Johnson's veto of the military construction bill in 1965 during the 89th Congress, action thereon, and Chairman Rivers' immediate presentation of an alternative bill.

In a new authorization bill, we could have deleted the nuclear carrier and provided for an oil carrier that is less than what we wanted and earlier than the President had wanted, since his wishes are for that authorization to be provided in fiscal year 1980.

That approach would provide for the wisdom and strength from coequal branches of Government flowing to each other as contemplated by the Founding Fathers.

Because I believe in that partnership approach, which is within the boundary of conviction and within the boundary of strong national defense goals, my vote in the Armed Services Committee yesterday was against bringing the veto up for an override attempt today.●

● Mr. WIRTH. Mr. Speaker, I think that the Members of the House should be very exact in their understanding of what this debate is about. We are not discussing the merits of spending either more or less money on defense. The President has not vetoed the defense appropriations bill. He vetoed instead the authorization bill—the bill which determines how these defense funds will be

allocated. By now this should be clear to all of us. The White House and Congress agree on what should be spent. The difference lies in the nature of that spending, and Mr. Speaker, that is a very significant difference indeed.

What then is the President's objection to the allocation arrived at by the Armed Services Committees? The answer is fairly simple: The President contends that the $2 billion allocation for another nuclear-powered aircraft carrier weakens the overall defense capabilities of NATO. Furthermore he claims that the development and construction of this mammoth vessel will directly disadvantage us in one of the most crucial defense areas—research.

And that is exactly what happened. The Armed Service Committees slashed our spending on research and development of new weapons in order to build this carrier. Let me point out that while $200 million buys very little in the way of an aircraft carrier, it buys a great deal of research. Our advantage over the Soviet Union lies in the fact that we have more advanced and sophisticated weapons. That advantage will not remain in effect long if we continue to shortchange the research budget so we can make room for these massive projects.

The President is quite correct in objecting to this threat to our future defense. At present, work is being carried out on a number of highly advanced weapons. These employ sophisticated electronic techniques which we have, but which the Soviets do not. The development of these weapons can go a long way toward redressing the balance of power in Europe. These weapons cannot be delayed just so we can have another nuclear aircraft carrier.

Another area that must be examined is that of the overall position of the Navy in our total defense strategy. At present over 40 percent of our defense spending goes to the Navy. This, despite the fact that in terms of both total tonnage and number of major combatants our Navy is far larger than that of the U.S.S.R. On the other hand, our overall ground and air forces are inferior. Furthermore, the aggregate naval forces of the NATO allies far exceeds the Soviet forces outside Asia.

However, the fact still remains that the West is outnumbered in the other defense areas. Compared to the Warsaw Pact countries we are down by a half in numbers of tanks and heavy artillery. To me this suggests that we should begin to redress the imbalance; to catch up where we are behind; to make sure that we do not put all the eggs in one basket.

Let us take another look at what this aircraft carrier would have done to the allocations:

Army helicopter procurement funds would be cut by 5 percent, even though antitank helicopters are seen as a key to meeting the Soviet armored advantage.

Missile funds for the Army are also cut by 5 percent.

Tracked combat vehicle purchases were reduced by $120 million.

Even Air Force missile funds were slashed by $50 million.

We should also note that these cuts were to occur in a budget $1.5 billion higher than the President originally requested. If this extra money is to be spent there are much better places for it to go.

Here again the President's alternatives show a great deal of merit. In restoring the cuts which armed services made, we would see an increase in the size of our European ammunition depots. As a point of reference, the 1973 Mideast war showed that these depots were too small to sustain a modern conventional war. We would also build shelters for our airfields in order to protect ourselves from a disabling attack. All these plans stand to strengthen our defense position far more than the addition of a new aircraft carrier.

The Armed Services Committee would have us believe that the Navy needs a small number of very large ships. The argument is, I think, very shaky. What we need is a larger number of medium-sized vessels. At present, most of the offensive capability of the Navy is concentrated on the carrier fleet. The other ships cannot attack enemy positions. If the flight deck of a carrier is destroyed by an enemy missile, launched from a surface boat or submarine, then the American task force might as well head for port.

This clearly illustrates that we need to spread our offensive capability around. Eventually the Harpoon missile will be deployed in other surface ships. However, the Navy consigns that to a late eventuality, and it is certainly a low priority when compared to the construction of other carriers.

Priorities clearly must be reversed. For the price of one carrier and its aircraft, we can build 40 missile frigates, equip them with radar controlled guns, antiship, antisubmarine, and antiaircraft missiles. These would be a far better buy, enabling us to deploy our ships in a much wider range at any given moment. It would also provide more flexibility in enabling us to respond to emergency situations with something smaller than a carrier fleet.

Times have changed for the aircraft carrier. Times changed for the battleship between the two World Wars. Because of increasingly sophisticated missiles which can be launched by relatively small, inexpensive ships, the carrier has become more vulnerable. The need for it has also decreased. During WW II land-based aircraft could not patrol the entire Atlantic against submarines. Since then aircraft ranges have increased, and carriers are no longer needed to fill in the "black hole."

By sustaining the President's veto, and moving farther away from our dependency on the carrier we do a number of vital things. We counter any possible Soviet threats, we reduce the vulnerability of the Navy's offensive power, and we help to redress other military imbalances. Good reasons all. The President's veto should stand, and we should have a better authorization bill.●

● Mr. KEMP. Mr. Speaker, I wish to make several remarks in closing.

President Carter has chosen, for the first time since 1843, to veto a defense bill. The President did not veto the bill because of "breaking the budget"—the bill provided for expenditure below that which the President had requested for fiscal year 1979.

The ostensible grounds for the veto was the fact that the Congress included $1.9 billion for a fifth nuclear powered aircraft carrier, the CVN–71 in opposition to the President's expressed wish to fund only a single nonnuclear powered aircraft carrier, the CVV. But it should be remembered that the White House advised the chairman of the Committee on Appropriations during its debate over the defense appropriation bill that it was willing to accept the CVV in the fiscal year 1979 bill, a proposition which, if all other Presidential spending recommendations had been accepted, would have broken the budget

However, as the debate over the details of the proposed new carrier versus the CVN–71 versus the nonnuclear carrier were spelled out on the floor, it became clear that money was not the issue. The administration acknowledges that the cost of the CVV is estimated now to be $1.5 billion—up from $900 million a year ago. The administration further acknowledges that the cost of 13 years of fuel for the CVV—fuel that is included in the capital cost of the CVN—is $300 million, and the cost of storing and delivering that oil to the fleet is an additional $350 million. This calculation, does not include the additional escort vessels required to protect the fleet oilers which would have to deliver the oil to the carrier beyond the modest level required to deliver ammunition and aviation fuel. Thus, it will cost at least $2.15 billion to buy an aircraft carrier, the CVV, which has only two-thirds the number of aircraft of the CVN and hence less ability to protect its carrier task force; would be unable to launch its aircraft twice as often in heavy seas as the CVN, and can carry far less in the way of munitions and aviation fuel reducing the length of time it can operate without replenishment.

The President has suggested that he was opposed to the large carrier because he wanted to buy a greater number of smaller surface ships. We now know this argument to be false now that the President has submitted his shipbuilding plan to the Congress. The Carter administration proposes to cut the Nation's shipbuilding program in half from that proposed by President Ford—from 30 to 15 ships. Deprived of the air protection afforded by the carrier, it is unlikely that any of the new ships will be able to operate in a hostile environment.

Thus, from the evidence the President has provided to the Congress, we can say with confidence that cost was not a factor in the veto of the defense bill, the effectiveness of the nuclear carrier was not an issue since it is both cheaper and more effective than the nonnuclear

carrier, and we know that the President is not proposing to build a greater number of smaller ships in place of the carrier.

One must look beyond the narrow issue of the carrier controversy to perceive what this administration is doing to the American defense posture. To do so, it is useful to review some recent history.

First. Upon taking office, President Carter slashed a total of $32 billion off the 5-year defense program proposed by President Ford and approved by the Congress with the fiscal year 1977 defense budget.

Second. President Carter's proposed fiscal year 1978 defense budget was $8 billion below that proposed by President Ford.

Third. Despite advice to the contrary from our allies, the Department of Energy, the Secretary of Defense, and the Joint Chiefs of Staff, the President deferred indefinitely—a euphemism for "killed" the neutron warhead for the Lance missile.

Fourth. The President blocked the initiation of full-scale development of the MX advanced ICBM in fiscal year 1978, fiscal year 1979, and preliminary budget documents indicate he will do so in fiscal year 1980 as well. This is done despite the manifest threat to land-based U.S. ICBMs which will emerge in the mid-1980s. The earliest the MX could be produced according to Carter spokesman is fiscal year 1987.

Fifth. Despite advice from every responsible element of the national defense bureaucracy, the President has proposed a total ban on nuclear tests despite the fact that the terms of the President's proposal would allow the Soviet Union to continue to conduct nuclear tests without fear of detection, while the United States could not test its nuclear weapons.

Sixth. The President stopped production of the B–1 bomber without so much as a single suggestion to the Soviets that they should restrain in any way, any of their most threatening new strategic systems.

Seventh. President Carter has reversed the SALT policy of the previous administration of insisting on an agreement where Soviet compliance with the terms of an agreement could be verified; the Carter administration is now willing to advance unverifiable proposals at SALT in an effort to win early agreement.

This frightening litany is 2 years of work by Carter administration officials. What emerges from a review of the efforts of the Carter administration is nothing less than a systematic effort of unilateral restraints that will, I think, reduce the ability of the United States to defend itself in the future. To be sure, the Carter administration takes a much more relaxed view of the Soviet military threat than does the Congress, but the administration has never made a presentation of why it does not share the view of either the Congress or the previous administration of the character of the Soviet military threat our forces are supposed to address. Instead, the President has chosen to cut America's defense capability.

The whole of the President's cuts in America's defense capability is, in this instance, greater than the sum of its parts. By simultaneously making cuts in all areas of the American defense posture—strategic and conventional, nuclear and nonnuclear forces, naval forces, and advanced research, coupled with an "Alice-in-Wonderland" arms control posture, the President reveals himself as one who is decoupled from the stark reality of our age, Soviet military power.

The President's veto of the defense authorization bill has crystallized the posture of this administration; it is opposed to maintaining the resolute defense posture earlier Presidents of both political parties have defended, because the group of academic arms control enthusiasts have captured both the President's imagination and the decisionmaking apparatus of the executive branch of Government. It is no accident that no President has vetoed a defense bill for more than a century; it is the first time in modern memory that the individual charged with the constitutional responsibility for initiative in national security matters has been so grossly derilict in his responsibility to the security of the current and future generation of Americans.

The veto of the defense authorization bill provides the Congress with an opportunity to revitalize the American defense posture. Issues held at abeyance in fiscal year 1979 can now be reopened. Programs deferred in the fiscal year 1979 budget can now be reopened. In short, it is now up to the Congress to step in where the President has defaulted on his constitutional responsibilities, and provide for a defense posture that will address the military threat we face. The cumulative effect of the President's defense policy since he assumed office provides the basis for a reconsideration of earlier Presidential decisions in which the Congress has acquiesced.

First, America's strategic nuclear posture demands early attention to mitigate the damage inflicted upon it by several unwise administration decisions. There is no longer any reason to believe that the President has in mind some new "mix" of forces different in significant ways from our current posture to offset the growth in Soviet strategic nuclear power. The President's policy is to stop the development of most major new strategic nuclear programs in the forlorn hope that the Soviets will respond with an unprecedented gesture of altruism, and disarm themselves. The dangerous statistics of the Soviet buildup since January, 1977 dismiss any residual hope of Soviet altruism in strategic arms. Therefore, the United States should take steps to restore a climate of "equal security" with the Soviets which makes arms control negotiations and strategic stability possible.

Full scale development on the MX ICBM should begin at the earliest possible date.

The possibility of an expedient interim system which could be deployed quickly during the period when the MX is being developed, if the IOC—initial operating capability—of MX cannot be advanced of FL 85 or earlier.

Development—and subsequent deployment—of the most capable heavy-payload ICBM we can develop should be included; a common MX/D–5 will not provide sufficient payload and performance characteristics to meet U.S. land-based ICBM requirements against the most plausible Soviet threat in the late 1980's.

Initial low rate B–1 bomber production should be initiated in fiscal year 1979 in conjunction with accelerated development of the cruise missile. In retrospect, Congress erred in acquiescing in the termination of the B–1 production line because the President's SALT posture severely limits the usefulness of cruise missiles without a modern penetrating aircraft and the slowpace of ICBM and SLBM modernization requires the expeditious deployment of the B–1.

Moreover, the cost overruns, delays, and technical risk that has become apparent in a posture which places sole reliance on the cruise missile is simply too much of a gamble.

REOPENING THE ISSUE OF THE ADEQUACY OF THE ADMINISTRATION'S SHIPBUILDING PROGRAM

Second, no less than our strategic nuclear posture, when the Congress considers the defense authorization bill again, it will be appropriate to reopen the issue of the adequacy of the administration's request for naval shipbuilding. When the Defense subcommittee of the Committee on Appropriations took testimony from the Navy, the administration's decision on the drastic cuts in naval shipbuilding were not known. Now that the President has decided to cut new naval shipbuilding in half, this recommendation should be reviewed in detail, and in my view, rejected.

Funds to execute the shipbuilding program which the Congress reviewed in connection with the fiscal year 1977 Defense budget and 5-year defense program should be provided.

The present capability of the U.S. Navy to project American power to the western Pacific, Persian/Arabian Gulf, and eastern Mediterranean are unduly constrained by the limited number of long-endurance aircraft carriers.

In the administration's presentation of its fiscal year 1978 and fiscal year 1979 defense budget requests, it suggested that large-deck aircraft carriers were obsolete, and could be replaced in the 1980's with small vertical/short takeoff and landing (V/STOL) aircraft. This assertion has subsequently been shown to be a sham; high performance V/STOL development has been pushed off into the early years of the next century, a point recognized by the administration when they cut funds in fiscal year 1979 for the development of V/STOL aircraft. Therefore, funds should be provided for the long-leadtime components of a sixth large-deck nuclear-powered aircraft carrier if the Congress should be required to review the fiscal year 1979 authorization bill again. Only with sufficient naval offensive power—provided only by tactical aircraft—can the United States be sure of being able to

stand athwart the Soviet Navy in a future conflict in the Middle East and elsewhere in the world now beyond the reach of American power due to understrength naval forces.

The administration made a host of recommendations for reductions in research and development programs which cut deeply into the ability of the United States to respond to future threats. The Congress accepted many of these recommendations in the expectation that the President would be willing to deploy sufficient forces to meet current threats. Since the President is not disposed to support the deployment of any of the major strategic and naval modernization programs, save the Trident program—even here, he has not yet requested funds for the D–5 missile to be deployed on the Trident II submarine, the Congress must provide for the kind of long term military security the American people insist upon.

In short, the President's veto of the Department of Defense authorization bill has provided an opportunity for a review of the adequacy of the U.S. defense posture to meet our defense requirements. If the President's budget requests were adequate when they were formulated in late 1977—and I do not believe they were—they are certainly inadequate today in light of the new evidence on the character of the Soviet threat.

If the veto is sustained, then I urge the Committee on Armed Services to initiate a brief series of hearings on the character of the Soviet threat, and the adequacy of U.S. strategic and general purpose forces to meet that threat. A new bill could then be reported to the Congress which would provide for a level of budgetary support to our defense objectives that will meet the security needs of this Nation and its allies.●

The SPEAKER. The gentleman from Illinois (Mr. PRICE) has 1 minute remaining.

Mr. PRICE. Mr. Speaker, I yield myself the balance of the time.

Mr. Speaker, let me repeat as I said in my opening statement, I do not believe that a vote to override would cause any permanent difficulties for the President or would weaken him in his dealings in other areas. Many Presidents have had vetoes overridden but have gone on to be effective Presidents, great Presidents, and have gone on to be reelected. But, Mr. Speaker, I do think a vote to override the veto will be a message to the world that the United States is not prepared to let its defense capabilities be reduced and that our potential adversaries cannot afford the misconception of doubting our willingness to meet our national security commitments.

Therefore, Mr. Speaker, I ask for a vote to override the veto.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. The question is, Will the House, on reconsideration, pass the bill, the objections of the President to the contrary notwithstanding?

Under the Constitution, this vote must be determined by the yeas and nays.

The vote was taken by electronic device, and there were—yeas 191, nays 206, not voting 35, as follows:

[Roll No. 730]

| Fary | Miller, Calif. | Wiggins |
| Fraser | Murphy, N.Y. | Young, Alaska |
| Frey | Pettis | Young, Tex. |
| Gibbons | Pressler | |

The Clerk announced the following pairs:

On this vote:

Mr. Fary and Mr. Teague for, with Mr. Ammerman against.

Mr. Krueger and Mr. Shipley for, with Mr. Mikva against.

Mr. Abdnor and Mr. Kasten for, with Mrs. Burke of California against.

Mrs. Pettis and Mr. Young of Alaska for, with Mr. Bellenson against.

Mr. Hansen and Mr. Thone for, with Mr. Lehman against.

Mr. Symms and Mr. Frey for, with Mr. Tsongas against.

Mr. Quillen and Mr. Burke of Florida for, with Mr. Hawkins against.

Mr. Huckaby and Mr. Del Clawson for, with Mr. Erlenborn against.

Until further notice:

Mrs. Heckler with Mr. Miller of California.
Mr. Quie with Mr. Sisk.
Mr. Murphy of New York with Mr. Wiggins.
Mr. Fraser with Mr. Gibbons.
Mr. Duncan of Oregon with Mr. Pressler.

Mr. PATTERSON of California changed his vote from "yea" to "nay."

Mr. COUGHLIN changed his vote from "nay" to "yea."

So, two-thirds not having voted in favor thereof, the veto of the President was sustained, and the bill was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. The message and the bill, together with the accompanying papers, are referred to the Committee on Armed Services.

The Clerk will notify the Senate of the action of the House.

GENERAL LEAVE

Mr. PRICE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just voted on.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

MOTION TO INSTRUCT CONFEREES ON H.R. 12930, TREASURY, POSTAL SERVICE, AND GENERAL GOVERNMENT APPROPRIATION ACT, 1979

Mr. STEED. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 12930) making appropriations for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1979, and for other purposes, with Senate amendments therefor, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

MOTION OFFERED BY MR. BROWN OF OHIO

Mr. BROWN of Ohio. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BROWN of Ohio moves that the managers on the part of the House, at the conference on the disagreeing votes of the two Houses on the bill, H.R. 12930, the "Treasury, Postal Service, and General Government Appropriations, 1979," be instructed to agree to the amendment of the Senate numbered 7.

The SPEAKER. Under the rules, the gentleman from Ohio (Mr. BROWN) is recognized for one hour.

For what purpose does the gentleman from Ohio (Mr. VANIK) rise?

Mr. VANIK. Mr. Speaker, I desire to be heard in oppostion to the motion.

The SPEAKER. The Chair will state that the time is under the control of the gentleman from Ohio (Mr. BROWN).

The gentleman from Ohio (Mr. BROWN) is recognized for one hour.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have offered this motion because of the continuing threat by the administration to impose oil import fees. A prohibition to such an import fee has already been approved by the Senate on a vote of 39 to 49 on a motion to table in the form of an amendment offered by Senator ROBERT DOLE of Kansas to the Senate's version of the Treasury, Postal Service, and general government appropriations bill.

Unfortunately, no similar prohibition was in the House version of that legislation when it passed our body because the threat of the administration to impose import fees did not at that time appear to exist. Thus, the only way the House can assure that the President does not unilaterally exercise the authority he has under section 232 of the Trade Expansion Act of 1962 to impose import fees on oil is to instruct its conferees on this issue.

Mr. Speaker, as the Members know, I found the President's original energy proposal totally unsatisfactory, because his proposal failed to adequately encourage domestic energy production to replace and force out of our domestic use expensive foreign oil.

While the President proposes the so-called crude oil equalization tax to encourage domestic conservation by bringing prices to consumers of domestically produced and federally price-controlled energy up to world price levels, I have supported gradual removal of all Federal price controls on energy so that the same price increase to consumers that encourages conservation will also encourage more domestically produced energy.

In light of proposition 13, COET (the crude oil equalization tax) is politically dead and will not be adopted by the energy conference. Somehow, the administration does not understand this and believes that it can coerce the conferees into adopting COET by the threat of imposing the $5 import fee if COET is not adopted.

This persistent threat that the administration may undertake an even more illogical tax approach to punish American consumers into conservation is, I think, incredible. I do not think such action should be taken, and in no case should it be taken without Congress having a chance to vote on it.

The imposition of a $5 import fee on crude oil would be nothing short of disastrous and it would have almost no effect on decreasing our import levels.

Using the Department of Energy's own models, it is estimated that a $5 import fee would decrease oil imports by only 200,000 to 300,000 barrels of oil per day. And, unlike decontrol, which would provide incentives to produce additional domestic oil, no additional domestic oil will be produced as a result of import fees.

Several studies have indicated that the import fee will cost U.S. consumers $3 billion per year, or 0.3 percent in inflation increase for every $1 of import fees. And if we look at the $5 import fee per barrel proposed, that would amount to $15 billion.

This $15 billion would result in the same economic impact as the social security tax which this Congress passed last December. My motion to instruct conferees gives the House a chance to vote against such a new tax.

In addition, the Congressional Budget Office says "imposition of a crude oil import fee would have no more than a minor effect on the U.S. balance of payments."

CBO also estimates that unemployment would rise by as much as 400,000 jobs if the $5 import fee were imposed.

Perhaps, more significantly, if the administration imposes a $5 import fee on oil, it will be a clear signal to the OPEC cartel that the American economy is willing and able to bear the additional costs of imported oil. Try to put yourself in the position of an OPEC oil minister who sees the U.S. Government asking its consumers to pay $5 a barrel more than he is getting for his OPEC oil. Logically, the OPEC countries will ask: "Why should the U.S. Treasury be getting an extra $12 to $15 billion a year, when the money could go to our own treasuries?"

Do we really want to show OPEC that the American system is capable of getting along with a price hike of $5 more per barrel that would go to our Treasury but not to encourage the production of oil?

Finally, imposition of such fees would have a severe regional economic impact on the Northeastern United States, where in effect there are no energy alternatives to the importation of oil. The result will be that they will experience the most severe impact, although the impact will be spread across the rest of the country as well because of the entitlements program that spreads the cost of higher priced imported oil throughout the country.

Therefore, Mr. Speaker, I urge you and the rest of my colleagues to support this motion to instruct the conferees to accept the Dole amendment to prohibit the import fees. It is an important vote for the consumers of the United States, and I think an important vote on our future as a society.

Mr. LATTA. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to my colleague from Ohio for the purpose of debate only.

Mr. LATTA. Mr. Speaker, I want to congratulate the gentleman for bringing this to the attention of the House, and for his motion to instruct these conferees.

In terms of gallonage cost to the average motorists, how much are we talking about?

Mr. BROWN of Ohio. The $5 per barrel import fee probably equates to about 5 cents per gallon of gasoline, so that in effect what we are doing is putting a tax on the workingman to drive to work every day by imposing this $5 a barrel import fee if the President chooses to do that, and he said he would if we do not pass COET.

Mr. LATTA. I think this is most important, that the American people know what this Congress is about to do, or not do, because they do not relate to a $5 increase in the cost of a barrel of oil but they do relate to a 5-cent increase in their gasoline at the pump. I do not think many Members of this Congress want to go home just before election and say that they voted against the gentleman's motion to instruct the conferees to save the 5 cents on a gallon of gasoline.

Mr. BROWN of Ohio. Let me just say to the gentleman that in addition it would have the impact of the same total cost to the workingman as the social security tax increase that the Congress passed last December. Many of us who did not vote for that social security tax

increase now find that we are sustained by Secretary of the Treasury Blumenthal and Mr. Miller of the Federal Reserve, with the suggestion that that tax ought to be repealed. To add another $15 billion onto the taxpayer, it seems to me, makes a little bit of a mockery of what we did not very long ago in this body by reducing taxes.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Arizona.

Mr. RHODES. Mr. Speaker, I congratulate the gentleman from Ohio on his initiative in offering this motion, and I hope the motion will be adopted. It seems to me that what the gentleman from Ohio is doing is trying to keep the administration from compounding the error which the administration made in submitting the energy proposal to begin with.

The crownpiece, the centerpiece of the energy proposal was COET, and the Congress of the United States has not seen fit—and it will not see fit—to enact COET. So, it seems to me that what the gentleman from Ohio is doing is quite proper, in that he is telling the administration that they must not impose under another law a tax which the Congress will not allow them to impose under the energy plan.

I think the effects of the two taxes would be quite similar. Each one of them would signal to the OPEC countries the fact that—although it is not a fact, but it would indicate the fact that the economy of the United States could get along with a higher price of imported oil. Of course, if we were to have a higher price of imported oil it would be inflationary. If there was to be a tax which would be imposed on imported oil, it would be inflationary. It would increase the cost of living to everybody, and actually it would be exactly the wrong thing to do at this particular time.

Mr. Speaker, I hope the gentleman's motion is agreed to.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Louisiana (Mr. MOORE).

Mr. MOORE. Mr. Speaker, I too would like to praise the gentleman from Ohio for offering this motion. I rise in very strong support of it.

It seems to me when we consider the anticipated action of putting an import fee on imported oil, we have to ask the question: Why is this being done? It is coming at a time when we already have rising inflation, and obviously when we artificially raise the price of something and we get no more of it for that price, we are bringing on inflation. As has just been pointed out by the distinguished minority leader, we are probably going to be facing an OPEC increase in price because of the decrease in the value of the dollar and because we get an increase in price this time of every year anyway. We are going to be inflicting a Government-imposed increase in price on a basic commodity which everybody in this country uses and we will be forcing that on the people for no particular benefit.

So we ask the question: Why would the administration do this? They do it in the name of conservation. Their whole energy policy is based on no growth, no more energy, no more expansion of the economy, but conserving what we have even if it hurts the workingman, even if it hurts the retired people, and even if it means there will be no more new jobs. Do not use any more energy. That is a no growth, shortsighted energy policy.

What the President is saying is: "I am going to raise the price of oil by imposing import fees until it hurts people to use it." The fallacy of that is that the people have to use it. They will have to drive to work and they will have to heat their homes.

The inconsistency is that not only would we get no more increased conservation for this increased price, but the people of this country would get nothing more for their money except one more increase in taxes at a time when we ought to be getting the economy rolling and putting more money into the pockets of our people by cutting taxes.

Even if we just decontrol, as the gentleman from Ohio (Mr. BROWN) pointed out on this House floor, even if we decontrol our price of gas and oil, there would be an increase in cost but for that increase the people would get more oil, more jobs and more of an economic stimulus.

So the question is do we want to choose the route of hurting the people and putting more money in the tax coffers or do we want to solve the energy crisis?

So when we ask the question, why is the administration doing this, we have the answer that the administration is wrong, and only this motion to instruct the conferees on this amendment would prevent this wrong solution.

Mr. BROWN of Ohio. Mr. Speaker, I yield to the gentleman from New York (Mr. KEMP), who is well known for his efforts in this field.

Mr. KEMP. Mr. Speaker, I appreciate the gentleman yielding.

I also support the Dole amendment, and I believe, as the gentleman from Ohio has pointed out and as my friend, the gentleman from Louisiana has, that this effort to impose here a crude oil equalization tax or import fee is nothing but an attempt by the administration to hold down consumption at the expense of production, which is what the gentleman pointed out earlier.

What we ought to be doing is encouraging production of new energy, encouraging economic growth. The equalization tax and the import quotas are anticonsumer and antigrowth and predicated upon the idea that there is a fixed or finite supply of energy in our country and that what we ought to be doing is slowing down the use of it and ultimately rationing as a result of the policies such as this, and that it is basically Malthusian, to the extent that our population has outgrown the resources, so the only thing is to hold down the use of those resources rather than to encourage production of new resources, of alternate resources, as well as to stimulate production.

I appreciate what the gentleman has done. I will strongly support the amendment.

I also agree with his analogy between this approach and that used by the administration and some of our friends to try to help social security by raising taxes on payrolls. The idea that we can help employment by raising taxes on employment is absolutely fallacious and counterproductive, and the idea that we can encourage new sources of energy by raising taxes is not only counterrational but also counterproductive. I am sure the House will support the motion to instruct the conferees.

Mr. BROWN of Ohio. Mr. Speaker, I yield to the gentleman from Ohio (Mr. VANIK), for the purpose of debate only.

Mr. VANIK. Mr. Speaker, I want to thank my colleague, the gentleman from Ohio (Mr. BROWN) for yielding although I wish to rise in opposition to this motion which has been made by our distingushed colleague, the gentleman from Ohio (Mr. BROWN).

I want to point out, Mr. Speaker, that this issue is something that should be debated in the Committee on Ways and Means where we could have an orderly discussion as to where this action can take us.

To take this quick, preemptory action on the floor right now treads on the likelihood of disaster. This issue is something that should have been debated thoroughly in the energy bill but it certainly should not be done quickly and rashly on the floor of this House.

Do you know what could happen today if we would adopt this motion? The dollar could go through its most serious plunge in all of the recent months.

The President went to Bonn, Germany, in order to preserve world confidence in the dollar. He had to promise we were going to do something about energy. He had to suggest that the American people intend to do something about our escalating consumption of energy. It was because of his statements in Bonn that the dollar continues today to be on probation. The dollar is on probation with all of our trading partners in the world.

If you want to eliminate the dollar today as the trading currency for the purchase of oil, then this action will do it.

This is a very dangerous thing to be considering in this Chamber on a short debate in which all of the time is controlled by those who are offering the motion. I want to thank my colleague, the gentleman from Ohio (Mr. BROWN) for giving me the opportunity to oppose it. But I say to you that the dollar is in terrible peril. It is humiliated in the world markets today. It is losing its value, and if this action is taken today, it would indicate that the President has no power to deal with the oil import issue. I think we are heading for serious trouble indeed.

I want to point out one other thing. The President has not exercised this power. He said he would, or that he might, but there are other things he can do with this power. For example, with the powers he has under this section

of the law, he can pick and choose among those countries from whom we purchase oil. I would hope that, in his good judgment, he would decide that the oil purchases should be made from those OPEC, oil producing countries which have favorable trade balances with the United States. We should buy oil from those countries who buy from us.

Today we are losing fiscal credibility as a nation. We are suffering a depleting credibility of the dollar as a currency because we are paying $50 billion for foreign oil. The countries from whom we buy this oil are making their purchases in other countries, in third countries. This is a most serious and solemn action.

I would urge my colleagues to study the effect of the proposal of the gentleman from Ohio (Mr. BROWN) with deep care. It is indeed something that should be pondered over. After proper deliberation, we might come to this decision. But let us do it in an orderly process by having this debate take place in the Committee on Ways and Means. Let the evidence be presented as to what the effect their action will have on the American people and on the American dollar. If we rashly adopt the proposal that is made by my distinguished colleague, the gentleman from Ohio (Mr. BROWN), we are exposing our Nation to a dangerous risk. I certainly hope the motion is defeated.

Mr. BROWN of Ohio. Mr. Speaker, may I say to the gentleman from Ohio (Mr. VANIK), my friend and colleague, who takes the position that this should be done in the Committee on Ways and Means at this juncture, that if I really thought it would be done before the end of this Congress, I might be more sympathetic to his viewpoint. But this is the only vehicle we have for doing this. This is done for only 1 year because it is done for only as long as the appropriation calls for, so it lasts for fiscal year 1979.

Let me make one further point, if I may. The very day that the President returned from Bonn, the leadership took off this floor the bill to which the gentleman from Texas (Mr. WRIGHT) was going to offer an amendment to allow the price of deep stripper oil to go up, to try to accomplish in a domestic production way what the President of the United States said he was going to do when he was in Bonn.

In other words, he would let the price of domestic oil start edging up so it would get up there by 1980. The Congress will have the opportunity in May of 1979 to say to the administration that we will not extend the EPCA legislation which keeps the price level lid on old oil. That will accomplish what the President wants to do by 1980, and I will support him in that effort. However, for now, I do not think it is desirable to do it by a tax method because if we do it through the tax method, it does not do anything to encourage domestic production, and we do not force out any foreign oil. What we do is add to the cost without producing one more drop of oil.

Mr. JOHN T. MYERS. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Indiana.

Mr. JOHN T. MYERS. Mr. Speaker, I thank the gentleman for yielding.

In the event the gentleman's motion does fail today and the President should impose these taxes, what could we expect the consumers' oil bills, heating bills, and gasoline bills would be? How much would they go up?

Mr. BROWN of Ohio. Mr. Speaker, I say to the gentleman from Indiana that the Congressional Budget Office estimates that the average home heating bill in Boston—I do not happen to have the figure for Indiana——

Mr. JOHN T. MYERS. It would be similar for Boston, I assume.

Mr. BROWN of Ohio. The average home heating bill in Boston would increase from $122 to $231 per year.

Mr. JOHN T. MYERS. Per year?

Mr. BROWN of Ohio. Per year, on the basis of a $5 a barrel import fee increase. That is a pretty impressive increase.

Mr. JOHN T. MYERS. That is heating bills only?

Mr. BROWN of Ohio. That is the heating bill. It is not the gasoline bill. It is just heating the home.

Mr. JOHN T. MYERS. I congratulate the gentleman from Ohio for his motion to help prevent an unnecessary increase to utility, oil, and heating bills for the poor people of this country.

Mr. BROWN of Ohio. Just let me suggest one other bit of information. I used the conservative figure in my former remarks of three-tenths of 1 percent inflation for each dollar. That comes out to a 1½-percent increase in inflation if this tax is imposed by the President. That is what we are trying to prevent. That is the CBO estimate. The Congressional Research Service estimates that it would be 2.6 percent, if we impose the $5 import fee per barrel, of additional inflation.

Mr. JOHN T. MYERS. Mr. Speaker, I thank the gentleman for his figures. I hope everyone will vote for the motion.

Mr. BROWN of Ohio. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. STOCKMAN), for purposes of debate only.

Mr. STOCKMAN. Mr. Speaker, the gentleman has brought up a very important point.

It seems to me that we spent the entire summer in a big battle in the House and Senate over the east coast entitlements, which are a measure of relief that east coast petroleum users are seeking.

It seems to me that if this import fee is adopted, it will force the situation to the point where that entire entitlement they are getting now in the proposed increase will be entirely wiped out, and the effort made over the last couple of months by those who represent east coast constituencies will be completely nullified. The reason for it is simply that there is so much spare capacity in the Caribbean and in western European refineries today that we are getting foreign products into this country for the same price as that at which the products are being produced by our domestic refiners, as a result of which the oil cost is $2 or $3 a barrel lower. If we raise the price on our domestic refiners by $5 for the oil they import, we are going to create a situation in which our domestic refiners cannot compete, or else we will have to impose a fee on other products as well as a crude oil import fee. That fee would have to be about $2 a barrel to keep everything even and not to give an advantage to foreign refineries.

If we do that, the $2 a barrel wipes out everything which those Members from the east coast have been trying to achieve over the last year by way of entitlement improvement for their residual and other products.

I might also say that I listened to the gentleman from Ohio very carefully. He was talking about the dollar and how it is essential for the dollar to take this action.

It seems to me that one of the worst pieces of mythology we have going today is that our crude oil imports are causing the dollar to decline and that there is a primary source of the monetary difficulty and the balance-of-payments difficulty we have. That cannot be true. If oil imports, per se, had a direct effect on the balance of payments and on the exchange value of the dollar, then we should be in clover today because the U.S. economy is less dependent on imported oil and has less of an imported oil burden than any other major industrial economy in the Western world.

It is less of a burden on our economy. We import 24 percent of our energy. West Germany imports 50 percent of their energy. Japan imports 70 percent of their energy. Our import bill only amounts to 2.3 percent of our GNP. In Japan it is almost four percent almost twice as large a burden on their economy. That is where their balance of payments is today.

The oil import is not the basic cause of our dollar problem. The basic cause is that our inflation rate is going up and theirs is going down, and the international currency markets are merely reflecting that by discounting the value of the dollar. If we want to rescue the dollar, and I share that goal wholeheartedly with the gentleman from Ohio, then let us get our domestic inflation rate under control, bring it back into line with what they have in Japan and West Germany. Then I think we could do something about the dollar. But if we impose an import fee, we are going to exacerbate our inflation problem and are going to make our dollar problem worse.

Mr. VANIK. Mr. Speaker, will the gentleman yield for just a moment?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio.

Mr. VANIK. I thank the gentleman for yielding.

I would like to say in response to that that I have not heard a careful response to the effect of this action on the dollar. Suppose we have to buy the oil with Swiss francs? Suppose we have to buy the oil with Japanese yen or German marks? Suppose another currency is selected? That is immediately going to increase the cost of oil imported into the United States by 8 to 10 percent.

I want to point out to the gentleman from Michigan (Mr. STOCKMAN) that our trade deficit does indeed result from our

oil import purchases. I want to refer to the gentleman a statement I placed in the CONGRESSIONAL RECORD on July 17 of this year, a complete report of the trade imbalance which indicates that imported oil is the culprit. In manufacturing goods, for example, we have a balance with many nations. We buy a great deal—but we sell almost as much. It is the $50 billion purchase of foreign oil which has taken the dollar down, and if this legislation is enacted, it will be a warning to all of our trading partners and to the OPEC nations that the President does not have the power to deal with the crumbling dollar. If we want to let the dollar plummet to hell, this is the way to do it.

Mr. GREEN. Mr. Speaker, will the gentleman yield?

Mr. STOCKMAN. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. If I could yield to the other gentlemen who have been waiting, then I will come back to the gentleman from Michigan (Mr. STOCKMAN). I yield to the gentleman from New York for purposes of debate only.

Mr. GREEN. I would like to ask the gentleman in the well a question. It appeared to me that, at the time of the OPEC oil price increases in 1973, those price increases were felt with the greatest severity in the northeastern section of the country because of the fact that the Northeast is much more dependent on imported oil from the OPEC countries than are other parts of the Nation. If we have an increase on the scale of $5 a barrel on imported oil imposed by the President, is it not reasonable to expect that that increase, too, although it is going to hurt the country as a whole, is going to fall with particular severity on the Northeast just as did the oil price increase in 1973?

Mr. BROWN of Ohio. The gentleman from New York is perceptive as he always is. That is exactly correct. It will fall on the Northeast to the greatest extent possible. But as he has noted, because of the entitlements burden, it will be spread also all over the rest of the country, but not quite as severely. So I have to say that maybe my 5-cent figure for gasoline is appropriate somewhere about the Pennsylvania-Ohio border. Maybe it is a little less—4 cents a gallon out in Indiana or Illinois, but it may be up as high as 6 cents or 7 cents in New England.

Mr. GREEN. I thank the gentleman. It seems to me very clear that the Northeast should not be held hostage by the President in his vain effort to get the wellhead tax approved. I, therefore, intend to support the motion of the gentleman in the well.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Massachusetts for purposes of debate only.

Mr. CONTE. Mr. Speaker, I want to take this opportunity to commend the gentleman in the well (Mr. BROWN of Ohio). I join with him in supporting his motion now before the House, a motion aimed at prohibiting the President from imposing oil import fees on oil. It is needed to insure that this administration does not take a step which would cause widespread harm throughout the country, and particularly in the Northeast.

By adopting this motion, the House would be instructing its conferees on the Treasury and Post Office appropriations bill, H.R. 12930, to follow the Senate passed Dole amendment. Under the provisions of the Dole amendment, the President is precluded from using appropriations included in this bill for the purpose of implementing oil import fees.

Mr. Speaker, the President has not yet stated that he will be imposing oil tariffs on the country. Yet top officials in the administration have sounded warnings that an import fee might be thrust on the American public if certain portions of the President's energy program are not passed by the Congress. Energy Secretary James Schlesinger has made this threat, as has Treasury Secretary Michael Blumenthal.

These administration officials may be well intentioned in declaring that the President would resort to oil import fees if necessary, but I say that these threats approach blackmail for those of us who come from oil dependent regions. For oil import fees would not be evenly applied throughout the country. Rather, they would strike most harshly at those consumers who are unfortunate enough to live in areas where oil is the dominant energy source.

In this country oil comprises 47 percent of our energy needs. But in my own region, New England, we are 80 percent dependent on oil. Of that amount, we import 79 percent of our petroleum supplies, leaving New England 63 percent dependent on imported oil. This is a staggering figure, especially when one considers that the country as a whole imports only 18 percent of its petroleum supplies.

These figures show why New England would be so unfairly discriminated against if the President resorted to an oil tariff. By imposing a fee of $3 to $5 on each barrel of imported oil, the cost to consumers in the Northeast would be astronomical. As a matter of fact, in a study prepared by the New England Economic Research Office in April of this year, it was conservatively figured that such a tariff would cost New England more than $2.6 billion over a 5-year period.

The Economic Research Office based its figures on asumptions widely made in the administration, that if an import fee were imposed, it would amount to $1.50 in the first year, $3 in the second year, and $5 during the third year and thereafter. Even with the benefit of the entitlements program to spread the cost of the fee over all barrels of domestic oil consumption, New England would suffer the burden of $188 million in fees the first year, $417 million in the second, and $667 million in the third year.

Mr. Speaker, I submit that the whole notion of oil import fees must be rejected as arbitrary and inequitable. I agree with the President that our country's energy situation is serious and demands action. But actions that are taken must balance the costs so that one region of the country is not sacrificed in the process.

For these reasons, I strongly support the motion offered by the gentleman from Ohio. He has correctly seen the economic devastation which could be caused through the President's imposition of an oil tariff, and along with the Senator from Kansas, has taken a leadership role in opposing the tariff. I congratulate him for this effort, and I urge my colleagues to support the gentleman's motion.

Mr. BROWN of Ohio. Mr. Speaker, I appreciate that, particularly from a member of the Committee on Appropriations and I would like to say to the gentleman from Massachusetts that it is through the courtesy of the gentleman from Ohio (Mr. MILLER) and friends of the gentleman on that committee, the ranking member of the Subcommittee on Postal Service of the Committee on Appropriations, that I had this opportunity to make this instruction effort today.

I appreciate the support of those members on the Committee on Appropriations who share my views.

Mr. CONTE. Mr. Speaker, if the gentleman will yield further, I also commend the gentleman from Ohio (Mr. MILLER) for giving us this opportunity.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I am happy to yield for purposes of debate to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, the gentleman from Ohio (Mr. BROWN) made reference earlier to an effort which he and I both support to try to encourage more production from the deep stripper wells in this country. He and I both want to maximize the life expectancy of those wells as one means of increasing our domestic supply. I think that is a very valid goal to pursue; but I believe the gentleman errs when he feels that in order to achieve that goal we must tie the President's hands and remove from him the last resort that current trade law permits him in the event that the Congress should fail to act to provide the energy supplies necessary for this country.

I believe there is a fundamental mistake in the apprehension of the gentleman from Massachusetts (Mr. CONTE) who refers to imposition of import fees as a Presidential proposal. The President has not said that he intends to do this. He has indicated very clearly that he hopes not to have to do it; that he does not want to do it. None of us want to see import fees established. That is not the question. The question is whether we strip from the President of the United States the one remaining recourse that he would have to deal with this critical international problem in the event the Congress of the United States should fail to act.

I was appalled when the gentleman from Michigan earlier suggested that it was not really a very big problem that

we are importing all this oil. He seems to feel that it has little to do with the real problems of this country.

Not a big problem? Let us just stop and realize from the standpoint of the growth of imports and our shameful reliance on foreign sources over only the past 4 or 5 years. We shall see clearly how big a problem it truly is. In 1973 when the Arab oil embargo should have shocked us out of our lethargy and into action, this country imported $7 billion worth of foreign petroleum. We thought that was pretty bad, $7 billion. Four years later, last year in 1977, we imported $45 billion worth of foreign petroleum, more than six times the dollar drain. This year the figure is expected to exceed $50 billion. The financial hemorrhaging has multiplied sevenfold in the 5 short years!

Now, when we stack that $45 billion import figure of last year up against the $26 billion deficit in our balance of payments, does it not become crystal clear that had it not been for our increasing reliance on foreign oil, we would have had a very healthy trade surplus and the value of the dollar would have continued to rise and not fall on world markets?

The gentleman from Michigan suggested further that really what we need to do is to get inflation under control. Get inflation under control when he blanches not at the fact that we are importing $50 billion worth of oil this year from foreign sources? How can the gentleman say those two in the same breath?

Obviously, one of the principal causes for the inflation and the decline in the value of the dollar abroad, brought about by our import of foreign oil, is the high cost of foreign petroleum. One of the principal causes for the domestic inflation is the cost of all those things whose production is affected by the cost of that expensive foreign oil. And when the dollar declines in value on world markets, it makes us pay more dollars for everything we import. That, too, increases the cost of living for every American.

Surely, the gentleman realizes that the Dole amendment—and it is a nongermane amendment by House standards—when offered on the floor of the Senate, was clearly offered in an effort to embarrass the President and to weaken his leadership. That is the one thing we cannot afford to do at this critical point in world history.

In the last year I have not met a single visiting leader from any foreign country who did not, among the first three questions that arose—and usually it was the first question—ask this question: "What are you going to do about energy?"

If this Congress fails to produce a comprehensive energy bill this year and also strips the President of his only recourse, we shall be saying to the world that we lack the self-discipline, we lack the will, and we lack the ability to come to grips with this, our most central economic problem. I think that question lurks hauntingly in the minds of many people throughout this world today.

Shall we say to them today that we do not have any confidence in our President? Shall we say to them by our action today that we want to weaken the President? Shall we say to the world: No, we have not produced an energy bill, although we have labored over it for 2 full years, and we will not let the President retain even the minimal authority he possesses under present law to cope with the level of imports?

If we do this, then we shall be saying to the world that we simply do not care, that we are content to keep coasting along, fat, dumb, and happy, until we spend ourselves poor on foreign oil and waste it and run out of it, and then we shall just depend upon Divine Providence to protect us.

Mr. Speaker, I do not think that is what we want to say. I do not think that is the message we want to give to the world, and I hope my colleagues will by all means vote against this pernicious motion.

Mr. BROWN of Ohio. Mr. Speaker, the gentleman from Texas (Mr. WRIGHT) has been very eloquent, and I admire his eloquence. I must say, however, that he is somewhat inaccurate in part of what he has had to say, and I refer to the statement that this is the only choice the President has had.

The President has had the authority under the EPCA legislation to raise the price of domestic oil if he wishes, which would encourage the production of oil in the United States as the producers reinvest the additional money received in the exploration and development of new wells.

Under the controls that were put on by this Congress a few years ago, our production of oil in the United States has gone steadily downward. The President can take other steps, as I am sure the gentleman from Texas (Mr. WRIGHT) knows, if he would, and the Secretary of Energy could take other steps if he would. They have from time to time promised that they would be happy to support such a price increase if the industry would support COET taxes.

I do not think it is up to the President to make that decision. That decision has to be made in the Congress, and I for one will not support taxes as a means of trying to solve our energy problem or as a means of conservation or production of oil.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. STEED. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I will yield to the gentleman from Ohio (Mr. SEIBERLING) briefly, and then I will yield to the distingiushed chairman of the subcommittee, the gentleman from Oklahoma (Mr. STEED), under whose leadership this bill was brought to the floor.

Mr. SEIBERLING. Mr. Speaker, I distinctly recall that when President Ford imposed an oil import tariff, I did not hear any great outcry from the minority side of the aisle. So I just wondered what has changed that has caused the gentleman from Ohio (Mr. BROWN) and his associates to become such strong opponents of such a tax. Is it because there is a different occupant of the White House? Is it because the oil companies prefer an end to controls on domestic oil prices, which will swell their profits, instead of a tariff, which will only help reduce the Federal deficit?

Mr. BROWN of Ohio. Mr. Speaker, I will be glad to try to explain to the gentleman what has changed, if I may.

First, President Ford put a $1-a-barrel tax on, and he put it on immediately or soon after—in fact it followed quite closely—the OPEC nations price increases, so it was unlikely that it would encourage price increases.

In addition, the previous vote on import fees occurred in February 1975, less than a year after the Arab oil embargo ended. The worldwide petroleum and economic picture was different at that time than it is today. In 1975 the United States was in a recession, and the oil supply picture was tenuous at best. Now the United States does not have the same recessionary problem, and there is a glut of oil supply on the world market.

Mr. STEED. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the chairman of the subcommittee.

Mr. STEED. Mr. Speaker, one of the reasons I asked for recognition as chairman of the subcommittee is, of course, because we are always faced with charges by legislative committees that we invade their province. This Senate amendment is, of course, an out-and-out invasion of the prerogatives of the Committee on Ways and Means, and for that reason I oppose this motion to instruct the House conferees to adopt the Senate action.

In addition, let me say that I also know that it is dangerous to instruct us now and to tie our hands to some extent when we go to weigh the issues with the other body, because we have several other very difficult Senate amendments to deal with in this bill. I would like to go to conference as freely as I can to represent the House.

I would like to say also—and I think I can speak for our subcommittee—that the fact that the House does not instruct us today does not mean that the Dole amendment will not have its full day in court in the conference that we will have with the other body.

At this point, Mr. Speaker, in order to keep the administration's position clear on this issue, I am inserting the following letter which was delivered to me today from the Secretary of the Treasury, Mr. Blumenthal, which reiterates the statements already made by the majority leader, and spells out the administration's position clearly on this issue:

THE SECRETARY OF THE TREASURY,
*Washington, D.C., September 7, 1978.*

Hon. TOM STEED,
*Chairman, Subcommittee on Treasury, Postal Service, General Government, House Committee on Appropriations, Washington, D.C.*

DEAR MR. CHAIRMAN: The Senate by floor action has added to the Appropriations Bill for the Treasury Department and other agencies (H.R. 12930) an amendment (the so-called "Dole Amendment") purporting to withdraw funding under these appropriations to carry out a program adjusting imports of petroleum or petroleum products under the Trade Expansion Act of 1962.

We are writing to express the strong opposition of the Administration to this amendment.

The Trade Expansion Act authorizes the President to adjust imports that threaten to

impair the national security. The Congress has recognized in legislation for many years that the country needs this capacity for prompt action in the event such a threat arises.

The Senate amendment would remove the capacity for prompt action with respect to petroleum imports. This would be a dangerous step, creating international doubts about our willingness and ability to act swiftly when our security interests are challenged.

Our allies and adversaries alike are well aware that we now import almost one half of our petroleum needs. In the 1973 oil embargo, it became clear that access to those supplies can be manipulated in an attempt to influence our foreign policy. More recently, our oil import bill has contributed to large trade deficits that have impaired the stability of the international monetary and trading systems and of the U.S. leadership role in world economic affairs.

Proponents of the Senate amendment say that they oppose Presidential adjustment of oil imports at the present time. But that is not the issue. At the Economic Summit in Bonn, the President made clear that he himself has not yet made any decision about the advisability of adjusting oil imports. And no such decision would ever be made without thorough consultations with the Congress and the most sober assessment of the national security considerations. The real issue raised by the Senate amendment is whether now to preclude the nation from taking prompt action under the standards of the Trade Expansion Act to adjust oil imports, regardless of national security threats that may arise. Constraining the nation's options in this fashion would expose our economy, our military posture, and our foreign policy to a new and unnecessary risk.

Simple prudence counsels that the nation retain the capacity for swift action to meet national security risks that may develop.

The Senate amendment is misguided in its aims and contrary to the national interest. We strongly urge you to make every effort to delete the amendment in Conference.

Sincerely,

W. MICHAEL BLUMENTHAL.

Mr. MAHON. Mr. Speaker, will the gentleman yield

Mr. BROWN of Ohio. Mr. Speaker, I yield for the purpose of debate only to the gentleman from Texas (Mr. MAHON), the distinguished chairman of the Committee on Appropriations.

Mr. MAHON. Mr. Speaker, I want to associate myself with the remarks of the gentleman from Oklahoma (Mr. STEED). In addition, I want to say to my friend, the gentleman from Ohio (Mr. BROWN), who has devoted a great deal of energy and time to these issues involving petroleum, that I think it would be ill-advised for the Committee on Appropriations to be instructed at this stage.

This is an issue that involves us all. We are all concerned about it. But, if this legislation is to be considered, it should be considered in the appropriate committee, which would be the Committee on Ways and Means.

In the interest of orderly procedure, I have risen to request that Members seriously consider not instructing the Committee on Appropriations on this very important matter.

Mr. STEIGER. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield for the purpose of debate to the gentleman from Wisconsin.

Mr. STEIGER. I appreciate very much my colleague's yielding to me.

Mr. Speaker, I find myself, I must admit, somewhat lonely on this side of the aisle in opposing the motion offered by my friend, the gentleman from Ohio (Mr. BROWN).

I listened with interest to the distinguished majority leader, and I must admit that he doggone near convinced me that I ought to favor the motion to instruct the conferees. But I will set that aside and simply ask that my colleagues on both sides of the aisle think somewhat more carefully than I think we might at this point be doing about the implications of this vote.

It does go beyond this Chamber. It does go beyond the politics that are obviously a part of both those who oppose and those who favor. And, yes, I admit I have never voted to instruct conferees, and I do not intend today to vote to instruct conferees, because I do not think it is the appropriate thing to do in a legislative body.

But may I suggest to my distinguished friend, the gentleman from Texas, the majority leader, and those on this side, that our problem is not quite so simple as that which was outlined. It is not just a problem of economic policy of the President of the United States, which is wrong and which creates the kind of uncertainty and the kind of problems with which he is faced in the decline of the dollar, and it is not, as my friend, the gentleman from Texas, the majority leader, indicated, a matter of simply importing oil. It does seem to me that we are faced at this point in our history and at this time in our country with something that overrides any of those issues, including economics and oil, and that is psychology in conference.

I would simply say to my friend in the well that to adopt this motion today to instruct the conferees to take the Dole amendment undermines further the ability of the President of the United States, despite my difference with him, despite my opposition to crude oil taxes, and despite my opposition to the economic policies of the administration, and imposing an import fee, it would not be the right time and the right place to take this action. I think we would make a serious mistake, both politically and economically, to do so; and I urge my colleagues to vote down the motion to instruct.

Mr. MOFFETT. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Connecticut.

Mr. MOFFETT. I thank the gentleman for yielding.

Mr. Speaker, the gentleman from Ohio (Mr. BROWN) and I have had the pleasure of working, over the last few months, in opposition to the natural gas compromise which the President is so vigorously supporting. I think it is fair to say that we believe it would be an administrative nightmare, it is not going to produce new gas, and it would be inflationary.

The gentleman has taken during that period of time the attitude very clearly that we ought to do something. He has favored the passage of conservation legislation, the utility rate reform, coal conversion, and so forth, which is a very positive attitude. If the gentleman from Ohio and I, and others, have our way, our image in this Congress and in this country will not be one of doing nothing on energy when we go home in October, but it will be one of taking the first step and rejecting what we think is a bad natural gas plan. But it certainly would not be an attitude of a do-nothing Congress and a do-nothing Government and doing nothing for this country.

By contrast, the motion of the gentleman, I think, is damaging, in that it can give the image that we are really bound on a do-nothing course.

While I know that the gentleman has no intention of trying to embarrass the President of the United States, the result will certainly be to embarrass the President and to embarrass all of us, I think, and the country in terms of worldwide perception. I think there is a choice here between leaving the door open for import fees—and in my region that is not too popular, as the gentleman from Massachusetts has indicated—but at least taxes go back to the taxpayers. At least they go to the Treasury.

The other choice will come along about next March, when the price controls on oil expire. Then, the President will have the option of having those controls go off. I would much prefer to leave the door open to an import tax, because I believe that this President would administer it fairly. He has shown that much sensitivity toward the Northeast thus far.

I would rather go in that direction than lean toward decontrol, which would really bring devastation in economic terms in the Northeastern part of the country.

So, with all due respect, I oppose the motion.

Mr. BROWN of Ohio. Mr. Speaker, let me say to my friend and colleague from Connecticut that I appreciate his kind remarks about our position not being a do-nothing position. Indeed, that is correct in my case and in his, I am sure. There are certain things we would like to see done, but one consistent position I have had in this area of energy and in several other areas is that I am not in favor of new and additional taxes.

I want to re-emphasize that if this motion fails, we permit the President an option he has under present law to impose taxes which—and I must say that I have some confusion because I am clearly of the impression that the President has suggested that failing COET taxes, and I think there is no chance for COET taxes during this Congress—will be $15 billion more on top of the social security tax increases of last year. That is just more than I am willing to see imposed on the citizens of our country, and the consumers.

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from California (Mr. DON H. CLAUSEN) for the purpose of debate only.

Mr. DON H. CLAUSEN. Mr. Speaker, I want to commend the gentleman in the

well, Mr. BROWN of Ohio, for taking this means of putting in perspective the import of foreign oil issue.

To add to what you have said, I submit that we, the United States are totally lacking in a coherent and coordinated import-export policy relating to oil.

To further explain, I want to bring to the attention of my colleagues a brief overview of the recent hearings conducted in San Francisco, Calif., by the Interior Subcommittee on Investigations chaired by our colleague from New Mexico (Mr. RUNNELS).

The purpose of the hearings was to gather data on the surplus of oil on the west coast coming from Alaska. There is a glut of oil from our own State of Alaska. The preliminary findings reveal a potential yield capacity of 2,000,000 barrels a day that could be delivered to the lower 48 States as initially intended when Congress enacted the Trans-Alaska Pipeline System Act.

While 60 percent of the oil transshipped through the Panama Canal is coming from Alaska, it is costing the American consumer an additional $2 per barrel.

The hearings revealed further that we are seriously lacking in the development of an adequate west-to-east pipeline system.

So in describing the Alaskan oil surplus problem, I suggest it is more of a transportation deficit. We have a totally inadequate distribution network which in my view, drastically curtails our mobilization capability.

Additionally, the refining capacity in California and the west coast is incapable of handling the Alaskan "sour" crude because it is unusually high in sulfur content. Out of the total capacity of 2.9 million barrels a day, only 700,000 barrels a day can be refined.

In order to handle this type of crude, the refineries would have to be retrofitted at a cost of some $50 million per refinery, plus the leadtime required.

The most efficient and readily available west-to-east pipeline distribution system is the SOHIO project from Long Beach, Calif., to Midland, Tex., where the advanced technology refining capacity now exists and could accommodate this Alaskan type crude. However, it will take 2 years to modify this existing line to handle the oil.

Meanwhile, there has been a considerable amount of discussion within the administration, indicating a possible export of Alaskan oil through an exchange arrangement with Japan. which runs counter to the mandate of Congress.

I felt it incumbent on me, as the ranking minority member of the Interior Subcommittee, to relate this information to the Members during the course of this discussion, in the hope it will add to our overall oil import-export perspective.

To add more comprehensive information to this debate, I would like to read the full text of my opening statement made at the San Francisco hearings:

Mr. Chairman, I have a statement I would like to present to the subcommittee:

Someone once said that the time to fix the roof is when the sun shines. Well, the time for the United States to build a system to better transport our domesic crude oil is now. I might add at the moment that the sky has a few stormclouds—that being the oil glut on the West Coast of California.

We're here today and tomorrow to disperse these clouds. We're here to review the available transportation alternatives to disperse the Alaskan crude on the West Coast. As I have said before, this is a temporary problem, although a serious one. It is one part of a greater concern, the proper distribution and use of the Alaskan crude, one of our most valuable national resources. Through these hearings we hope to gain the persepective and information to resolve the temporary oil glut on the West Coast. And if we do our job well, we can go a long way toward correcting the larger problem, the more effective use of Alaskan crude throughout the entire country.

The term "oil glut" is in many ways a misnomer. As I view it, it is essentially a transportation deficit. As of now, the Alaskan crude isn't getting to the parts of the country that actually need it, and can use it. Instead of moving large quantities of oil from Valdez directly to the Gulf Coast and the Eastern refineries capable of handling the high sulfur content oil, it has been accumulating off California. And our California refineries have a limitation on the capacity for accommodating that oil. The ultimate solution to this temporary oil glut is an improved transportation system.

The problem is temporary since an integral part of an improved transportation system is anticipated within three to four years. I am referring to the Sohio pipeline project from Long Beach in Southern California, to Midland, Texas, where the refining capacity exists to accommodate this kind of oil. Once operational it can transport up to some 500,000 barrels a day, of this Alaskan crude to the Central United States. The pipeline will effectively relieve the West Coast of its locally unrefinable oil, and supply the rest of the country with needed energy. In this way we have fulfilled our duty under the Trans-Alaska Pipeline Act enacted by the Congress to equitably supply all the lower 48 states with Alaskan oil.

Negotiations for the Sohio project are progressing, and one of the factors delaying construction has been the concern of many Californians over the environment impact of the proposed terminal in Long Beach. I was a part of the Congressional delegation from California that was involved in the Clean Air Act amending process that permitted California to have higher than the national standards because of the uniqueness of the existing meteorological conditions in the Long Beach area and the entire Los Angeles Basin. In recent days we've read of the agreements that have been reached between the Sohio and the Southern California Edison companies on pollution tradeoffs, and hopefully we'll hear more today from the State of California with regard to the progress of the Air Resources Board and evaluation of that progress, and ultimately the voters in the Long Beach Area. It's my understanding they have a referendum in November that would have to approve of this agreement.

However, until the Sohio pipeline is sending oil eastward we must devise an interim distribution system. To do this we need to know the answers to a variety of issues. Only then can we pursue any one solution. Foremost in our minds throughout this inquiry should be, what are the best available means of transporting Alaskan oil to all of the regions of the country? After all, there is no doubt that we can use every drop of the 1.2 million barrels a day that is currently available from Alaskan oil, and ultimately the full capacity of the two million barrels a day. The basic question is how can we most economically distribute the crude for refining?

A recently advanced proposed solution to the so-called oil glut is an exchange of our Alaskan crude with the lower sulfur, that is, so-called sweet crude obtained from the Japanese from their Mideast and Indonesian sources. The theory is that our high sulfur or sour crude be swapped with Japan for the sweet crude our California refineries can absorb productively. On the surface, this would seem to rectify the immediate problem of too much unrefinable oil off the coast of California.

We're here in San Francisco to study this alternative. I have some honest doubts about whether it is a thorough response to the problem. I'm not sure we can do it without paying the piper. If we dance to the export tune, will the American consumer have to pay the piper in windfall profits? If we dance to the export tune, will the American maritime industry have to pay the piper in lost jobs, as well as idle ships? If we dance to the export tune, will the American taxpayer have to pay the piper in deficits of the Canal Company, as our new Panama Canal Treaties would require?

I'm keeping an open mind on this proposal, trusting these hearings will furnish the information base for the considered decision. As of now, there remain a number of uncertainties about this suggestion which need to be cleared up. For example, the advocates suggest that an exchange can result in a transportation savings of 54 cents a barrel or more. How is this calculated? If there will be a transportation savings, will it accrue to the benefit of the oil companies, or will it be passed on back through to the consumers?

Are these suggested transportation savings actually the result of shipping on foreign vessels? All of the oil being shipped now travels on American vessels because the Jones Act requires it. But this protection does not extend to the international shipments. The transport of Alaskan crude is crucial to the American maritime industry. It is the largest single employment area for the United States flag vessels. Thousands of jobs and millions invested in new vessels, are potentially at stake.

The Maritime Administration has studied the availability of American tankers and has concluded that we have the capacity to ship Alaskan oil on American bottoms. We may find that exporting Alaskan crude is the best over-all solution, but we should be aware of all the ramifications before we decide on a particular course.

While we examine this proposed major change in the use of Alaskan oil, we must also study alternatives to maximize our current transportation system. At the present time we ship some of the Alaskan oil through the Panama Canal to the Gulf and East Coast refineries. Perhaps one method of resolving the oil glut in California would be to increase shipments through the Canal. We need to know how economic a solution this might be, and what its impact would be on the consumers of America.

I am aware that the tolls and other fees collected on the oil tankers are a significant, some say even an essential source of revene for the Canal Company. And Alaskan crude is 60 percent of all of the oil shipped through the Panama Canal. What will happen to the Canal Company's solvency, buttresed by tanker revenue at this time, if we export our oil, and withdraw these shipments? The Canal Company will most probably suffer multimillion dollar deficits. Most importantly, under the recently ratified treaties, the American taxpayer will have to make up these losses.

My main point is that the temporary oil glut in California isn't the only variable involved. We ought to approach a solution to this temporary problem without jeopardizing the larger question of the equitable distribu-

tion of Alaskan oil throughout our nation. It may be that the American people would prefer we use the Alaskan supply here, if we can economically do so. We must remind ourselves of the basic fact, that the Congress, in 1973, when they passed the Trans-Alaska Pipeline System Act, gave full assurance to all of the American people that Alaskan oil would be available to them to address our domestic energy requirements.

As we examine the possible export of Alaskan crude, I hope we keep these greater concerns in mind. An effective national energy distribution system, including pipelines and tankers, is a vital part of our overall energy programs, the security of our nation, as well as the economic well-being of the entire United States.

The more completely we design our distribution system, the more efficient our use of energy. And that, in turn, is one avenue to energy independence, an urgent national need.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Louisiana (Mr. MOORE) for the purpose of debate only.

Mr. MOORE. Mr. Speaker, I appreciate the gentleman again yielding to me. I have listened to the remarks by those in opposition to the gentleman's motion. I disagree, obviously, and I take some offsense at some of those remarks.

First, let me say that if it were true that the defeat of this motion and the imposition of these fees would make a stronger America, stop us from using foreign oil, and would make the President a world leader, then I would agree with them.

But that is not the case. We know this fee is not going to do all those things. What this fee is simply going to do and it is a consumer issue and the consumer ought to be listening, is cost them $15 billion for no more oil, it is going to cause inflation of 1.5 percent for no more oil, and it is not because they are fat, dumb, and happy—which I take offense to—as the majority leader called the American people a moment ago.

When one has to drive to work, he is not fat, dumb, and happy. When one has to heat his home in the cold Northeast Corridor, he is not fat, dumb, and happy.

If the American people happen to be misled about the oil prices, it is this administration and the Congresses in the past that have misled them by keeping oil and natural gas artificially depressed at an artificial price instead of letting it go to the world price to provide more oil and gas to meet their needs.

So I say this motion needs to be passed in order to bring home to the American people that we cannot pass off this 1.5-percent inflation, $15 billion item saying that it will save energy.

Those things were caused by the very people and the prior administrations that say we should not do this, that it will hamstring us and prevent conservation. That is untrue. This is not going to produce one more barrel of oil. The Department of Energy is telling us we are saving quite a bit now so existing conservation is working.

We will save quite a bit more in the future as the prices get higher and the consumers get convinced that they have to save and that we do have an energy problem. But when we impose another tax on them, this is a cruel hoax as it will hurt them without any benefit.

Mr. OTTINGER. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Speaker, like my friend, the gentleman from Connecticut, I side with the gentleman from Ohio on the energy bill, and I am privileged to serve with both of them on the Energy and Power Subcommittee. When it comes to being concerned about the provisions of the Energy Act, I agree that it would be costly and contribute to inflation.

I am opposed to the motion offered by the gentleman from Ohio because it unduly ties the President's hands, even though I am leery about import fees. But the gentleman from Louisiana and the gentleman from Ohio are strong advocates of decontrol. They are willing to impose on the American people an oil price increase that would cost at least a hundred billion dollars a year and the proceeds would go to the oil companies rather than to the taxpayers.

The President has discussed a tax which would be refunded to the people. I would much rather see a tax than see money taken from the public in increased oil prices and go to the oil companies; they will walk away with the money and I do not believe they will give us any more production for that either.

So I would not like to see the President's hands tied. I think we have a terrible problem with respect to imported oil, and indeed, I think this is the No. 1 problem we face, underlying the sinking value of the dollar, over huge trade and balance of payments deficit, and our inflation. In addition, our dependence on imported oil poses a grave national security risk. Under these circumstances, discretion to address our import problem by imposing import fees should be left to the President. If he chooses to impose some kind of fee, I am sure he would have an entitlements program and, although it would be difficult to administer, he could take action to spread the burdens of such a tax equitably around the country; but I would rather see quotas imposed and allocations as a fairer means of dealing with our dependence on oil imports. However, I would not want to see this instrument deprived to the President. I would not want to see us limited to the avenue the gentleman from Louisiana and the gentleman from Ohio advocate, of just handing huge windfalls to the oil companies.

Mr. BROWN of Ohio. But the difference is very simple. The President proposes to tax the consumer $15 billion, 5 cents a gallon on gasoline or 2.6-percent inflation rate, take that money for the Federal Government and do with it what he will. But the distinction is that if we let the free market work—and I realize that is anathema to some Members of the Congress—then the money in the marketplace goes back into the economy and we have an increase of supply of the commodity, and an increase in jobs, and the increase in supply tends to pull the price down. But that does not happen with taxes. With taxes we multiply the price impact.

An example of this is what has happened already in the intrastate gas, where during the time of the shortage the price of natural gas in the free market intrastate system surged, but after the shortage and now the price of the free market gas is lower than the price of gas controlled by the Federal Government. To me that demonstrates one thing and one thing only, and that is that the market works better and quicker than all these bureaucrats we have in Washington and even better and quicker than the U.S. Congress.

Mr. OTTINGER. If the gentleman would yield further, the President as he discussed this is talking about using an import fee as he proposed for the COET tax, refunding the proceeds to the taxpayer. The idea is to make the price of oil higher to people so they would conserve it, but return the taxes to the people so as not to have depressing effect on the economy as we would have with deregulation.

Mr. BROWN of Ohio. Mr. Speaker, I must say I am a little confused about what the President wants to do because I just heard the majority leader, the gentleman from Texas (Mr. WRIGHT) say that he did not hear the President say that, and I am inclined to think that may not be totally the case. I think the President may have changed his mind. You know, he does that occasionally in the energy area, so I do not know what the President's position actually is, but I know that he said something about placing a $5-a-barrel import fee if we do not pass the COET tax.

Mr. WIRTH. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Colorado.

Mr. WIRTH. Mr. Speaker, let me just say that I, unhappily, oppose the gentleman's motion for the reasons that were most eloquently presented by the gentleman from Wisconsin (Mr. STEIGER). But I would like, if I might, ask a question of the gentleman relating to this issue.

It seems to me the issue we are looking at is again the problem we face of conservation and production together. So that the question that you raise through your motion also raises for the Congress a very interesting potential for legislation in the next session of the Congress on the pricing of oil, and the necessity of raising the price. It seems to me we do have the opportunity here to, in the Congress, focus on something akin to a COET tax, crude oil equalization tax, to get the price of oil up to the level of the OPEC prices and help get rid of the regulatory program but, at the same time, provide within that formula an incentive for production.

I would hope that in the next Congress we might be able to resolve this

dilemma through a piece of legislation that might accomplish both the purposes that the gentleman seeks in terms of the pricing structure and incentive.

Is that something the gentleman could see coming down the line whether or not this motion is adopted?

Mr. BROWN of Ohio. Mr. Speaker, in response to the inquiry of the gentleman from Colorado (Mr. WIRTH) let me say that in this area I take one step at a time. The first step I am interested in is that I am trying to avoid the imposition of import fees at this point.

Now, Mr. Speaker, I must take the last couple of minutes to summarize my position on this matter, and I urge my colleagues to vote for the motion to instruct the conferees.

This is a very important matter. If a $5 import fee per barrel were imposed, this would result in a $15 billion tax increase on the consumers.

According to the CBO estimates this $5 import fee would increase the average home heating bill in Boston from $122 per year to $231 per year.

The CBO estimates that an additional 400,000 jobs would be lost.

The impact on inflation would be, according to the CBO, a rise by 1.5 percent, and, according to the Congressional Research Service, a rise by 2.6 percent.

Further, the DOE estimates that at most imports would be reduced something in excess of 300,000 barrels a day.

The cost of the average gallon of gas across the country would be 5 cents a gallon greater. I do not think the President unilaterally ought to be able to do that in the oil area. I do not think my constituents or the consumers of the country want him to do it.

I would assume that if you wish for the President to do this, then you will vote against my motion to instruct the conferees. If you do not want him to do it, you will send the message to the President very clearly and emphatically that you do not believe that he should be permitted to raise our taxes by $15 billion and that we ought not to sock the consumers with higher home heating bills and gasoline bills as the average consumer tries to get along with the other inflation costs that he has to face.

● Mr. BROYHILL. Mr. Speaker, H.R. 11567 contains authorizations of appropriations for the Securities and Exchange Commission for fiscal years 1979 and 1980 in the amount of $69 and $79 million, respectively. The House-passed version of this legislation contained authorization of appropriations through fiscal year 1981 at slightly higher figures than were included in the Senate-passed bill. However, I am positive that the SEC can easily live within these slightly lower figures.

I supported a 3-year authorization for the Commission so that it could plan its long-range programs with more certainty. However, I am confident that the 2-year authorization agreed to by the Senate will give the Commission the flexibility that it needs to develop its programs for the next 2 fiscal years.

Although the authorization levels in this bill are not as high as we originally passed, they do represent an increase over past years. An increase in the authorization level for the Commission, I believe is justified. Over the last two Congresses, we have significantly increased the responsibilities of the Securities and Exchange Commission. For example, in the 94th Congress, we passed extensive revisions to the securities laws. In the present Congress, we passed the Foreign Corrupt Practices Act which greatly increases the Commission's role in prosecuting improper conduct by American companies operating abroad. Because of these and other new enforcement and regulatory duties, I do believe that it is appropriate to authorize the Commission the amounts specified in the bill before us today.

The Senate-passed bill also contains a provision not found in the House-passed version which, I believe, is worthy of adoption by this body. The Senate bill would amend section 3(b) of the Securities Act of 1933 to increase from $1.5 to $2 million the amount of securities which may be offered before that offering is required to be registered with the SEC. In recent years much concern has developed regarding the inability of smaller companies to raise the capital vitally needed for operations and growth. One of the reasons small concerns have been negatively impacted recently is because this statutory ceiling found in this 1933 Securities Act is at a level which is too low to provide the needed capital without going through the expenses inherent in a larger offering. Consequently, small concerns are today turning to foreign sources of capital, selling out to public corporations, or, even worse, not growing at all. Because of this artificially low ceiling, there has been a dramatic drop off in the use of this limited offering exemption. For example, according to the SEC, in 1973 there were 817 filings under this exemption raising $298.6 million. However, for 1977—first 11 months—there were only 215 filings raising only $71.1 million.

Although the limited offering ceiling was recently raised to $1.5 million, knowledgeable individuals in the industry do not feel that this is sufficient. A task force, chaired by former SEC Chairman William Casey, recently recommended raising the ceiling to $3 million. This is the recommended minimum which is supported by small business concerns as well as securities brokers. The reason for the higher ceiling is to accommodate increased costs of public offerings and to provide underwriters compensation commensurate with their own risks.

Raising this limited offer exemption ceiling is a noncontroversial issue and is supported by the Securities and Exchange Commission. It is a move which will be in the best interest of the business and financial communities, public investors, and the U.S. economy as a whole. Consequently, I urge that this portion of H.R. 11567 also be approved by this body.●

● Mr. ECKHARDT. Mr. Speaker, H.R. 11567 was originally passed by the House on April 4 under suspension of the rules. It provided a 3-year authorization for the Securities and Exchange Commission beginning fiscal 1979 of $70, $80, and $91 million, respectively. The bill before us today as amended by the Senate provides for a 2- rather than a 3-year authorization and decreases by $1 million—or approximately 1½ percent—the authorization amounts. These changes are acceptable to the Securities and Exchange Commission. I am persuaded that the changes are not sufficiently substantive as to create any difficulties in the functioning of the agency.

The Senate has added an additional provision, which amends section 3(b) of the Securities Act of 1933, to permit the Commission to exempt public offering not exceeding $2.5 million from the registration provisions of the act. The present level for the exemption is $1.5 million. This provision is designed to provide a vehicle for the Commission to alleviate substantially the costs and other burdens upon small companies in their attempts to raise capital. During the first session of this Congress, there was considerable testimony before Chairman LAFALCE'S Subcommittee on Capital, Investment, and Business Opportunities of the Committee on Small Business than an increase in the section 3(b) ceiling to even a higher figure was an important adjunct to certain changes in our tax structure, some of which have already been passed by the House, to provide small businesses access to equity and venture capital. In addition, this measure is supported by the Commission.

My colleague from California, Mr. Moss, has expressed strenuously his concern that raising the section 3(b) exemption to $2.5 million would eliminate many of the important public investor protections which full registration provides. Although I have the greatest respect for that distinguished gentleman and his advocacy of investor protection, I do not agree that this amendment places those protections in jeopardy. The amendment to section 3(b) merely permits the Commission, when appropriate, and with such safeguards as may be necessary in the public interest, to relieve small issuers of the burden and expense of filing a full registration statement. The amendment does not mandate that the Commission issue an exemption for the full $2.5 million. Indeed, I have been advised that earlier today the Commission considered and approved a lesser figure of $1.5 million. But an increased ceiling would provide the Commission with desirable flexibility to adjust the exemption to inflation and other economic considerations. Given the traditional concern of the Commission for the protection of the public investors, Congress may feel comfortable that in establishing conditions for an exemption under section 3(b), the Commission will give appropriate observance to investor protection. However, in deference to those concerns expressed by the gentleman from California, I am proposing an amendment to the Senate amendment establishing a $2 million ceiling, thereby splitting the difference between the existing figure and that proposed by the Senate.●

● Mr. STAGGERS. Mr. Speaker, H.R.

11567 as passed by the House authorized appropriations for the Securities and Exchange Commission in the amounts of $70, $80, and $91 million for fiscal years 1979, 1980, and 1981 respectively. As amended by the Senate, the bill authorizes appropriations for the Commission in the amounts of $69 and $79 million for fiscal years 1979 and 1980 respectively. Additionally, the bill now amends section 3(b) of the Securities Act of 1933 to increase the maximum aggregate amount of securities which can be issued pursuant to the exemption provided by that section to $2.5 million. This provision would enable small businesses to raise and attract investment capital at reasonable cost without undue paperwork.

The amendment just offered would change this maximum aggregate amount to $2 million. Earlier this session the Congress adopted a $1.5 million ceiling for this exemption in Public Law 95–283. The $2 million figure represents a compromise.

This ceiling should provide the SEC with sufficient flexibility to use its discretionary authority to adjust the level of the small business exemption based upon experience with inflation and the actual costs of raising capital.●

The SPEAKER pro tempore (Mr. BOLLING). All time has expired.

Without objection, the previous question is ordered on the motion.

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. BROWN).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. BROWN of Ohio. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 194, nays 201, not voting 37, as follows:

[Roll No. 731]

| Florio | Pressler | |

The Clerk announced the following pairs:

Mr. Fary with Mr. Abdnor.
Mr. Florio with Mrs. Pettis.
Mr. Ammerman with Mr. Young of Alaska.
Mr. AuCoin with Mr. Wiggins.
Mr. Hawkins with Mr. Kasten.
Mr. Shipley with Mr. Hansen.
Mr. Teague with Mr. Frey.
Mr. Gibbons with Mr. Cochran of Mississippi.
Mrs. Burke of California with Mr. Erlenborn.
Mr. Bellenson with Mr. Del Clawson.
Mr. Duncan of Oregon with Mr. Burke of Florida.
Mr. Huckaby with Mr. Quie.
Mr. Sisk with Mr. Symms.
Mr. Waxman with Mr. Quillen.
Mr. Miller of California with Mr. Thone.
Mr. Mikva with Mr. Pressler.
Mr. Lehman with Mr. Krueger.
Mr. Evans of Georgia with Mr. Fraser.

Messrs. ECKHARDT, APPLEGATE, MINISH, and WOLFF changed their vote from "nay" to "yea."

Messrs. BOLAND, BAUCUS, and JOHN L. BURTON changed their vote from "yea" to "nay."

So the motion was rejected.

The result of the vote was announced as above recorded.

APPOINTMENT OF CONFEREES ON H.R. 12930

The SPEAKER pro tempore (Mr. SIMON). Without objection, the Chair appoints the following conferees: Messrs. STEED, ADDABBO, ROYBAL, PATTEN, BOLAND, SLACK, MAHON, MILLER of Ohio, MCEWEN, and CEDERBERG.

There was no objection.

## CONFERENCE REPORT ON H.R. 12222, INTERNATIONAL DEVELOPMENT AND FOOD ASSISTANCE ACT OF 1978

Mr. ZABLOCKI submitted the following conference report and statement on the bill (H.R. 12222) to amend the Foreign Assistance Act of 1961 to authorize development and economic assistance programs for fiscal year 1979, to make certain changes in the authorities of that Act and the Agricultural Trade Development and Assistance Act of 1954, to improve the coordination and administration of United States development-related policies and programs, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95–1545)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12222) to amend the Foreign Assistance Act of 1961 to authorize development and economic assistance programs for fiscal year 1979, to make certain changes in the authorities of that Act and the Agricultural Trade Development and Assistance Act of 1954, to

improve the coordination and administration of United States development-related policies and programs, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "International Development and Food Assistance Act of 1978".

TITLE I—DEVELOPMENT ASSISTANCE

DEVELOPMENT ASSISTANCE POLICY

SEC. 101. Chapter 1 of part I of the Foreign Assistance Act of 1961 is amended by striking out section 102 and inserting in lieu thereof the following new sections:

"SEC. 101. GENERAL POLICY.—(a) The Congress finds that fundamental political, economic, and technological changes have resulted in the interdependence of nations. The Congress declares that the individual liberties, economic prosperity, and security of the people of the United States are best sustained and enhanced in a community of nations which respect individual civil and economic rights and freedoms and which work together to use wisely the world's limited resources in an open and equitable international economic system. Furthermore, the Congress reaffirms the traditional humanitarian ideals of the American people and renews its commitment to assist people in developing countries to eliminate hunger, poverty, illness, and ignorance.

"Therefore, the Congress declares that a principal objective of the foreign policy of the United States is the encouragement and sustained support of the people of developing countries in their efforts to acquire the knowledge and resources essential to development and to build the economic, political, and social institutions which will improve the quality of their lives.

"United States development cooperation policy should emphasize four principal goals:

"(1) the alleviation of the worst physical manifestations of poverty among the world's poor majority;

"(2) the promotion of conditions enabling developing countries to achieve self-sustaining economic growth with equitable distribution of benefits;

"(3) the encouragement of development processes in which individual civil and economic rights are respected and enhanced; and

"(4) the integration of the developing countries into an open and equitable international economic system.

"The Congress declares that pursuit of these goals requires that development concerns be fully reflected in United States foreign policy and that United States development resources be effectively and efficiently utilized.

"(b) Under the policy guidance of the Secretary of State, the agency primarily responsible for administering this part should have the responsibility for coordinating all United States development-related activities.

"SEC. 102. DEVELOPMENT ASSISTANCE POLICY.—(a) The Congress finds that the efforts of developing countries to build and maintain the social and economic institutions necessary to achieve self-sustaining growth and to provide opportunities to improve the quality of life for their people depend primarily upon successfully marshalling their own economic and human resources. The Congress recognizes that the magnitude of these efforts exceeds the resources of developing countries and therefore accepts that there will be a long-term need for wealthy countries to contribute additional resources for development purposes. The United States should take the lead in concert with other nations to mobilize such resources from public and private sources.

"Provision of development resources must be adapted to the needs and capabilities of specific developing countries. United States assistance to countries with low per capita incomes which have limited access to private external resources should primarily be provided on concessional terms. Assistance to other developing countries should generally consist of programs which facilitate their access to private capital markets, investment, and technical skills, whether directly through guarantee or reimbursable programs by the United States Government or indirectly through callable capital provided to the international financial institutions.

"Bilateral assistance and United States participation in multilateral institutions shall emphasize programs in support of countries which pursue development strategies designed to meet basic human needs and achieve self-sustaining growth with equity.

"The Congress declares that the principal purpose of United States bilateral development assistance is to help the poor majority of people in developing countries to participate in a process of equitable growth through productive work and to influence decisions that shape their lives, with the goal of increasing their incomes and their access to public services which will enable them to satisfy their basic needs and lead lives of decency, dignity, and hope. Activities shall be emphasized that effectively involve the poor in development by expanding their access to the economy through services and institutions at the local level, increasing their participation in the making of decisions that affect their lives, increasing labor-intensive production and the use of appropriate technology, expanding productive investment and services out from major cities to small towns and rural areas, and otherwise providing opportunities for the poor to improve their lives through their own efforts. Participation of the United States in multilateral institutions shall also place appropriate emphasis on these principles.

"(b) Assistance under this chapter should be used not only for the purpose of transferring financial resources to developing countries, but also to help countries solve development problems in accordance with a strategy that aims to insure wide participation of the poor in the benefits of development on a sustained basis. Moreover, assistance shall be provided in a prompt and effective manner, using appropriate United States institutions for carrying out this strategy. In order to achieve these objectives and the broad objectives set forth in section 101 and in subsection (a) of this section, bilateral development assistance authorized by this Act shall be carried out in accordance with the following principles:

"(1) Development is primarily the responsibility of the people of the developing countries themselves. Assistance from the United States shall be used in support of, rather than substitution for, the self-help efforts that are essential to successful development programs and shall be concentrated in those countries that take positive steps to help themselves. Maximum effort shall be made, in the administration of this part, to stimulate the involvement of the people in the development process through the encouragement of democratic participation in private and local governmental activities and institution building appropriate to the requirements of the recipient countries.

"(2) Development planning must be the responsibility of each sovereign country. United States assistance should be administered in a collaborative style to support the development goals chosen by each country receiving assistance.

"(3) United States bilateral development assistance should give high priority to undertakings submitted by host governments which directly improve the lives of the poorest of their people and their capacity to participate in the development of their countries, while also helping such governments enhance their planning, technical, and administrative capabilities needed to insure the success of such undertakings.

"(4) Development assistance provided under this chapter shall be concentrated in countries which will make the most effective use of such assistance to help satisfy basic human needs of poor people through equitable growth, especially in those countries having the greatest need for outside assistance. In order to make possible consistent and informed judgments in this respect, the President shall assess the commitment and progress of countries in moving toward the objectives and purposes of this chapter by utilizing criteria, including but not limited to the following:

"(A) increase in agricultural productivity per unit of land through small-farm, labor-intensive agriculture;

"(B) reduction of infant mortality;

"(C) control of population growth;

"(D) promotion of greater equality of income distribution, including measures such as more progressive taxation and more equitable returns to small farmers;

"(E) reduction of rates of unemployment and underemployment; and

"(F) increase in literacy.

"(5) United States development assistance should focus on critical problems in those functional sectors which affect the lives of the majority of the people in the developing countries; food production and nutrition; rural development and generation of gainful employment; population planning and health; evironment and natural resources; and education, development administration, and human resource development.

"(6) United States assistance shall encourage and promote the participation of women in the national economies of developing countries and the improvement of women's status as an important means of promoting the total development effort.

"(7) United States bilateral assistance shall recognize that the prosperity of developing countries and effective development efforts require the adoption of an overall strategy that promotes efficient utilization of energy and, therefore, consideration shall be given to the full implications of such assistance on the price, availability, and consumption of energy in recipient countries.

"(8) United States cooperation in development should be carried out to the maximum extent possible through the private sector, including those institutions which already have ties in the developing areas, such as educational institutions, cooperatives, credit unions, free labor unions, and private and voluntary agencies.

"(9) To the maximum extent practicable, United States private investment should be encouraged in economic and social development programs to which the United States lends support.

"(10) Assistance shall be planned and utilized to encourage regional cooperation by developing countries in the solution of common problems and the development of shared resources.

"(11) Assistance efforts of the United States shall be planned and furnished to the maximum extent practicable in coordination and cooperation with assistance efforts of other countries, including the planning and implementation of programs and projects on a multilateral and multidonor basis.

"(12) United States bilateral development assistance should be concentrated on projects

which do not involve large-scale capital transfers. However, to the extent that such assistance does involve large-scale capital transfers, it should be furnished in association with contributions from other countries working together in a multilateral framework.

"(c) The Congress, recognizing the desirability of overcoming the worst aspects of absolute poverty by the end of this century by, among other measures, substantially lowering infant mortality and birth rates, and increasing life expectancy, food production, literacy, and employment, encourages the President to explore with other countries, through all appropriate channels, the feasibility of a worldwide cooperative effort to overcome the worst aspects of absolute poverty and to assure self-reliant growth in the developing countries by the year 2000.".

DEVELOPMENT ASSISTANCE AUTHORITIES

SEC. 102. (a) Chapter 1 of part I of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following:

"SEC. 122. GENERAL AUTHORITIES.—(a) In order to carry out the purposes of this chapter, the President is authorized to furnish assistance, on such terms and conditions as he may determine, to countries and areas through programs of grant and loan assistance, bilaterally or through regional, multilateral, or private entities.".

(b)(1) Part I of such Act is further amended—

(A) by striking out "less developed friendly" in the first sentence in subsection (b) of section 201;

(B) by striking out everything after the first sentence in subsection (b) of section 201 through "herein) be loaned" in subsection (d) of such section and inserting in lieu thereof the following: "The President shall determine the interest payable on any loan. In making loans under this chapter, the President shall consider the economic circumstances of the borrower and other relevant factors, including the capacity of the recipient country to repay the loan at a reasonable rate of interest, except that loans may not be made"; and

(C) by inserting subsection (b) of section 201, as amended by subparagraphs (A) and (B) of this paragraph, immediately after section 122(a), as added by subsection (a) of this section.

(2)(A) Section 301(a) of such Act is amended by striking out "201(d)" and inserting in lieu thereof "122(b)".

(B) Section 103(b) of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "201" and inserting in lieu thereof "122".

(C) Section 106(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended in the second sentence by striking out "201" and inserting in lieu thereof "122(b)".

(c)(1) Section 122 of the Foreign Assistance Act of 1961, as added by subsection (a) of this section and as amended by subsection (b)(1) of this section, is amended by adding at the end thereof the following new subsections:

"(c) Dollar receipts paid during any fiscal year from loans made under this part or from loans made under predecessor foreign assistance legislation shall be deposited in the Treasury as miscellaneous receipts.

"(d) Not to exceed $10,000,000 of the funds made available each fiscal year for the purposes of this chapter may be used for assistance, on such terms and conditions as the President may determine, to research and educational institutions in the United States for the purpose of strengthening their capacity to develop and carry out programs concerned with the economic and social development of developing countries.".

(2) Section 299(a) of such Act is amended by striking "110(b), 211(a), and 211(d)" and inserting in lieu thereof "110(b) and 122(d)".

(d) Part I of such Act is further amended—

(1) in section 204—

(A) by striking out "SEC. 204. DEVELOPMENT LOAN COMMITTEE.—" and inserting in lieu thereof "(e)"; and

(B) by striking out "titled" and inserting in lieu thereof "chapter"; and

(2) by inserting such section, as so redesignated and amended, at the end of section 122, as added and amended by subsections (a) through (c) of this section.

(e) Chapter 1 of part I of such Act, as amended by subsections (a) through (d) of this section, is further amended by adding at the end thereof the following new section:

"SEC. 123. PRIVATE AND VOLUNTARY ORGANIZATIONS AND COOPERATIVES IN OVERSEAS DEVELOPMENT.—(a) The Congress finds that the participation of rural and urban poor people in their countries' development can be assisted and accelerated in an effective manner through an increase in activities planned and carried out by private and voluntary organizations and cooperatives. Such organizations and cooperatives, embodying the American spirit of self-help and assistance to others to improve their lives and incomes, constitute an important means of mobilizing private American financial and human resources to benefit poor people in developing countries. The Congress declares that it is in the interest of the United States that such organizations and cooperatives expand their overseas development efforts without compromising their private and independent nature. The Congress further declares that the financial resources of such organizations and cooperatives should be supplemented by the contribution of public funds for the purpose of undertaking development activities in accordance with the principles set forth in section 102. The Congress urges the Administrator of the agency primarily responsible for administering this part, in implementing programs authorized under this part, to draw on the resource of private and voluntary organizations and cooperatives to plan and carry out development activities.

"(b) In order to further the efficient use of United States voluntary contributions for development, relief, and rehabilitation of friendly peoples, the President is authorized to use funds made available for the purposes of this chapter to pay transportation charges on shipments by the American National Red Cross and by United States voluntary agencies registered with the Advisory Committee on Voluntary Foreign Aid.

"(c) Reimbursement under this section may be provided for transportation charges on shipments from United States ports, or in the case of excess or surplus property supplied by the United States from foreign ports, to ports of entry abroad or to points of entry abroad in cases (1) of landlocked countries, (2) where ports cannot be used effectively because of natural or other disturbances, (3) where carriers to a specified country are unavailable, or (4) where a substantial savings in costs or time can be effected by the utilization of points of entry other than ports.

"(d) Where practicable, the President shall make arrangements with the receiving country for free entry of such shipments and for the making available by the country of local currencies for the purpose of defraying the transportation costs of such shipments from the port or point of entry of the receiving country to the designated shipping point of the consignee.".

(f) Section 115 of such Act is repealed.

(g)(1) Chapter 2 of part I of such Act, as amended by this section, is further amended—

(A) by repealing title I (except sections 206 and 209), title II (except sections 214 and 219), title VI, title VII, and title VIII;

(B) by amending the chapter heading to read as follows: "CHAPTER 2—OTHER PROGRAMS";

(C) by inserting the following new title heading immediately before section 206: "TITLE I—MULTILATERAL AND REGIONAL DEVELOPMENT PROGRAMS"; and

(D) by inserting the following new title heading immediately before section 214: "TITLE II—AMERICAN SCHOOLS AND HOSPITALS ABROAD; PROTOTYPE DESALTING PLANT".

(2)(A) Section 281 of such Act is amended by inserting "and chapter 1" immediately after "this chapter" each of the four places it appears.

(B) Section 601(b)(5) of such Act is amended by striking out "201" and inserting in lieu thereof "122".

(C) Section 608(a) of such Act is amended by striking out "section 212" and inserting in lieu thereof "chapter 1 of part I".

(D) Section 611(a) of such Act is amended by striking out "titles I, II, and VI of chapter 2 and chapter 4 of part I" and inserting in lieu thereof "chapter 1 of part I, title II of chapter 2 of part I, or chapter 4 of part II".

(E) Section 611(e) of such Act is amended by striking out "titles I, II, or VI of chapter 2 or chapter 4 of part I of this Act" and inserting in lieu thereof "chapter 1 of part I, title II of chapter 2 of part I, or chapter 4 of part II".

(F) Section 620(d) of such Act is amended by striking out "under section 201" and inserting in lieu thereof "on a loan basis under chapter 1 of part II".

(G) Section 636(h) of such Act is amended by striking out "titles II, V, and VI (except development loans)" and inserting in lieu thereof "chapter 1 (except development loans) and title II".

(H) Section 636(c) of such Act is amended by striking out "(other than title I of chapter 2 of part I)" both places it appears.

(I) Section 636 (d) and (e) of such Act are each amended by striking out "(other than title I of chapter 2 of part I)".

(J) Section 636(f) of such Act is amended—

(i) by striking out "section 212" and inserting in lieu thereof "chapter 1 of part I"; and

(ii) by striking out "title I of chapter 2" and inserting in lieu thereof "chapter 1".

(K)(i) Section 108 of such Act is repealed.

(ii) Section 109 of such Act is amended by striking out "Notwithstanding section 108 of this Act whenever" and inserting in lieu thereof "Whenever".

AGRICULTURE, RURAL DEVELOPMENT, AND NUTRITION

SEC. 103. (a) Section 103 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 103. AGRICULTURE, RURAL DEVELOPMENT, AND NUTRITION.—(a)(1) In recognition of the fact that the great majority of the people of developing countries live in rural areas and are dependent on agriculture and agricultural-related pursuits for their livelihood, the President is authorized to furnish assistance, on such terms and conditions as he may determine, for agriculture, rural development, and nutrition—

"(A) to alleviate starvation, hunger, and malnutrition;

"(B) to expand significantly the provision of basic services to rural poor people to enhance their capacity for self-help; and

"(C) to help create productive farm and off-farm employment in rural areas to provide a more viable economic base and enhance opportunities for improved incomes, living standards, and contributions by rural poor people to the economic and social development of their countries.

"(2) There is authorized to be appropriated to the President for purposes of this section, in addition to funds otherwise available for such purposes, $665,231,000 for the fiscal year 1979. Amounts appropriated un-

der this section are authorized to remain available until expended.

"(b)(1) Assistance provided under this section shall be used primarily for activities which are specifically designed to increase the productivity and income of the rural poor, through such means as creation and strengthening of local institutions linked to the regional and national levels; organization of a system of financial institutions which provide both savings and credit services to the poor; stimulation of small, labor-intensive enterprises in rural towns; improvement of marketing facilities and systems; expansion of rural infrastructure and utilities such as farm-to-market roads, water management systems, land improvement, energy, and storage facilities; establishment of more equitable and more secure land tenure arrangements; and creation and strengthening of systems to provide other services and supplies needed by farmers, such as extension, research, training, fertilizer, water, forestry, soil conservation, and improved seed, in ways which assure access to them by small farmers.

"(2) In circumstances where development of major infrastructure is necessary to achieve the objectives set forth in this section, assistance for that purpose should be furnished under this chapter in association with significant contributions from other countries working together in a multilateral framework. Infrastructure projects so assisted should be complemented by other measures to ensure that the benefits of the infrastructure reach the poor.

"(c) The Congress finds that the greatest potential for significantly expanding availability of food for people in rural areas and augmenting world food production at relatively low cost lies in increasing the productivity of small farmers who constitute a majority of the agricultural producers in developing countries. Increasing the emphasis on rural development and expanded food production in the poorest nations of the developing world is a matter of social justice and a principal element contributing to broadly based economic growth, as well as an important factor in alleviating inflation in the industrialized countries. In the allocation of funds under this section, special attention shall be given to increasing agricultural production in countries which have been designated as 'least developed' by the United Nations General Assembly.

"(d) Assistance provided under this section shall also be used in coordination with programs carried out under section 104 to help improve nutrition of the people of developing countries through encouragement of increased production of crops with greater nutritional value; improvement of planning, research, and education with respect to nutrition, particularly with reference to improvement and expanded use of indigenously produced foodstuffs; and the undertaking of pilot or demonstration programs explicitly addressing the problem of malnutrition of poor and vulnerable people. In particular, the President is encouraged—

"(1) to devise and carry out in partnership with developing countries a strategy for programs of nutrition and health improvement for mothers and children, including breast feeding; and

"(2) to provide technical, financial, and material support to individuals or groups at the local level for such programs.

"(e) Local currency proceeds from sales of commodities provided under the Agricultural Trade Development and Assistance Act of 1954 which are owned by foreign governments shall be used whenever practicable to carry out the provisions of this section.".

(b) Section 644 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following:

"(o) 'Agriculture' includes aquaculture and fisheries.

"(p) 'Farmers' includes fishermen and other persons employed in cultivating and harvesting food resources from salt and fresh waters.".

(c) Sections 117 and 296 (f) and (g) of such Act are repealed.

(d) Section 103A of such Act is amended by inserting "environmental," immediately after "social," in clause (2) of the first sentence.

POPULATION AND HEALTH

SEC. 104. (a) Section 104 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 104. POPULATION AND HEALTH.—(a) FINDINGS.—The Congress recognizes that poor health conditions and uncontrolled population growth can vitiate otherwise successful development efforts.

"Large families in developing countries are the result of complex social and economic factors which change relatively slowly among the poor majority least affected by economic progress, as well as the result of a lack of effective birth control. Therefore, effective family planning depends upon economic and social change as well as the delivery of services and is often a matter of political and religious sensitivity. While every country has the right to determine its own policies with respect to population growth, voluntary population planning programs can make a substantial contribution to economic development, higher living standards, and improved health and nutrition.

"Good health conditions are a principal element in improved quality of life and contribute to the individual's capacity to participate in the development process, while poor health and debilitating disease can limit productivity.

"(b) ASSISTANCE FOR POPULATION PLANNING.—In order to increase the opportunities and motivation for family planning and to reduce the rate of population growth, the President is authorized to furnish assistance, on such terms and conditions as he may determine, for voluntary population planning. In addition to the provision of family planning information and services and the conduct of directly relevant demographic research, population planning programs shall emphasize motivation for small families.

"(c) ASSISTANCE FOR HEALTH AND DISEASE PREVENTION.—In order to contribute to improvements in the health of the greatest number of poor people in developing countries, the President is authorized to furnish assistance, on such terms and conditions as he may determine, for health programs. Assistance under this subsection shall be used primarily for basic integrated health services, safe water and sanitation, disease prevention and control and related health planning and research. This assistance shall emphasize self-sustaining community-based health programs by means such as training of heatlh auxiliary and other appropriate personnel, support for the establishment and evaluation of projects that can be replicated on a broader scale, measures to improve management of health programs, and other services and supplies to support health and disease prevention programs.

"(d) INTEGRATION OF ASSISTANCE PROGRAMS.—(1) Assistance under this chapter shall be administered so as to give particular attention to the interrelationship between (A) population growth and (B) development and overall improvement in living standards in developing countries, and to the impact of all programs, projects, and activities on population growth. All appropriate activities proposed for financing under this chapter shall be designed to build motivation for smaller families through modification of economic and social conditions supportive of the desire for large families, in programs such as education in and out of school, nutrition, disease control, maternal and child health services, improvements in the status and employment of women, agricultural production, rural development, and assistance to the urban poor. Population planning programs shall be coordinated with other programs aimed at reducing the infant mortality rate, providing better nutrition for pregnant women and infants, and raising the standard of living of the poor.

"(2) Since the problems of malnutrition, disease, and rapid population growth are closely related, planning for assistance to be provided under sections (b) and (c) of this section and under section 103 shall be coordinated to the maximum extent practicable.

"(3) Assistance provided under this section shall emphasize low-cost integrated delivery systems for health, nutrition, and family planning for the poorest people, with particular attention to the needs of mothers and young children, using paramedical and auxiliary medical personnel, clinics and health posts, commercial distribution systems, and other modes of community outreach.

"(e) RESEARCH AND ANALYSIS.—(1) Health and population research and analysis carried out under this Act shall—

"(A) be undertaken to the maximum extent practicable in developing countries by developing country personnel, linked as appropriate with private and governmental biomedical research facilities within the United States;

"(B) take account of the special needs of the poor people of developing countries in the determination of research priorities; and

"(C) make extensive use of field testing to adapt basic research to local conditions.

"(2) The President is authorized to study the complex factors affecting population growth in developing countries and to identify factors which might motivate people to plan family size or to space their children.

"(f) PROHIBITION ON USE OF FUNDS FOR ABORTIONS AND INVOLUNTARY STERILIZATIONS.—(1) None of the funds made available to carry out this part may be used to pay for the performance of abortions as a method of family planning or to motivate or coerce any person to practice abortions.

"(2) None of the funds made available to carry out this part may be used to pay for the performance of involuntary sterilizations as a method of family planning or to coerce or provide any financial incentive to any person to undergo sterilizations.

"(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the President, in addition to funds otherwise available for such purposes—

"(1) $224,745,000 for the fiscal year 1979 to carry out subsection (b) of this section; and

"(2) $148,494,000 for the fiscal year 1979 to carry out subsection (c) of this section. Funds appropriated under this subsection are authorized to remain available until expended.".

(b) Section 114 and title X of chapter 2 of part I of such Act are repealed.

EDUCATION AND HUMAN RESOURCES DEVELOPMENT

SEC. 105. Section 105(a) of the Foreign Assistance Act of 1961 is amended in the second sentence by striking out "$101,800,000 for the fiscal year 1977 and $84,900,000 for the fiscal year 1978, which amounts are" and inserting in lieu thereof "$109,036,000 for the fiscal year 1979, which amount is".

TECHNICAL ASSISTANCE, ENERGY, RESEARCH, RECONSTRUCTION, AND SELECTED DEVELOPMENT PROBLEMS

SEC. 106. Section 106(b) of the Foreign Assistance Act of 1961 is amended in the first sentence by striking out "$104,500,000 for the fiscal year 1977 and $105,000,000 for the fiscal year 1978, which amounts are" and

inserting in lieu thereof $126,244,000 for the fiscal year 1979, which amount is".

APPROPRIATE TECHNOLOGY

SEC. 107. Section 107 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 107. APPROPRIATE TECHNOLOGY.—(a) In carrying out activities under this chapter, the President shall place special emphasis on the use of relatively smaller, cost-saving, labor-using technologies that are generally most appropriate for the small farms, small businesses, and small incomes of the poor.

"(b) Funds made available to carry out this chapter should be used to the extent practicable for activities in the field of appropriate technology, including support of an expanded and coordinated private effort to promote the development and dissemination of appropriate technology in developing countries.".

WOMEN IN DEVELOPMENT

SEC. 108. Section 113 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(d)(1) Up to $10,000,000 of the funds made available each fiscal year under this chapter shall be used, in addition to funds otherwise available for such purposes, for assistance on such terms and conditions as the President may determine to encourage and promote the participation and integration of women as equal partners in the development process in the developing countries. These funds shall be used primarily to support activities which will increase the economic productivity and income earning capacity of women.

"(2) Nothing in this section shall be construed to authorize the establishment of a separate development assistance program for women.".

HUMAN RIGHTS ACTIVITIES

SEC. 109. Section 116(e) of the Foreign Assistance Act of 1961 is amended in the first sentence—

(1) by striking out "Of" and inserting in lieu thereof "The President is authorized and encouraged to use not less than $1,500,000 of"; and

(2) by striking out "1978, not less than $750,000 may be used only" and inserting in lieu thereof "1979".

ENVIRONMENT AND NATURAL RESOURCES

SEC. 110. Section 118 of the Foreign Assistance Act of 1961 is amended—

(1) by inserting "(a)" immediately after the section caption; and

(2) by adding at the end thereof the following new subsections:

"(b) In carrying out programs under this chapter, the President shall take into consideration the environmental consequences of development actions.

"(c) In furtherance of the purposes of this section, the President shall carry out studies to identify the major environment and natural resource problems, and the institutional capabilities to solve those problems, which exist in developing countries. The results of these studies shall be reported to the Congress by March 1, 1979.".

RENEWABLE AND UNCONVENTIONAL ENERGY TECHNOLOGIES

SEC. 111. Section 119 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 119. RENEWABLE AND UNCONVENTIONAL ENERGY TECHNOLOGIES.—(a) The President is authorized to furnish assistance under this chapter for cooperative programs with developing countries in energy production and conservation, with particular emphasis on programs in research and development, and use of small-scale, decentralized, renewable energy sources for rural areas carried out as integral parts of rural development efforts in accordance with section 103 of this Act. Such programs shall also be directed toward the earliest practicable development and use of energy technologies which are environmentally acceptable, require minimum capital investment, are most acceptable to and affordable by the people using them, are simple and inexpensive to use and maintain, and are transferable from one region of the world to another.

"(b) The agency primarily responsible for administering this part shall coordinate with the Department of Energy, to the maximum extent possible, the planning and implementation of energy programs authorized under this chapter, including section 107, and shall consult with the Department of Energy on such planning and implementation.".

RELATIVELY LEAST DEVELOPED COUNTRIES

SEC. 112. (a)(1) Chapter 1 of part I of the Foreign Assistance Act of 1961, as amended by section 102 of this Act, is further amended by inserting the following new section 124 immediately after section 123:

"SEC. 124. RELATIVELY LEAST DEVELOPED COUNTRIES.—(a) Relatively least developed countries (as determined on the basis of criteria comparable to those used for the United Nations General Assembly list of 'least developed countries') are characterized by extreme poverty, very limited infrastructure, and limited administrative capacity to implement basic human needs growth strategies. In such countries special measures may be necessary to insure the full effectiveness of assistance furnished under this part.

"(b) For the purpose of promoting economic growth in these countries, the President is authorized and encouraged to make assistance under this chapter available on a grant basis to the maximum extent that is consistent with the attainment of United States development objectives.

"(c)(1) The Congress recognizes that the relatively least developed countries have virtually no access to private international capital markets. Insofar as possible, prior assistance terms should be consistent with present grant assistance terms for relatively least developed countries. Therefore, notwithstanding section 620(r) of this Act and section 321 of the International Development and Food Assistance Act of 1975 but subject to paragraph (2) of this subsection, the President on a case-by-case basis, taking into account the needs of the country for financial resources and the commitment of the country to the development objectives set forth in sections 101 and 102—

"(A) may permit a relatively least developed country to place amounts, which would otherwise be paid to the United States as payments on principal or interest on liability incurred by that country under this part (or any predecessor legislation) into local currency accounts (in equivalent amounts of local currencies as determined by the official exchange rate for United States dollars) for use by the relatively least developed country, with the concurrence of the Administrator of the agency primarily responsible for administering this part, for activities which are consistent with section 102; and

"(B) may waive interest payments on liability incurred by a relatively least developed country under this part (or any predecessor legislation) if the President determines that that country would be unable to use for development purposes the equivalent amounts of local currencies which could be made available under subparagraph (A).

"(2) The aggregate amount of interest and principal paid into local currency accounts under this subsection in any fiscal year may not exceed the amount approved for such purpose in an Act appropriating funds to carry out this chapter for that fiscal year, which amount may not exceed the amount authorized to be so approved by the annual authorizing legislation for development assistance programs.

"(3) In exercising the authority granted by this subsection, the President should act in concert with other creditor countries.

"(d) The President may on a case-by-case basis waive the requirement of section 110(a) for financial or 'in kind' contributions in the case of programs, projects, or activities in relatively least developed countries.

"(e) Section 110(b) shall not apply with respect to grants to relatively least developed countries.".

(2) The authority granted by section 124 (c) of the Foreign Assistance Act of 1961 shall not become effective until October 1, 1979.

(b)(1) Section 110(a) of such Act is amended by striking out "and except that" and all that follows through the end of the sentence and inserting in lieu thereof a period.

(2) Section 110(b) of such Act is amended by striking out "Except" and all that follows through "no" and inserting in lieu thereof "No".

PROJECT AND PROGRAM EVALUATION

SEC. 113. Chapter 1 of part I of the Foreign Assistance Act, as amended by sections 102 and 112 of this Act, is further amended by inserting the following new section 125 immediately after section 124:

"SEC. 125. PROJECT AND PROGRAM EVALUATION.—(a) The Administrator of the agency primarily responsible for administering this part is directed to improve the assessment and evaluation of the programs and projects carried out by that agency under this chapter. The Administrator shall consult with the appropriate committees of the Congress in establishing standards for such evaluations.

"(b) The President shall report on actions taken by the international financial institutions and the United Nations Development Program to improve the evaluation of projects and programs conducted by those institutions. The report required by this subsection shall be submitted as a part of the report required by section 634.".

AMERICAN SCHOOLS AND HOSPITALS ABROAD

SEC. 114. Section 214 of the Foreign Assistance Act of 1961 is amended—

(1) in subsection (c) by striking out "for the fiscal year 1977, $25,000,000, and for the fiscal year 1978, $25,000,000, which amounts are" and inserting in lieu thereof "$25,000,000 for the fiscal year 1979, which amount is"; and

(2) by striking out subsection (d) and (e) and by redesignating subsection (f) as subsection (d).

HOUSING AND OTHER CREDIT GUARANTY PROGRAMS

SEC. 115. (a) Sections 221 and 222 of the Foreign Assistance Act of 1961 are amended to read as follows:

"SEC. 221. HOUSING GUARANTEES.—The Congress recognizes that shelter requirements are among the most fundamental of human needs. Shelter for most people in the developing countries consists largely of domestic materials assembled by local labor. While recognizing that most financing for such housing must come from domestic resources, the Congress finds that carefully designed programs involving United States capital and expertise can increase the availability of domestic financing for improved housing and related services for low-income people by demonstrating to local entrepreneurs and institutions that providing low-cost housing can be financially viable. The Congress reaffirms, therefore, that the United States should continue to assist developing countries in marshalling resources for low-cost housing. Particular attention should be given to programs which will support pilot projects for low-cost shelter or which will have a maximum demonstration impact on local institutions and national

policy. The Congress declares that the long run goal of all such programs should be to develop domestic construction capabilities and to stimulate local credit institutions to make available domestic capital and other management and technological resources required for effective low-cost shelter programs and policies.

"SEC. 222. AUTHORIZATION.—(a) To carry out the policy of section 221, the President is authorized to issue guaranties to eligible investors (as defined in section 238(c)) assuring against losses incurred in connection with loans made for projects meeting the criteria set forth in section 221. The total principal amount of guaranties issued under this title or heretofore issued under prior housing guaranty authorities, which are outstanding at any one time, shall not exceed $1,180,000,000. The authority of this section shall continue until September 30, 1980. The President may issue regulations from time to time with regard to the terms and conditions upon which such guaranties shall be issued and the eligibility of lenders.

"(b) Activities carried out under this section shall emphasize—

"(1) projects which provide improved home sites to poor families on which to build shelter, and related services;

"(2) projects comprised of expandable core shelter units on serviced sites;

"(3) slum upgrading projects designed to conserve and improve existing shelter;

"(4) shelter projects for low income people designed for demonstration or institution building purposes; and

"(5) community facilities and services in support of projects authorized under this section to improve the shelter occupied by the poor.

"(c) In issuing guaranties under this section with respect to projects in a country which require the use or conservation of energy, the President shall give consideration to the use of solar energy technologies, where such technologies are economically and technically feasible. Technologies which may be used include solar hot water systems, solar heating and cooling, passive solar heating, biomass conversion, photovoltaic and wind applications, and community-scale solar thermal applications.".

(b) Section 222A(h) of such Act is amended by striking out "September 30, 1978" and inserting in lieu thereof "September 30, 1979".

(c) Section 223(a) of such Act is amended by striking out "221, 222," and inserting in lieu thereof "222".

(d) Section 223(b) of such Act is amended in the first sentence—

(1) by striking out "221 or" the first place it appears;

(2) by striking out "221 and section 222 and of" and inserting in lieu thereof "222 and administering housing guaranties heretofore authorized under this title and under";

(3) by striking out "section 221 or" the second place it appears; and

(4) by inserting "this title or" immediately after "heretofore pursuant to".

(e) Section 223(c) of such Act is amended by striking out "section 221 or" and by inserting "under this title or" immediately after "heretofore".

(f) Section 223(d) of such Act is amended—

(1) by striking out "221, 222, 222A," and inserting in lieu thereof "222 or 222A"; and

(2) by inserting "under this title or" immediately after "heretofore".

(g) Section 223(f) of such Act is amended in the first sentence by striking out "section 221 or".

(h) Section 223(g) of such Act is amended by inserting "heretofore under this title or" immediately after "outstanding".

(i) Section 223(i) of such Act is repealed.

(j) Section 223(j) of such Act is amended by striking out "sections 221 and" in the first sentence and inserting in lieu thereof "section".

(k) Section 620(l) of such Act is amended by striking out "221(b)(1)" both places it appears and inserting in lieu thereof "234(a)(1)".

ASSISTANCE FOR CERTAIN DISADVANTAGED CHILDREN IN ASIA

SEC. 116. Chapter 2 of part I of the Foreign Assistance Act of 1961 is amended by striking out the title heading for title V and inserting in lieu thereof the following:

"TITLE V—DISADVANTAGED CHILDREN IN ASIA

"SEC. 241. ASSISTANCE TO CERTAIN DISADVANTAGED CHILDREN IN ASIA.—(a) The Congress recognizes the humanitarian needs of disadvantaged children in Asian countries where there has been or continues to be a heavy presence of United States military and related personnel in recent years. Moreover, the Congress finds that inadequate provision has been made for the care and welfare of such disadvantaged children, particularly those fathered by United States citizens.

"(b) Accordingly, the President is authorized to expend up to $2,000,000 of funds made available under chapter 1 of this part, in addition to funds otherwise available for such purposes, to help meet the needs of these disadvantaged children in Asia by assisting in the expansion and improvement of orphanages, hostels, day care centers, school feeding programs, and health, education, and welfare programs. Assistance provided under this section shall be furnished under the auspices of and by international organizations or private voluntary agencies operating within, and in cooperation with, the countries of Asia where these disadvantaged children reside.".

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

SEC. 117. (a) Section 302(a)(1) of the Foreign Assistance Act of 1961 is amended in the first sentence by striking out "for the fiscal year 1977, $219,900,000 and for the fiscal year 1978, $252,000,000" and inserting in lieu thereof "$285,450,000 for the fiscal year 1979 of which not to exceed $300,000 shall be available for contribution to the United Nations Trust Fund on South Africa".

(b)(1) Section 302(a)(1) of such Act is further amended—

(A) by striking out "$42,500,000" in the third sentence and inserting in lieu thereof "$52,000,000"; and

(B) by inserting immediately after the third sentence the following: "Of the funds authorized to be appropriated under this subsection for the fiscal year 1979, not to exceed $52,000,000 shall be available for voluntary contributions to the United Nations Relief and Works Agency for Palestine Refugees, except that not more than $42,500,000 of this amount may be obligated unless the President certifies to the Congress that any contributions above this level have been matched by equivalent contributions by members of the Organization of Petroleum Exporting Countries.".

(2) Not later than January 31, 1979, the Secretary of State shall provide the Committee on Foreign Relations of the Senate and the Committee on International Relations of the House of Representatives with a full and detailed report on the progress made by the Commissioner-General of the United Nations Relief and Works Agency to improve the ration distribution system so that food to Palestine refugees can be more equitably distributed on the basis of need, rather than entitlement.

(c) Section 302(a) of such Act is amended by adding at the end thereof the following new paragraph:

"(3) None of the funds made available under this subsection for the fiscal year 1979 may be used for the United Nations Institute for Namibia unless the President determines that such funds will not be used to support the military or paramilitary activities of the Southwest African Peoples Organization.".

(d) Section 301 of such Act is amended by adding at the end thereof the following new subsection:

"(g) It is the sense of the Congress that the President should instruct the appropriate representatives of the United States to the United Nations to encourage the specialized agencies of the United Nations to transfer the funding of technical assistance programs carried out by such agencies to the United Nations Development Program.".

(e) In addition to amounts otherwise available for such purpose, there are authorized to be appropriated to the President not to exceed $1,000,000 for contributions to the World Assembly on Aging to be convened under the auspices of the United Nations, except that the amount so contributed may not exceed 25 percent of the expenditures of such Assembly. Amounts appropriated under this subsection are authorized to remain available until expended.

INTERNATIONAL DISASTER ASSISTANCE

SEC. 118. (a) Section 491(b) of the Foreign Assistance Act of 1961 is amended by striking "or international organization" and inserting in lieu thereof ", international organization, or private voluntary organization.".

(b) Section 492 of such Act is amended—

(1) in the first sentence by striking out "each of the fiscal years 1977 and 1978" and inserting in lieu thereof "the fiscal year 1979"; and

(2) by striking out the third sentence.

ASSISTANCE FOR AFRICAN REFUGEES

SEC. 119. Chapter 9 of part I of the Foreign Assistance Act of 1961 is amended—

(1) by redesignating section 495D, as added by section 121 of the International Development and Food Assistance Act of 1977, as section 495E; and

(2) by adding at the end thereof the following new section:

"SEC. 495F. ASSISTANCE TO AFRICAN REFUGEES.—The President is authorized to furnish assistance, on such terms and conditions as he may determine, exclusively for the relief and rehabilitation of African refugees and other needy people located in Africa. There is authorized to be appropriated for the fiscal year 1979 for purposes of this section, in addition to amounts otherwise available for such purposes, $15,000,000, which amount is authorized to remain available until expended. Assistance under this section shall be provided in accordance with the policies and general authorities contained in section 491.".

LOCUST PLAGUES CONTROL IN AFRICA

SEC. 120. In order to assist in attempts to control locust plagues in Africa, especially in the Horn of Africa, there is authorized to be appropriated to the President, in addition to amounts otherwise authorized for disaster relief purposes, $2,000,000, which amount is authorized to remain available until expended.

REIMBURSABLE DEVELOPMENT PROGRAMS

SEC. 121. Section 661 of the Foreign Assistance Act of 1961 is amended by striking out "$2,000,000" the first place it appears and all that follows through "1978," and inserting in lieu thereof "$3,000,000 of the funds made available for the purposes of this Act for the fiscal year 1979".

AFRICAN DEVELOPMENT FOUNDATION

SEC. 122. (a) The Congress declares that the United States should place higher priority on the formulation and implementation of policies and programs to enable the people of African nations to develop their potential, fulfill their aspirations, and enjoy better, more productive lives. In furtherance of these objectives, the Congress finds that additional support is needed for community-based self-help activities in Africa and that an African Development Foundation, orga-

nized to further the purposes set forth in section 123 of the Foreign Assistance Act of 1961, can complement current United States development programs in Africa.

(b) The Congress therefore requests that the President report to the Congress not later than February 1, 1979, on steps he has taken to review proposals for an African Development Foundation.

## TITLE II—FOOD FOR PEACE

### EFFECTIVENESS OF FOOD ASSISTANCE IN MEETING BASIC FOOD NEEDS

SEC. 201. The Congress finds that food assistance provided by the United States to developing countries under title I of the Agricultural Trade Development and Assistance Act of 1954 often is distributed within those countries in ways which do not significantly alleviate hunger and malnutrition in those countries. In order to determine how United States food assistance can be more effectively used to meet the food needs of the poor in developing countries, the President shall submit to the Congress not later than February 1, 1979, a report (1) explaining why food assistance provided to developing countries under title I of the Agricultural Trade Development and Assistance Act of 1954 is not more successful in meeting the food needs of those suffering from hunger and malnutrition, and (2) recommending steps which could be taken (including increasing the proportion of food assistance which is furnished under titles II and III of that Act) to increase the effectiveness of food assistance under that Act in meeting those needs.

### TRANSPORTATION COSTS FOR FOOD FOR DEVELOPMENT PROGRAMS

Sec. 202. Section 304 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following new subsection:

"(d) The Commodity Credit Corporation may pay, with respect to commodities made available under this title to a country on the United Nations Conference on Trade and Development list of relatively least developed countries, freight charges from United States ports to designated ports of entry abroad or to designated points of entry abroad in the case of landlocked countries.".

### APPLICATION OF FOOD FOR DEVELOPMENT PROCEEDS TO REPAYMENT OBLIGATIONS

SEC. 203. Section 305 of the Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) by inserting "(a)" immediately after "SEC. 305."; and

(2) by adding at the end thereof the following new subsection:

"(b) Such disbursements shall be deemed to be payments with respect to the credit furnished pursuant to the agreement or if, in the case of a country on the United Nations Conference on Trade and Development list of relatively least developed countries, the disbursements in a fiscal year are greater than the amount of the annual repayment obligation which that country would have to meet for that fiscal year under the agreement but for the disbursements in accordance with the Food for Development Program, then the disbursements which are in excess of the amount of that annual repayment obligation may, to the extent provided in the agreement, be considered as payments with respect to the annual repayment obligations of that country for that fiscal year under other financing agreements under this Act.".

## TITLE III—COORDINATION AND ADMINISTRATION OF THE DEVELOPMENT-RELATED PROGRAMS AND POLICIES OF THE UNITED STATES

### DECLARATION OF OBJECTIVES

SEC. 301. The Congress declares that the United States Government should place higher priority, in the formulation and implementation of governmental policies, on efforts to help meet the legitimate needs of poor countries for improving the quality of the lives of their populations. The Congress also declares that greater effectiveness and efficiency of United States assistance to such countries can be achieved through improved coordination and administrative consolidation.

### IMPLEMENTATION OF OBJECTIVES

SEC. 302. In furtherance of the objectives set forth in section 301, the Congress directs the President to institute a strengthened system of coordination of all United States economic policies which impact on the developing countries of the world, including but not limited to policies concerning international trade, commodity agreements, investment, debt, international financial institutions, international and multilateral development agencies and programs, and concessional and grant food assistance, in addition to policies concerning United States bilateral economic development assistance.

### REPORT

SEC. 303. The President shall report to the Congress not later than February 1, 1979, on the steps he has taken to implement this title and on any further legislation which may be needed to achieve the objectives of this title.

## TITLE IV—UNIFIED PERSONNEL SYSTEM

### ESTABLISHMENT OF A UNIFIED PERSONNEL SYSTEM

SEC. 401. (a) Not later than March 15, 1979, the President shall submit to the Congress, and publish in the Federal Register, regulations establishing a unified personnel system for all employees of the agency primarily responsible for administering part I of the Foreign Assistance Act of 1961. In preparing such regulations, the President shall keep the appropriate committees of the Congress fully and currently informed, and shall consult with them on a regular basis, concerning the nature of the unified personnel system to be established.

(b) The regulations submitted to the Congress pursuant to subsection (a)—

(1) may not become effective until after the end of the 90-day period beginning on the date of such submission in order to provide the appropriate committees of the Congress an opportunity to review them; and

(2) shall not become effective then if, during such 90-day period, either House of Congress adopts a resolution stating in substance that it disapproves the personnel system proposed to be established by the regulations.

(c) Regulations which take effect pursuant to this section shall have the force and effect of law and shall apply with respect to the personnel of the agency primarily responsible for administering part I of the Foreign Assistance Act of 1961, notwithstanding any inconsistent provision of law unless that provision of law specifically states that it supersedes regulations issued under this section.

## TITLE V—ADMINISTRATIVE PROVISIONS

### USE OF COMPETITIVE SELECTION PROCEDURES

SEC. 501. Section 601 of the Foreign Assistance Act of 1961 is amended by adding the following new subsection at the end thereof:

"(e)(1) The Congress finds that significantly greater effort must be made in carrying out programs under part I of this Act to award contracts on the basis of competitive selection procedures. All such contracts should be let on the basis of competitive selection procedures except in those limited cases in which the procurement regulations governing the agency primarily responsible for administering part I of this Act allow noncompetitive procedures to be used.

"(2) In order to provide the Congress with information to assist it in assessing the efforts of the agency primarily responsible for administering part I of this Act to make the maximum possible use of competitive selection procedures, the Administrator of that agency—

"(A) when submitting the congressional presentation materials for development assistance for fiscal year 1980, shall also submit to the Congress a report identifying and describing each contract in an amount in excess of $100,000 which the agency entered into without competitive selection procedures during the period April 1, 1978, to September 30, 1978, and explaining why each such contract was not the subject of competitive selection procedures; and

"(B) when submitting the congressional presentation materials for development assistance for fiscal year 1981, shall also submit to the Congress a report identifying and describing each contract in an amount in excess of $100,000 which the agency entered into without competitive selection procedures during the fiscal year 1979 and explaining why each such contract was not the subject of competitive selection procedures.".

### ANNUAL FOREIGN ASSISTANCE REPORT

SEC. 502. (a) Chapter 2 of part III of the Foreign Assistance Act of 1961 is amended—

(1) by striking out "(c)" in section 634 (c) and inserting in lieu thereof "SEC. 633A. "FURNISHING INFORMATION.—" and by inserting such redesignated section immediately after section 633; and

(2) by striking out the remaining provisions of section 634 and inserting in lieu thereof the following:

"SEC. 634. ANNUAL REPORT.—(a) In order that the Congress and the American people may be better and more currently informed regarding United States development policy, including the amounts and effectiveness of assistance provided by the United States Government to developing countries and international organizations, the Chairman of the Development Coordination Committee shall transmit to the Congress not later than February 1 of each year a report on foreign assistance for the fiscal year ending the previous September 30. The report shall include—

"(1)(A) a comprehensive and coordinated review of all United States policies and programs having a major impact on the development of developing countries, including but not limited to bilateral and multilateral assistance, trade, debt, employment, food, energy, technology population, oceans, environment, human settlements, natural resources, and participation in international agencies concerned with development;

"(B) an assessment of the impact of such policies and programs on the well-being of the poor majority in developing countries in accordance with the policy objectives of chapter 1 of part I, including the progress developing countries are making toward achieving those objectives which are indicative of improved well-being of the poor majority, which objectives shall include but not be limited to increasing life expectancy and literacy, lowering infant mortality and birth rates, and increasing food production and employment; and

"(C) an assessment of the impact of such policies and programs on economic conditions in the United States, including but not limited to employment, wages, and working conditions;

"(2) the dollar value of all foreign assistance and guaranties by category and by country provided or made by the United States Government by any means to all foreign countries and international organizations—

"(A) from 1946 to the fiscal year immediately preceding the fiscal year for which the report is required;

"(B) as presented to Congress for the immediate preceding fiscal year;

"(C) as obligated during the immediately preceding fiscal year;

"(D) as planned for the fiscal year in which the report is presented; and

"(E) as proposed for the fiscal year following the year in which the report is presented;

"(3) a summary of repayments, by country, to the United States from previous foreign assistance loans;

"(4) the status of each loan and each contract of guaranty or insurance theretofore made under this Act, predecessor Acts, or any Act authorizing international security assistance, with respect to which there remains outstanding any unpaid obligation or potential liability; the status of each extension of credit for the procurement of defense articles or defense services, and of each contract of guarantee in connection with any such procurement, theretofore made under the Arms Export Control Act with respect to which their remains outstanding any unpaid obligation or potential liability; the status of each sale of agricultural commodities on credit terms, theretofore made under the Agricultural Trade Development and Assistance Act of 1954 with respect to which there remains outstanding any unpaid obligation; and the status of each transaction with respect to which a loan, contract or guarantee of insurance, or extension of credit (or participation therein) was theretofore made under the Export-Import Bank Act of 1945 with respect to which there remains outstanding any unpaid obligation or potential liability; except that such report shall include individually only any loan, contract, sale, extension of credit, or other transaction listed in this paragraph which is in excess of $1,000,000;

"(5)(A) the status of the debt servicing capacity of each country receiving assistance under this Act;

"(B) all forms of debt relief granted by the United States with respect to such countries, together with a detailed statement of the specific debt relief granted with respect to each such country and the purpose for which it was granted; and

"(C) a summary of the net aid flow from the United States to such countries, taking into consideration the debt relief granted by the United States; and

"(6) such other matters relating to foreign assistance provided by the United States Government under part I as the Chairman of the Development Coordination Committee considers appropriate.

"(b) For purposes of this section—

"(1) 'foreign assistance' means any tangible or intangible item provided by the United States Government to a foreign country or international organization under this or any other Act, including but not limited to any training, service, or technical advice, any item of real, personal, or mixed property, any agricultural commodity, United States dollars, and any currencies of any foreign country which are owned by the United States Government; and

"(2) 'provided by the United States Government' includes, but is not limited to, foreign assistance provided by means of gift, loan, sale, credit, or guaranty.".

(b) Part III of the Foreign Assistance Act of 1961 is amended by redesignating section 671 as section 634A and by inserting such redesignated section immediately after section 634.

(c) Part III of such Act, as amended by subsection (b) of this section, is further amended by adding the following new section immediately after new section 634A:

"SEC. 634B. CLASSIFICATION OF REPORTS.—All information contained in any report transmitted under this Act shall be public information. However, in the case of any item of information to be included in any such report that the President, on an extraordinary basis, determines is clearly detrimental to the security of the United States, he shall explain in a supplemental report why publication of each specific item would be detrimental to the security of the United States. A supplemental report shall be transmitted to the Congress at the time the report is transmitted.".

(d)(1) Title XI of chapter 2 of part I and sections 120(d), 222A(j), 495C(e), 620(w), 621A(c), 640B(d), and 657 of the Foreign Assistance Act of 1961 are repealed.

(2) Section 640B(g) of such Act is amended by striking out "subsection (d), the President" and inserting in lieu thereof "section 634, the Chairman of the Committee".

REIMBURSABLE TECHNICAL ASSISTANCE

SEC. 503. Section 607 of the Foreign Assistance Act of 1961 is amended by redesignating subsection (b) as subsection (c) and by inserting the following new subsection (b) immediately after subsection (a):

"(b) When any agency of the United States Government provides services on an advance-of-funds or reimbursable basis under this section, such agency may contract with individuals for personal service abroad or in the United States to perform such services or to replace officers or employees of the United States Government who are assigned by the agency to provide such services. Such individuals shall not be regarded as employees of the United States Government for the purpose of any law administered by the Civil Service Commission.".

AUDITOR GENERAL

SEC. 504. Section 624 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(g)(1) In addition to the officers provided for in subsection (a) of this section, there shall be an Auditor General who shall be appointed by the Administrator of the agency primarily responsible for administering part I of this Act. The Auditor General shall be compensated at the rate provided for level V of the Executive Schedule under section 5316 of title 5, United States Code.

"(2) The Auditor General shall report to and be under the direct supervision of the Administrator.

"(3) The Auditor General shall, with respect to the duties and responsibilities of the agency primarily responsible for administering part I of this Act and subject to the authority of the Administrator of such agency, supervise, direct, and control all audit and investigative activities relating to the programs and operations of the agency.

"(4) The Auditor General shall submit an annual report to the Administrator. This report shall be provided to the Congress without further clearance or approval as part of the annual report required by section 634 of this Act.

"(5) In the execution of the responsibilities and duties assigned in paragraph (3) of this subsection, the Auditor General shall have (A) access to all records, reports, papers, and documents of the agency and its administrative subdivisions, and (B) authority to request such information or assistance as necessary for carrying out the duties set forth in this subsection from any Federal, State, or local governmental agency or unit thereof, and from contractors, grantees, and loan recipients of the agency.".

MOTOR VEHICLES

SEC. 505. Section 636(a)(5) of the Foreign Assistance Act of 1961 is amended by striking "$3,500" and inserting in lieu thereof "the current market price in the United States of a mid-sized sedan or station wagon meeting the requirements established by the General Services Administration for a Class III vehicle of United States manufacture (or, if the replacement vehicle is a right-hand drive vehicle, 120 percent of that price)".

OPERATING EXPENSES

SEC. 506. Section 667(a) of the Foreign Assistance Act of 1961 is amended—

(1) in the text preceding paragraph (1) by striking out "1978" and inserting in lieu thereof "1979"; and

(2) in paragraph (1) by striking out "$220,200,000" and inserting in lieu thereof "$261,000,000".

## TITLE VI—MISCELLANEOUS PROVISIONS

REDUCTION OF AUTHORIZATION

SEC. 601. The total funds authorized to be appropriated in this Act (excluding funds authorized to be appropriated to carry out section 214 of the Foreign Assistance Act of 1961) shall be reduced by 5 percent.

PROHIBITIONS ON ASSISTANCE TO VIETNAM, CAMBODIA, UGANDA, AND CUBA

SEC. 602. Notwithstanding any other provision of law or of this Act, funds authorized to be appropriated in this Act shall not be used for any form of aid, either by monetary payment or by the sale or transfer of any goods of any nature, to the Socialist Republic of Vietnam, Cambodia, Uganda, or Cuba.

REPORTS TO CONGRESS ON DEBT RELIEF AGREEMENTS

SEC. 603. (a)(1) The Secretary of State shall keep the Committee on Foreign Relations of the Senate, the Committee on International Relations of the House of Representatives, and the Committee on Appropriations of each House of the Congress fully and currently informed of any negotiations with any foreign government with respect to any cancellation, renegotiation, rescheduling, compromise, or other form of debt relief (including any modification of the terms, conditions, or manner of repayment), with regard to any debt owed to the United States by such foreign government.

(2) The Secretary of State shall transmit to such committees a copy of the text of any agreement with any foreign government which would result in any such debt relief no less than thirty days prior to its entry into force, together with a detailed justification of the interest of the United States in the proposed debt relief. The requirements of this paragraph shall not apply with respect to an agreement if a statutory requirement exists that the amount of the debt relief provided by the agreement may not exceed the amount approved for such purposes in advance in an appropriation Act.

(b) Section 4 of the Foreign Disaster Assistance Act of 1974 is repealed.

MISCELLANEOUS REPEALS

SEC. 604. Sections 302(d), 302(e), 302(f), 302(g), 302(h), 304, 494A, 495A, 618, 619, 637(a), 649, 651, 655, 656, 658, and 665, and chapters 6 and 7 of part I, of the Foreign Assistance Act of 1961 are repealed.

EFFECTIVE DATE

SEC. 605. The amendments made by this Act shall take effect on October 1, 1978.

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12222) to amend the Foreign Assistance Act of 1961 to authorize development and economic assistance programs for fiscal year 1979, to make certain changes in the authorities of that act and the Agricultural Trade Development and Assistance Act of 1954, to improve the coordination and administration of U.S. development-related policies and programs, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1979

The conference substitute contains authorizations for fiscal year 1979 appropriations of $1,795 million for bilateral economic assistance programs. The amount authorized to be appropriated in the conference substitute is $38.1 million less than the total House authorization, $49.4 million more than the total Senate authorization, and $43.5 million less than the original executive branch request.

The amount contained in the conference substitute compared to the amounts requested by the executive branch and recommended by the House and Senate follow:

AUTHORIZATION OF APPROPRIATION FOR FISCAL YEAR 1979

[In millions of dollars]

| Program | Executive branch request for fiscal year 1979 | House bill | Senate amendment | Conference substitute |
|---|---|---|---|---|
| Bilateral development assistance: | | | | |
| Agriculture, rural development, and nutrition | 673.2 | 673.2 | 665.2 | 665.2 |
| Population planning | 205.4 | 225.4 | 224.8 | 224.8 |
| Health | 148.5 | 148.5 | 144.0 | 148.5 |
| Education and human resources development | 109.0 | 109.0 | 98.2 | 109.0 |
| Technical assistance, energy, research reconstruction, and selected development problems | 126.2 | 126.2 | 126.2 | 126.2 |
| American schools and hospitals abroad | 8.0 | 25.0 | 25.0 | 25.0 |
| International organizations and programs | 282.2 | 283.5 | 290.1 | 285.5 |
| World assembly on aging | 0 | 1.0 | 1.0 | 1.0 |
| International disaster assistance | 25.0 | 25.0 | (1) | 25.0 |
| Locust control | 0 | 0 | 2.0 | 2.0 |
| Assistance to African refugees | 0 | 15.0 | 0 | 15.0 |
| Operation expenses (AID) | 261.0 | 261.0 | 261.0 | 261.0 |
| Subtotal | 1,838.5 | [2] 1,892.8 | 1,837.5 | 1,888.2 |
| Reductions | 0 | [3] 59.7 | [4] 91.9 | [5] 93.0 |
| Total | 1,838.5 | 1,833.1 | 1,745.6 | 1,795.0 |

[1] Senate amendment authorized "such amounts as may be necessary."
[2] House bill also included $1,855,000,000 for the economic support fund for fiscal year 1979, but the fund was included in the conference on S. 3075, the International Security Assistance Act of 1978.
[3] 5-percent cut, to be applied to each sum except for agriculture, rural development and nutrition and American schools and hospitals abroad.
[4] 5-percent cut, to be applied against the total funds authorized.
[5] 5-percent overall cut as required under the Senate amendment, except for the exemption for American schools and hospitals abroad provided in the House bill.

SHORT TITLE

The House bill cited the act as the "International Development and Food Assistance Act of 1978."

The Senate amendment cited the act as the "International Development Assistance Act of 1978."

The conference substitute is the same as the House provision.

DEVELOPMENT ASSISTANCE POLICY STATEMENTS

*Efficient utilization of energy*

The Senate amendment included as one of the principles to guide bilateral development assistance the statement that U.S. assistance shall recognize that the prosperity of developing countries and effective development efforts require the adoption of an overall strategy that promotes efficient utilization of energy and that U.S. assistance shall consider the full implications of such assistance on the price, availability, and consumption of energy in recipient countries.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision.

*Use of private sector "free labor unions"*

The House bill provided that, to the maximum extent possible, U.S. development efforts should be carried out through the private sector, including those institutions which already have ties in developing areas.

The Senate amendment stated the same policy and added "free labor unions" to the illustrative list of private sector institutions.

The conference substitute is the same as the Senate provision.

*Private investment*

The House bill stated that the development programs to which the United States lends support should reflect, to the maximum extent possible, the role of U.S. private investment.

The Senate amendment stated that, to the maximum extent practicable, U.S. private investment should be encouraged in development programs to which the United States lends support.

The conference substitute is the same as the Senate provision.

*Large-scale capital transfers*

The House bill stated that U.S. bilateral assistance should be concentrated on projects which do not involve large-scale capital transfers, but if such transfers are involved, they should be in a multilateral framework.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

*Absolute poverty*

The House bill encourages the President to explore with other countries the feasibility of a worldwide cooperative effort to overcome the worst aspects of absolute poverty and to assure self-reliant growth in the developing countries by the end of the century.

The Senate amendment did not contain a comparable provision.

Th conference substitute is the same as the House provision.

PRIVATE AND VOLUNTARY ORGANIZATIONS AND COOPERATIVES

The Senate amendment included a statement of policy (1) favoring an increase in development assistance activities by private and voluntary organizations and cooperatives without compromising their private and independent nature; (2) declaring the desirability of supplementing their resources with public funding for development activities; and (3) urging the Agency for International Development to draw on the resources of private voluntary organizations and cooperatives.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision.

REPEAL OF PROHIBITION ON ECONOMIC SUPPORT (ESF) RECIPIENTS RECEIVING DEVELOPMENT ASSISTANCE

The House bill repealed section 115 of the Foreign Assistance Act of 1961, which prohibits, without express congressional approval, the use of both development and ESF funds in the same country in the same fiscal year.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

The committee of conference expects that development assistance and economic support funds will be provided to the same country in the same fiscal year only in exceptional circumstances. The committee further expects that any development assistance funds used in countries receiving economic support funds will be fully justified in congressional presentation materials and will meet all criteria established in the Foreign Assistance Act for development assistance projects and programs. In repealing section 115, the committee of conference noted that under the prior notification procedures of section 671 of the Foreign Assistance Act of 1961 (which becomes section 634A under this bill), the House Committee on International Relations and the Senate Committee on Foreign Relations are to be notified of any proposal to modify programs justified to Congress in the annual presentation materials, including proposals that would result in the provision of development assistance and economic support funds to the same country in the same fiscal year.

FORESTRY AND SOIL CONSERVATION

The Senate amendment amended section 103(b)(1) of the Foreign Assistance Act of 1961, relating to assistance for agriculture, rural development, and nutrition, to include forestry and soil conservation in the exam-

ples of services and supplies needed by farmers.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision.

AGRICULTURAL RESEARCH

The Senate amendment amended section 103A(2) of the Foreign Assistance Act of 1961, relating to agricultural research, to add "environmental" factors to the list of factors affecting small farmers which shall be subjects for research carried out under that act.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision.

POPULATION AND HEALTH

*Contribution to World Health Organization's special program of research, development, and research training in human reproduction*

The Senate amendment earmarked $4.5 million for fiscal year 1979 to support the World Health Organization's special program of research, development, and research training in human reproduction.

The House bill did not contain a comparable earmark. The House International Relations Committee, however, recommended in its report on this bill that the Agency for International Development make a direct contribution of $4.5 million from the population account to the World Health Organization.

The conference substitute is the same as the House position. The committee of conference reiterates the directive contained in both the House report and the Senate amendment to the effect that the Agency for International Development contribute $4.5 million from the population account to the World Health Organization's special program of research, development, and research training in human reproduction.

*Prohibition on funding for abortions and involuntary sterilizations*

The House bill transferred the prohibitions now in section 114 of the Foreign Assistance Act of 1961 to section 104. In doing so, it made a grammatical change, substituting "None of the funds * * * may be used" for "None of the funds * * * shall be used" in two instances. This change does not alter the meaning of the prohibitions. The House bill also changed the prohibition on the use of funds as a financial incentive to "practice sterilization" to a prohibition on the use of funds as a financial incentive to "undergo sterilization."

The Senate amendment retained section 114 of the Foreign Assistance Act of 1961 without change.

The conference substitute is the same as the House provisions.

*Health assistance authorization*

The House bill authorized assistance under section 104(e) of the Foreign Assistance Act of 1961 for health, health education, disease prevention, and environmental sanitation.

The Senate amendment created a separate subsection for assistance for health and disease prevention activities.

The conference substitute is a compromise provision which maintains health and population authorizations in the same section. The provision authorizes assistance for health programs, to be used primarily for basic integrated health services, safe water and sanitation, disease prevention and control, and related health planning and research. It also requires that planning for health and population assistance programs be coordinated with appropriate food and nutrition programs and states that to the maximum extent practicable research be carried out in developing countries.

The committee of conference noted that the new statement of health policy is intended to emphasize the continuing role and responsibility of the Agency for International Development as the primary source of U.S. health assistance to developing countries.

WOMEN IN DEVELOPMENT

The House bill directed that up to $10 million be used for assistance to promote the participation of women in the economies of developing countries, with emphasis on programs which increase income and economic productivity and which strengthen the capacity of women and women's organizations to participate in development activities.

The Senate amendment was similar to the House provision, without specific reference to providing net increases in income or strengthening women's organizations.

The conference substitute is the same as the Senate provision. The committee of conference intends that the $10 million funding provided in this section be used to further programs to involve women in the development process, including technical support to Agency for International Development missions to help them implement this section, assistance where appropriate to indigenous women's organizations in developing countries, and dissemination of relevant research findings and data.

HUMAN RIGHTS

The House bill authorized and encouraged the President to use not less than $1.5 million of development assistance funds in fiscal year 1979 for programs and activities to encourage or promote increased adherence to civil and political rights, as set forth in the Universal Declaration of Human Rights.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

ENVIRONMENT AND NATURAL RESOURCES

The House bill directed the President to carry out studies to identify the major environment and natural resource problems, and the institutional capabilities to solve those problems, which exist in developing countries. The results of these studies were to be reported to Congress.

The Senate amendment included the same directive. In addition, it required that the studies indicate what the Agency for International Development is doing to assist developing nations to create environmental protection institutions, and that no less than $1.5 million would be used for the studies.

The conference substitute is the same as the House provision.

ENERGY TECHNOLOGIES

*Relationship to other agencies and programs*

The Senate amendment revised section 119 of the Foreign Assistance Act of 1961 relating to renewable and unconventional energy technologies, to provide that the Agency for International Development shall coordinate with the Department of Energy, to the maximum extent possible, the planning and implementation of energy programs authorized under chapter 1, part 1, of the Foreign Assistance Act including section 107, and shall consult with the Department of Energy on such planning and implementation.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision.

*Increasing awareness of energy programs*

The Senate amendment directed the Agency for International Development to insure that each country mission be aware of the programs available under section 119 and, to the extent practicable, that at least one officer at each mission be properly trained on how to identify energy needs and to develop, in conjunction with experts, energy programs.

The House bill did not contain a comparable provision.

The conference substitute is the same as the House position. The committee of conference urges the Agency for International Development to insure that each of its missions has personnel who are knowledgeable about the Agency's energy program and are capable of identifying energy needs and of developing energy programs in conjunction with experts.

RELATIVELY LEAST DEVELOPED COUNTRIES

The Senate amendment established a new section of the Foreign Assistance Act of 1961 setting forth special policies to guide assistance to the relatively least developed countries. The new section:

(1) Contained a statement that relatively least developed countries (RLDC's), as determined on the basis of criteria comparable to those used for the U.N. General Assembly list of least developed countries, are characterized by extreme poverty, very limited infrastructure, and limited administrative capacity which may require special measures to insure the full effectiveness of development assistance.

(2) Provided that assistance to RLDC's should be on a grant basis (similar to existing section 102(e) of the Foreign Assistance Act).

(3) Provided that prior assistance to RLDC's should be made consistent with present grant assistance and, therefore, authorized the President, on a case-by-case basis, (*a*) to permit payments on principal or interest of development assistance loans to be used for development activities, and (*b*) to waive interest payments on these loans if the President determined the country would be unable to use the funds for developmental purposes. The Senate amendment provided that amounts waived or paid into local currency accounts must be authorized and appropriated annually; that this authority should be used in concert with other creditor countries; and that this new authority would not become effective until fiscal year 1980.

(4) Provided that the President may, on a case-by-case basis, waive the requirement of section 110(a) for financial or "in kind" contributions by a recipient RLDC government (similar to the RLDC exemption in section 110(a) of the Foreign Assistance Act).

(5) Shifted language of section 110(b) of the Foreign Assistance Act, which exempts RLDC's from the 36-month limitation on grant project assistance, to this new section.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision.

PROJECT AND PROGRAM EVALUATION

The Senate amendment directed the Administrator of the Agency for International Development to improve the Agency's assessment and evaluation procedures. The amendment also required the President to report to Congress on the evaluation procedures of the international financial institutions and the United Nations Development Program.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision.

AMERICAN SCHOOLS AND HOSPITALS ABROAD

The House bill provided that assistance under the American schools and hospitals abroad program not be furnished in any fiscal year to more than four institutions in the same country, only one of which may be a hospital and one a university, excluding any institution receiving such assistance as of September 30, 1978.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the Senate position. The committee of conference feels that the programs carried out under section 214 of the Foreign Assistance Act of 1961, authorizing the American schools and hospitals abroad program, have proliferated beyond what the Congress intended when it first authorized the program in 1959. As a result, the authority to assist schools and hospitals abroad has been administratively expanded and the original legislative goal of supporting institutions of excellence which can be clearly identified as American institutions is not always being achieved in practice.

Although the committee of conference did not accept the House provision limiting assistance under this program to a certain number of institutions in any one country in a given year, it is intended that any new programs be restricted to those institutions which serve as demonstration centers for American ideas and practices in education and health.

The committee of conference noted with approval recent steps the Agency for International Development has taken toward this end. In particular, the committee of conference supported the concept of establishing criteria for project selection for the American schools and hospitals abroad program. The Agency for International Development should continue its efforts to define these criteria and complete such work seasonably in the coming fiscal year.

During the coming fiscal year, the Committee on International Relations and the Committee on Foreign Relations will pay particular attention to Agency actions to insure that the standards set forth are applied in project selection. To insure that this program encourages the spread of American ideas and practices on a worldwide oasis, special consideration should be given to programs meeting established criteria of excellence which also increase the geographic distribution of the program.

SOLAR ENERGY FOR HOUSING GUARANTY PROGRAM

The House bill directed consideration to be given in housing guaranty projects to solar energy. The provision covered not just the use but also the conservation of energy and stated that such consideration should be given where the technologies are economically and technically feasible.

The Senate amendment directed consideration to be given to the use of solar energy in housing guaranty projects which require the use of an energy source.

The conference substitute is the same as the House provision.

ASSISTANCE TO DISADVANTAGED CHILDREN AND ORPHANS

The Senate amendment authorized up to $2 million in development assistance funds for assistance to disadvantaged children in Asia, particularly those fathered by American citizens in countries where there has been, or continues to be, a large U.S. military presence. This assistance is to be furnished through international organizations and private voluntary agencies.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision. The committee of conference intends that up to $150,000 of the funds made available under this provision be used for the verification of birth records of children in Thailand born of American fathers and Asian mothers.

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

*U.N. Trust Fund on South Africa*

The House bill earmarked $300,000 of the funds authorized for section 302(a) of the Foreign Assistance Act of 1961, which authorizes appropriations for voluntary contributions to international organization and programs, for a contribution to the United Nations Trust Fund on South Africa.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

*UN Institute for Namibia*

The House bill provided that none of the funds available under section 302(a) of the Foreign Assistance Act of 1961 for fiscal year 1979 may be used for the United Nations Institute for Namibia unless the President determines that funds contributed will not be used to support the activities of the South-West African People's Organization (SWAPO)

The Senate amendment did not contain a comparable provision

The conference substitute incorporates the House provision with an amendment to require a Presidential determination that funds contributed to the U.N. Institute for Namibia will not be used to support the military or paramilitary activities of SWAPO.

*U.N. University*

The Senate amendment provided that none of the funds authorized to be appropriated under section 302(a) of the Foreign Assistance Act of 1961 be expended for contribution to the United Nations University.

The House bill did not contain a comparable provision.

The conference substitute is the same as the House position.

*Relief and Works Agency for Palestine Refugees (UNRWA)*

The Senate amendment (*a*) increased the ceiling on the fiscal year 1978 U.S. contribution UNRWA by $9.5 million; (*b*) put a $52 million ceiling on a fiscal year 1979 U.S. contribution to UNRWA, with contributions above $42 million to be made available only upon Presidential determination of matching contributions from members of the Organization of Petroleum Exporting Countries; and (*c*) required a report from the Secretary of State by January 31, 1979, on improvements in the UNRWA ration distribution system.

The House bill did not contain comparable provisions.

The conference substitute is the same as the Senate provisions.

*U.N. Development Program Disaster Preparedness and Prevention Trust Fund*

The Senate amendment earmarked not to exceed $5 million for a Disaster Preparedness and Prevention Trust Fund to be administered by the United Nations Development Program.

The House bill did not contain a comparable provision.

The conference substitute is the same as the House position.

The committee of conference agreed not to provide the funds for this purpose pending completion of a United Nations study of the scope and magnitude of assistance required by the world's most disaster-prone nations. The committee of conference noted the urgent need to improve the capability of governments of poor, disaster-prone nations to manage international disaster assistance efforts and to develop their capacity to prevent disasters from affecting the lives and property of their people. If a U.N.-sponsored Disaster Preparedness and Prevention Trust Fund is agreed upon, the committee of conference urges the President to give careful consideration to requesting authorization of appropriations of funds for a U.S. contribution to the Fund. The committee of conference believes that such an international program would be complementary to international disaster preparedness efforts now being undertaken by the United States and would enlist other nations in sharing the burden.

*U.N. Development Program Technical Assistance*

The Senate amendment stated the sense of Congress that U.S. representatives to the United Nations encourage the U.N. specialized agencies to transfer funding of their technical assistance programs to the United Nations Development Program.

The House bill did not contain a similar provision.

The conference substitute is the same as the House provision.

INTERNATIONAL DISASTER ASSISTANCE

*General policy*

The Senate amendment added to present policy language on international disaster assistance in the Foreign Assistance Act of 1961, a statement that disaster assistance symbolizes U.S. humanitarian concern for those in need abroad and constitutes an important element in U.S. foreign relations and aid.

The House bill did not contain a comparable provision.

The conference substitute is the same as the House position.

*Assistance for reconstruction*

The Senate amendment added reconstruction to the existing purposes (relief and rehabilitation) of the disaster assistance program.

The House bill did not contain a comparable provision.

The conference substitute is the same as the House position.

*Private voluntary organization*

The Senate amendment added "private voluntary agency" as a vehicle for distributing assistance to the existing authorities for disaster assistance to foreign countries and international organizations.

The House bill did not contain a comparable provision.

The conference substitute is essentially the same as the Senate provisions.

*Funding*

The House bill authorized an appropriation of $25 million for fiscal year 1979.

The Senate amendment established an International Disaster Assistance Fund with permanent authorization for appropriations of "such amounts as may be necessary."

The conference substitute is the same as the House provision.

RELIEF AND REHABILITATION ASSISTANCE FOR TURKEY

The Senate amendment amended section 495D of the Foreign Assistance Act of 1961, to allow use of funds made available for disaster assistance for Turkey to be used for disaster-related scientific equipment.

The House bill did not contain a comparable provision.

The conference substitute is the same as the House position. However, the committee of conference recognizes the desirability of using international disaster assistance funds for disaster preparedness and prediction and contingency planning for natural disasters abroad such as earthquakes and other calamities, as well as for relief and rehabilitation after a disaster has occurred.

ASSISTANCE TO AFRICAN REFUGEES

The House bill authorized $15 million in disaster assistance funds for relief and rehabilitation of refugees and other needy people in Africa.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

LOCUST CONTROL IN AFRICA

The Senate amendment authorized $2 million, in addition to amounts otherwise authorized for disaster relief purposes, for assistance in efforts to control locust plagues in Africa, especially in the Horn of Africa.

The House bill contained no comparable provision.

The conference substitute is the same as the Senate provision.

AFRICAN DEVELOPMENT FOUNDATION

The Senate amendment directed the President to report to Congress by February 1, 1979, on steps taken to review proposals for establishing an African Development Foundation, and to submit thereafter legislation to establish such a foundation.

The House bill did not contain a comparable provision.

The conference substitute requests the President to report by February 1, 1979, on the steps he has taken to review proposals for an African Development Foundation.

REPORTS ON EXCHANGES OF MATERIALS

The House bill required the President to report by February 1 of each year on steps taken to implement section 663 of the Foreign Assistance Act of 1961, which provides for the furnishing of foreign assistance in return for receipt of raw materials.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the Senate position.

IMPROVED COORDINATION AND ADMINISTRATIVE CONSOLIDATION

The House bill included a provision calling for improved coordination and administrative consolidation of U.S. development assistance programs. The provision declared that the U.S. Government should place higher priority on helping to meet the needs of poor countries and on greater effectiveness and efficiency through improved coordination and administrative consolidation of U.S. development assistance programs.

The House bill directed the President to institute a strengthened system of coordinating U.S. economic policies impacting on developing nations and to establish an International Development Cooperation Administration (IDCA) with primary responsibility for coordinating international development activities. The maximum range of such programs was to be placed under IDCA.

The House bill also required a Presidential report on implementation of these provisions by February 1, 1979.

The Senate amendment did not contain a comparable provision.

The conference substitute declares that the U.S. Government should place higher priority on helping to meet the needs of poor countries and on greater effectiveness and efficiency through improved coordination and administrative consolidation of U.S. development assistance programs. It directs the President to institute a strengthened system of coordination of U.S. economic policies which impact on developing nations and requires that he submit a report on implementation of these provisions by February 1, 1979.

The committee of conference urges the President to consider establishing an International Development Cooperation Administration, to supersede the Agency for International Development, which would have, subject to the foreign policy guidance of the Secretary of State, primary responsibility within the U.S. Government for coordination of international development-related activities and which would have within its organizational framework the maximum possible range of U.S. Government agencies and programs related to international development.

UNIFIED PERSONNEL SYSTEM

The House bill required the President to submit by February 1, 1979, regulations establishing a unified personnel system for the Agency for International Development, and in preparing such regulations, to keep the appropriate congressional committees informed. The regulations would not become effective until 30 days after they are submitted to Congress and could be vetoed by either House.

The Senate amendment did not contain a comparable provision.

The conference substitute incorporates the House provision with amendments to (*a*) set March 15, 1979, as the date by which the new personnel plan shall be submitted to Congress; (*b*) provide 90 days for congressional review; and (*c*) removes the provision allowing the Executive to alter the new regulations after they are issued.

The committee of conference declares that the new unified personnel system should be consistent with the President's civil service reform program. In general, it should be based primarily on existing provisions of law governing the Foreign Service personnel system (or where appropriate, with civil service authorities), and should be designed to meet the particular requirements of the Agency for International Development (or its successor agency), which include the need to have its personnel serve overseas and meet language and technical skill requirements.

USE OF COMPETITIVE SELECTION PROCEDURES

The House bill encouraged the Agency for International Development to make greater use of competitive procurement practices in the Agency's procurement process and required a report in the fiscal year 1980 and fiscal year 1981 congressional presentation documents.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

HUMAN RIGHTS REPORTS

*Submission of report*

The House bill retained section 116(d) of the Foreign Assistance Act of 1961 which directs the Secretary of State to make a separate annual report on human rights conditions in countries receiving development assistance.

The Senate amendment replaced the reporting requirements in section 116(d) of the Foreign Assistance Act with the requirement that the Chairman of the Development Coordination Committee include in his annual consolidated report to Congress the status of human rights in countries receiving development assistance.

The conference substitute is the same as the House provision.

*Countries covered by reports*

The House bill amended section 116(d)(1) of the Foreign Assistance Act of 1961 to include in the annual human rights report on recipients of development assistance those countries currently eligible for development assistance or that might become eligible if the requirements for eligibility were modified.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the Senate position.

REPORTING ON AGRICULTURAL DISINCENTIVES

The House bill required a description in the annual consolidated report of the governmental policies of each country receiving assistance which are disincentives to increasing such country's agricultural production and a description and evaluation of each country's efforts toward eliminating such governmental policies.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the Senate position. A separate report on this matter in addition to those already required would cause unnecessary and to some extent repetitive paperwork. However, it is the intent of the committee of conference that the substance of the information required by the House provision be included in the material which is submitted pursuant to section 634(a)(1)(B) of the Foreign Assistance Act of 1961 as part of the annual consolidated report to the Congress.

COMPETITIVE IMPACT REPORT

The Senate amendment required the Secretary to give full consideration, before extending aid with funds authorized to be appropriated by this legislation, to the extent of the likely adverse impact of such aid on U.S. industries and employment either by reducing demand for U.S. goods or increasing imports into the United States. The U.S. International Trade Commission would be required to report annually on the impact of such aid on U.S. industries and employment and make recommendations in the report concerning areas of aid which adversely affect domestic U.S. industries and employment.

The House bill did not contain a comparable provision.

The conference substitute is the same as the House position.

A similar report will be required by section 634 of the Foreign Assistance Act, as amended by this legislation.

REIMBURSABLE TECHNICAL ASSISTANCE

The House bill exempted from agency personnel ceilings those persons hired temporarily to perform services or to replace employees performing services under a reimbursable technical assistance program.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

AUDITOR GENERAL

The Senate amendment established a statutory position of Auditor General for the Agency for International Development (AID) who would:

(1) Be appointed by the AID Administrator and compensated at Executive Level V;

(2) Report directly to the AID Administrator;

(3) Supervise, direct, and control all audit and investigative activities relating to the programs and operations of the Agency;

(4) Submit an annual report to the Administrator, which report would be provided to the Congress without further clearance or approval as part of the annual report required by section 634 of the Foreign Assistance Act of 1961; and

(5) In the execution of the responsibilities and duties described in paragraph (3) above, have access to all records, reports, papers, and documents of the Agency and its administrative subdivisions, as well as the authority to request such information or assistance as necessary for carrying out his duties from any Federal, State, or local governmental agency or unit thereof, and from contractors, grantees, and loan recipients of AID.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision.

5-PERCENT REDUCTION

The House bill provided for a 5-percent reduction of each sum in the bill, with the exception of sections 103 (agriculture, rural development, and nutrition) and 111 (American schools and hospitals abroad) in title I.

The Senate amendment provided for a 5-percent reduction in the total funds authorized in the bill.

The conference substitute provides for a 5-percent reduction in total funds authorized in this bill, excluding funds for the American schools and hospitals abroad program.

PROHIBITION ON AID TO VIETNAM, CAMBODIA, UGANDA, OR CUBA

The House bill contained a provision prohibiting the use of funds authorized to be appropriated in this act for any form of aid or trade, directly or indirectly, to Vietnam, Cambodia, Uganda, or Cuba.

The Senate amendment contained a similar provision but it did not mention trade or specify that assistance either "directly or indirectly" to the four countries be prohibited.

The conference substitute is the same as the Senate provision. The committee of conference intends that the prohibition not apply to assistance to students from Uganda now completing their studies at U.S. institutions.

PRIOR REVIEW OF DEBT MODIFICATION AGREEMENTS

The Senate amendment required the Secretary of State to transmit to the Senate Foreign Relations Committee, the House International Relations Committee, and the Committee on Appropriations of each House of the Congress a copy of any proposed agreement with any foreign government that would modify the terms, conditions, or manner of repayment of any foreign governmental debt owed to the United States, together with a detailed justification of the U.S. interest in the proposed modification, at least 30 days prior to the date of its entry into force. Exempt from this provision were any proposed agreements subject to a statutory requirement that the amount of the debt so canceled, rescheduled, or otherwise modified could not exceed the amount approved in advance in an appropriation act. The Senate amendment also repealed section 4 of the Foreign Disaster Assistance Act of 1974 which deals with debt relief or submission of agreements prior to execution.

The House bill did not contain a comparable provision.

The conference substitute incorporates the Senate provision, with an amendment requiring the Secretary of State to keep the Senate Foreign Relations Committee, the House International Relations Committee, and the Appropriation Committees informed of such debt negotiations.

REPEALS OF OUTDATED SECTIONS OF THE FOREIGN ASSISTANCE ACT OF 1961

*Section 302(h)*

The House bill repealed section 302(h) of the Foreign Assistance Act of 1961 requiring certification that the United Nations Education, Scientific, and Cultural Organization (UNESCO) has taken steps to correct certain policies (the certification has been received).

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

*Section 494A*

The House bill repealed section 494A of the Foreign Assistance Act of 1961, requiring a report on solutions to problems of famine in the Sahel (the report has been received).

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

*Section 495A*

The House bill repealed section 495A of the Foreign Assistance Act of 1961, requiring reports on programing of funds for Guatemala relief. (The funds have been obligated and the reports received.)

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

*Section 651*

The Senate amendment repealed section 651 of the Foreign Assistance Act of 1961, urging the sale of supersonic planes to Israel following the 1967 Middle East war (the planes were sold to Israel).

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision.

ANTITERRORISM

The Senate amendment prohibited the use of funds authorized to be appropriated by this legislation for aid to any nation which supports or harbors any terrorist groups or fails to take appropriate measures to prevent such groups from incursions into the territories of others.

The House bill did not contain a camparable provision.

The conference substitute is the same as the House position.

The committee of conference notes that the Foreign Assistance Act of 1961 already contains a similar provision, section 620A, which provides that,

* * * the President shall terminate all assistance under this act to any government which aids or abets, by granting sanctuary from prosecution, to any individual or group which has committed an act of international terrorism and the President may not thereafter furnish assistance to such government until the end of the 1-year period * * *.

The committee of conference also notes that S. 2236, an act to combat international terrorism, which includes the imposition of sanctions against states which support terrorism, is on the Senate calendar.

ECONOMIC SUPPORT FUND

The House bill amended the Foreign Assistance Act of 1961 to include a new chapter 11 in part I (relating to economic assistance). The amendment established an Economic Support Fund (ESF) program as a successor to the current security supporting assistance program which is in chapter 4 of part II (relating to security assistance) of that act, and authorized appropriation of $1,855 million (less 5 percent) for ESF in fiscal year 1979.

The Senate amendment did not contain a comparable provision. However, the Senate amended chapter 4 of part II of the Foreign Assistance Act for the same purposes in a separate bill, S. 3075, the International Security Act of 1978.

The conference substitute is the same as the Senate position, in that ESF is not included in H.R. 12222. The committee agreed that for fiscal year 1979, ESF should be included in the conference report on S. 3075. At the same time, the House conferees continued to believe that, for substantive reasons as expressed in House Report 95–1087 (pp. 13 and 36–37) and elsewhere in the legislative history of H.R. 12222, the ESF in the future should be contained in foreign economic assistance authorizing legislation and should be transferred to part I of the Foreign Assistance Act. The Senate conferees stated that they will consider the House position again next year.

## CONFERENCE REPORT ON S. 3075, INTERNATIONAL SECURITY ASSISTANCE ACT OF 1978

Mr. ZABLOCKI submitted the following conference report and statement on the Senate bill (S. 3075) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95–1546)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3075) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "International Security Assistance Act of 1978".

CONTINGENCY FUND

SEC. 2. Section 451(a) of the Foreign Assistance Act of 1961 is amended by striking out "fiscal year 1978 not to exceed $5,000,000" and inserting in lieu thereof "fiscal year 1979 not to exceed $5,000,000".

INVOLVEMENT OF UNITED STATES PERSONNEL IN NARCOTICS CONTROL ENFORCEMENT ACTIVITIES ABROAD

SEC. 3. Section 481(c)(1) of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new sentences: "No such officer or employee may interrogate or be present during the interrogation of any United States person arrested in any foreign country with respect to narcotics control efforts without the written consent of such person. The provisions of this paragraph shall not apply to the activities of the United States Armed Services in carrying out their responsibilities under applicable Status of Forces arrangements.".

USE OF HERBICIDES TO ERADICATE MARIHUANA

SEC. 4. Section 481 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(d)(1) Assistance authorized by this chapter may not be made available or used for any program involving the spraying of a herbicide to eradicate marihuana plants if the use of that herbicide is likely to cause serious harm to the health of persons who may use or consume the sprayed marihuana. This prohibition shall not apply if the herbicide is used in conjunction with another substance that will clearly and readily warn potential users and consumers of the sprayed marihuana that a herbicide has been used on it.

"(2) The Secretary of State shall inform the Secretary of Health, Education, and Welfare of the use or intended use by any country or international organization of any herbicide to eradicate marihuana in a program receiving assistance under this chapter. The Secretary of Health, Education, and Welfare, on the basis of scientific information and testing and after receiving comments from the Secretary of Agriculture and the Administrator of the Environmental Protection Agency, shall promptly advise the Secretary of State if the use of that herbicide is likely to cause serious harm to the health of persons who may use or consume marihuana sprayed with that herbicide. If the Secretary of State is so advised with respect to any herbicide, the prohibition contained

in paragraph (1) shall apply with respect to the use of that herbicide.

"(3) The Secretary of State shall submit a comprehensive report to the Congress not later than January 1 of each year explicitly detailing all efforts he has taken to ensure compliance with the requirements of this subsection and to prevent the spraying of marihuana with herbicides that are likely to cause serious harm to human health.".

INTERNATIONAL NARCOTICS CONTROL

SEC. 5. (a) Section 482 of the Foreign Assistance Act of 1961 is amended by striking out "$39,000,000 for the fiscal year 1978" and inserting in lieu thereof "$40,000,000 for the fiscal year 1979".

(b) Such section is further amended—

(1) by inserting "(a)" immediately before "To carry out"; and

(2) by adding at the end of the section the following new subsection:

"(b) Funds authorized to be appropriated by this section shall not be made available for the procurement of weapons or ammunition under this chapter.".

HUMAN RIGHTS

SEC. 6. (a) Paragraph (1) of section 502B (a) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(1) The United States shall, in accordance with its international obligations as set forth in the Charter of the United Nations and in keeping with the constitutional heritage and traditions of the United States, promote and encourage increased respect for human rights and fundamental freedoms throughout the world without distinction as to race, sex, language, or religion. Accordingly, a principal goal of the foreign policy of the United States shall be to promote the increased observance of internationally recognized human rights by all countries.".

(b) Paragraph (2) of such section is amended by striking out "It is further the policy of the United States that, except" and inserting in lieu thereof "Except".

(c) Paragraph (3) of such section is amended by striking out "the foregoing policy" and inserting in lieu thereof "paragraphs (1) and (2),".

(d)(1) Paragraph (2) of such section is amended by adding at the end thereof the following new sentence: "Security assistance may not be provided to the police, domestic intelligence, or similar law enforcement forces of a country, and licenses may not be issued under the Export Administration Act of 1969 for the export of crime control and detection instruments and equipment to a country, the government of which engages in a consistent pattern of gross violations of internationally recognized human rights unless the President certifies in writing to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that extraordinary circumstances exist warranting provision of such assistance and issuance of such licenses.".

(2) Section 4 of the Export Administration Act of 1969 is amended by adding at the end thereof the following new subsection:

"(m)(1) Crime control and detection instruments and equipment shall be approved for export by the Secretary of Commerce only pursuant to a validated export license.

"(2) The provisions of this subsection shall not apply with respect to exports to countries which are members of the North Atlantic Treaty Organization or to Japan, Australia, or New Zealand.".

(e) Section 502B(a)(2) of the Foreign Assistance Act of 1961, as amended by subsection (d)(1) of this section, is further amended by adding at the end thereof the following new sentence: "Assistance may not be provided under chapter 5 of this part to a country the government of which engages in a consistent pattern of gross violations of internationally recognized human rights unless the President certifies in writing to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that extraordinary circumstances exist warranting provision of such assistance.".

MILITARY ASSISTANCE

SEC. 7. (a) Subsection (a)(1) of section 504 of the Foreign Assistance Act of 1961 is amended to read as follows:

"(a)(1) There is authorized to be appropriated to the President to carry out the purposes of this chapter not to exceed $133,500,000 for the fiscal year 1979. Not more than the following amounts of funds available to carry out this chapter may be allocated and made available for assistance to each of the following countries for the fiscal year 1979:

| | |
|---|---|
| "Portugal | $27,900,000 |
| "Spain | 41,000,000 |
| "Jordan | 45,000,000 |
| "Philippines | 17,100,000 |
| "Greece | 35,000,000 |

The amount specified in this paragraph for military assistance to any such country for the fiscal year 1979 may be increased by not more than 10 percent of such amount if the President deems such increase necessary for the purposes of this chapter.".

(b) Section 516(a) of such Act is amended by inserting immediately before the period at the end thereof ", and until September 30, 1981, to the extent necessary to carry out obligations incurred under this chapter during the fiscal year 1978 with respect to Indonesia and Thailand".

STOCKPILING OF DEFENSE ARTICLES FOR FOREIGN COUNTRIES

SEC. 8. Section 514(b)(2) of the Foreign Assistance Act of 1961 is amended by striking out "$270,000,000 for the fiscal year 1978" and inserting in lieu thereof "$90,000,000 for the fiscal year 1979".

INTERNATIONAL MILITARY ASSISTANCE AND SALES PROGRAM MANAGEMENT

SEC. 9. (a) Section 515 of the Foreign Assistance Act of 1961 is amended in the first sentence of subsection (b)(1)—

(1) by striking out "fiscal year 1978" and inserting in lieu thereof "fiscal year 1979"; and

(2) by striking out "Brazil" and inserting in lieu thereof "Turkey, Indonesia, Thailand".

(b) Such section is amended in subsection (d) by striking out "may not exceed 865 for the fiscal year 1978" and inserting in lieu thereof ", including any such members serving on a reimbursable basis pursuant to subsection (b)(3), may not exceed 790 for the fiscal year 1979".

(c) Such section is amended in subsection (f) by striking out "1976" in the last sentence and inserting in lieu thereof "1977, except that the President may assign an aggregate total of not to exceed eight additional defense attachés to such countries in order to perform overseas management functions under this subsection".

(d) Such section is amended in subsection (g) by inserting "for fixed" immediately before "periods of time" in the second sentence.

(e) Such section is amended by adding at the end thereof the following new subsection:

"(h) The President shall continue to instruct United States diplomatic and military personnel in United States missions abroad that they should not encourage, promote, or influence the purchase by any foreign country of United States-made military equipment, unless they are specifically instructed to do so by an appropriate official of the executive branch.".

ECONOMIC SUPPORT FUND

SEC. 10. (a) Chapter 4 of part II of the Foreign Assistance Act of 1961 is amended to read as follows:

"CHAPTER 4—ECONOMIC SUPPORT FUND

"SEC. 531. AUTHORITY.—(a)(1) The Congress recognizes that under special economic, political, or security conditions the national interests of the United States may require economic support for countries or in amounts which could not be justified solely under chapter 1 of part I. In such cases, the President is authorized to furnish assistance to countries and organizations, on such terms and conditions as he may determine, in order to promote economic or political stability. In planning assistance intended for economic development under this chapter, the President shall take into account, to the maximum extent feasible, the policy directions of section 102.

"(2) The Secretary of State shall be responsible for policy decisions and justifications for economic support programs under this chapter, including determinations of whether there will be an economic support program for a country and the amount of the program for each country. The Secretary shall exercise this responsibility in cooperation with the Administrator of the agency primarily responsible for administering part I.

"(b)(1) There are authorized to be appropriated to the President to carry out the purposes of this chapter for the fiscal year 1979, $1,902,000,000.

"(2) Amounts appropriated to carry out this chapter are authorized to remain available until expended.

"(c) Amounts appropriated to carry out this chapter shall be available for economic programs only and may not be used for military or paramilitary purposes.

"SEC. 532. MIDDLE EAST PROGRAM.—(a) The Congress recognizes that a peaceful and lasting resolution of the divisive issues that have contributed to tension and conflict between countries in the Middle East is essential to the security of the United States and the cause of world peace. The Congress declares and finds that the United States can and should play a constructive role in securing a just and durable peace in the Middle East by facilitating increased understanding between the Arab countries and Israel and by assisting the countries in the region in their efforts to achieve economic progress and political stability, which are the essential foundations for peace. It is the sense of the Congress that United States assistance programs in the Middle East should be designed to promote mutual respect and security among the countries in the region and to foster a climate conducive to increased economic development, thereby contributing to a community of free, secure, and prospering countries in the Middle East.

"(b)(1) Of the amount authorized to be appropriated to carry out this chapter for the fiscal year 1979, not less than $785,000,000 shall be available only for Israel, not less than $750,000,000 shall be available only for Egypt, and not less than $93,000,000 shall be available only for Jordan.

"(2) The total amount of funds allocated for Israel under this chapter for the fiscal year 1979 may be made available as a cash transfer. In exercising the authority of this paragraph, the President shall ensure that the level of cash transfers made to Israel does not cause an adverse impact on the total amount of nonmilitary exports from the United States to Israel.

"(3) Not less than two-thirds of the assistance furnished to Israel, and not less

than two-thirds of the assistance furnished to Egypt, under this chapter for the fiscal year 1979 shall be provided on a grant basis.

"(4) The President is requested to provide that at least $65,000,000 of the funds allocated for Egypt under this chapter for the fiscal year 1979 shall be available for the development and encouragement of private enterprise in Egypt. Programs financed under this paragraph shall be developed in close consultation with the Overseas Private Investment Corporation. It is the intent of the Congress that the funds made available under this paragraph should be used, to the maximum extent feasible, to encourage other donors, especially the Arab countries that are members of the Organization of Petroleum Exporting Countries, to participate in private enterprise development in Egypt. Funds made available under this paragraph may be used, among other things, for lending to Egyptian private business enterprise, to provide necessary surveys, services, and programs to encourage and support private enterprise development, and to contract for personnel to assist such programs.

"(5) It is the sense of the Congress that programs which stress regional development or regional scientific and technical cooperation between Israel and its Arab neighbors can contribute in an important way to the mutual understanding that must serve as the basis for permanent peace in the Middle East. Of the amount authorized to be appropriated to carry out this chapter for the fiscal year 1979, not less than $5,000,000 shall be available only to fund regional programs which stress development or scientific and technical cooperation between Israel and its Arab neighbors or programs which would be used for Arab-Israeli cooperation once normalization of relations between Israel and the Arab nations occurs.

"(6)(A) Funds appropriated to carry out this chapter for the fiscal year 1979 may not be expended for construction of the proposed potash production facility in Jordan until the President has determined, and has reported his determination to the Congress, that Jordan has obtained firm commitments from other sources for the financing, in addition to the proposed United States contribution, which will be required for that project.

"(B) Funds appropriated to carry out this chapter for the fiscal year 1979 may not be expended for construction of the proposed Maqarin Dam and Jordan Valley Irrigation System until the President has determined, and has reported his determination to the Congress, that Jordan has obtained firm commitments from other sources for the financing, in addition to the proposed United States contribution, which will be required for that project.

"SEC. 533. SOUTHERN AFRICA PROGRAM.—(a) Of the amount authorized to be appropriated to carry out this chapter for the fiscal year 1979, $60,000,000 shall be available only for the countries of southern Africa to address the problems caused by the economic dislocation resulting from the conflict in that region and for education and job training assistance. Such funds may be used to provide humanitarian assistance to African refugees and persons displaced by war and internal strife in southern Africa, to improve transportation links, interrupted or jeopardized by regional political conflicts, and to provide economic support to countries in the region.

"(b) No assistance may be furnished under this section to Mozambique, Angola, Tanzania, or Zambia, except that the President may waive this prohibition with respect to any such country if he determines, and so reports to the Congress, that furnishing such assistance to such country would further the foreign policy interests of the United States.

"SEC. 534. TURKEY AND CYPRUS PROGRAMS.—(a) Of the amount authorized to be appropriated to carry out this chapter for the fiscal year 1979, not less than $15,000,000 shall be available only for refugee relief and reconstruction on Cyprus.

"(b) Of the amount authorized to be appropriated to carry out this chapter for the fiscal year 1979, not less than $50,000,000 shall be available only for Turkey.".

(b)(1) Section 502B(d)(2)(A) of the Foreign Assistance Act of 1961 is amended by striking out "security supporting assistance" and inserting in lieu thereof "economic support fund".

(2) The second sentence of section 610(b) of such Act is repealed.

(3) Section 653(b) of such Act is amended by striking out "security supporting assistance" each of the three places it appears and inserting in lieu thereof "assistance under chapter 4 of part II of this Act".

(4) Sections 669(a) and 670(a) of such Act are each amended by inserting "(including assistance under chapter 4 of part II)" immediately after "economic assistance" and by striking out "or security supporting".

(5) Section 406(a) of the International Security Assistance and Arms Export Control Act of 1976 is amended by striking out "or security supporting assistance" and inserting in lieu thereof "assistance, no assistance under chapter 4 of part II,".

(6) After September 30, 1978, any reference in any law to security supporting assistance shall be deemed to be a reference to assistance under chapter 4 of part II of the Foreign Assistance Act of 1961.

INTERNATIONAL MILITARY EDUCATION AND TRAINING

SEC. 11. (a) Section 542 of the Foreign Assistance Act of 1961 is amended by striking out "$31,000,000 for the fiscal year 1978" and inserting in lieu thereof "$31,800,000 for the fiscal year 1979".

(b) Section 543 of such Act is amended—

(1) by striking out "and" at the end of paragraph (1);

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following new paragraph:

"(3) to increase the awareness of nationals of foreign countries participating in such activities of basic issues involving internationally recognized human rights.".

ASSISTANCE FOR PEACEKEEPING OPERATIONS

SEC. 12. (a) Part II of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new chapter:

"CHAPTER 6—PEACEKEEPING OPERATIONS

"SEC. 551. GENERAL AUTHORITY.—The President is authorized to furnish assistance to friendly countries and international organizations, on such terms and conditions as he may determine, for peacekeeping operations and other programs carried out in furtherance of the national security interests of the United States.

"SEC. 552. AUTHORIZATION OF APPROPRIATIONS.—(a) There is authorized to be appropriated to the President to carry out the purposes of this chapter, in addition to amounts otherwise available for such purposes, $30,900,000 for the fiscal year 1979.

"(b) Amounts appropriated under this section are authorized to remain available until expended.

"SEC. 553. MIDDLE EAST SPECIAL REQUIREMENTS FUND.—(a) Of the amount authorized to be appropriated to carry out this chapter for the fiscal year 1979, $3,500,000 may be used only for special requirements related to international peacekeeping in the Middle East.

"(b) The President may obligate or expend funds under this section for a foreign country or international organization only if—

"(1) he has transmitted to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations and the chairman of the Committee on Appropriations of the Senate a report setting forth—

"(A) the name of such country or organization;

"(B) the amount of such funds to be made available to such country or organization;

"(C) the purpose for which such funds are to be made available to such country or organization; and

"(D) the reasons why it is in the national interest to use funds under this section for such purpose rather than—

"(i) using other available funds; or

"(ii) if no other funds are available for such purpose, awaiting the enactment of legislation making funds specifically available for such purpose;

"(2) a period of 30 calendar days has elapsed since the Congress received such report; and

"(3) the Congress did not adopt, during such 30-day period, a concurrent resolution stating in substance that the Congress does not approve the proposed use of funds described in such report.

"SEC. 554. ADMINISTRATIVE AUTHORITIES.—Except where expressly provided to the contrary, any reference in any law to part I of this Act shall be deemed to include reference to this chapter and any reference in any law to part II of this Act shall be deemed to include reference to this chapter.".

(b) Section 502B(d)(2)(A) of such Act is amended—

(1) by inserting "or chapter 6 (peacekeeping operations)" immediately after "and training)"; and

(2) by striking out "or part UI (assistance to the Middle East) of this Act".

(c)(1) Section 620B of such Act is amended in paragraph (1) by striking out "or 5" and inserting in lieu thereof "5, or 6".

(2) Section 653(b) of such Act is amended—

(A) by striking out "part V" both places it appears and inserting in lieu thereof "chapter 6 of part II"; and

(B) by inserting immediately before the comma in paragraph (2) "or assistance under chapter 6 of part II".

(3) Section 669(a) and 670(a) of such Act are each amended by inserting "providing assistance under chapter 6 of part II," immediately after "training,".

(4) Part VI of such Act is repealed.

(5) Section 406(a)(1) of the International Security Assistance and Arms Export Control Act of 1976 is amended by inserting "no assistance under chapter 6 of part II," immediately before "and no military" in the first sentence.

UNITED STATES POLICY REGARDING THE EASTERN MEDITERRANEAN

SEC. 13. (a) Section 620(x) of the Foreign Assistance Act of 1961 shall be of no further force and effect upon the President's determination and certification to the Congress that the resumption of full military cooperation with Turkey is in the national interest of the United States and in the interest of the North Atlantic Treaty Organization and that the Government of Turkey is acting in good faith to achieve a just and peaceful settlement of the Cyprus problem, the early peaceable return of refugees to their homes and properties, and continued removal of Turkish military troops from Cyprus in the context of a solution to the Cyprus problem, and the early serious resumption of intercommunal talks aimed at a just, negotiated settlement.

(b) The Foreign Assistance Act of 1961 is

amended by inserting immediately after section 620B the following new section:

"SEC. 620C. UNITED STATES POLICY REGARDING THE EASTERN MEDITERRANEAN.—(a) The Congress declares that the achievement of a just and lasting Cyprus settlement is and will remain a central objective of United States foreign policy. The Congress further declares that any action of the United States with respect to section 620(x) of this Act shall not signify a lessening of the United States commitment to a just solution to the conflict on Cyprus but is authorized in the expectation that this action will be conducive to achievement of a Cyprus solution and a general improvement in relations among Greece, Turkey, and Cyprus and between those countries and the United States. The Congress finds that—

"(1) a just settlement on Cyprus must involve the establishment of a free and independent government on Cyprus and must guarantee that the human rights of all of the people of Cyprus are fully protected;

"(2) a just settlement on Cyprus must include the withdrawal of Turkish military forces from Cyprus;

"(3) the guidelines for inter-communal talks agreed to in Nicosia in February 1977 and the United Nations resolutions regarding Cyprus provide a sound basis for negotiation of a just settlement on Cyprus;

"(4) serious negotiations, under United Nations auspices, will be necessary to achieve agreement on, and implementation of, constitutional and territorial terms within such guidelines; and

"(5) the recent proposals by both Cypriot communities regarding the return of the refugees to the city of New Famagusta (Varosha) constitute a positive step and the United States should actively support the efforts of the Secretary General of the United Nations with respect to this issue.

"(b) United States policy regarding Cyprus, Greece, and Turkey shall be directed toward the restoration of a stable and peaceful atmosphere in the Eastern Mediterranean region and shall therefore be governed by the following principles:

"(1) The United States shall actively support the resolution of differences through negotiations and internationally established peaceful procedures, shall encourage all parties to avoid provocative actions, and shall strongly oppose any attempt to resolve disputes through force or threat of force.

"(2) The United States will accord full support and high priority to efforts, particularly those of the United Nations, to bring about a prompt, peaceful settlement on Cyprus.

"(3) All defense articles furnished by the United States to countries in the Eastern Mediterranean region will be used only in accordance with the requirements of this Act, the Arms Export Control Act, and the agreements under which those defense articles were furnished.

"(4) The United States will furnish security assistance for Greece and Turkey only when furnishing that assistance is intended solely for defensive purposes, including when necessary to enable the recipient country to fulfill its responsibilities as a member of the North Atlantic Treaty Organization, and shall be designed to ensure that the present balance of military strength among countries of the region, including between Greece and Turkey, is preserved. Nothing in this paragraph shall be construed to prohibit the transfer of defense articles to Greece or Turkey for legitimate self defense or to enable Greece or Turkey to fulfill their North Atlantic Treaty Organization obligations.

"(5) The United States shall use its influence to ensure the continuation of the ceasefire on Cyprus until an equitable negotiated settlement is reached.

"(6) The United States shall use its influence to achieve the withdrawal of Turkish military forces from Cyprus in the context of a solution to the Cyprus problem.

"(c) Because progress toward a Cyprus settlement is a high priority of United States policy in the Eastern Mediterranean, the President and the Congress shall continually review that progress and shall determine United States policy in the region accordingly. To facilitate such a review the President shall, within 60 days after the date of enactment of this section and at the end of each succeeding 60-day period, transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report on progress made toward the conclusion of a negotiated solution of the Cyprus problem. Such transmissions shall include any relevant reports prepared by the Secretary General of the United Nations for the Security Council.

"(d) In order to ensure that United States assistance is furnished consistent with the policies established in this section, the President shall, whenever requesting any funds for security assistance under this Act or the Arms Export Control Act for Greece and Turkey, transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate his certification, with a full explanation thereof, that the furnishing of such assistance will be consistent with the principles set forth in subsection (b). The President shall also submit such a certification with any notification to the Congress, pursuant to section 36(b) of the Arms Export Control Act, of a proposed sale of defense articles or services to Greece or Turkey.".

ANNUAL MILITARY ASSISTANCE REPORT

SEC. 14. Chapter 3 of part III of the Foreign Assistance Act of 1961, as amended by the International Development and Food Assistance Act of 1978, is amended by inserting immediately after section 654 the following new section:

"SEC. 657. ANNUAL REPORT ON MILITARY ASSISTANCE AND MILITARY EXPORTS.—Not later than February 1 of each year, the President shall transmit to the Congress an annual report for the fiscal year ending the previous September 30, showing the aggregate dollar value and quantity of defense articles and defense services, and of military education and training, furnished by the United States to each foreign country and international organization, by category, specifying whether they were furnished by grant under chapter 2 or chapter 5 of part II of this Act, by sale under chapter 2 of the Arms Export Control Act, by commercial sale licensed under section 38 of that Act, or by other authority.".

ARMS TRANSFER POLICY

SEC. 15. (a) Section 1 of the Arms Export Control Act is amended by adding at the end thereof the following new paragraph:

"It is the sense of the Congress that the President maintain adherence to a policy of restraint in conventional arms transfers and that, in implementing this policy worldwide, a balanced approach should be taken and full regard given to the security interests of the United States in all regions of the world and that particular attention should be paid to controlling the flow of conventional arms to the nations of the developing world. To this end, the President is encouraged to continue discussions with other arms suppliers in order to restrain the flow of conventional arms to less developed countries.".

(b) Not later than December 31, 1979, the President shall transmit to the Congress a detailed report assessing the results and commenting on the implications of the multilateral discussions referred to in the amendment made by subsection (a).

SALES FROM STOCK

SEC. 16. Section 21(e)(1) of the Arms Export Control Act is amended—

(1) by striking out "and" at the end of subparagraph (B);

(2) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following new subparagraph:

"(D) the recovery of ordinary inventory losses associated with the sale from stock of defense articles that are being stored at the expense of the purchaser of such articles.".

RENEGOTIATION ACT OF 1951

SEC. 17. Section 22 of the Arms Export Control Act is amended by adding at the end thereof the following new subsection:

"(c) The provisions of the Renegotiation Act of 1951 do not apply to contracts for the procurement of defense articles and defense services heretofore or hereafter entered into under this section or predecessor provisions of law.".

ANNUAL ARMS SALES PROPOSAL

SEC. 18. (a) Section 25 of the Arms Export Control Act is amended by adding at the end thereof the following new subsection:

"(d) On or before November 15 of each year, the President shall transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate the Arms Sales Proposal covering all sales under this Act (other than sales to members of the North Atlantic Treaty Organization, Japan, Australia, and New Zealand) of major defense equipment for $7,000,000 or more, or of any other defense articles or defense services for $25,000,000 or more, which are considered eligible for approval during the fiscal year beginning on October 1 of such year.".

(b) Subsection (c) of such section is amended by striking out "this section" and inserting in lieu thereof "subsection (a) or (b)".

DEFENSE REQUIREMENT SURVEY

SEC. 19. Chapter 2 of the Arms Export Control Act is amended by adding at the end thereof the following new section:

"SEC. 26. DEFENSE REQUIREMENT SURVEYS.—(a) The Congress finds that defense requirement surveys prepared by the United States for foreign countries have had a significant impact on subsequent military procurement decisions of those countries. It is the policy of the United States that the results of defense requirement surveys conducted by the United States clearly do not represent a commitment by the United States to provide any military equipment to any foreign country. Further, recommendations in such surveys should be consistent with the arms export control policy provided for in this Act.

"(b) As part of the quarterly report required by section 36(a) of this Act, the President shall include a list of all defense equipment surveys authorized during the preceding calendar quarter, specifying the country with respect to which the survey was or will be conducted, the purpose of the survey, and the number of United States Government personnel who participated or will participate in the survey.

"(c) Upon a request of the chairman of the Committee on International Relations of the House of Representatives or the chairman of the Committee on Foreign Relations of the Senate, the President shall grant that committee access to defense requirement surveys conducted by United States Government personnel.".

FOREIGN MILITARY SALES AUTHORIZATION AND AGGREGATE CEILING

SEC. 20. (a) Section 31(a) of the Arms Export Control Act is amended by striking out "$677,000,000 for fiscal year 1978" and inserting in lieu thereof "$682,000,000 for the fiscal year 1978 and $674,300,000 for the fiscal year 1979".

(b) Section 31(b) of such Act is amended

by striking out "$2,102,350,000 for the fiscal year 1978, of which" and inserting in lieu thereof "$2,152,350,000 for the fiscal year 1978 and $2,085,500,000 for the fiscal year 1979, of which amount for each such year".

(c) Section 31(c) of such Act is amended by striking out "fiscal year 1978" and inserting in lieu thereof "fiscal year 1979".

(d) Section 31(d) of such Act is amended by striking out "$100,000,000" and inserting in lieu thereof "$150,000,000".

FULL DISCLOSURE REPORTS

SEC. 21. Section 36(b)(1) of the Arms Export Control Act is amended—(1) by amending subparagraph (D) to read as follows:

"(D) an evaluation, prepared by the Director of the Arms Control and Disarmament Agency in consultation with the Secretary of State and the Secretary of Defense, of the manner, if any, in which the proposed sale would—

"(i) contribute to an arms race;

"(ii) increase the possibility of an outbreak or escalation of conflict;

"(iii) prejudice the negotiation of any arms controls; or

"(iv) adversely affect the arms control policy of the United States;";

(2) by striking out "and" at the end of subparagraph (L);

(3) by striking out the period at the end of subparagraph (M) and inserting in lieu thereof a semicolon; and

(4) by inserting immediately after subparagraph (M) the following new subparagraphs:

"(N) the projected delivery dates of the defense articles to be offered;

"(O) a detailed description of weapons and levels of munitions that may be required as support for the proposed sale; and

"(P) an analysis of the relationship of the proposed sale to projected procurements of the same item.".

USE OF FOREIGN CURRENCY

SEC. 22. (a) Section 502(b) of the Mutual Security Act of 1954 is amended to read as follows:

"(b)(1)(A) Notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, or any other provision of law—

"(i) local currencies owned by the United States which are in excess of the amounts reserved under section 612(a) of the Foreign Assistance Act of 1961 and of the requirements of the United States Government in payment of its obligations outside of the United States, as such requirements may be determined from time to time by the President; and

"(ii) any other local currencies owned by the United States in amounts not to exceed the equivalent of $75 per day per person or the maximum per diem allowance established under the authority of subchapter I of chapter 57 of title 5 of the United States Code for employees of the United States Government while traveling in a foreign country, whichever is greater, exclusive of the actual cost of transportation;

shall be made available to Members and employees of the Congress for their local currency expenses when authorized as provided in subpapagraph (B).

"(B) The authorization required for purposes of subparagraph (A) may be provided—

"(i) by the Speaker of the House of Representatives in the case of a Member or employee of the House;

"(ii) by the chairman of a standing or select committee of the House of Representatives in the case of a member or employee of that committee;

"(iii) by the President of the Senate, the President pro tempore of the Senate, the Majority Leader of the Senate, or the Minority Leader of the Senate, in the case of a Member or employee of the Senate;

"(iv) by the chairman of a standing, select, or special committee of the Senate in the case of a member or employee of that committee or of an employee of a member of that committee; and

"(v) by the chairman of a joint committee of the Congress in the case of a member or employee of that committee.

"(C) Whenever local currencies owned by the United States are not otherwise available for purposes of this subsection, the Secretary of the Treasury shall purchase such local currencies as may be necessary for such purposes, using any funds in the Treasury not otherwise appropriated.

"(2) On a quarterly basis, the chairman of each committee of the House of Representatives or the Senate and of each joint committee of the Congress (A) shall prepare a consolidated report (i) which itemizes the amounts and dollar equivalent values of each foreign currency expended and the amounts of dollar expenditures from appropriated funds in connection with travel outside the United States, stating the purposes of the expenditures including per diem (lodging and meals), transportation, and other purposes, and (ii) which shows the total itemized expenditures, by such committee and by each member or employee of such committee (including in the case of a committee of the Senate, each employee of a member of the committee who received an authorization under paragraph (1) from the chairman of the committee); and (B) shall forward such consolidated report to the Clerk of the House of Representatives (if the committee is a committee of the House of Representatives or a joint committee whose funds are disbursed by the Clerk of the House) or to the Secretary of the Senate (if the committee is a committee of the Senate or a joint committee whose funds are disbursed by the Secretary of the Senate). Each such consolidated report shall be open to public inspection and shall be published in the Congressional Record within ten legislative days after the report is forwarded pursuant to this paragraph. In the case of the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives, such consolidated report may, in the discretion of the chairman of the committee, omit such information as would identify the foreign countries in which members and employees of that committee traveled.

"(3)(A) Each Member or employee who receives an authorization under paragraph (1) from the Speaker of the House of Representatives, the President of the Senate, the President pro tempore of the Senate, the Majority Leader of the Senate, or the Minority Leader of the Senate, shall within thirty days after the completion of the travel involved, submit a report setting forth the information specified in paragraph (2), to the extent applicable, to the Clerk of the House of Representatives (in the case of a Member of the House or an employee whose salary is disbursed by the Clerk of the House) or the Secretary of the Senate (in the case of a Member of the Senate or an employee whose salary is disbursed by the Secretary of the Senate). In the case of an authorization for a group of Members or employees, such reports shall be submitted for all Members of the group by its chairman, or if there is no designated chairman, by the ranking Member or if the group does not include a Member, by the senior employee in the group. Each report submitted pursuant to this subparagraph shall be open to public inspection.

"(B) On a quarterly basis, the Clerk of the House of Representatives and the Secretary of the Senate shall each prepare a consolidation of the reports received by them under this paragraph with respect to expenditures during the preceding quarter by each Member and employee or by each group in the case of expenditures made on behalf of a group which are not allocable to individual members of the group. Each such consolidation shall be open to public inspection and shall be published in the Congressional Record within ten legislative days after its completion.".

(b) Notwithstanding section 30 of this Act, the amendment made by subsection (a) of this section shall take effect on the date of enactment of this Act.

SPECIAL SECURITY ASSISTANCE PROGRAM FOR THE MODERNIZATION OF THE ARMED FORCES OF THE REPUBLIC OF KOREA

SEC. 23. (a)(1) The President is authorized until December 31, 1982—

(A) to transfer, without reimbursement, to the Republic of Korea, only in conjunction with the withdrawal of the 2d Infantry Division and support forces from Korea, such United States Government-owned defense articles as he may determine which are located in Korea in the custody of units of the United States Army scheduled to depart from Korea; and

(B) to furnish to the Republic of Korea, without reimbursement, defense services (including technical and operational training) in Korea directly related to the United States Government-owned defense articles transferred to the Republic of Korea under this subsection.

(2) Any transfer under the authority of this section shall be made in accordance with all the terms and conditions of the Foreign Assistance Act of 1961 applicable to the furnishing of defense articles and defense services under chapter 2 of part II of that Act, except that no funds heretofore or hereafter appropriated under that Act shall be available to reimburse any agency of the United States Government for any such transfer or related services.

(b) In order that transfers of defense articles under subsection (a) will not cause significant adverse impact on the readiness of the Armed Forces of the United States, the President is authorized, in lieu of such transfers, to transfer additional defense articles from the stocks of the Department of Defense, wherever located, to the Republic of Korea to compensate for the military capability of defense articles withdrawn from Korea in any case where he determines that—

(1) the transfer of specific defense articles located in Korea would have a significant adverse impact on the readiness of the United States Armed Forces;

(2) the defense capability provided by those defense articles is needed by the Armed Forces of the Republic of Korea in order to maintain the military balance on the Korean peninsula; and

(3) a comparable defense capability could be provided by less advanced defense articles in the stocks of the Department of Defense which could be transferred without significant adverse impact on the readiness of the United States Armed Forces.

The President shall report to the Congress each determination made under this subsection prior to the transfer of the defense articles described in such determination.

(c) The President shall transmit to the Congress together with the presentation materials for security assistance programs proposed for each fiscal year through and including the fiscal year 1983, a report describing the types, quantities, and value of defense articles furnished or intended to be furnished to the Republic of Korea under this section.

(d) The President should also transmit to the Congress, 120 days prior to each phase of troop withdrawal, a report on the viability of the withdrawal. This report should include assessments of the military balance on the Korean peninsula, the impact of with-

drawal on the military balance, the adequacy of United States military assistance to the Republic of Korea, the impact of withdrawal on the United Nations and the Republic of Korea command structure, Republic of Korea defensive fortifications and defense industry developments, the United States reinforcement capability, and the progress of diplomatic efforts to reduce tensions in the area.

(e)(1) It is the sense of the Congress that further withdrawal of ground forces of the United States from the Republic of Korea may seriously risk upsetting the military balance in that region and requires full advance consultation with the Congress.

(2) Prior to any further withdrawal, the President shall report to the Congress on the effect of any proposed withdrawal plan on preserving deterrence in Korea, the reaction anticipated fom North Korea, the effect of the plan on increasing incentives for the Republic of Korea to develop an independent nuclear deterrent, the effect of any withdrawal on our long-term military and economic partnership with Japan, the effect of any proposed withdrawal on the United States-Chinese and United States-Soviet military balance, and the possible implications of any proposed withdrawal on the Soviet-Chinese military situation.

UNITED STATES RELATIONS WITH THE SOVIET UNION

SEC. 24. (a) The Congress finds and declares that a sound and stable relationship with the Soviet Union will help achieve the objectives of the Foreign Assistance Act of 1961 and the Arms Export Control Act, strengthen the security of the United States, and improve the prospects for world peace.

(b) Therefore, it is the sense of the Congress that the President, in cooperation with the Congress and knowledgeable members of the public, should make a full review of United States policy toward the Soviet Union. This review should cover, but not be limited to—

(1) an overall reevaluation of the objectives and priorities of the United States in its relations with the Soviet Union;

(2) the evolution of and sources of all bargaining power of the United States with respect to the Soviet Union and how that bargaining power might be enhanced;

(3) what linkages do exist and what linkages should or should not exist between various elements of United States-Soviet relations such as arms control negotiations, human rights issues, and economic and cultural exchanges;

(4) the policies of the United States toward human rights condtions in the Soviet Union and how improved Soviet respect for human rights might be more effectively achieved;

(5) the current status of strategic arms limitations talks and whether such talks should be continued in their present framework or terminated and renewed in some other forum;

(6) the current status of other arms control negotiations between the United States and the Soviet Union;

(7) the challenges posed by Soviet and Cuban involvement in developing countries and a study of appropriate policy responses and instruments to meet those challenges more effectively;

(8) the impact of our relations with the People's Republic of China on our relations with the Soviet Union;

(9) the impact of strategic parity on relations between the United States and the Soviet Union and on the ability of the United States to meet its obligations under the North Atlantic Treaty;

(10) United States economic, technological, scientific, and cultural relations with the Soviet Union and whether those relations are desirable and should be continued, expanded, restricted, or linked to other aspects of relations between the United States and the Soviet Union;

(11) the evolution of Soviet domestic politics and the relationship between Soviet domestic politics and its foreign policy behavior, especially towards the United States; and

(12) what improvements should be made in the institutions and procedures of United States foreign policy in order to ensure a coherent and effective policy towards the Soviet Union.

(c) The President should report the results of the review called for by subsection (b) to the Congress not later than December 31, 1978.

REPORT ON REVIEW OF ARMS SALES CONTROLS ON NON-LETHAL ITEMS

SEC. 25. The President shall, within 120 days after the enactment of this Act, report in writing to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate the results of the review conducted pursuant to section 27 of the International Security Assistance Act of 1977.

UNITED STATES-REPUBLIC OF CHINA MUTUAL DEFENSE TREATY

SEC. 26. (a) The Congress finds that—

(1) the continued security and stability of East Asia is a matter of major strategic interest to the United States;

(2) the United States and the Republic of China have for a period of twenty-four years been linked together by the Mutual Defense Treaty of 1954;

(3) the Republic of China has during that twenty-four-year period faithfully and continually carried out its duties and obligations under that treaty; and

(4) it is the responsibility of the Senate to give its advice and consent to treaties entered into by the United States.

(b) It is the sense of the Congress that there should be prior consultation between the Congress and the executive branch on any proposed policy changes affecting the continuation in force of the Mutual Defense Treaty of 1954.

RHODESIA EMBARGO

SEC. 27. In furtherance of the foreign policy interests of the United States, the Government of the United States shall not enforce sanctions against Rhodesia after December 31, 1978, provided that the President determines that—

(1) the Government of Rhodesia has demonstrated its willingness to negotiate in good faith at an all-parties conference, held under international auspices, on all relevant issues; and

(2) a government has been installed, chosen by free elections in which all political and population groups have been allowed to participate freely, with observation by impartial, internationally-recognized observers.

NEGOTIATIONS BETWEEN ISRAEL AND EGYPT

SEC. 28. (a) The Congress finds that—

(1) a lasting settlement of the Arab-Israel conflict is vital to United States national interests as well as to the interests of the countries of the region;

(2) support for a strong and secure Israel and the maintenance for this purpose of Israel's effective defense capabilities as essential to peace remains a fundamental tenet of United States foreign policy;

(3) direct, face-to-face negotiations between Israel and Egypt without preconditions is an historic opening for peace, and the support of such negotiations by other moderate Arab countries, can best promote a peace settlement based on mutual concessions and accommodation;

(4) the establishment of secure, recognized, and defensible borders between Israel and its neighbors will discourage hostilities; and

(5) full, normalized relations between Israel and its Arab neighbors, including trade, travel, tourism, communications, and diplomatic relations are vital for peace.

(b) It is the sense of the Congress that the Government of the United States should continue to promote direct negotiations between Israel and Egypt and to encourage other Arab countries to enter into negotiations leading to peace treaties with Israel.

(c) It is further the sense of the Congress that the United States should be responsive to Israel's economic needs and defense requirements, including the provision of additional advanced aircraft, in order to maintain Israel's defense capability which is essential to peace.

REPORTS TO CONGRESS

SEC. 29. (a) Section 8(d) of the Act entitled "An Act to amend the Foreign Military Sales Act, and for other purposes", approved January 12, 1971, is amended in the second sentence by striking out "Additionally, the President shall also submit a quarterly report to the Congress" and inserting in lieu thereof "The annual presentation materials for security assistance programs shall include a table".

(b) Section 408(b) of the International Security Assistance and Arms Export Control Act of 1976 is amended by striking out "(1)" and by repealing paragraph (2).

(c)(1) The International Security Assistance and Arms Export Control Act of 1976 is amended—

(A) in section 202, by striking out "(a)" immediately after "SEC. 202." and by repealing subsection (b);

(B) by repealing section 217;

(C) by repealing section 218; and

(D) in section 407, by striking out "(a)" and by repealing subsection (b).

(2) The International Security Assistance Act of 1977 is amended—

(A) in section 9—

(i) by striking out "REVIEW OF" in the section heading;

(ii) by striking out "(a)" immediately after "SEC. 9."; and

(iii) by repealing subsections (b) through (e); and

(B) by repealing section 23.

(3) Section 5 of the Emergency Security Assistance Act of 1973 is repealed.

(4) Section 17 of the Foreign Assistance Act of 1974 is repealed.

SAVINGS PROVISION

SEC. 30. Enactment of this Act shall not affect the authorizations of appropriations and limitations of authority applicable to the fiscal year 1978 which are contained in provisions of law amended by this Act (other than sections 31(a), (b), and (d) of the Arms Export and Control Act).

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the title of the bill and agree to the same.
